Valuations for Finance Acts, Rating, Mortgages, Division and Compensation.

The Times of February 22nd says: "The Insurance Laws of the Dominion of Canada provide real safeguards for policy holders and annuitants."

The Confederation Life Association

gives the absolute security afforded by the Canadian Insurance Laws

[Established 1871]

Funds - - £4,250,000

The Association has recently placed upon the market a scheme which secures a guaranteed income for the after years of life, and an estate at death—a scheme which is singularly beneficial in its character, absolutely definite in its guarantees, and safe with an unsurpassable security.

You are invited to apply for particulars of the above proposition to the

Chief Office for the United Kingdom:

TEMPLE BAR HOUSE, 23-28, FLEET ST., LONDON, E.C.

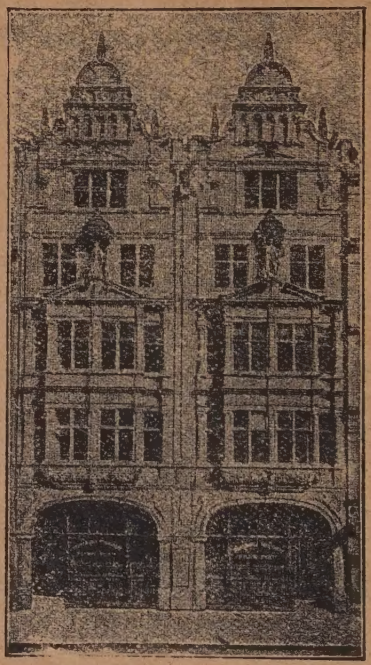
Telegrams: "Icta, Fleet, London." Telephone Nos.: Central 13267; City 7367.

Maximum Benefits at Minimum Cost. Guaranteed Surrender and Loan Values. Favourable Annuity Rates.

TEMPERANCE
PERMANENT BUILDING SOCIETY.

(Founded 1854. Incorporated 1875.)

This Society offers Advantages unsurpassed by any Building Society in London.



Since its establishment in 1854 it has continuously maintained its hold on popular favour, and has advanced upon Freehold and Leasehold Property over

£12,650,000

Reserve Fund exceeds **£140,000.**

THE BURBERRY

Illustrated Catalogue & Patterns Post Free

THE ONE dependable Weatherproof that ensures effective protection without sacrifice of health.

RUBBER-PROOFED coats, or Weatherproofs interlined with oiled silk, afford nominal security, but only at the expense of the self-ventilation essential to comfort and well-being.

THE BURBERRY provides a reliable safeguard against wet or cold, yet is light and faultlessly air-free, so that it can be worn in the mildest weather without discomfort or the enervating heat, engendered by air-tight fabrics.

THE BURBERRY retains its weather-resisting properties unimpaired by the roughest usage, whilst rubber-proofs and interlined coats are rendered practically useless by exposure to any extreme of cold or heat.

For the man who values Health, as well as Security, there is but ONE Weatherproof—

THE BURBERRY

Every Burberry garment is labelled "Burberrys"

"I have used your goods for years, and have found nothing to equal them in rain, sleet, or snow. They allow free ventilation under all conditions."
—T. T., Bradford.

PREFACE

THE Editor first has to make his apologies to those of his readers who were unable to procure copies of the 1916 edition, which, owing to the great demand for it, was completely sold out soon after publication.

The year 1917 will be a memorable one in the history of the ANNUAL. First published in the year 1886, it has now, in the thirty-second year of its existence, passed under the joint control of the Oxford University Press and Messrs. Hodder & Stoughton. Opportunity has been taken of the change of proprietorship to amplify very considerably the contents of the ANNUAL, whilst preserving the characteristic features which distinguish it from other works of reference. The Editor is thus able to give effect to the requests which have reached him from all quarters during the past few years.

The Drama of Europe continues to absorb the world's attention, and the amount of space devoted to the War, and matters arising out of the War, will be found an important and considerable part of this issue. The Editor believes that every matter of note, up to the time of going to press, has been recorded and fully dealt with. The Recommendations of the Paris Economic Conference are given at length, as well as those of the various Committees appointed in England to consider the question of future trade.

The ANNUAL is now the standard work of reference for official information of a varied nature, and the Editor cannot too gratefully express his acknowledgments for the courteous help he has invariably received from all Departments of His Majesty's Government. Even in extreme times of pressure, such as at present, the information desired has been willingly and promptly supplied. Similar acknowledgment must also be made to His Majesty's Representatives abroad and the Governments of the Dominions and Over-Seas Possessions for equally courteous help.

As in the past, the Editor is willing to reply to correspondents who desire further information on subjects dealt with in the ANNUAL, but owing to the greatly increasing number of these inquiries, it is expected that correspondents will frame their questions as briefly as possible.

London Office—

29 THREADNEEDLE STREET, E.C.

ARE YOU CONFIDENT THAT YOU HOLD A SUFFICIENT AMOUNT OF INSURANCE ON YOUR LIFE, having due regard

1. To the shrinkage in value of your other investments—a shrinkage which at the present time can be satisfactorily counteracted only by recourse to some form of life or endowment insurance?
2. To the relief from payment of Income Tax granted by the Inland Revenue authorities in respect of income applied as insurance premium?
3. To the interests of dependents should the bread-winner happen to die—specially during this time of war stress? In that connection it would be unwise to ignore the further serious diminution of available capital implied in the burden of Death Duties.

THE NORWICH UNION LIFE INSURANCE SOCIETY

By reason of its

AGE, MAGNITUDE, RESERVE STRENGTH, LIBERALITY, ALERTNESS, AND ECONOMY

THE OUTSTANDING BRITISH LIFE OFFICE

Write for Prospectus to The SECRETARY, NORWICH UNION LIFE OFFICE, NORWICH, or to any Branch Office of the Society

THE LONDON LIFE

Association Limited

notes the tendency in unsettled times to avoid ordinary With-Profit Policies and offers

(1) Non-participating policies at lower rates than other offices.

(2) With-profit policies with a bonus guaranteed.

Example of Annual premiums: **£1,000 at death.**

Age.	Non-participating.	With yearly compound reversionary bonus of 35/- % anticipated, and 30/- % guaranteed till 1925.
25	£14 : 13 : 4	£20 : 18 : 4
40	23 : 12 : 6	30 : 16 : 8
55	42 : 19 : 2	51 : 5 : 10

Comparisons are odious, but to the Association's advantage.

No Commission paid.
Economy in management unequalled.

81 King William Street, London, E.C.

H. M. TROUNCER, Actuary and Manager.

ECONOMISE YOUR FOOD BILL.

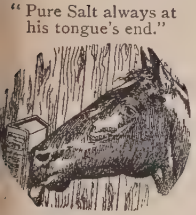
It is not what an animal eats, but what it digests, that counts. Pure salt is a vital necessity to aid digestion, and as 55 per cent. of blood is common salt

NO ANIMAL CAN LIVE WITHOUT SALT.

Don't mix salt with feed, or use poisonous Rock Salt. Let the animals help themselves just as Nature demands. The cost is under ½*d.* per week.

NO WASTE. CLEAN. PURE. ALWAYS READY.

"Pure Salt always at his tongue's end."



MILCH COWS GIVE MORE MILK AND RICHER QUALITY.

A TRUE NATURAL VERMIFUGE
(Patented 1902).

Awarded Gold and Prize Bronze Medals.

Write for Free Booklet and Proof.

THE NATIONAL MUTUAL LIFE ASSOCIATION OF AUSTRALASIA, Ltd.

Established 1869.

Head Office for the United Kingdom: 5, CHEAPSIDE, LONDON, E.C.

Accumulated Funds over - - - £10,000,000

Annual Income over - - - - - £1,550,000

DIRECTORS.

ROBERT CHANCELLOR NESBITT, Esq., *Chairman.*
Right Hon. Major-Gen. LORD CHEYLESMORE, K.C.V.O.
Right Hon. LORD SYDENHAM, G.C.S.I., G.C.M.G., G.C.I.E.
Right Hon SIR GEORGE H. REID, P.C., G.C.B., G.C.M.G., K.C., M.P.

Manager, H. W. MEYERS.

SPECIAL FEATURES.

Premium Rates.—10 % below the average of English and Foreign Offices. The 20-Payment Life Policy is cheaper than the 25-Payment Policies of most Offices, *thus saving five years' premiums.*

The Best Office for Annuities. Return generally ¼ per cent. per annum more than most Offices. In some instances the difference is as great as 2 per cent. per annum.

THE BEST CHILDREN'S ENDOWMENT POLICY IN THE WORLD.

Should Father and Child live. A remarkable investment is secured.

Should Father die. All further payments cease, but Child will inherit the Capital just as if his Father had survived.

Should Child die. All Premiums are returned with 4 per cent. interest.

Telephone—5608 Central. *Telegraphic Address—"Envoy," Finsquare, London.*

The **IMBECILE** and **WEAK-MINDED** receive special **training,** with **expert supervision,** in Schools, Farm, Garden, and Trade Workshops at

THE ROYAL EARLSWOOD INSTITUTION

FOR MENTAL DEFECTIVES.

(Formerly the Earlswood Asylum)
REDHILL, SURREY.

Patrons: H.M. THE KING, H.M. QUEEN ALEXANDRA.

E. C. P. HULL, Esq., J.P., Treasurer and Chairman.

Selected Cases are admitted on **Reduced Inclusive Fees.** Those **unable to pay,** by the votes of Subscribers, **with Part Payment** towards cost, on the **modified system of election** without competition, a definite number of votes being required.

Full Information and Advice gladly given by

Mr. H. HOWARD, Secretary, 14-16, Ludgate Hill, E.C.

Telephone: City 5297. (Entrance Ave Maria Lane.)

Shaftesbury Society and Ragged School Union

PATRONS: THEIR MAJESTIES THE KING AND QUEEN.

Established in 1844. **First President: Lord Shaftesbury.**

A great pioneer London Charity at work among thousands of children and youth in the crowded poverty areas.

The Society has many-sided operations for the physical needs of the cripples, the ill-clad, the underfed, and the ailing, and for the moral and religious needs of the neglected and tempted.

72nd Annual Report, with Financial Statement duly audited, will be sent on application.

Donations, Grants, and Bequests form the chief part of its income, and are earnestly invited.

FUNDS ARE URGENTLY NEEDED

All Contributions should be sent to the Director—

The

GRINNELL

AUTOMATIC SPRINKLER AND FIRE ALARM

will save your premises from destruction by fire and safeguard the lives of your employés. It is the best possible investment, because it will save your business from interruption and enable you to effect a considerable saving on your fire insurance premiums.

FIRE-RESISTING DOORS.
Officially endorsed by the Fire Offices Committee.

"UNDERWRITER" FIRE PUMPS.
Also Power and Turbine Pumps.

STANDARDISED CAST-IRON TANKS.
Portable, easily handled and shipped.

"SIMPLEX" FIRE EXTINGUISHERS.
As a first-aid fire appliance, strong in construction, powerful and efficient in action, yet easy to handle and operate, these extincteurs are unequalled.

For Surveys and Estimates for a Complete Fire Protection installation write—

BEGINNINGS OF THE SEASONS

The Spring and Autumn Seasons begin, respectively, at the Vernal and Autumnal Equinoxes, *i.e.* when the Sun crosses the Equator, and its Declination is zero. The Summer and Winter Seasons begin, respectively, at the Summer and Winter Solstices, *i.e.* when the Sun reaches, respectively, its greatest declination North and South.

α Leonids . . . . . Feb. 22–28

Pendulum.—The length of a pendulum is connected with the time of its swing by the formula $t = \pi\sqrt{l/g}$, where g is the force of gravity. As g varies in different latitudes, the length of the seconds pendulum will vary, and $l = 0{\cdot}993549\ m - {\cdot}026\cos 2\phi$, where m is in metres and ϕ the latitude.

PHASES OF THE MOON

☾ Last Quarter	5*d.*	11*h.*	50*m.*	Morn.
● New Moon	12*d.*	10*h.*	36*m.*	Aft.
☽ First Quarter	19*d.*	2*h.*	38*m.*	Aft.
○ Full Moon	27*d.*	3*h.*	14*m.*	Morn.

SIGNS OF THE ZODIAC

♈ Aries = 0°	♌ Leo = 120°	♐ Sagittarius = 240°
♉ Taurus = 30°	♍ Virgo = 150°	♑ Capricornus = 270°
♊ Gemini = 60°	♎ Libra = 180°	♒ Aquarius = 300°
♋ Cancer = 90°	♏ Scorpio = 210°	♓ Pisces = 330°

To find the distance of a thunder-cloud or gun, count the seconds between flash and sound, add one-fifth to get distance in miles. Thus 5 seconds, add 1, gives 6 miles.

B is barometer reading at base, *b* reading at top of a hill. Then height of hill is 55,000 $\frac{B-b}{B+b}$ feet. Thus, barometer reads 30·5 in. at base, and 30·0 in. at top, then height is 55,000 × $\frac{\cdot 5}{60\cdot 5}$ or 454 feet.

Explanation.—On what day did June 18, 1815, fall? First find the column which contains the year 1815 (6th column). Run down column to months, when the figure 4 will be found opposite June. In bottom table take the figure 4, and run along the days of the month to 18, when it will be found to give a **Sunday**, June 18, 1815, having fallen on a Sunday.

Leap Years.

THE MORSE CODE

This is a code of signalling used in ordinary and also in wireless telegraphy. Being based on short and long sounds, it can be adapted to flash signalling by long and short flashes. It is graphically represented here by dots for the short sounds and dashes for the long sounds.

SEVEN WONDERS OF THE WORLD

The earliest extant list of the Seven Wonders of the World dates from the 2nd cent. before Christ. That given by Philo of Byzantium is: the pyramids of Egypt; the hanging gardens of Babylon; the statue of Jupiter by Pheidias; temple of Diana at Ephesus; mausoleum at Halicarnassus; the colossus of Rhodes; and the pharos (lighthouse) of Alexandria. The Seven New Wonders of the World have been considered to be: wireless; telephone; aeroplane; radium; antiseptics and antitoxins; spectrum analysis; and X-rays.

ASTRONOMICAL SYMBOLS AND ABBREVIATIONS

☉	The Sun.	♂	Mars.	☌	Conjunction.
☾	The Moon.	♃	Jupiter.	□	Quadrature.
☿	Mercury.	♄	Saturn.	☍	Opposition.
♀	Venus.	♅	Uranus.	☊	Ascending Node.
⊖ or ♁	The Earth.	♆	Neptune.	☋	Descending Node.

Refraction.—Light passing from one medium into one more dense is bent or refracted. Light from the heavenly bodies entering our atmosphere is refracted by successive layers which become more and more dense, and this bending of the rays always makes the *object appear higher* in the heavens than it really is, or technically its altitude above the horizon is increased. The amount of refraction, *i.e.* the angle between the original course of a ray and that by which it enters our eyes, is greatest at the horizon and least at the zenith where it is zero. At the horizon it is usually assumed to be 33½ minutes of arc, or about the Sun's diameter, and hence when the Sun has just gone below the horizon we see it just beginning to set. Similarly, when the Sun's upper limb at rising just really reaches the horizon we see the whole Sun above it. The effect is to increase the time the sun appears above the horizon and *lengthen* the duration of *sunlight*. The amount of refraction in seconds is roughly 58 times the tangent of the zenith distance of the star. This 58·2″ is the *Constant of Refraction*.

Another effect of refraction is seen in the *elliptic shape* assumed by the *Sun* and Moon when *near the horizon*. The lower limb, being nearer the horizon, is raised up about 5′ more than the upper limb is raised by refraction, or about one-sixth of the diameter. As the horizontal diameter is not affected, the two diameters, vertical and horizontal, appear in the proportion of 5 to 6, and hence the elliptic disc.

Venus as evening star in June and to end of year.

Jupiter, evening star in west during January, February, March, April; in east during September, October, November, December.

Saturn, evening star in west in May and June; in south in March and April; in east in January and February.

Variation of Latitude.—Alterations in the position of matter on the earth, such as transportation, denudation, subsidences, earthquakes, etc., should theoretically affect the earth's axis. Until recently it was considered that our methods of observation were not sufficiently refined to show very small motions of the Pole. However, in 1888, it was indisputably established that the Pole "wandered," or that latitudes were subject to slight changes. In effect the Pole has two motions: (1) an annual motion in an elliptic orbit whose major axis is about 30 feet; (2) an orbital motion in a circle, of diameter about 26 feet, in 428 days. The origin of these wanderings has not yet been fully elucidated; but the annual motion may be caused by seasonal changes.

THE ALMANACK EXPLAINED AND AMPLIFIED

Almanack is by some derived from *al*, meaning *the*, and *manach*, signifying a *reckoning*. Others prefer to derive the word from the squared sticks, about a foot in length, on which were carved the phases of the moon for the whole year. These carved sticks were called *al-mon-aght*, or *al-mon-heed*. Such almanacks were used by any one; but **calendars** were the official intimations of feasts, saints' days, and of ecclesiastical matter generally. The word comes from **calendæ**, the first days of the Roman months. Properly considered, we should employ almanacks as dividers of time by the year, calendars by the month, and ephemerides by the day. The three terms are now synonymous, denoting an annual register with a calendar in which are arranged the days of the month and week, the rising and setting of the heavenly bodies, tides, ecclesiastical matter, and other miscellaneous information.

Ancient calendars were constructed by the ecclesiastics, and for the most part were based on the lunar changes. More recent almanacks are based on the tropical or seasonal year.

This **tropical year** is the period of one complete revolution of the sun in the heavens, from one equinox to the same equinox again. Its length is 365*d*. 5*h*. 48*m*. 45·5*s*. The adoption of any other year would, in course of time, show the seasons occurring in months differing from the original.

The **Roman civil calendar** in use in the time of Julius Cæsar actually differed some three months from the seasonal year, the autumn of the almanac being really winter. To adjust this, Julius Cæsar, in 45 B.C., ordered the introduction of the **Julian Calendar.** In this calendar the year consists of 365 days, except every fourth year which has 366 days; the extra day was added after Feb. 23, which day, in the Roman calendar, was the *sixth* of the calends of March. Being reckoned twice over, it was called *Bis sextus* hence **Bissextile.** The extra day is now added at the end of February. At the same time it was ordered that the year begin on Jan. 1, whereas it previously began in March. This accounts for September, October, November, December not being now the seventh, eighth, ninth, and tenth months. Julius Cæsar also suppressed the month Quintilis and called it Julius after himself, an example followed by Augustus Cæsar, who appropriated the month Sextilis. In civil life the year must of necessity consist of a whole number of days. Now, four times the odd 5*h*. 48*m*. 45·5*s*. give only 23*h*. 15*m*. 2*s*., and hence the additional day every fourth year just a little overdoes it; the difference amounts to one day in 128 years.

At the time of the *Nicene Council* held A.D. 325, the Vernal Equinox fell on March 21; but in A.D. 1582 it was found to fall some ten days earlier. Pope Gregory XIII ordered the ten days to be struck out of that year, and so made March 21 again the day of the Vernal Equinox. To obviate such a disturbance in future he introduced the **Gregorian Calendar,** which retains the extra day every fourth year, except in such century-years as are not divisible by 400. Thus while 2,000 is a leap year, 1,900 and 2,100 are not leap years, though divisible by 4. The small error remaining amounts to one day in about 4,000 years, and may be disregarded. The introduction of this calendar is known as the *Reformation of the Calendar*.

The *Gregorian Calendar* was adopted in Catholic countries in 1582, in Germany and Switzerland in 1700. It was not *adopted in England* till 1751, when by an Act of Parliament it was provided that the civil year should begin on Jan. 1 instead of on March 25 as formerly, and that the day following Wednesday, Sept. 2, 1752, should be reckoned Sept. 14 instead of Sept. 3, thus dropping 11 days.

The *Julian* was then termed the **Old Style,** and the *Gregorian* the **New Style.** The two will differ more and more: at present Jan. 14 New Style corresponds to Jan. 1 Old Style.

The *Julian year calendar* is still retained in Russia and by the Greek Church generally.

To change Old Style into New Style.—

On and from	and before and on	add to date.
Oct. 5, 1582	Feb. 29, 1700	10 days.
March 1, 1700	,, 1800	11 ,,
March 1, 1800	,, 1900	12 ,,
March 1, 1900	,, 2100	13 ,,

Thus March 28, 1587 (O.S.) is March 38 or April 7, 1587 (N.S.); but remembering that the O.S. leap years which are not N.S. leap years are 1700, 1800, 1900, etc., we find Feb. 29, 1700 (O.S.) is March 11, 1700 (N.S.).

To change New Style into Old Style.—With the exceptions presently to be named, if the year be 15— or 16—, subtract 10 days from the date; if 17—, subtract 11 days; if 18—, subtract 12 days; if 19—, 13 days.

Thus March 9, 1852 (N.S.) is, remembering leap year, February 38, from which subtracting 12 days we obtain February 26 (O.S.). The exceptions are the year 1700 up to and including March 11, subtract 10, not 11; the year 1800 up to and including March 12, subtract 11, not 12; and the year 1900 up to and including March 13, subtract 12, not 13.

Thus March 11, 1800 (N.S.) is Feb. 39 (N.S.) and Feb. 28 (O.S.).

The data in the ecclesiastical calendar depend on phases of the Moon, and have nothing to do with seasonal changes; hence to fit them in, it is desirable to have some simple relation between the solar and lunar periods. Meton, in 433 B.C., found a lunar cycle which answered this purpose.

The **Metonic Cycle** is a period of 6,940 days or 19 solar years 9*h*. 32*m*. 48*s*., or 235 lunations 7*h*. 29*m*. The small difference of two hours between the solar 19 years and the 235 lunar months creates an error of one day in 76 years. After every 19 years, therefore, the lunar phases approximately recur, or, in other words, the calendar for the Moon's phases and ecclesiastical fixtures are the same for 1898 and 1917. There may be a day out dependent on the number of leap years in the cycle. Meton published his scheme at the Olympic games, and inscribed it in letters of gold on marble pillars. It was marked by letters of gold in ancient calendars. Hence the **Golden Number,** which is used in fixing Easter. The Golden Number for any year is found by adding 1 to the date and dividing by 19. If there is no remainder, 19 is the Golden Number, otherwise the remainder is the Golden Number. Thus the Golden Number for 1917 is 18. By means of this Golden Number, the Dominical Letter, and the Epact, the ecclesiastical calendar is usually constructed.

The **Epact** is the age of the Moon on Jan. 1 in the New Style and on March 22 in the Old Style. The *age of the Moon* connects the lunar and solar years, and for calendar purposes all the day on which the new moon is supposed to take place, though it happens but one second

before midnight, is called the first day of the Moon. The Epact for any year of the present century is given in the following table, provided we know the Golden Number.

G. N.	1	2	3	4	5	6	7	8	9	10
Epact	29	10	21	2	13	24	5	16	27	8
G. N.	11	12	13	14	15	16	17	18	19	
Epact	19	0	11	22	3	14	25	6	17	

The Dominical or Sunday Letter.—The first seven letters of the alphabet being attached to the several days of the year, A to Jan. 1, B to Jan. 2, C to Jan. 3, and so on, A to Jan. 8, and so on, then that letter which falls on the first Sunday is called the Dominical or Sunday Letter. Thus Jan. 1, 1917, is Monday (A), the first Sunday is (G).

In leap year the Sundays after February have the letter preceding, thus 1916 was a leap year, and the Sunday Letter in Jan. and Feb. was B, but A for all Sundays after.

If we do not know on what day Jan. 1 falls, the Sunday Letter can be found by adding to the year the whole number found on dividing by 4, increasing the result by 6, and then dividing by 7. The letter under the remainder in the following table is the Sunday Letter.

Remainder	0	1	2	3	4	5	6
Sunday Letter	A	G	F	E	D	C	B

Thus 1917 + 479 + 6 = 2,402, which divided by 7 gives a remainder 1, and hence Sunday Letter G.

Year	1910	11	12	13	14	15	16
Sunday Letter	B	A	GF	E	D	C	BA
Year	17	18	19	20	21	22	
Sunday Letter	G	F	E	DC	B	A	

The following definition of **Easter** has been handed down from the time of the Council of Nice, A.D. 325, its aim being to preserve the same relation between the times of Easter and Passover as existed at the time of the Resurrection, and more especially to insure that Passover came first. "Easter Day is the first Sunday after the Full Moon which happens upon, or next after, the 21st day of March; and if the Full Moon happens on a Sunday, Easter Day is the following Sunday." The moon on which Easter depends is called the **Paschal Moon.**

Thus Easter-Day may fall on any of the 35 days beginning March 22 and up to and including April 25. In 1818 it fell on March 22, in 1913 on March 23, and in 1940 it falls on March 24. In 1886 it fell on April 25 and will again in 1943. As Easter can fall on any one of 35 days, there are necessarily 35 calendars.

Easter Day being fixed for the year, the Moveable Feasts dependent on it can be fixed.

		Days before Easter.
Septuagesima	3rd Sunday before Lent	63
Sexagesima	2nd " " "	56
Quinquagesima (Shrove)	1st " " "	49
Ash Wednesday	First day of Lent	46
Quadragesima	1st Sunday in Lent	42
Palm Sunday	Next before Easter	7
Good Friday	Crucifixion	2
Easter Day		Days after Easter.
Rogation	5th Sun. after Easter	35
Ascension Day	Holy Thursday	39
Sunday after Ascension		42
Whit Sunday		49
Trinity Sunday		56

TABLE TO DETERMINE EASTER DAY FROM THE EPACT AND SUNDAY LETTER

	Sunday Letter						
Epact.	A.	B.	C.	D.	E.	F.	G.
0	Apr. 16	Apr. 17	Apr. 18	Apr. 19	Apr. 20	Apr. 14	Apr. 15
1	16	17	18	19	13	14	15
2	16	17	18	12	13	14	15
3	16	17	11	12	13	14	15
4	16	10	11	12	13	14	15
5	9	10	11	12	13	14	15
6	9	10	11	12	13	14	8
7	9	10	11	12	13	7	8
8	9	10	11	12	6	7	8
9	9	10	11	5	6	7	8
10	9	10	4	5	6	7	8

12	2	3	4	5	6	7	8
13	2	3	4	5	6	7	1
14	2	3	4	5	6	Mar. 31	1
15	2	3	4	5	Mar. 30	31	1
16	2	3	4	Mar. 29	30	31	1
17	2	3	Mar. 28	29	30	31	1
18	2	Mar. 27	28	29	30	31	1
19	Mar. 26	27	28	29	30	31	1
20	26	27	28	29	30	31	Mar. 25
21	26	27	28	29	30	24	25
22	26	27	28	29	23	24	25
23	26	27	28	22	23	24	25
24	Apr. 23	Apr. 24	Apr. 25	Apr. 19	Apr. 20	Apr. 21	Apr. 22
25	23	24	25	19	20	21	22
26	23	24	18	19	20	21	22
27	23	17	18	19	20	21	22
28	16	17	18	19	20	21	22
29	16	17	18	19	20	21	15

For leap years use the second letter of the year.

Advent, the beginning of the ecclesiastical year, is the nearest Sunday to St. Andrew's Day, which is Nov. 30.

	Christmas Day.	Easter Day.	Sunday Letter.	Golden No.	Epact.
1914	Friday	April 12	D	15	3
1915	Saturday	April 4	C	16	14
1916	Monday	April 23	BA	17	26
1917	Tuesday	April 8	G	18	6
1918	Wednesday	March 31	F	19	17
1919	Thursday	April 20	E	1	29
1920	Saturday	April 4	DC	2	10
1921	Sunday	March 27	B	3	21

THE JEWISH CALENDAR

The year is composed of 12 or 13 lunar months of 29 or 30 days each. The 12-month year is called the **common year,** the 13-month the **embolistic year.**

The common year can have 353, 354, or 355 days. The embolistic year can have 383, 384, or 385 days. These years succeed each other in such a manner as to arrive at the same solar date after 19 years (12 common, 7 embolistic).

Month.	Common Year.			Embolistic Year.		
Tishri	30	30	30	30	30	30
Hesvan	29	29	30	29	29	30
Kislev	29	30	30	29	30	30
Tebet	29	29	29	29	29	29
Sebat	30	30	30	30	30	30
Adar	29	29	29	30	30	30
Veadar				29	29	29
Nisan	30	30	30	30	30	30
Iyar	29	29	29	29	29	29
Sivan	30	30	30	30	30	30
Tamuz	29	29	29	29	29	29
Ab	30	30	30	30	30	30
Elul	29	29	29	29	29	29
	353	354	355	383	384	385

The Jewish year cannot begin on Sunday, Wednesday, or Friday. It dates from 3760 B.C., and begins in September. The Jewish day begins at sunset of the preceding civil day.

Year.	Month.	Days.	Commences.
5677	Tishri	30	1916 Sept. 28
	Hesvan	29	Oct. 28
	Kislev	30	Nov. 26
	Tebet	29	Dec. 26
	Sebat	30	1917 Jan. 24
	Adar	29	Feb. 23
	Nisan	30	March 24
	Iyar	29	April 23
	Sivan	30	May 22
	Tamuz	29	June 21
	Ab	30	July 20
	Elul	29	Aug. 19
5678	Tishri	30	Sept. 17
	Hesvan	29	Oct. 17
	Kislev	30	Nov. 16
	Tebet	29	Dec. 16

CHIEF JEWISH DAYS, 1917

Fast: Siege of Jerusalem	Tebat 10	Jan.	4
Fast of Esther	Adar 13	Mar.	7
Purim, First Day	„ 14	„	8
„ Second Day	„ 15	„	9
Passover, First Day	Nisan 15	April	7
„ Second Day	„ 16	„	8
Pentecost (Shebuoth), 1st Day	Sivan 6	May	27
„ „ 2nd Day	„ 7	„	28
Fast: Taking of Jerusalem	Tamuz 17	July	8
Fast: Dedication of Temple	Ab 10	„	29
New Year (Rosh Hashanah)	Tishri 1	Sept.	17
Fast of Guedaliah	„ 3	„	19
Expiation (Yom Kippur)	„ 10	„	26
Feast of Tabernacles (Sucoth)	„ 15	Oct.	1
„ „	„ 16	„	2
Hosana Raba	„ 21	„	7
Rejoicing of the Law	„ 23	„	9
Dedication of Temple	Kislev 25	Dec.	10

As the New Year commences at the previous sunset, it would be more correct to say Sept. 16.

THE MAHOMMEDAN CALENDAR

The year consists of 12 purely lunar months and contains either 354 or 355 days. In the 354-day year the months have alternately 30 and 29 days. In the year of 355 days the last month has 30 days.

The calendar starts from the Hegira—the flight of Mahomet, A.D. 622, July 16 (Friday).

Year.	Month.	Days.		Begins.
1335	Muharram	30	1916	Oct. 28 (Sat.)
	Safar	29		Nov. 27
	Rabīa I	30		Dec. 26
	Rabīa II	29	1917	Jan. 25
	Jumāda I	30		Feb. 23
	Jumāda II	29		Mar. 25
	Rajab	30		April 23
	Sha'bān	29		May 23
	Ramadān	30		June 21
	Shaivāl	29		July 21
	Dhu'l-Qa'da	30		Aug. 19
	Dhu'l-Hijja	30		Sept. 18
1336	Muharram	30		Oct. 17 (Wed.)
	Safar	29		Nov. 16
	Rabīa I	30		Dec. 15
	Rabīa II	29	1918	Jan. 14

PRINCIPAL FEASTS, 1917

Birth of the Prophet	Jan. 6
Ascension of the Prophet	May 19
First of Ramadān	June 21
Grand Beiram	July 21
Little Beiram	Sept. 17
Feast of Peace	Oct. 10
New Year (1336)	Oct. 17
Birth of the Prophet	Dec. 26

A TABLE COMPARING THE FOUR CHIEF YEARS

FASTING AND ABSTINENCE DAYS IN THE ROMAN CATHOLIC CHURCH

1. *Fasting Days in Great Britain: on which flesh-meat is forbidden, unless a dispensation be granted; and only one meal, with a collation, is allowed to those who are bound to fast.*—All the days of Lent, except Sundays; the Ember days; the Vigils or Eves of Whit-Sunday, of SS. Peter and Paul, of the Assumption, of All Saints, of St. Andrew (in Scotland only), and of Christmas Day; and the Wednesdays and Fridays of Advent. Fasting is dispensed on a day of obligation.

2. *Abstinence Days in Great Britain: on which flesh-meat is forbidden.*—They are, besides the Fasting days above mentioned, the Sundays in Lent, unless a dispensation be granted, and all Fridays in the year, except Days of Obligation and (in England) Dec. 26. There has also been granted a relaxation of the law of abstinence (except during Lent) on Ember Saturdays, and on such Vigils as immediately precede or follow a Friday or other day of abstinence.

The *solemn* celebration of marriages is, by a general law of the Roman Catholic Church, forbidden from Ash Wednesday till after Low Sunday, and from the 1st Sunday in Advent till the day after the Epiphany. In some places, *all* marriages are forbidden during those times.

TIME

Three kinds of time are used in astronomical work: *Sidereal*, *Apparent*, and *Mean Time*, the unit in each case being the day. The day is derived from the rotation of the Earth on its axis, and is defined as the interval of time between two consecutive passages of a heavenly body across the meridian of a place. Thus we can have a solar day, a lunar day, or a sidereal day.

The Earth's rotation is always performed in the same time, but the length of the day varies according to the heavenly body observed. This comes from the fact that these bodies are not relatively fixed, but have their own motions, the Earth itself having a motion of revolution round the Sun. However, in consequence of the enormous distances of the stars, their motions and the Earth's orbital motion round the Sun may be neglected, and a star may be considered as a fixed point. In other words, the interval between two consecutive transits of a star is caused by the Earth's rotation alone, and is therefore constant. Such interval is the **sidereal day**, the only uniform time-unit we can observe. It contains $23h.\ 56m.\ 4{\cdot}01s.$ of mean solar time. In consequence of the orbital motion of the Earth, the Sun appears to make a revolution amongst the stars, its path being the **Ecliptic.** The point of intersection of the ecliptic with the equator is called the **First Point of Aries** (♈), and the local sidereal day begins when this point crosses the meridian.

When the Sun is used as a time measurer we cannot neglect the Earth's orbital motion, which makes the Sun apparently move eastward amongst the stars about one degree every day. In consequence, the meridian of the place has to travel this extra degree or so before the Sun transits again, and the interval between two consecutive transits of the Sun is called the **solar day,** which evidently is variable as the Earth travels in an elliptic orbit. The **sundial** shows solar or **apparent time**, and is thus not so useful as a clock.

In the course of one complete revolution of the Earth round the Sun, one whole rotation or one day is taken up by the Sun's apparent motion eastward, and there is therefore one less solar day in the year than there will be sidereal days, and since there are 365·2421 solar days in the year, there are 366·2421 sidereal days. It follows that the mean solar day is $3m.\ 55{\cdot}9s.$ (mean solar) longer than the sidereal day.

The variable solar day being inconvenient, a fictitious Sun is imagined moving uniformly in the Equator and making one complete revolution, while the true Sun makes a revolution in the Ecliptic. By this we obtain a day uniform in length, and the mean or average length of the apparent solar days. The imaginary Sun is called the Mean Sun, the day the Mean Solar Day, and the time Mean Solar Time. The clock measures **mean solar time,** and shows twelve at mean noon. The difference between apparent time and mean time is called the **equation of time.**

The **civil day** is measured in mean time, and runs from midnight to midnight, the hours running on from a set of 12 before noon denoted by A.M. (**ante meridian**), and another set of 12 after Noon, denoted by P.M. (**post meridian**), and is hence twelve hours in advance of the **astronomical day** which astronomers have found convenient to commence at noon, the hours running from 0 to 24.

The **sidereal year** is the interval between two consecutive returns of the Sun to the same position among the stars. It is $365d.\ 6h.\ 9m.\ 9s.$ or 365·256360 days of mean solar time.

The **tropical or seasonal year** is the time taken by the Sun in making two successive passages of the same equinoctial point. These points are not fixed, but in consequence of precession retrograde or move to meet the Sun by 50·5 seconds of arc in the year, and hence the tropical year is shorter than the true or sidereal year by the time taken to travel this arc, and is $365d.\ 5h.\ 48m.\ 45{\cdot}5s.$ or 365·242199 days of mean solar time. This is the year employed in calendars and in ordinary life.

The **sidereal month** is the time taken by the Moon in her revolution round the Earth to travel from its position amongst the stars until its return. Its average duration is $27d.\ 7h.\ 43m.\ 11{\cdot}5s.$ or 27·321661 days.

The time between two consecutive new or full moons is the **synodic month.** It is $29d.\ 12h.\ 44m.\ 2{\cdot}8s.$ or 29·53059 days. It is the synodic month which is alluded to in explaining the calendar. There are 235 synodic months or lunations in the Metonic cycle.

The **week** as a measure or division of time was in use in Eastern countries at a very early period. It probably originated in the phases of the moon, or in the number of planets, seven being known. The names given to the days of the week by the Romans and by our Saxon ancestors were those of their chief deities.

Roman.	Saxon.	English.
Dies Solis (Sun)	Sunan daeg (Sun)	Sunday
Dies Lunæ (Moon)	Monan daeg (Moon)	Monday
Dies Martis (Mars)	Tuis daeg (Tuisco)	Tuesday
Dies Mercurii (Mercury)	Woden's daeg (Woden)	Wednesday
Dies Jovis (Jupiter)	Thor's daeg (Thor)	Thursday
Dies Veneris (Venus)	Friga's daeg (Friga)	Friday
Dies Saturni (Saturn)	Seater's daeg (Seater)	Saturday

A **sundial** shows apparent time, so that the "equation of time" is a means of correcting the sundial time and so giving us the mean time. The "equation of time" is sometimes expressed as the time the Sun is before or after the clock, or dial before or after the clock. The "equation of time" is greatest in February, May, August, and November, and vanishes about April 16, June 15, Sept. 1, and Dec. 25.

This variation between mean time and apparent time is responsible for the, to many, curious behaviour of morning and afternoon when, say in January, the afternoons lengthen by 44 minutes and the mornings by only 25 minutes. Sunrise and sunset are at equal intervals from the time the sun comes to the meridian, *i.e.* apparent noon. Hence if mean noon or 12 o'clock comes before apparent noon, the interval sunrise to mean noon is less than half the time the Sun is above the horizon, while from mean noon to sunset is greater than the half. The **afternoons** are then **longer** than the **mornings.** This happens in January. In September the mornings shorten 46 minutes, while the evenings shorten 65 minutes. The **afternoons** are **shorter** than the **mornings.**

Local Time.—The daily rotation of the Earth on its axis gives the sun the appearance of travelling from E. to W. in the sky. Hence the farther east a place is the earlier the Sun comes to its meridian, and it is evident that each place has its own noon, its own time, the **local time.**

The earth's rotation carries a place through 360° in the 24 hours, or 15° in every hour, or, put differently, two places separated 15° of **longitude** have local times differing by one hour. Of course, this soon becomes intolerable, and each country adopts the time of one place and calls it the standard time. Greenwich local time became the

legal time throughout Great Britain, Berlin local time throughout Germany. Here, again, with modern facilities of travel, these adopted times have to give way to a comprehensive plan which adopts **Greenwich time** or some time which differs even hours or half-hours from it. This adopted time is called Standard Time or Universal Time, and is in use as follows :—

STANDARD OR UNIVERSAL TIME

Generally speaking, Greenwich time—or Greenwich time plus or minus a number of hours—is now in use all over the world. The times given below are legal times (the time the *clock* shows in the various countries) ; they differ from the local times (which are not the times as shown by the clock), but only by sufficient minutes to make mean time some complete hour or half-hour of Greenwich mean time.

Thus, Tokio local time is 9 h. 19 m. earlier than Greenwich mean time, because the difference of longitude between Greenwich and Tokio is 9 h. 19 m. The 19 m. being dropped gives the even 9 hours shown as legal (clock) time in the table. When it is mean noon at Greenwich it is 9 p.m. legal (clock) time at Tokio. Similarly, in Great Britain, in France, in Germany, or elsewhere, the local times of various towns differ, but the clock everywhere in each country shows the standard time of the country. Thus, the local time of Plymouth or Aberdeen differs from that of Greenwich, but the clocks throughout Great Britain all show twelve noon at the same time ; similarly, for example, the local time of Düsseldorf, or Königsberg, differs from Berlin, but the clocks throughout Germany show 1 o'clock when it is 12 noon at Greenwich. Again, the local time of Montego Bay, Jamaica, is 5 h. 12 m. later than Greenwich mean time. The nearest hour being 5 h., this is the adopted legal time. When it is local mean noon at Jamaica, it is 5 h. 12 m. p.m. at Greenwich, but legal (clock) noon at Jamaica is 5 h. p.m. at Greenwich.

Greenwich time	Algeria, Belgium, Faroë Islands, France, Gibraltar, Great Britain, Portugal, St. Thomé and Principe Islands, Spain, Whydah.
1 h. fast on G.T.	Austria-Hungary, Bosnia, Denmark, Germany, Norway, Malta, Portuguese West Africa, Serbia, South-west Africa Protectorate, Sweden, Switzerland.

11½ h. „ „ „	Samoa.

Holland adopted Greenwich time in 1894, but in 1908 adopted Amsterdam time—19 m. 40 s. slow on Greenwich. Russia also keeps its own time. **Russian time** is 2 h. 1 m. fast. A Bill—Time (Ireland) Bill—which received the Royal sanction on Aug. 22, 1916, provides for uniform time throughout the United Kingdom. The change was made on Sunday, Oct. 1, 1916, at 2 a.m. Dublin mean time, when the clocks were showing 3 a.m. summer time. They were put back 35 minutes, and so brought into agreement with the clocks in Great Britain, which indicated 2 h. 25 m. (Dublin time having been 25 m. late on Greenwich mean time). Thenceforward Greenwich mean time (or, whilst summer time prevails, one hour in advance of G.M.T.) will be the statutory time for all general purposes throughout the United Kingdom.

Time Signals.—There are various methods adopted to disseminate the correct time. Shipping all over the world get time by observing the dropping of a ball on a mast erected in a conspicuous position in the port. These balls are usually dropped by electricity from some observatory. For example, the time balls at Greenwich, Deal, Portsmouth, Portland, and Devonport are dropped from Greenwich Observatory at 1.0 p.m. every day.

The Observatory sends a time signal every hour to the G.P.O., and from thence it is sent automatically to all the large towns, where, in turn, it is distributed to local towns and subscribers. (For terms see Post Office Guide.)

Time signals are sometimes sent by telephone.

Wireless Time Signals.—Time signals were sent from the Eiffel Tower in 1910, and have been continued up to the present time, uninterrupted by the war. At present, signals are sent from Eiffel at 10.45 a.m. and 11.45 p.m., and from Norddeich, at the mouth of the River Ems, at noon and at midnight. Suppose we are on the look-out for the morning signals—at 10.44 will commence a series of Morse T's or dashes —, which continue for about 55 seconds, and after a

short blank comes a single sharp dot. This is the time signal. This is repeated 10.46 to 10.47 and 10.48 to 10.49, the dashes being replaced in the first case by a series of D's — · · ·, and in the second by the figure 6 — · · · · ·. There are, therefore, three chances, viz.—45 m., 47 m., and 49 m., the minute being recognised by T, D, or 6.

The noon signals from Norddeich are sent differently. They commence at 11 h. 58 m. 46 s. Five sharp dots denote the seconds 46, 47, 48, 49, and 50. Another set of five commences at 11 h. 58 m. 56 s., and so on for six sets, the last set being 11 h. 59 m. 56 s., 57, 58, 59, and 12 h. 0 m. 0 s.

The signals sent from the Eiffel Tower at 10 a.m. are known as the "Onogo" system. Commencing at 9 h. 57 m. 0 s., are a series of warning letters x (— .. —), which continue to 57 m. 50 s., then three o's (— — —), the first commences at 57 m. 55 s., the last ends at 58 m. 0 s. At 58 m. 8 s. begin a series of n's (— .), the dot falling on the 10, 20, 30, 40, 50 second, followed by the three o's. At 59 m. 6 s. begin a series of g's (— — .), the dot again falling as before, finishing up at from 59 m. 55 s. to 10 h. 0 m. 0 s. with the three o's as before.

The dash is one second duration, the dot a quarter second. The time can be derived from any signal. This 10 signal is more or less experimental at present.

THE CHIEF TIME BALLS AND TIME GUNS IN THE BRITISH ISLES

Place.		Height.	Remarks.
Greenwich (Royal Observatory	Black ball, 5 ft. diameter.	211 ft. above high water. Drop 10 ft. at one	Half-way up 5 m. before one o'clock; full up 2½ m. before.
Sheerness (Garrison Fort)	Black ball, 3½ ft. diameter	120 ft. above high water. Drop 17 ft. at one.	Full up 5 m. to one.
Deal (Telegraph Tower)	Black ball, 5 ft. diameter.	76 ft. above high water. Drop 10 ft. at one	Half-way up 5 m. before one o'clock; full up 3 m. to one.
Portsmouth (Sem. Tower, Dockyard)	Black ball, 3¾ ft. diameter.	162 ft. above high water. Drop 18 ft. at one	Half-way up 5 m. to one; full up 2 m. to one.
Southampton . .	Ball	Roof, S. Western Hotel	Drop at one.

Edinburgh (Calton Hill)	Ball	455 ft. above high water. Drop 10 ft.	Half-way 5 m. to one; full up 2 m. to one.
N. Shields . . .	Gun	East of Albert Edward Dock	1 h.

Twilight.—For some time before the sun rises and for some time after it has set it illuminates the upper regions of the atmosphere; the light reflected is called twilight. Astronomical twilight is considered to last until the Sun is 18° below the horizon, the duration varying with the season and latitude, as shown in the table.

Latitude.	0°	20°	35°	40°	45°	50°	55°	60°	65°
	h. m.	h. m.	h. m.	h. m.	h. m.	h. m.	h. m.	h. m.	h. m.

Feb. 1	1 13	1 17	1 28	1 34	1 43	1 54	2 9	2 30	3 3
Mar. 1	1 10	1 14	1 25	1 31	1 39	1 49	2 3	2 21	2 49
April 1	1 10	1 15	1 27	1 34	1 43	1 55	2 13	2 41	3 35
May 1	1 12	1 19	1 35	1 45	1 59	2 21	3 7	..	..
June 1	1 15	1 24	1 45	2 0	2 25	3 45	..	..	..
July 1	1 16	1 25	1 48	2 4	2 34	..	..	..	..
Aug. 1	1 14	1 21	1 40	1 51	2 9	2 41	..	..	..
Sept. 1	1 11	1 17	1 30	1 38	1 49	2 4	2 27	3 12	..
Oct. 1	1 10	1 14	1 25	1 32	1 40	1 50	2 5	2 25	2 56
Nov. 1	1 12	1 16	1 26	1 33	1 40	1 51	2 5	2 24	2 52
Dec. 1	1 15	1 19	1 30	1 37	1 46	1 58	2 15	2 40	3 24

This table is for north latitudes. If used for south latitudes, the dates must be altered by 6 months, *i.e.* for Jan. 1 we should take the figures given along the line July 1.

For all practical purposes the table may be used to find the time from sunset or sunrise when the Sun is below the horizon any number of degrees up to 18° by proportion. Thus at 9° we halve the above times.

The blank spaces in the table show that twilight lasts all night. If we consider the formula that the latitude of a place is the Sun's North Polar distance, less the Sun's distance below the horizon, we see that on the longest day when the Sun's N.P.D. is 66½°, for all places whose latitude is greater than 48½° the sun never gets 18° below the horizon, and hence the continuous twilight. The formula also shows that on this day at all places above latitude 66½° the Sun never gets below the horizon. This produces the **Midnight Sun.**

Increase and Decrease in Length of Day.—Taking the day from sunrise to sunset, the following table gives the amount during each month.

	Increase. h.	m.		Decrease. h.	m.
Jan.	1	9	July	1	4
Feb.	1	42	Aug.	1	46
March	1	59	Sept.	1	52
April	1	46	Oct.	1	55
May	1	26	Nov.	1	28
June	0	17	Dec.	0	18

The day is equal in length to the night all over the world twice in the year, viz. when the Sun crosses the equator from south to north, at the Vernal Equinox, March 21, and again at the Autumnal Equinox, Sept. 23, when the Sun crosses the equator from north to south.

The days are longest and the nights shortest when the Sun reaches its maximum declination in that hemisphere. This in the northern hemisphere occurs about June 22, and in the southern hemisphere about Dec. 22.

The days are shortest and nights longest in the northern hemisphere about Dec. 22 and in the southern hemisphere about June 22.

The actual duration of the day depends on the latitude, and the following table shows the duration of the longest and shortest days in various latitudes.

Lat.	Longest Day.	Shortest Day.	Lat.	Longest Day.	Shortest Day.
°	h. m.	h. m.	°	h. m.	h. m.
0	12 5	12 4·5	50	16 18	8 0
10	12 40	11 30	55	17 17	7 5
20	13 18	10 53	60	18 45	5 45
30	14 2	10 10	65	21 43	3 22
40	14 58	9 16	66	24 0	2 30
45	15 33	8 42	67	24 0	0 0

In higher latitudes there is a small difference between the N. and S. latitudes.

Lat. N.	Arctic Day.	Arctic Night.	Lat. S.	Antarctic Day.	Antarctic Night.

June 1	53	Dec. 1	126

CYCLES, ERAS

The Roman Indiction is a cycle of 15 years established by Constantine, A.D. 312. It was used by the Romans to indicate times of payment of taxes. Papal Acts are dated by the year of the Indiction. To find the Indiction add 3 to the date and the remainder after dividing by 15 is the Indiction. If there is no remainder, then 15 is the Indiction. Thus 1917 + 3 is 1920, which divided by 15 leaves remainder 0. Hence the Indiction is 15.

The Julian Period is a cycle of 7,980 years obtained by multiplying together the Solar Cycle of 28, the Lunar Cycle of 19, and the Roman Indiction of 15. The Julian Period began 4713 B.C. and ends A.D. 3267. To find the Julian year add 4713 to date. Thus 1917 + 4713 is 6630. A.D. 1 is Julian year 4714.

The Solar Cycle is a period of 28 Julian years, at the end of which the days of the week return to the same days of the month. 1917 in the Solar Cycle is 22.

The Olympiads were periods of 4 years by which the Greeks reckoned their times. During five days every fourth year, near the summer solstice, the Olympic Games were celebrated. The first Olympiad was the year 3,938 of the Julian Period, or 776 B.C. Computation by Olympiads ceased A.D. 397.

The Grecian Era, or Era of the Seleucidæ, began 312 B.C., when Seleucus Nicator took Babylon. It is called by the Jews Dhilcarnaim, and Era of Contracts. The year 1917 is 2229 of the Grecian Era.

The Era of Diocletian, also called the Era of Martyrs, began A.D. 284, so that 1917 is 1633 of the era.

The Hegira, or Mahommedan Era, dates from the flight of Mahomet from Mecca to Medina, A.D. 622, July 15. The era commences on July 16. It is in use in Turkey, Arabia, Persia. See p. 34.

Armenian.—Dates from the Council of Tiben, when the Armenians seceded from the Greek Church. It corresponds to Tuesday, July 9, A.D. 552.

Assyrian, Babylonian, or Era of Nabonassar.—An era famous in astronomy, dating from the beginning of the reign of Nabonassar, founder of the kingdom of the Babylonians, *i.e.* Wednesday, Feb. 26, 747 B.C. The year 1917 is 2664 of this era.

Biblical.—In 1650-52 Archbishop Usher published a work propounding a scheme of Biblical chronology, and the date he assigned to the creation of the world, 4004 B.C., was inserted by some unknown authority in the margin of reference editions of the Bible.

Chinese.—The Chinese dated back to the time of the Emperor Yao, 2277 B.C., but in 1913 the calendar of Western Europe was adopted.

Christian.—The Christian Era, or the Era of the Incarnation, is distinguished by cardinal numbers, those before Christ being marked B.C. (Before Christ), or A.C. (*Ante Christum*), and those after Christ A.D. (*Anno Domini*). It was introduced into Italy in the 6th cent. by Dionysius, a Roman abbot, and was in use in England before the close of the 8th cent. Its beginning is Jan. 1 in the 4th year of the 194th Olympiad, the 753rd from the foundation of Rome, and the 4,714th of the Julian period. Dionysius adopted the day of the Annunciation, March 25, as the beginning of the first year of the era, but in England the practice of beginning the year at Christmas prevailed from the 7th to the 12th centuries. In the 12th cent., however, the custom of beginning the civil year on March 25 began to prevail, and was generally followed down to the reformation of the calendar in 1752. In 1750 the Calendar (New Style) Act was passed for the purpose of removing the inconvenience of having a different date from that generally employed in the rest of Europe. It ordered that the day following Sept. 2 of the year 1752 should be considered the 14th of the month, and, at the same time, the beginning of the legal year was changed from March 25 to Jan. 1. In Scotland from the year 1600 the legal year had commenced on Jan. 1. The years 1800 and 1900 were not leap-years but common years, and the difference between the old style and the new style is now, accordingly, 13 days. The year 2000, however, will be a leap year, these being the years which are divisible by four—in the case of the centurial years after omitting the two ciphers.

Hindu.—Amongst the Hindus there are three important reckonings—the *Kaliyuga*, *Vikrama* and *Saka* Eras. The Kuliyuga Era was devised for astronomical purposes somewhere about A.D. 400; it takes its starting-point from Friday, Feb. 18, 3102 B.C. The *Vikrama* Era, of Northern India, was never used for astronomical purposes, but is traditionally connected with a King Vikrama in Malwa, Central India; it began in 58 B.C., its first civil day in that year being Sept. 19. The year A.D. 1917 is, therefore, the year 1975

of the Vikrama Era. The *Saka* Era is in general use in Southern India, and was founded by King Nahapana, of Parthian extraction, who reigned from A.D. 78, although modern belief erroneously ascribes it to a King Salivahana of Pratishthana. It starts on March 3, A.D. 78. The year A.D. 1917 is 1839 of the Saka Era. In Kashmir and some of the Hill States the *Saptarshi* reckoning is used. It arises from the belief that the Saptarshis, "the seven saints," were translated to heaven, and became the stars of the constellation Great Bear in 3077 B.C. A.D. 1917 is, therefore, 4983. In the United Provinces and the Punjab there is a reckoning, known as the *Fasli*, from *fasl*, "a harvest." It began in A.D. 593, the year A.D. 1917 being 1325.

Jewish.—Up to the 15th cent. the Jews followed the era of the Seleucidæ or of Contracts. Since then, however, they have adopted an era dating from the Creation of the World, which, they calculate, took place 3760 years before the beginning of the Christian Era. Thus the year A.D. 1917 is *Annus Mundi* 5678 in the Jewish Calendar. The year consists of 12 lunar months, with an additional month intercalated at intervals. See p. 33.

Roman.—The chronological epoch adopted by Roman historians dates from the foundation of Rome. The most usually accepted date is that adopted by Terentius Varus, who placed it in the third year of the sixth Olympiad, that is, in the year 3961 of the Julian Period, 753 B.C. It is expressed by the abbreviation A.U.C. (*Anno Urbis Conditæ*, *i.e.* in the year from the building of the city).

THE TIDES

The rising and falling of the water, the phenomena known as *the tides*, have been recognised from very ancient times, and were generally ascribed to the influence of the Moon. According to Commander Warburg, R.N., the earliest mention is by Herodítus (484-428 B.C.). For a full historical account, perhaps the most useful volume is the "Tide Tables," published by the Lords Commissioners of the Admiralty (Potter, 145 Minories, E.C., 1*s.* 6*d.*). This volume gives full tide tables for the coasts of the United Kingdom and also for most places in the world. For the theoretical side, and all the similar phenomena, "The Tides," by Sir G. H. Darwin (John Murray), may be consulted.

We can only present here a mere outline, and first let us recall three points in the *Law of Universal Attraction*. (1) All bodies in the universe mutually attract each other. (2) This attraction varies inversely as the square of their distance apart. (3) The force of attraction is also proportional to their masses.

The tides are caused by the attraction of the Sun and Moon on the Earth, the Moon being so much nearer than the Sun its share is by far the more important. This being so, a short explanation becomes the easier by neglecting the Sun, merely observing that what is said of the Moon applies in less degree to the Sun.

From (2) above, it follows that the portion of the Earth's surface turned towards the Moon gets a stronger pull than the Earth as a whole. This pull has but slight effect on the solid portion, but is sufficient to separate or lift the fluid portion. This piling-up follows the Moon, and a tide wave is set up. On the opposite side of the Earth, the effect of the pull on the Earth as a whole is greater than on the fluid surface, which consequently gets left behind, and so really causes a rising of the water. Hence two tides are caused and tide waves set up, one on the Earth's surface towards the Moon, and one on the surface turned away from the Moon.

If a mass of water is raised at one place, there must be a proportional lowering of its depth at some other, water being non-elastic. It follows that we get *high tides* and *low tides*. When the water is rising at a place it is *flood tide*, and when falling it is *ebb tide*. Similarly the action of the Sun causes a pair of tides. These four tides sometimes act in unison and are sometimes opposed. For instance, at the times of full and new Moons, or technically, Full and Change, the two pairs coincide, and so acting together cause the highest tides or *spring tides*. At the times of half Moon, when the pull of the Moon is at right angles to the pull of the Sun, the two pairs are at maximum separation, and in effect the Sun high tides lower the Moon high tides and raise the Moon low tides. The resulting tides are called *neap tides*.

The Moon comes to the meridian about 50 minutes, on the average, later each day, and two consecutive high tides at a place are separated by 12 hours 25 minutes on the average. This gives an average interval of 24 hours 50 minutes from one morning tide to the next morning tide. At the springs it is only 24 hours 38 minutes, and these tides are said to *prime*. At neaps the interval is about 25 hours 6 minutes, and the neaps are said to *lag*. The Moon not being the sole cause of the tides, the time between its meridian passage and the following high tide is not constant. Its mean value is called the *establishment of port*.

The establishment of port for London Bridge is 1 hour 58 minutes. If this be applied to the establishment of any other place we get a *constant* which in turn applied to the time of high water at London will give approximately the time of high water at the other port.

Such "tidal constants" are given, in the following list, for a number of places on the British and neighbouring coasts.

Before showing the method of using the constants it will be convenient to explain briefly some phenomena in connection with tides.

Bore.—All the water in a river on a falling or ebb tide does not get free before the flood tide commences. This flood tide has to overcome this opposing current and also the friction of the river bottom. Sometimes, through shallowness or other causes at the mouth of a river, the *flood* comes in at a very rapid pace, and meeting the ebb forms a wall of water which increases in height as the river narrows. This is a *bore*. Small *bores* can be observed on the Severn and Wye, on the Seine in France, the Hooghli in India.

Double high water is met with at Southampton. The tidal stream proper enters the Solent by way of the Needles, and in its course makes the ordinary high water in the Solent and up the Southampton Water. This tide then proceeds to fall, and in the Solent is joined by the water which has travelled outside the Isle of Wight and entered via Spithead in the east. The natural outlet is in the west, between Hurst Castle and the Needles, but this being very narrow, the water accumu-

lates and causes a general rise in the Solent, which is somewhat relieved by a flow up the Southampton Water, where a secondary high tide is thus formed. This happens from one to two hours after the original high water, and Southampton is thus favoured by having continuous high water for some hours. *Guider* is the *double low water* met with at Weymouth, the water being low for some four hours.

TIDAL CONSTANTS,

and the Rise of the Tide at Springs and Neaps

All times are standard times. On charts certain levels of the water are marked; the *rise* is the difference between these levels and high water.

Place.	Constant.	Spring Rise.	Neap Rise.

The method of using the constants can be seen from the following examples:

1. Find the time of high water at Ilfracombe on Aug. 5 and Aug. 13.

Time of H.W.	h. m.	h. m.
London Bridge	3 10 morn. (5),	10 19 morn.(13).
Add constant	4 0	4 0
Time of H.W. Ilfracombe	7 10 morn. (5),	2 19 after. (13).

The addition of the constant carried it past noon, the 12 hours being taken away it becomes 2*h.* 19*m.* after noon.

2. Find the time of high water at Yarmouth (Bridge) on Aug. 7 and on Aug. 18.

Time of H.W.,	h. m.	h. m.
London Bridge	4 39 morn. (7),	2 30 after. (18).
Subtract constant	4 15	4 15
	0 24 morn. (7),	10 15 morn.(18).

The constant being larger than the time of H.W. at London Bridge, 12 hours are added.

SOLAR SYSTEM

The table contains concisely the relative measurements, motions, and other data of the Sun and the planets revolving around it. Between Mars and Jupiter are some hundreds of small planets or asteroids, and three have been selected as representing the inner fringe, the middle, and the outer fringe of this zone of small bodies.

A method of remembering the relative distances from the Sun is known as *Bode's Law*. Write a series of 4's, and add 3 to the second, twice 3 to the third, and so on.

4	4	4	4	4	4	4	4	4
	3	6	12	24	48	96	192	384
4	7	10	16	28	52	100	196	388
☿	♀	⊕	♂	☉	♃	♄	♅	♆

These figures, it will be seen, agree well with the astronomical unit distances given in column 5, except in the case of Neptune. Although but an empirical series, it has given support to the probable existence of a planet outside Neptune. All search has failed to find such a planet.

THE SOLAR SYSTEM

Sun.—A good view of the Sun's surface, *i.e.* the *photosphere*, or light sphere, can be obtained if the rays passing through the eye-piece of a telescope are thrown upon a white screen. Photographs taken by a camera fixed at the eye-end of a telescope also afford a means of studying the surface, which appears granulated and marked by bright and dark spots. The dark spots, called *sun-spots*, show an apparently dark umbra surrounded by a half-tone penumbra; they sometimes reach 40,000 miles diameter and become visible to the unaided eye. There is a periodicity in their occurrence which, according to Newcomb, requires 4·6 years to reach maximum spotted area and another 6·5 years to decline. Spots seldom appear on the Sun's disc above latitude 48; they are equally distributed in both hemispheres, generally come into being in a zone about 30° N. or S. latitude, gradually approach the solar equator, the maximum occurring generally about 16° lat. The level of sun-spots is probably about the general level of the photosphere; the spectrum is of the type of the Red Stars, being weaker in the violet than the spectrum of the photosphere generally, and probably this indicates a lower temperature. Other phenomena show a close association with the sun-spot period of about 11 years. Prominences occur in sympathy with spots, and are most numerous at spot maximum. The solar corona goes through periodic changes of form during the spot period. Terrestrial auroras (Northern and Southern Lights) and the Earth's magnetism also follow the progressive spot changes.

The photosphere has a nearly continuous bright spectrum crossed by dark lines (Fraunhofer lines) caused by the absorption of gases in our atmosphere, and also those surrounding the Sun. Its light weakens towards the limb. The bright spots on the surface are called Faculæ, and are most numerous in the region of the Sun's limb. They prevail near the spot and follow the periodicity. The other bright areas—granulations—are numerous all over the surface, and are extensive areas reaching as much as 50,000 square miles each.

During a solar eclipse it is possible to see other features. As the Moon nearly covers the Sun and the crescent of light becomes narrow, the Sun's light weakens and becomes yellow, then shadow bands are noticed moving along the Earth's surface, then as the photosphere vanishes a narrow rim of rosy light surrounds the Moon, and the pearly-coloured corona is seen, sometimes stretching out away from the Sun as much as 3,000,000 miles; at other eclipses it appears more equally distributed and not so extensive. This variation in form follows the 11-year sun-spot period. As seen at spot maximum there are long equatorial streamers in the corona, but at minimum it is more regular and fairly uniform all round the Sun. Its light is radially polarised, which may be an evidence of reflected photospheric light. Its spectrum is more nearly continuous than that of the photosphere, with a few bright lines, notably the coronal line, due to an unknown element. The corona probably rotates with the Sun.

The narrow rim of rosy light about 5,000 or 6,000 miles thick is called the *chromosphere*. Elevations in it are called *prominences*. These sometimes reach 100,000 miles in height, occasionally they even exceed 200,000. The spectrum of the chromosphere shows a large number of elements, that of the prominences only hydrogen, helium, and occasionally sodium and magnesium. During the eclipse of 1870 Young noticed that just as the photospheric light was extinguished, the dark lines in the spectrum suddenly flashed out as bright lines for about 3 seconds. In 1896 this was photographed by Shackleton, and since then the flash spectrum has been successfully photographed by many. The *flash spectrum* is a reversal of the chromospheric spectrum. The unit of heat measurement is the *calorie*, or the amount of heat required to raise one gram of water one degree centigrade, and the intensity of solar radiation (*solar constant*) is about 1·95 calories per square centimetre per minute. The total amount each year is equivalent to the burning of 4×10^{23} tons of anthracite coal.

The Sun *rotates* on an axis inclined 7° to the ecliptic. By observation of sun-spots and faculæ, and by spectro-heliograms of hydrogen and calcium flocculi, *i.e.* by reflecting the spectrum of these metals at the two limbs so that one falls directly above the other, and noting the shift of the spectral lines, the rotation of the Sun's surface is found to vary with the solar latitude. Thus at the Equator it is 24·6 days, at lat. 30° it is 26·3 days, at lat. 60° it is 31·2 days, and at 80° it is about 35 days.

Astronomers, when referring to the *Sun's distance* from the Earth, express it in *parallax, i.e.* the angle at the Sun which is subtended by the Earth's radius. This angle is now regarded as 8·80″, corresponding to 92,800,000 miles.

The angle at Earth subtended by the Sun is the Sun's angular diameter, and varies according to the position of the Earth in its orbit. This angle varies between 31′ 31″ and 32′ 35″, its mean value being 32′ 2″, which with a parallax of 8·80″ corresponds to a diameter of 865,000 miles, about 109 times the Earth's diameter. The Sun with the whole solar system moves in space towards Right Ascension 275° and Dec. + 33°, with a velocity of about 20 kilometres per second, *i.e.* about 12 miles per second or 4 astronomical units per annum. This is referred to as

the *Sun's way*, and the point to which it is travelling the *apex of the Sun's way*.

The Moon, as viewed from the Earth, subtends an angle varying between 33½′ of arc and 29½′, the mean diameter being 31½′. This variation of the Moon's apparent angular diameter shows that its orbit round the Earth is not circular, it is elliptic. At greatest distance from the Earth the Moon is 252,970 miles away, and 221,610 miles at minimum distance. The mean distance is 238,840 miles, and its diameter 2,163 miles, or just over one-quarter that of the Earth. The Moon completes its orbit in about 27⅓ days, with an average velocity of 2,287 miles per hour. Its motion eastward in its orbit is about 33′, or roughly its own diameter per hour. This motion is very quickly noticed if a bright star is near. The Moon being an opaque body, the light we receive from it is reflected sunlight. The Sun illumines that hemisphere turned towards it, and we see such portion of this illuminated surface as is turned towards us; but as the relative positions of the Sun, Earth, and Moon are varying continuously, the illuminated portion we see is also varying from no illumination (New Moon), when the Moon is between Earth and Sun, to a complete illuminated hemisphere (Full Moon), when the Earth is between the Sun and Moon. These changes are the *phases of the Moon*. The line separating the light and dark is called the *terminator*. This elliptic arc together with the Moon's limb form the *crescent moon*, the tips being the "cusps" or "horns." The terminator is used in measuring heights of Lunar mountains, and its predicted position is given in the Almanack.

From the foregoing it will be recognised that when we see the Moon as new, we should be viewed from the Moon as full, and when the Moon is full, it is New Earth. The Full Earth reflects the sunlight on to the New Moon, and this light being reflected back enables us to see the Dark Moon in a pale reddish light. This illumination is called *earth-shine*. The Moon when full is diametrically opposite the Sun, so that when at Full Moon the Sun is in N. Dec. or S. Dec., it follows that the Moon is in S. Dec. or N. Dec. respectively. But in summer the Sun is in N. Declination, and hence the Full Moon is in S. Dec., and consequently but a short time above the horizon. Similarly, the Sun in winter being in S. Dec., the Full Moon is in N. Dec. and a long time above horizon. In other words, we get *more moonlight in winter than in summer*.

The Eastward motion of the Moon is about 12° a day, and causes the Moon to rise later each day, the *retardation* varying from 17 to 76 minutes. At the Full Moon nearest the autumnal equinox this retardation is at minimum, and we have a Full Moon for several successive nights, rising about the time of sunset. Being the time of harvest, this prolongation of light is appreciated by farmers, and this Full Moon is called the *Harvest Moon*. The October Full Moon has similar retardation but rather more. This is the *Hunter's Moon*.

There is very little, if any, atmosphere on the Moon. The craters, perhaps the most striking lunar phenomena, are very large and in some cases exceed 100 miles in diameter.

ECLIPSES

There are two kinds of eclipses—Lunar and Solar.

Lunar eclipses are caused by the Moon entering the Earth's shadow, which can only occur when the Earth is between the Sun and Moon, *i.e.* when the Moon is in opposition, or Full Moon. If both Earth and Moon revolved in the plane of the ecliptic, an eclipse could happen at each Full Moon; but the Moon's orbit is inclined 5° to the ecliptic, which it cuts at two points called *nodes*. Halfway between the nodes the inclination of 5° carries the Moon's path about 20,000 miles either above or below the ecliptic plane. This decreases as the nodes are approached, and finally the two paths coincide at the node. The Earth's shadow tapers and at the distance of the Moon is about 6,000 miles, and since its centre is in the ecliptic it reaches 3,000 miles above and 3,000 miles below the ecliptic plane. Hence for the Moon to come within the shadow it must be near a node, and a lunar eclipse can happen only at Full Moon near a node. If the whole Moon is involved in the shadow the eclipse is total, otherwise it is partial. During a lunar eclipse the Moon appears a dull red or copper colour, caused by those rays of the Sun which pass through our atmosphere being refracted or bent to reach the Moon's surface. The atmosphere at the same time absorbs the green and blue rays, allowing only the red to pass. Two or three lunar eclipses occur every year, and usually one is total.

Solar eclipses are caused by the Moon passing between the Earth and the Sun, *i.e.* at New Moon. Also, as previously explained, the Moon must be near a node. But the nature of the eclipse depends on other circumstances. The distance between the Earth and Moon varies, hence the Moon's shadow, always very narrow, may not reach the Earth, in which case it does not cover the Sun, but leaves a ring of light or annulus, and the eclipse is *annular*. If the shadow reach the Earth's surface it can hide up the Sun only from a narrow track; in this track zone the eclipse is *total*, but only *partial* outside the track. In a solar eclipse the dark figure of the Moon is seen advancing across the Sun's disc, and during this time it will be noticed that the Sun's rays, shining through tree foliage, form on the ground numerous images of the partially eclipsed Sun. The temperature lowers. When the Moon covers the disc of the Sun, the corona and the chromosphere become visible.

The least number of eclipses in one year is 2—both solar. The greatest number is seven, 5 solar and 2 lunar, or 4 solar and 3 lunar. An eclipse of the sun is visible only from a limited region of the earth's surface, while one of the moon may be seen from an entire hemisphere. Consequently more eclipses of the moon are visible at any one place than of the sun.

The ancient Chaldeans foretold eclipses by means of the Saros, a period of 18 years 10 days, or 18 years 11 days, dependent on the number of leap years. During a Saros there are generally 41 solar and 29 lunar eclipses, and when the period expires the eclipses repeat themselves very nearly in the same order as they did 18 years and 11 days before.

Jan. 8.—*A total Eclipse of the Moon.* The beginning visible in Central and Western Europe, N.W. Africa, and N. and S. America. The ending visible in N. America, N.W. portion of S. America, N. and N.E. Asia, and E. Australia.

Moon enters shadow	Jan. 8*d.* 5*h.* 50*m.* (morn.)	G.M.T.
Beginning of total eclipse	„ 8*d.* 7*h.* 0*m.* „	
End of total eclipse	„ 8*d.* 8*h.* 29*m.* „	
Moon leaves shadow	„ 8*d.* 9*h.* 39*m.* „	

The whole eclipse is not visible at Greenwich, as the Moon sets at 8*h.* 11*m.*

Jan. 23.—*A partial Solar Eclipse.* Invisible at Greenwich. Mag. 0·73.

Eclipse begins	Jan. 23*d.* 5*h.* 43*m.* (morn.),	Long. 18° E.,	Lat. 28° N., N. Africa.
Greatest eclipse	„ 23*d.* 7*h.* 28*m.* „	„ 26° E.	„ 63° N., Sweden, Finland.
Eclipse ends	„ 23*d.* 9*h.* 13*m.* „	„ 96° E.,	„ 60° N., Siberia.

June 19.—*A partial Solar Eclipse.* Invisible at Greenwich. Mag. 0·47.

Eclipse begins	June 19*d.* 11*h.* 36*m.* (morn.),	Long. 119° W.,	Lat. 53° N., Canada.
Greatest eclipse	„ 19*d.* 1*h.* 16*m.* (after.)	„ 150° E.,	„ 66° N., Siberia.
Eclipse ends	„ 19*d.* 2*h.* 56*m.* „	„ 73° E.,	„ 46° N.

July 4.—*A total Lunar Eclipse.* The beginning is visible in Asia, Africa, Europe except in N.W. The ending is visible in W. Australia, S.W. Asia, Europe, Africa, and S. America. At Greenwich it is partly visible, the moon rising at 8*h.* 11*m.*

Moon enters shadow	July 4*d.* 7*h.* 52*m.* (after.)	G.M.T.
Totality begins	„ 4*d.* 8*h.* 51*m.* „	
Totality ends	„ 4*d.* 10*h.* 27*m.* „	
Moon leaves shadow	„ 4*d.* 11*h.* 25*m.* „	

July 19.—*A partial Solar Eclipse* beginning at 1*h.* 5*m.* (morn.). Very small mag., only 0·09. Invisible at Greenwich.

Dec. 14.—*An annular Eclipse of the Sun.* Invisible at Greenwich. Central line of annulus runs through the South Pole at local apparent midnight.

Dec. 28.—*A total Lunar Eclipse.* The beginning visible generally in N. and S. America, Pacific Ocean; the ending visible in N. America, Pacific Ocean, E. Asia, and Australia. Invisible at Greenwich, the Moon setting at 8*h.* 4*m.*

Moon enters shadow	Dec. 28*d.* 8*h.* 5*m.* (morn.)	G.M.T.
Totality begins	„ 28*d.* 9*h.* 38*m.* „	
Totality ends	„ 28*d.* 9*h.* 55*m.* „	
Moon leaves shadow	„ 28*d.* 11*h.* 27*m.* „	

Mercury is the nearest planet to the Sun, and was known in the most remote times. Recorded observations go back to 262 B.C. The Greeks called it Apollo when a morning star, and Mercury as an evening star. It receives from the Sun more light and heat than any other planet, and moves the quickest in its orbit. Its power to reflect light is, however, lower than the other planets, and a little less than the Moon. A few markings have been noted on its surface. Mercury passes through phases similar to the Moon. Its surface has a dull rosy tint. Its day is the same length as its year.

Venus is very much like the Earth in size, density, and general constitution. As a morning star the Greeks called it Phosphorus, and Hesperus when seen as an evening star. As we usually see only the upper surface of its atmosphere, no decided markings have been under observation, and consequently we do not yet know the time of its rotation or the length of its day. Opinion is divided as to whether it is 23 hours 21 minutes, or whether it coincides with its year, *i.e.* 225 days. It passes through phases similar to the Moon. It has no satellite.

Mars, whose orbit lies outside the Earth's orbit, has twice the reflecting power (albedo) of Mercury and about half that of Venus. The markings on its surface are in the main permanent, and have been charted just as the seas, continents, and mountains on the Earth. White patches, "polar caps," are plainly visible during the winter in Mars, and as they gradually dissolve as spring advances, they are generally supposed to consist of snow and ice. In 1877 Schiaparelli announced the discovery of narrow dark markings now called "canals," which by some have been considered artificial, but of this there is no real evidence. Undoubtedly climatic changes are observable. Mars is considered ruddy in hue. In 1877 Asaph Hall, with the 26-inch refractor at Washington, discovered two minute satellites. Deimos is 14,600 miles from the centre of Mars, and revolves in a period of 30 hours 18 minutes; Phobos is only 5,800 miles distant, and revolves in 7 hours 39 minutes, which is less than the day of Mars. Hence Phobos, when seen from Mars, rises in the west and sets in the east. The diameters are about 7 and 6 miles, and these minute attendants can be seen only with the largest telescopes.

The asteroids, or small planets, are very small bodies revolving round the Sun in a zone between Mars and Jupiter. The first was discovered on Jan. 1, 1801, and is known as Ceres (1). Since the introduction of photography in astronomy many are discovered annually, and at present 800 have been found. Prof. Barnard, with the 40-inch refractor at the Yerkes Observatory, has succeeded in ascertaining the diameters of the four largest.

Ceres, 488 miles.	Pallas, 304 miles.
Vesta, 248 „	Juno, 118 „

Vesta is, however, twice as bright as Ceres. In general, the diameters do not exceed 10 or 15 miles. Gravity on such bodies is small, a shot from a rifle fired upward would not fall back. Eros, discovered in 1898, approaches within 13,500,000 miles of the Earth, the nearest except the Moon and perhaps a stray comet. Its diameter is about 15 miles, and its light is subject to variation.

Jupiter comes next to Venus in brightness, and is 5 times as brilliant as Sirius, the brightest star. The markings on its surface are sufficiently pro-

nounced to be seen with small telescopes of 2 and 3 inches aperture. Generally speaking, these are in zones or belts parallel to Jupiter's equator, and are doubtless changes in the atmosphere, which is very extensive. As with the Sun the limbs are fainter than the central surface, and Jupiter is probably a fluid sphere surrounded by deep cloud layers. The spectrum shows unmistakably that the light is not all reflected sunlight, and there are faint shadings in the orange and red, probably due to some unknown substance in its atmosphere. The markings and spots are ever changing, but there is one remarkable exception. The Great Red Spot was first noted in 1878, and up to the present remains a mystery. It is 30,000 miles in length and 7,000 miles wide. The temperature of Jupiter is probably high. For satellites, see Table, p. 43.

Saturn is the most distant planet known to the Ancients. In brightness it comes after Sirius. It has 10 satellites, and is surrounded by a thin luminous ring, or system of rings composed of very minute bodies. The limbs of Saturn are not so bright as the central portions of the disc, and the markings are, like those of Jupiter, in zones parallel to the equator, the equatorial zone being much brighter than the other surface. The spectrum resembles that of Jupiter, but the unknown constituent does not show in the spectrum of the rings. It is probably fluid like Jupiter. The rings were discovered by Galileo in 1612. A 2-inch refractor will show Titan, the largest satellite.

Uranus was discovered by Sir W. Herschel in 1781 with a 7-inch reflector. As seen in the telescope it has a greenish hue. The spectrum is crossed by six dark absorption bands, indicating that its atmosphere differs from ours. Uranus, Jupiter, and Saturn may be regarded as semi-suns.

Neptune is the most remote member of the solar system known to us. Its orbit was computed by Adams in England and Leverrier in France, from the observed perturbations in the motion of Uranus, before it was seen in the telescope, which was on Sept. 23, 1846, near its computed place. There are a few indistinct markings on its surface. Its spectrum is similar to that of Uranus. From Neptune the Sun appears much the same as Venus does to us; no disc could be discerned by the naked eye. The light received, however, is 700 times that given by the Full Moon. Mercury, Venus, and the Earth would never be sufficiently far from the Sun to be seen, and Jupiter would only be observed at elongation.

Comets differ in appearance and characteristics from either stars or planets. Generally speaking, a comet consists of a more or less star-like *nucleus*, surrounded by a nebulous mass called the *coma*, and a *tail*. There probably is no really solid nucleus. Comet spectra show that they shine partly by reflected light and partly by their own light. In size they are immense objects, the coma often reaching 100,000 miles in diameter, while the tail may exceed 50,000,000 miles in length. In no case, however, has the mass equalled that of the Earth, indicating the extreme tenuity of its material, which as indicated in the spectra consists of carbon and hydrogen compounds. It is possible that comets were only visitors to our system, and that those which now belong to us were captured by coming within the sphere of attraction of one of the larger planets. At any specified distance from the Sun there is a limiting velocity, which, if the comet exceed, it will be driven away from the solar system; but should its velocity be less than the limits, the comet becomes a member of our system, and is known as a *periodic comet*.

PERIODIC COMETS (SHORT PERIOD)

	Period in Years.	Next Return.	Discovered
Encke	3·3	1917–18	1786
Tempel II	5·3	1920	1873
Brorsen	5·5	1917–18	1846
Barnard	5·5	1917	1884
Tempel-Swift	5·6	1919	1867
Winnecke (Pons)	5·9	1920	1819
Giacobini	6·5	1921	1900

Olbers	72·7	1960	1815
Halley	76·0	1986	12 B.C.

There are many more faint or telescopic comets than comets visible to the naked eye (about 20 or 30 per century). Some *comets* have become *lost*, notably—Lexell, discovered in 1770, period 5½ years; Biela, discovered in 1772, period 6½ years; De Vico, discovered in 1844, period 5½ years; Blainplain, discovered in 1819, period 5 years.

Meteors.—There are in the solar system a vast number of minute bodies which we call meteors. These bodies sometimes overtake the Earth and sometimes meet it, and when they pass through our atmosphere the heat generated is usually enough to raise them to a white heat and finally dissipate them. Their track is marked by a luminous streak. They generally come in streams, and these streams are known from their "radiant," or position in the sky from which they appear to come. Thus the radiant point of the August meteors is in the constellation Perseus. Meteors are becoming more and more regarded as débris of comets, and several streams have been identified as moving in zones corresponding to the orbits of lost comets. The chief are:

Time of appearance.	Name.	Connected comet.
Aug. 9–11	Perseids	Tuttle, 1862
Nov. 12–14	Leonids	Tempel, 1866
Nov. 27–29	Andromedes	Biela

A meteor usually appears in an altitude of from 80 to 100 miles, and disappears when at from 5 to 10 miles above the Earth, the length of path ranging from 50 to 500 miles.

No meteor belonging to a stream has ever been known to reach the ground, but there are occasionally isolated meteors which have fallen. These sometimes are of respectable size; the largest known fell at Knyahinya in 1866 and weighed 647 lb.

PRINCIPAL METEOR RADIANTS

	R.A.	Dec.	
Quarantids	230°	+ 53	Jan. 2–3
Lyrids	270°	+ 32	April 19–21
Perseids	45°	+ 57	Aug. 9–11

Leonids	150°	+ 23	Nov. 13–15
Andromedes	25°	+ 43	Nov. 23–24
Geminids	108°	+ 33	Dec. 1–14

APPARENT DIURNAL MOTION OF THE HEAVENS

An observer so situated that he can obtain a view of the heavens all around him finds that this view is limited by a circle where the Earth apparently meets the sky. This circle is the **horizon.** Stars, sun, moon, and planets first appear above the horizon or rise in the east, travel across the sky, and go below the horizon or set in the west. The time taken to travel this arc is called the time of diurnal arc. Some, however, never go below the horizon, and their paths are circles which get smaller and smaller as the stars are situated nearer a certain point in the sky called the *celestial pole.* This circular motion around the pole is uniform, and is performed in 23*h.* 56*m.* 4*s.*

But this motion is not real; it is only apparent. The real motion causing this appearance is the rotation of the Earth on its axis. It is, however, convenient to speak of the motion as if the stars really did travel as described.

As a place on the Earth is located by the co-ordinates of latitude and longitude, so the stars are located in the sky by reference to the celestial pole and equator. The co-ordinate or distance along the equator is the **Right Ascension,** and is reckoned from the intersection of the equator with the ecliptic (apparent path of the Sun). This point is called the First Point of Aries, and corresponds to Greenwich when reckoning longitudes on the Earth. The distance from the equator as measured on a meridian passing over the star and the celestial pole is called the star's **declination.** It is N. or S. according as the star is north or south of the equator. It corresponds to latitude on the Earth. Right Ascension is usually denoted by R.A., and declination by + Dec. or — Dec., according to the N. or S. position of the star.

Another method of locating a star is to refer it to the zenith and the horizon, the height above the horizon being its *altitude,* and the arc of the horizon intercepted between the observer's meridian and the vertical line through the star—in other words, the distance along the horizon as measured from the north or south point. This is the **azimuth.** The Sun's azimuth, as reckoned from the north point, at rising, is given on the second page for each month.

The stars are bodies similar to our Sun, and are in general made up of the same substances as shown by the spectroscope. They vary in size, some being smaller than the Sun and some larger.

The term *magnitude* is used by astronomers to indicate *brightness,* and has no reference to size. In this sense the brightest stars are first magnitude stars, the next bright the second magnitude, and so on, each magnitude being 2·512 times less bright than the preceding, *e.g.* a 4th mag. is 2·512 times fainter than a 3rd mag. This number (2·512) is called the *light ratio,* for visual work. The *photographic magnitude* is higher numerically than the visual. A negative mag. means that the star is so many mags. brighter than the first magnitude.

The **number of stars** visible to the naked eye in the whole sky does not exceed 6,000, so that an observer can never see more than 2,500 at any one time. In the telescope and on the photographic plates there are millions. The most complete data respecting the number of stars and the light they give is by Prof. Chapman, who remarks that the *total light of all the stars* is equal to the light of about 700 first magnitude stars, and can hardly reach 800, *i.e.* on the photographic scale, or between 900 and 1,000 on the visual scale. A star of magnitude — 6·1 would give the whole light. The full moon gives about 100 times the light of all the stars, and the sun gives about 100,000,000 times.

The Brightest Stars in the Sky

	R.A. h. m.	Dec. °	Mag.	Spectral Type.	
Sirius	6 40	17 S	— 1·6	Sirian	A

All stars fainter than 20 mag.		3	690

Stars near the horizon are said to **twinkle** when they exhibit rapid changes in brightness, and sometimes show prismatic colours. It was noted centuries ago that white stars twinkled more than red. The phenomenon is less and less pronounced as the zenith is approached, which indicates that it is due to our atmosphere. In its passage through the atmosphere starlight is sifted, absorbed, and refracted in ever-varying degree, the fainter white rays showing such treatment more than the red rays. Stars being at such enormous distances from the Earth, the light is as if coming from a point, and if a ray is interfered with, there is not another arriving at the same instant to take its place. Planets being near the Earth, we get rays from their circular

discs, *i.e.* from an area, so that light rays traverse our atmosphere, from many points, along the same path, and the twinkling is less noticeable. The effect is seen more as a blurring of the planet's image. Twinkling is more in evidence when the air is humid.

The **distances of the stars** from the solar system vary considerably, and are so enormous that the longest measure we can obtain is useful in only a few isolated cases. The radius of the Earth's orbit is our longest measure, and is referred to as an *astronomical unit*, and the angle at a star which this unit (92,600,000 miles) subtends is called the **star's parallax.** If we can measure this we know its distance. Even then the figures representing distance, in this large unit, convey little meaning, and recourse is had to a larger unit, the distance in miles that light travels in one year, or the *light year*. It is about 63,000 ast. units.

Put in other words, it takes light, travelling 186,000 miles per second, 8·8 years to reach the earth from Sirius. From a star with a parallax of one-tenth second light takes 32·6 years to reach us.

The expression "**fixed star**" is only relative. Stars not only change their position, with respect to the Earth, by reason of precession, aberration, and nutation, but they have motion peculiar to themselves. From meridian observations we detect small movements in Right Ascension and in Declination. These are called *proper motions*. These are in a plane at right angles to the line between the Earth and star; the star's motion to or from us or along the line of sight is called its *radial motion* and is determined by the spectroscope. Knowing the motion in three directions, the total motion in space can be determined. The following table is arranged in order of *proper motion*. Only where the parallax is known can the motion be translated into miles per second.

Light is emitted from a luminous body by *vibrations* which give rise to wave-motion, some wave-lengths being longer than others. The *short wave-lengths* give the violet colours, the *long wave-lengths* the red colours. When all the various wave-lengths from red to violet are emitted, the light is white.

If a beam of white light is passed through a prism, it is refracted or bent out of its course; and not only so as a whole—the prism refracts the violet rays or short wave-lengths more than the red. Consequently the white light is separated into its various colours, and if allowed to fall on a white screen a strip of brilliant shades from red to violet is seen. This is the **spectrum,** and the length of the strip is called the *dispersion*. Solids, liquids, and gases under high pressure give out every shade of colour, and the *spectrum* is *continuous*. In the spectrum of gas under low pressure there are shades of colour missing, marked by dark lines or bands. This is a discontinuous spectrum. If a beam of white light, sunlight for instance, passes through a gas or vapour, the latter absorbs those rays which make up its own spectrum. This absorption is seen by dark lines crossing the otherwise continuous spectrum. These dark lines are called *Fraunhofer lines*, which thus really tell us the various metals or gases surrounding the sun.

Some lines would be due to passage through our own atmosphere and are called *Telluric lines*.

A *sodium* flame will give a *bright line spectrum*, *i.e.* so many wave-lengths are missing that the bright portion is very scarce, giving the appearance of bright lines on dark background. The two strongest lines in the sodium spectrum are known as the *D lines* in the yellow.

The limelight gives a continuous spectrum; but if it pass through the sodium flame, two *dark lines* cross it in the position of the bright D lines.

By such principles the light from any object can be analysed, the process being termed *spectrum analysis*, and the prisms and other requisites make up the **spectroscope.**

By subjecting the light of the stars to the spectroscope, they have been separated into classes or types, according to the particular characteristics of their individual spectra.

Type I.—Spectra in which the metallic lines, if any, are very faint, the hydrogen lines being predominant, broad, dark, and diffused. The stars are white or bluish, *e.g.* Sirius, Vega, Castor.

Type II.—The metallic lines are numerous, the hydrogen lines dark and distinct but not broad. The stars are yellowish, *e.g.* Sun, Arcturus, Capella, Pollux.

Type III.—The metallic lines are present, the hydrogen lines are feeble, and the spectrum is crossed by fluted bands sharp on edge nearest violet and fading towards the red. The stars are orange colour, *e.g.* Antares, α Orion, α Herculis.

Type IV.—Bright metallic lines present, no hydrogen lines, the spectrum crossed by fluted bands fading towards the violet. The stars are red, *e.g.* 19 Piscium, U Hydræ.

Type V.—The Wolf-Rayet stars. Bright line spectra. All found in the Milky Way or the two Magellanic Clouds. γ Velorum.

Stellar spectra are so varied that the gradations from one class to another form really a continued series, and the nomenclature in the Draper Catalogue differs from the above. The stars are arranged in the sequence O, B, A, F, G, K, M, N. Where A represents Type I; F and G two classes between Type I and Type II, which latter is represented by K; M is Type III; N Type IV; O Type V; B a class between O and A.

O	Type V	Wolf-Rayet	γ Velorum	
B		Helium	Regulus	Algol
A	Type I	Sirian	Sirius	Vega
F		Sir.-Sol.	α Argus	Polaris
G		Solar	Capella	ζ Herculis
K	Type II	Solar	Arcturus	α Centauri
M	Type III	Antarian	Antares	α Herculis
N	Type IV	Carbon	19 Piscium	U Hydræ

The number of stars down to mag. 6¼ in each class is:

	O	B	A	F	G	K	M	N
	20	696	1885	720	609	1719	457	8
% in Milky Way	100	82	66	57	58	56	54	87

Should a star have a motion to or from the Earth, then it has the effect of shifting the dark lines in the spectrum towards the blue end or towards the red end respectively. This shift when measured can be reduced to miles per second. Stars having motion to or from the Earth are said to have *radial motion*. Motion of approach is denoted by the sign —, and + denotes a receding motion. The velocity in the list is in miles per second.

An interesting distribution of stars brighter than mag. 6¼ is:

Blue—Types A and B . .	2,600 stars.
Yellow—Types F, G, K .	3,000 ,,
Red—Type M . . .	500 ,,

VARIABLE STARS

Some stars change in brightness and are called **variable stars,** and are divided into classes according to their characteristics. Some vary according to definite laws, others apparently follow no law. Some 1,500 are at present known.

Class I embraces those temporary or **new stars** which occasionally blaze out in the sky, reach to great brilliancy, remain visible for a time, and then fade away. Between 134 B.C. and the present time some thirty have been recorded. These are generally in the Milky Way and a large percentage in the region of the constellation of the Scorpion. In A.D. 1572 a new star appeared in Cassiopeiæ which was well observed by Tycho Brahé. It rivalled Venus in brilliancy, and in fact is the brightest on record, being fairly well seen by the naked eye in the daytime. It was at first white, but afterwards became red. It remained for two years and then faded. It is now represented by the star B Cassiopeiæ of 11th mag.

In A.D. 1604 a new star appeared and became nearly as bright as Venus. This was observed by Kepler. After two years it faded away, and at present there is no trace of it.

The Novæ of recent years include Nova Andromedæ (1885); Nova Aurigæ (1892), and Nova Persei in 1901. The latter increased in brightness over 1,500 times in three days, became nearly as bright as Sirius. It showed a nearly continuous spectrum crossed with dark lines, which in two days changed to a bright line spectrum showing the presence of helium, calcium, and hydrogen. From its first appearance a nebula was gradually developing around it which finally became very extensive.

Class II consists of variables of long period, usually from 120 to 450 days. During this time a regular rise to maximum and fall to minimum occur. Stars of this class are red, and give banded spectra. The representative is *Mira Ceti*, known since 1596. Once in eleven months the star starts from 9½ mag. and in 125 days gradually reaches the brightness of a star of the 2nd, 3rd, or 4th magnitude, remaining at its maximum some twenty days, and then in about 180 days falls back to its minimum. Its spectrum is of type III, eleven dark bands sharp towards the violet. It is receding from us at the rate of 40 miles a second. A few stars of this class are:

Long Period Variables—Red Stars, Banded Spectra

	R.A. h.	Dec. °	Period.	Range mag.
Mira Ceti .	2	3 S	332 days	1·7 to 9·5
ν Orionis .	5	20 N	375 ,,	5·8 ,, 12·3
ν Geminor .	7	22 N	86 ,,	9 ,, 13
R Carinæ .	9	62 S	310 ,,	4·5 ,, 10
R Ursæ Maj.	10	69 N	302 ,,	6 ,, 13
χ Cygni .	19	32 N	406 ,,	4·5 ,, 13·5

Class III embraces variable stars of short period, ranging from a few hours to about thirty days; nearly all are white or yellow stars showing Sirian or solar spectra. Probably all are close binary stars. Examples are:

	R.A. h.	Dec. °	Days.	Range mag.	Type.
ζ Geminor	6	20 N	10·15	3·7 to 4·5	G
R Muscæ .	12	68 S	0·88	6·5 ,, 7·6	G
β Lyræ .	18	33 N	12·91	3·4 ,, 4·5	G
η Aquilæ	19	0 N	7·17	3·5 ,, 4·7	G
δ Cephei .	22	37 N	5·37	3·7 ,, 4·9	G

Class IV comprises eclipsing variables or variables of the Algol type. All the light fluctuations take place in a few hours, and it then remains at maximum for a longer time. A dark companion intervening causes the variation.

Algol (β Persei) R.A. 3*h.*, Dec. 40 N, was discovered in 1669; it varies from 2·3 mag. to 3·5 mag., the period from one maximum to another

being 2*d*. 20*h*. 49*m*. The following data with respect to this system was found by Prof. Auwers:

Diameter of Algol	1,061,000 miles
,, of Satellite	834,000 ,,
Distance from centre to centre	3,230,000 ,,
Algol's orbital velocity	26 miles per sec.
Satellite's orbital velocity	55 ,, ,,
Mass of Algol	·45 that of Sun
Mass of Satellite	·22 ,, ,,

Class V embraces stars whose variation apparently follows no law of periodicity. Such as η Argûs, which varies from a 1st magnitude star to one of 7th mag. It is reddish, and presents a spectrum similar to the temporary stars.

The phenomena of variable stars present interesting problems which are now being seriously attacked by astronomers.

Double Stars.—Stars which are apparently single when seen with the unaided eye, sometimes prove to consist of two very close together. These are known as double stars, and continued observation has shown that they revolve around each other. On p. 51 is a list of such interesting stars with various details explained by the headings.

EXPLANATION OF ASTRONOMICAL TERMS

Two heavenly bodies are in "conjunction" (☌) when they have the same *longitude*, *i.e.* when they are seen in the same direction in the heavens; they are in "opposition" (☍) when seen in opposite directions, *i.e.* when 180° of *longitude* apart. These terms and the following are in general applied to members of the solar system. Thus a planet being in conjunction with the Sun, becomes difficult to see, its light being overpowered by sunlight. On the contrary, a planet in *opposition* comes to the meridian at midnight and is most favourably situated for observation. When half-way between these positions, *i.e.* 90° different in longitude, they are said to be in "quadrature" (□); by "greatest elongation" is meant the greatest apparent *angular* distance from the Sun; the planet is then generally most favourably situated for observation. Mercury can only be seen with the naked eye at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is crossing the plane of the Earth's orbit. The term "Perihelion" means nearest, and "Aphelion" furthest, from the Sun. An "occultation" of a planet or star is an eclipse of it by some other body, usually the Moon.

LARGE PROPER MOTION STAR.

Since the Proper Motion Table on p. 48 was set up, the small 10·5 mag. star found by Barnard of Yerkes Observatory has proved to have the largest known P.M. This star is close to the star B.D. + 4° 3560, and precedes 66 Ophiuchi; its colour is orange, its spectrum of type Mb. Its P.M. is 10·3″ in direction 0°, and Adams at Mt. Wilson finds a radial velocity of − 91 km. per second.

RAINFALL

In the Almanack the average rainfall for each month is given. The seasons and years, however, in public memory, are those which stand forth as differing greatly from the mean values. If the whole year be considered, then the exceptionally dry and exceptionally wet years are as follows. The four seasons being taken as the year, the winter season embraces the latter part of the previous year.

Dry				Wet			
Year.	W. and S.	S. and A.	Total.	Year.	W. and S.	S. and A.	Total.
	in.	in.	in.		in.	in.	in.
1858	8·0	8·5	16·5	1903	11·0	24·8	35·8
1847	7·0	9·7	16·7	1852	7·6	24·8	32·4
1864	8·0	8·9	16·9	1879	14·1	17·7	31·8
1870	7·6	10·6	18·2	1853	12·0	19·4	31·4
1854	7·8	10·6	18·4	1915	18·1	13·2	31·3
1874	4·5	14·1	18·6	1877	18·8	12·5	31·3

Taking the year in two periods of six months—winter and spring ; summer and autumn :

Wet				Dry			
Year.	Wr.	Sg.	Total.	Year.	Sr.	An.	Total.
	in.	in.	in.		in.	in.	in.
1877	11·8	7·0	18·8	1903	16·2	8·6	24·8
1915	12·9	5·3	18·2	1852	11·1	13·6	24·7
1916	10·4	7·5	17·9	1841	8·5	13·6	22·1
1869	10·7	5·9	16·6	1880	7·1	13·7	20·8
1866	8·6	6·0	14·6	1888	13·8	6·0	19·8
1879	7·6	6·6	14·2	1875	9·8	9·7	19·5

Dry				Wet			
	in.	in.	in.		in.	in.	in.
1874	2·3	2·2	4·5	1914	3·9	4·3	8·2
1893	5·3	1·1	6·4	1858	5·7	2·8	8·3
1880	3·3	3·3	6·6	1884	4·7	4·1	8·8
1895	3·8	3·1	6·9	1864	2·5	6·4	8·9
1847	3·9	3·2	7·1	1904	4·3	4·7	9·0
1857	4·6	2·6	7·2	1868	4·1	5·3	9·4

Considering each of the four seasons, we get for :

Wet Seasons

Wr.		Sg.		Sr.		An.	
	in.		in.		in.		in.
1915	12·9	1878	9·7	1903	16·2	1880	13·7
1877	11·8	1862	9·2	1888	13·8	1841	13·6
1869	10·7	1916	7·5	1879	13·2	1852	13·6

SOME OF THE HIGHEST MOUNTAINS IN THE WORLD

Name.	Where Situated.	Height in Feet.
Mount Everest	Himalayas	29,002
K 2 or Godwin-Austen	,,	28,250
Kinchinjunga	,,	28,146
Pk. XIII. or Makalu	,,	27,800
Dhaulagiri	,,	26,837
Nanga Parbat	,,	26,656
Tagarma	(Pamirs) Turkestan	25,780
Rakapuchi	Himalayas	25,560
Tirach Mir	,,	25,400
Aconcagua	Andes	23,393
Tengri Khan	Tibet	22,800
*Tres Cruces	Andes	22,658
Mercedario	,,	22,315
Bonete	,,	21,980
Llullaillaco	,,	21,720
Incahuasi	,,	21,719
Ojo del Salado	,,	21,653
Illampu (Sorata)	,,	21,500
Chimborazo	,,	20,517
Mount McKinley	Alaska	20,300
Cotopaxi	Andes	19,580
Mt. Logan	Canada	19,539
Demavend (Elburg)	Caucasus	19,400
Kilimanjaro	East Africa	19,321
Tolima	Colombia	18,432
Orizaba	Mexico	18,250
Mt. Elias	Alaska	18,024
Popocatepetl	Mexico	17,876
Maipo	Andes	17,670
Kenya	B.E. Africa	17,007
Ararat	Armenia	17,000
Kasbek	Caucasus	16,545
Mount Blanc	Alps	15,782
Mt. Wilhelmina	New Guinea	15,580
Ras Daschan	Abyssinia	15,160
Matterhorn	Alps	14,782
Blanca Peak	Colorado	14,390
Jungfrau	Alps	13,669
Fujiyama	Japan	12,395
Aorangi (Mt. Cook)	New Zealand	12,349
Ben Nevis	Scotland	4,406
Snowdon	Wales	3,560
Carrantuohill	Ireland	3,414

ACTIVE VOLCANOES

There are between 300 and 400 volcanoes actually active at the present time. The more important are:

Name.	Where Situated.
Vesuvius	Italy.
Hekla	Iceland.
Etna	Sicily.
Stromboli	Lipari Is.
Cotopaxi	Ecuador.
Izalco	Salvador.
Popocatepetl	Mexico.
Kilauea	Hawaii.
Mauna Loa	,,
Mont Pelé	Martinique.
Krakatoa	Malay Penin.
Gownong Lamongang	Java.
Erebus	Antarctic.

* A very large number of peaks in the Andes range between 20,000 and 21,000 ft.; the better known are here given.

THE LONGEST RIVERS

River.	Outflow.	Length in Miles.
Missouri—Mississippi	Gulf of Mexico	4,221
Amazon	Atlantic	3,800
Nile	Mediterranean	3,780
Congo	Atlantic	3,000
Yangtsze-kiang	North Pacific	3,000
Yenisei	Arctic Sea	2,900
Lena	Arctic Sea.	2,860
Mekong (*or* Cambodia)	China Sea	2,800

Vancouver (British)	20,000
Tierra del Fuego (Argentine)	18,500
Southampton (British)	17,800
Formosa (Japan)	13,944
Sicily (Italy)	9,860

Area of the earth, 196,791,000 sq. m.; cubic contents, 259,944,035,515 cubic miles.

OCEAN AREAS AND DEPTHS

The mean depth of the floor of the ocean is about 12,060 ft., whilst the mean elevation of the surface of the continents above sea-level is only 2,300 ft.

I. The amount to which an Annuity of £1 accumulates at Compound Interest for any number of years from 1 to 60, at different rates per cent.

Variation of Temperature in the Air.—Where the atmosphere remains in proximity to the ground, as for instance on the slope of a mountain, the change is fairly regular, being a decrease of 1° F. for every 400 feet. Naturally this mean value is affected by climate, season, hour of the day, and state of the sky. But in vertical ascents away from the influence of the soil, the temperature lowers about 2° F. for the first 400 feet, but then not so rapidly, the whole decrease for the first 4,000 feet being about 9° F. Between 16,000 feet and 40,000 feet the fall in temperature is 14° F. for every 4,000 feet. Above this is a region where the temperature remains about 70° F. below zero.

The following table shows the present value of a lease, freehold, or annuity of £1, reckoned at various rates per cent :

Years.	2½%	3%	4%	5%	6%	Years.	2½%	3%	4%	5%	6%

1. Find the present value of a lease bringing in £100 per annum (after all deductions for repairs, etc., have been made) which has 27 years to run—at 5% ? *Answer* :—14·64 years' purchase, or £1,464.

2. To find the capital value of an income or pension of £100 received by a person aged 40, interest being at 5%. From the Table of Expectation of Life (*q.v.*) a person aged 40 has approximately 25 years to live ; an annuity for 25 years at 5% would be worth, therefore, 14·09 years' purchase, and the capital value would be £1,409.

EXPECTATION OF LIFE

The table given below is somewhat less favourable than one framed on the figures in the Returns of the Registrar-General ; it is, however, of more practical value, as representing nearly the basis on which most insurance companies work.

Controller of the Post Office Stores Department, 17-19 Bedford Street, London, W.C. (Hours, 9.30 a.m.—4 p.m.; Sats. to 12.30 p.m.)

INLAND CORRESPONDENCE

is that within the United Kingdom, and comprises—(1) letters; (2) postcards; (3) book packets; (4) samples; (5) newspapers; and (6) parcels.

LETTERS

The prepaid rate of postage is:

Not exceeding 1 oz. in weight	1*d.*
Exceeding 1 oz. but not exceeding 2 oz.	2*d.*
For every additional 2 oz. or fraction of 2 oz.	½*d.*

There is no limit of weight; maximum length 2 ft., width 1 ft., depth 1 ft. Indecent or obscene matter or explosives may not be sent by post, and eggs, fish, game, meat, fruit, and vegetables by parcel post only.

POSTCARDS

Postage	½*d.*
Reply postcard	1*d.*

Postcards must not be thicker nor thinner than the thickest or thinnest official postcard, and must not exceed 5½ in. by 3½ in., nor be less than 4 in. by 2¾ in. The left-hand half of the address side may be used for correspondence; if for abroad, the word "postcard" must be printed or written thereon.

BOOK PACKETS

The prepaid rate is:

Not exceeding 2 oz. in weight	½*d.*
For every additional 2 oz. or fraction of 2 oz.	½*d.*

Limit of size—2 ft. in length by 1 ft. in width or depth. This was merged with the letter post in 1897, but was revived in 1915. The expression "book packet" means a packet not exceeding 1lb. in weight which consists of—

(*a*) books and other publications or works of literary character, and any other written or printed matter not being in the nature of a letter;

(*b*) sketches, drawings, paintings, photographic prints, and engravings on paper, or on some substance ordinarily used for the purpose;

(*c*) maps, plans, and charts;

(*d*) the binding or mounting of any of the previous articles; and

(*e*) documents such as commercial or business papers of a formal character, lists and tabular statements, deeds and agreements, printed circulars, Christmas and other cards, MS., proofs, examination papers with corrections. Circulars produced by typewriting or any mechanical process are admissible if handed in at a head or branch post office as such, and at least twenty copies posted at the same time.

Packets must be posted either without covers, or in unfastened envelopes, or in covers open at ends.

SAMPLES

The prepaid rate on samples is:

Not exceeding 4 oz. in weight	1*d.*
Between 4 oz. and 6 oz.	1½*d.*
,, 6 oz. and 8 oz.	2*d.*

Limit of size: 12 in. in length, 8 in. in width, 4 in. in depth.

No article is admissible by sample post unless it be in fact a specimen, itself without saleable value, of goods for sale. Packets must be sent in wrappers, marked "Sample Post," open at the ends or in unfastened envelopes. Seeds, tea, flour, drugs, and such-like articles, which cannot be sent in open wrappers or envelopes, may be sent in boxes or in bags of linen or other material, fastened in such a way as to admit of easy examination. The name, trade, and address of the dealer by whom the packet is sent must in all cases be printed or stamped on the outside of the wrapper or label. No packet may enclose a written document.

NEWSPAPERS

The prepaid rate is:

Not exceeding 6 oz. in weight	½*d.*
For every additional 6 oz. or fraction of 6 oz.	½*d.*

The newspaper post is available for any publication registered at the G.P.O. as a newspaper. Limit of size, as for letters; limit of weight, 2 lb. Newspapers must be done up in a similar manner to halfpenny packets. No writing is permissible other than the name, address, and description of sender, the words "with compliments," a reference to a page, and a request for return if undelivered.

PARCELS

The rates of postage are:

Not exceeding	*s.*	*d.*	Not exceeding	*s.*	*d.*
1 lb.	0	4	8 lb.	0	9
2 ,,	0	5	9 ,,	0	10
3 ,,	0	6	10 ,,	0	11
5 ,,	0	7	11 ,, (limit)	1	0
7 ,,	0	8			

Maximum length, 3 ft. 6 in.; maximum length and girth combined, 6 ft. Every parcel should

be marked "Parcel post," and handed in at a post office. A certificate of posting for an unregistered parcel may be obtained free. The address should be on the parcel itself, not merely on the label. Parcels are neither accepted nor delivered on Sundays. A postman on foot or bicycle in rural districts must not accept more than 11 lb. from one person, unless he has had notice on the previous day, and, if he is already carrying the maximum load for his walk, he may refuse to accept more parcels or other heavy correspondence. Parcels for the Channel Islands are liable to Customs examination at the port of arrival, and the sender must make a declaration of contents at the office where the parcel is posted.

BLIND LITERATURE POST

Papers of any kind, periodicals and books, impressed in "Braille" or other special type for the use of the blind, may be sent, subject to special conditions, at the rate of 2 oz. ½*d.*; 5 lb. 1*d.*; 6 lb. (limit), 2*d.* Maximum size, 2 by 1 by 1 ft.

REDIRECTION.—Letters, postcards, book packets, sample packets and newspapers may be redirected to the same addressee at another address either (1) by an agent of the addressee after delivery, or (2) by an officer of the Post Office. In the case of (1), the correspondence to be retransmitted without additional charge must be reposted not later than the day after delivery (Sundays and public holidays not counted), and must not have been opened or tampered with. Parcels, when redirected, are subject to additional postage at the prepaid rate, unless the original address and the substituted address are served from the same delivery office, or one within the same town delivery area (the whole of the London Postal District is one town delivery area); parcels must be redirected also not later than the day after delivery. In the case of (2), notices of removal and applications for redirection of correspondence must be signed by each person to whom the letters are to be addressed on printed forms to be obtained from a postmaster or from the postman of the walk. Separate notices are required for parcels and telegrams. Notice of redirection holds good and is free for one year; for the second and third year the fee is 1*s.* a year, and 5*s.* a year thereafter. The redirection of correspondence will not be undertaken for a person temporarily leaving home, unless the house be left uninhabited, nor of correspondence addressed to clubs, hotels, boarding-houses, or lodgings.

REGISTRATION.—Correspondence of any kind (including parcels) can be registered. The fee is 2*d.* in addition to the postage. For a further 2*d.* the sender may obtain advice of delivery. Everything intended for registration *must be handed to an officer of the Post Office*, and a certificate of posting obtained. If it be desired to obtain compensation for damage to a packet (other than a parcel), the packet must bear the words "Fragile, with care." Packets which contain coin or jewellery, if posted unregistered, are subject to compulsory registration, and are charged on delivery with a fee of 4*d.*, less any amount prepaid in excess of the postage.

Compensation for Loss or Damage.—The fees for compensation inclusive of registration are: fee 2*d.*, compensation, £5; 3*d.*, £20, and 1*d.* for each additional £20 up to the maximum 1*s.* 10*d.* for £400. Compensation up to £2 is given on (*a*) unregistered parcels, for loss, only if certificate of posting is obtained when parcel is posted; (*b*) unregistered packets conveyed by Express Delivery Service No. 1. Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, etc.) is only given when the money is enclosed in one of the registered letter envelopes sold by the Post Office, and the packet is tendered for transmission by registered letter post. The maximum compensation for *coin* is £5.

CERTIFICATES OF POSTING.—Certificates of posting of an unregistered letter, letter-card, postcard, halfpenny packet, or newspaper may be obtained on request when handing in the letter or article at a post office; the fee is ½*d.* The certificate of the posting of a parcel is free.

EXPRESS DELIVERY SERVICES.—There are three Express Delivery Services: (1) *By special messenger all the way*, on week-days only, from all offices which deliver telegrams. The charge, which must be prepaid, is 3*d.* per mile, or part of a mile, inclusive of all charges, but there is a special weight fee on each packet weighing more than 1 lb. and a fee of 1*d.* on each packet after the first up to ten. Loose money or jewellery may be conveyed at owner's risk. Living animals are accepted, and arrangements can be made for the conduct of a person to an address. Every packet must be handed in over the counter, with "Express" boldly written on the top left-hand corner. (*In London, this service is suspended for the present.*) (2) By *Express messenger after transmission by ordinary post*, charge 3*d.*, as in No. 1. (3) *In advance of the ordinary deliveries at request of addressee* (fee 3*d.* a mile, and 1*d.* for every ten, or less number, of additional packets, beyond the first). For No. 1 the waiting fee is: 10 minutes free; each additional 15 minutes or part thereof, 2*d.*

CONVEYANCE OF SINGLE LETTERS BY RAIL.—For a fee of 2*d.*, in addition to the ordinary postage, letters not exceeding 1 oz. in weight may be handed in at a passenger station to be forwarded, and afterwards passed on by each company in succession (if the case requires it), by the next available train or steamship, to the station of address (there to be called for), or to be transferred there to the nearest post office letter-box. The sender may also arrange to have the letter forwarded by express service after conveyance by train, but *in London* this particular combination of service is suspended for the present.

DISPOSAL OF UNDELIVERED CORRESPONDENCE.—Inland packets, undelivered, chargeable with a postage of 1*d.* or more, if bearing on the outside the full name and address of sender, are returned direct and unopened; others are opened by the Returned Letter Office, and returned if containing the sender's address; if containing no address, they are destroyed. Postcards and packets with a postage not exceeding ½*d.*, in case of non-delivery, are only returned, on payment of a second postage, when they bear on the outside the name and address of sender, with a request for their return. Undelivered parcels which do not contain the address of the sender are liable to be disposed of after 3 months. Undelivered foreign correspondence is, as a general rule, disposed of in the same manner as inland correspondence.

POSTE RESTANTE.—This is intended solely for the accommodation of strangers and travellers, and for three months only. Correspondence is taken in at all post offices except town sub-offices. The words "To be called for" or "Poste Restante" should appear in the address. Correspondence addressed to initials, fictitious names, or a Christian name without a surname is at once sent to the Returned Letter Office. All persons applying for poste restante correspondence must supply

sufficient particulars to ensure delivery to the person to whom it properly belongs. Poste restante parcels are kept for three weeks before being returned, letters from abroad two months, but correspondence which bears a request for its return within a specified time will, if not delivered, be dealt with accordingly.

STAMPS, ENVELOPES, POSTCARDS, ETC.

STAMPS.—*Postage stamps* of the following values are issued by the Post Office: ½*d.*, 1*d.*, 1½*d.*, 2*d.*, 2½*d.*, 3*d.*, 4*d.*, 5*d.*, 6*d.*, 7*d.*, 8*d.*, 9*d.*, 10*d.*, 1*s.*, 2*s.* 6*d.*, 5*s.*, 10*s.*, £1. Books of eighteen 1*d.* and twelve ½*d.* stamps, price 2*s.* Rolls of 1,000 and 500 1*d.* and ½*d.* stamps are sold. In a rural district postmen are authorised to sell 1*d.* and ½*d.* stamps and registered letter envelopes.

Income Tax Stamps are on sale at Money Order Offices, and are of the values: 1*d.*, 2*d.*, 3*d.*, 6*d.*, 1*s.*, 2*s.*, 3*s.*, 4*s.*, 5*s.*, and 10*s.*

Entertainment Duty Stamps of the values of ½*d.*, 1*d.*, 2*d.*, 3*d.*, 6*d.*, 1*s.*, 2*s.*, 3*s.*, 4*s.*, and 5*s.*, and rolls of 480 stamps of the values of 2*d.*, 3*d.*, 6*d.*, and 1*s.* can be obtained at head post offices, the London District offices, and from collectors of Customs and Excise. *Government stamped tickets*, for payment of entertainment duty, can be obtained from collectors of Customs and Excise or from the Entertainment Tax Branch, Customs House, London, E.C.

Insurance Stamps are of the following denominations: health, 1*d.*, 1½*d.*, 2*d.*, 2½*d.*, 3*d.*, 3½*d.*, 4*d.*, 4½*d.*, 5*d.*, 5½*d.*, 6*d.*, 7*d.*, 1*s.*, 1*s.* 2*d.* Also for 13 weekly contributions at values of 7*s.* 7*d.*, 6*s.* 6*d.*, 5*s.* 5*d.*, 4*s.* 10½*d.* Unemployment, 2*d.*, 4*d.*, 5*d.*

Cut-out Postage Stamps (except stamps used in Queen Victoria's reign, which are no longer valid) cut out of envelopes, postcards, letter-cards, newspaper wrappers, or telegram forms may be used as adhesive stamps, provided they are not imperfect, mutilated, or defaced in any way. *Spoiled Stamps.*—Stamps are considered defaced when marked on the face with any written, printed or stamped character, and cannot then be used for payment of postage nor when they are imperfect. Stamps may, however, be perforated with initials for identification. Application for the recovery of the value of spoiled or unused postage stamps, either postage or revenue, can be made to the postmaster at most of the large post offices. *Repurchase of Postage Stamps.*—No smaller amount than £1 worth repurchased from one person at one time. Commission charged at the rate of 5% on face value of stamps. Application must be made on an official form. Payment is made by means of an order from the Chief Office of Account, London, Dublin, Edinburgh.

ENVELOPES bearing ½*d.* stamp, N (commercial) size (5⅛ × 3½ in.), are sold at ¾*d.* each, 7 for 4*d.*, 11 for 6*d.*, 22 for 1*s.*, 220 for 10*s.* Embossed envelopes bearing 1*d.* stamp, A size (4¾ × 3⅛), 1½*d.* each; 11, 1*s.*; 220, £1. Commercial (5⅛ × 3½), 1½*d.* each; 12, 1*s.* 0¾*d.*; 23, 2*s.*; 230, £1.

REGISTERED LETTER ENVELOPES, for foreign and inland letters, with a 3*d.* embossed stamp on the flap for payment of the registration fee 2*d.* and postage 1*d.*, are of five sizes: F, 5½ × 3½ in., 3¼*d.* each; G, 6 × 3½ in., 3½*d.* each; H, 8 × 5 in. and H2, 9 × 4 in., 3¾*d.* each; K, 11½ × 6 in., 4*d.* each.

LETTER CARDS.—1*d.* each; 12, 1*s.*; 120, 10*s.*

POSTCARDS.—Stamped postcards, stout (4¼ in. × 3½ in.), ¾*d.* each; 7 for 4*d.*; 11 for 6*d.*; 110 for 5*s.* Thin (5½ in. × 3½ in.), ½*d.* each; 12 for 6*d.*; 240 for 10*s.* Cards bearing penny stamp, 1*d.* each. Reply postcards, stout, 1½*d.* each; 6, 6¾*d.*; 11, 1*s.*; 55, 5*s.* Thin, 1*d.* each; 12, 1*s.*; 120, 10*s.*

NEWSPAPER WRAPPERS, bearing ½*d.* stamp, ¾*d.* each; 7, 4*d.*; 12, 6¾*d.*; 22, 1*s.*; 440, £1. Bearing 1*d.* stamp, 1¼*d.* each; 6, 6½*d.*; 23, 2*s.*; 115, 10*s.*

LICENCES.—The following can only be obtained from the post office: Dog, gun, male servant, carriage, motor-bicycle or tricycle, hackney carriage or hackney motor-car, motor-car, armorial bearings, game, gamedealer, gamekeeper, to keep hounds.

LONDON POSTAL DISTRICTS

The London Postal Area is divided into eleven districts:

Battersea.	Norwood.
East Central (E.C.).	Paddington.
West Central (W.C.).	South Eastern (S.E.).
Eastern (E.).	South Western (S.W.).
Northern (N.).	Western (W.).
North Western (N.W.).	

Each has a head district office, with numerous sub-district offices.

FOREIGN AND COLONIAL CORRESPONDENCE

Foreign and Colonial correspondence is divided into the following classes: (*a*) letters; (*b*) postcards; (*c*) printed papers; (*d*) commercial papers; (*e*) samples; (*f*) parcels.

LETTERS.—Prepaid rate of postage to all foreign countries (except United States, and places in China and Morocco where there are British post office agencies) is 2½*d.* first oz. and 1½*d.* each succeeding oz. or fraction thereof; from the United Kingdom to British possessions generally and to United States, to the places in Morocco where there are British post office agencies, and to H.M. ships-of-war and H.M. troops serving abroad, the letter rate is 1*d.* per oz. In the case of letters and packets for H.M. ships-of-war, the recipient should be very fully described, and the correspondence should be addressed c/o G.P.O., London, E.C. Correspondence for members of the British Expeditionary Forces abroad is subject to special conditions, which can be ascertained by inquiry at any post office.

POSTCARDS.—Rate of postage, 1*d.*; reply postcards, 2*d.*

REPLY COUPONS.—Coupons exchangeable for stamps of the value of 25 centimes (2½*d.*) each in any country participating in the arrangement can be purchased at any Money Order Office at the price of 3*d.* each for the purpose of prepaying replies to letters. The coupons can be exchanged by the addressees of such letters at the post office of the place of destination for local postage stamps.

PRINTED PAPERS AND COMMERCIAL PAPERS.—The rate of postage on printed papers for all places abroad (except registered newspapers, magazines, and trade journals for Canada and Newfoundland) is ½*d.* per 2 oz., and on commercial papers is 2½*d.* for the first 10 oz. and ½*d.* per 2 oz. thereafter. The limit of size of printed or commercial papers is 2 ft. by 1 ft. for British Colonies or possessions, but for foreign countries in the Postal Union the length is limited to 18 in.

MAGAZINE POST FOR CANADA AND NEWFOUNDLAND

Rates, up to 6 oz., 1*d.*; over 6 oz. but not over 1½ lb., 1½*d.*; ½*d.* each ½ lb. afterwards up to 5 lb. Limit: 5 lb.; 2 × 1 × 1 ft.

SAMPLES.—The rate of postage on sample packets for all places abroad is 1*d.* for the first 4 oz. and ½*d.* per 2 oz. thereafter. The use of the

Sample Post is restricted to (*a*) bona-fide trade samples or patterns of merchandise without saleable value, and (*b*) natural history specimens. Limits of size and weight: 2 ft. × 1 ft. × 1 ft. for British Colonies or possessions; for foreign countries, 12 in. × 8 in. × 4 in.; the weight varies between 4 lb. and 5 lb. (see *Post Office Guide* for countries).

PARCELS.—The sender of a parcel for any place abroad must fill up a Customs declaration. There are two forms in use, one an adhesive form for all British possessions and a few foreign countries, the other a non-adhesive form for all other places abroad. With the latter a despatch note must also be filled up. The sender of a parcel to certain countries and places may take upon himself the payment of the customs and other charges ordinarily payable by the addressee, otherwise they are collected on delivery. Parcels intended to be sent under this arrangement must be handed in at a Head or Branch Post Office. The sender must pay a fee of 6*d.*, sign an undertaking to pay on demand the amount due, and make a deposit. In the case of parcels for Canada, New Zealand, the Union of South Africa, and the United States a deposit of 1*s.* for each 4*s.* or fraction thereof of the value of the parcel, with a minimum deposit of 5*s.*, is required; for any other destination abroad the deposit is 1*s.* for each 10*s.* or fraction thereof. Various articles are prohibited, including letters, except certain British possessions, where one letter may be enclosed.

The rates to foreign countries are:

* The parcel post with the U.S. is carried on by means of two distinct services, namely, an official one with the U.S. Post Office, and a semi-official one maintained through the Agency of the American Express Company. Prepayment of customs cannot be undertaken by sender in the official service. A sender of a parcel by the semi-official service may without extra charge direct that a parcel be sent through the New York Customs House in *bond* for customs examination at any one of the "U.S. ports of entry" or inland custom houses. The addressees of such parcels must, however, make arrangements for the delivery of parcels so treated after they have been cleared at the inland port. Such parcels must be clearly marked by the sender, "In bond to ," naming the inland port chosen; and the same words must also be written by the sender in the same handwriting on the Customs declaration and despatch-note.

IMPERIAL BRITISH PARCEL RATES

The triple rate of 3 lb. 1*s.*, 7 lb. 2*s.*, 11 lb. 3*s.* is in force to Aden, Ascension, Bahamas, Barbados, Bermuda, Brit. E. Africa, Brit. Guiana, Brit. Honduras, Brit. Somaliland, Brunei, Canada, Ceylon, China (British Agencies), Cyprus, Falkland Is., Gambia, Gibraltar, Gold Coast, Grenada, Hong Kong, India, Jamaica, Leeward Is. (Antigua, Dominica, Montserrat, Nevis, St. Kitts, Tortola), Malay States, Malta, Mauritius, Morocco (Brit. P.O. agencies), Newfoundland, New Zealand, North Borneo, Persia (Indian P.O. agencies), St. Helena, St. Lucia, St. Vincent, Sarawak, Seychelles, Sierra Leone, Straits Settlements, Tobago, Togoland, Trinidad, Turks and Caicos Is., Uganda,

and Zanzibar. To Nigeria the rate is 3 lb., 1*s.* 6*d.*; 7 lb., 2*s.* 6*d.*; 11 lb., 3*s.* 6*d.*; to Nyasaland, 3*s.*, 4*s.*, 5*s.*; to Fiji the rates for 3, 7, and 11 lb. are 1*s.* 8*d.*, 3*s.* 4*d.*, and 5*s.*; to Australia, not over 1 lb., 1*s.*, for every additional lb., 6*d.* each lb.; to British South Africa (Cape of Good Hope, Natal, Orange Free State, and Transvaal), for each lb. or fraction thereof up to 11 lb., 9*d.*; to British Solomon Is. and Papua, not over 1 lb., 1*s.* 2*d.*, for each additional lb. up to 11 lb., 10*d.*

To most countries the maximum length, breadth, or depth is 3 ft. 6 in., or length and girth combined 6 ft. Parcels for Canada, however, must be limited to 2½ ft. in length, unless they are such articles as umbrellas, golf clubs, etc. Parcels to New Zealand over 4 ft. in length are 1*s.* extra. To Abyssinia, the Argentine, Brazil, Cuba, Mexico, Paraguay, and France and Italy and their colonies, the maximum length is 2 ft. and length and girth combined 4 ft. In most cases parcels of umbrellas, golf clubs, etc., may be longer. Parcels may be insured at varying sums, according to the country to which they are sent, the limit in many countries being £400, in others no more than £50 or £20. The rate is 4*d.* for £12, and 2*d.* for every additional £12 up to 5*s.* 10*d.* for £400. For parcels by the U.S. *semi-official* service the rate is 6*d.* per £12 up to £120. Compensation up to £1 is also given for loss or damage of uninsured parcels to certain British possessions and foreign countries. Articles of gold and silver, precious stones, jewellery and other like articles may be sent in the letter mails as "*insured boxes*" to Belgium, Denmark, Egypt, France, Holland, Italy, Montenegro, Norway, Portugal, Rumania, Switzerland. Postage 1*s.* to 3*s.* The minimum insurance fee is 4*d.*, and the "insured box" must not exceed 2 lb. nor be more than 12 × 4 × 4 in. The box must be made of metal or wood.

CASH ON DELIVERY.—Service exists between the U.K. and Bahamas (Nassau), Barbados, Bermuda, British Guiana, British Honduras, Cayman Is., Cyprus, Egypt, Fiji Is., Gambia, Gibraltar, Grenada, Hong Kong, Jamaica, Leeward Is., Malta, Morocco (British Agencies), Nyasaland (certain towns), Rhodesia (Southern), St. Lucia, St. Vincent, Sarawak, Seychelles, Somaliland (British), Straits Settlements, Trinidad and Tobago. Limit of collection, £20. Delivery fees charged in U.K., £5, 4*d.*; £10, 6*d.*; £15, 9*d.*; £20, 1*s.*, exclusive of the commission on the M.O. or P.O. by which the remittance is made; in the above countries, according to a scale, *e.g.* £1, 3*d.* to 1*s.* 1*d.*; £5, 1*s.* to 4*s.* 4*d.*; £10, 2*s.* to 8*s.* 6*d.*; £20, 3*s.* 9*d.* to 17*s.*

INTERNATIONAL EXPRESS SERVICE.—Delivery is made by special messenger of correspondence to or from certain British Possessions and foreign countries. The charge is 3*d.* in addition to the postage; 5*d.* in case of parcels. The full fee is collected from the addressee.

MONEY AND POSTAL ORDERS

MONEY ORDERS, INLAND.—Rate of poundage for sums not exceeding £1, 2*d.*, £3, 3*d.*, £10, 4*d.*, £20, 6*d.*, £30, 8*d.*, £40, 10*d.* £40 is the limit of amount issued. Money may be transmitted by telegraph money order from any money order office in the U.K. which is also a despatching office for telegrams, and may be made payable at any money order office which is also an office for the delivery of telegrams. Charge, money office poundage at ordinary rate for money orders, plus a supplementary fee of 2*d.*, plus charge for official telegram of advice at ordinary rate of inland telegrams. Advice of payment may be obtained for a fee of 2*d.*, and in the case of foreign or colonial orders, for 2½*d.* Payment may be deferred for a period not exceeding ten days, or for a fee of 4*d.* payment may be stopped.

FOREIGN AND COLONIAL MONEY ORDERS are issued at a poundage of 3*d.* for £1, 6*d.* for £2, 9*d.* for £4, and 3*d.* for each additional £2 up to £40. They are valid in most cases for 12 months after the month of issue. Some countries have £10, £20, and £30 limits. *Telegraph Money Orders Abroad* are issued at ordinary rate for foreign money orders, plus a supplementary fee of 6*d.* for each order, plus charge for telegram of advice at ordinary rate for telegrams addressed to the country of payment.

POSTAL ORDERS are issued for amounts of 6*d.*, 1*s.*, 1*s.* 6*d.*, 2*s.*, 2*s.* 6*d.*, 3*s.*, 3*s.* 6*d.*, etc., up to 15*s.* at 1*d.* poundage; from 15*s.* 6*d.* to 21*s.* at 1½*d.* poundage. Stamps not exceeding 3 in number may be affixed up to a value of 5*d.*, but odd halfpence will not be paid. If an order is not paid within 3 months from last day of month of issue, a commission equal to original poundage will be charged; if not paid within 6 months, the order must be sent to the Controller of the Money Order Department, London, with a request for payment at some specified office. Postal orders are issued and paid to most British possessions except Australia (unless when issued to soldiers) and Canada (where, however, they are paid).

TELEGRAMS

INLAND TELEGRAMS are charged 9*d.* for the first 12 words, and ½*d.* for every additional word. This charge includes delivery within 3 miles of the office nearest the address; beyond that limit the charge is 3*d.* a mile. The cost of a reply, not exceeding 48 words, may be prepaid. The reply form may be used at any time within 12 months, or its value refunded. An abbreviated address may be registered for a fee of £1.1.0 a year. Telegrams, of which the accuracy is doubted, can be repeated for a fee of half the amount paid for transmission. A certified copy of a telegram can be obtained for 3*d.* Forms with embossed stamps are sold singly, or in books of 20, interleaved with a sheet of carbonic paper, price 15*s.* 2*d.* Most telegraph offices are closed between 7 p.m. and 9 a.m., but certain offices are open from 8 a.m. to 8 p.m. Telegrams may be accepted at an office after the usual hours on payment of 1*s.* for the postmaster, 1*s.* for the telegraphist, 1*s.* for a messenger, if one be required to call the telegraphist. *Night telegraph letters* for delivery by the first post next morning may be sent at a rate of 9*d.* for 36 words or less, and ½*d.* for every 3 words beyond 36. *Multiple address telegrams* will be delivered at two or more addresses in the same free delivery at a charge of 3*d.* for every copy beyond the first. *Abbreviated addresses* may be registered on payment of a fee of £1.1.0 a year.

With the exception of words ordinarily written as one, or coupled by hyphens, as "mother-in-law," "forty-seven," "warehouse-man," no combination of words is counted as one word. Such names as De la Rue, St. Pancras are charged as single words, but double names like Bouverie-Tracy, although written with a hyphen, are counted as two words. Such abbreviations as don't are single words. Figures are counted at the rate of five figures to a word; fractions according to the number of figures, 2¾ is one word but 109¾ two. Initial letters are each counted as one word, but the initials of the London Postal Districts (*e.g.* S.W.) are only one word, as are the letters P.M. and A.M. All names of towns and villages in the U.K. are counted as one word, irrespective of the number of words of which they are composed.

FOREIGN AND COLONIAL TELEGRAMS must be

written on special forms. Receipts for same can be obtained for 1*d.*, or a certified copy from the secretary, General Post Office, for 5*d.* Telegrams in plain language for places abroad must be written in self-explanatory English or French. Telegrams written in one of the authorised codes may be forwarded to places in British or Allied territory outside Europe, and with certain exceptions to places in the territory of neutral states outside Europe. A reply of any length can be prepaid, with a minimum of 10*d.* "Deferred" telegrams (plain language only) may be sent at half rates to the British Oversea Dominions and other extra-European places, on condition that they may be deferred during transmission for not more than 24 hours in favour of full-rate traffic. Night and week-end letter telegrams can be sent to and from places in North America, and also to various other places. The rates for foreign telegrams (minimum 10*d.*) are per word, *European:* Albania, 6*d.*; Algeria, 2½*d.*; Azores, 9*d.*; Belgium, 2*d.*; Canary Is., 5*d.*; Denmark, 2½*d.*; Faroe Is., 4*d.*; France, 2*d.*; Germany, 2*d.*; Gibraltar, 3*d.*; Greece, 5½*d.*; Greek Is., 6*d.* (Crete, 5½*d.*); Holland, 2*d.*; Iceland, 5½*d.*; Italy, 2½*d.*; Malta, 4*d.*; Montenegro, 7*d.*; Morocco, 4*d.*; Norway, 2½*d.*; Portugal, 3*d.*; Rumania, 5*d.*; Russia, 4½*d.*; Serbia (*susp.*); Spain, 3*d.*; Sweden, 2½*d.*; Switzerland, 2½*d.*; Tunis, 2½*d.*; West African French Colonies, 1*s.* 4½*d.* *Extra-European:* Abyssinia, 1*s.* 7*d.*; Aden, 2*s.*; Annam, 3*s.*; Argentine, 2*s.* 9*d.*; Ascension, 2*s.* 6*d.*; Australia, 3*s.*; Bahamas, 2*s.* 5*d.*; Bermuda, 2*s.* 6*d.*; Bolivia, 2*s.* 9*d.*; Brazil, 2*s.* 7*d.*; Brit. Cent. Af. (Nyasaland), 2*s.* 11*d.*; Brit. E. Af., *see* E. Africa; Brit. Guiana, *see* Guiana, Brit.; Brit. Honduras, *see* Honduras, Brit.; British New Guinea, 3*s.* 2*d.*; Brit. N. Indies, 3*s.* 2*d.*; E. Af. (Brit.), 2*s.* 9*d.* (Brit. Somaliland, 2*s.* 6*d.*; Zanzibar, 2*s.* 6*d.*); E. Africa, Portuguese, 2*s.* 8*d.*; Ecuador, 2*s.* 9*d.*; Egypt (Alexandria, 1*s.*, Suakim, 1*s.* 4*d.*, other places, 1st region, 1*s.*, 2nd, 1*s.* 1*d.*, 3rd, 1*s.* 4*d.*); Falkland Is., 2*s.* 11*d.*; Federated Malay States, *see* Malay Penin.; Fiji Is., 2*s.* 8*d.*; French Somali, 2*s.* 3*d.*; Guatemala, 3*s.* 1*d.*; Guiana (British), 2*s.* 6*d.*, (Dutch), 6*s.* 9*d.*, (French), 6*s.* 3*d.*; Honduras (Brit.), 2*s.* 6*d.*, (Repub.), 3*s.* 4*d.*; Hong Kong, 3*s.* 6*d.*; India, 1*s.* 8*d.*; Japan, 3*s.* 11*d.*; Liberia, 4*s.*; Madagascar, 2*s.* 8*d.*; Madeira, 1*s.*; Malay Penin., 2*s.* 10*d.*; Mauritius, 2*s.* 6*d.*; Mexico, 2*s.* 1*d.*; Newfoundland, 1*s.*; New Zealand, 2*s.* 8*d.*; Nicaragua, 3*s.* 4*d.*; Panama, 3*s.* 2*d.*; Paraguay, 2*s.* 9*d.*; Perim, 2*s.*; Persia (Bushire, 1*s.* 9*d.*, other places, 1*s.* 6*d.*); Peru, 2*s.* 9*d.* (except Iquitos, Masisea, Orellana, Requena, 3*s.* 9*d.*); Philippine Is. (Manilla), 3*s.* 6*d.* (other places, 3*s.* 9*d.*); Port. E. Af., 2*s.* 8*d.*; Réunion, 2*s.* 8*d.*; St. Helena, 2*s.* 6*d.*; Salvador, 3*s.* 4*d.*; Sandwich Is., 2*s.* 7*d.*; Seychelles Is., 2*s.* 6*d.*; Sierra Leone, *see* W. Af.; Siam, 2*s.* 10*d.*; Somaliland, 2*s.* 6*d.*; South Africa, British, 2*s.* 6*d.* (Rhodesia, N., 2*s.* 8*d.*, S. 2*s.* 8*d.*); United States (New York, 1*s.*; other States, 1*s.* 1*d.* to 1*s.* 6*d.*); Uruguay, 2*s.* 9*d.*; Venezuela, 5*s.*; West Africa (Bathurst, 3*s.* 2*d.*; Gold Coast, 4*s.*; Nigeria, 4*s.* 4*d.*, 4*s.* 6*d.*; Sierra Leone, 3*s.* 2*d.*); West Indies (Antigua, Barbados, Dominico, Grenada, Jamaica, St. Kitts, St. Lucia, St. Vincent, Tobago, Trinidad, 2*s.* 6*d.*; Cuba, 1*s.* 8*d.* to 1*s.* 10*d.*; Haiti, 4*s.* 4*d.* to 6*s.* 5*d.*; Martinique, 4*s.* 9*d.*; St. Thomas, 3*s.* 1*d.*).

Canada (Alberta, 1*s.* 6*d.*; New Brunswick, 1*s.*; Manitoba, 1*s.* 5*d.*; Ontario, 1*s.*; Quebec, 1*s.*; Saskatchewan, 1*s.* 6*d.*; British Columbia, 1*s.* 6*d.* to 3*s.* 2*d.*).

WIRELESS TELEGRAMS (radio-telegrams). Special regulations are in force during the war. No private radio-telegrams can be accepted for transmission to or from ships through coast stations in the United Kingdom. They can, however, be accepted for transmission through coast stations abroad, so far as these are available. The usual charge to an ocean liner is 10½*d.* a word, but there are lower rates to vessels making short voyages. *Long-distance communication* (up to about 1,500 miles) can be established with certain ships by the Marconi station at Poldhu. The charge is 2*s.* 6*d.* a word, plus the ship charge, usually 4*d.* a word. Such radio-telegrams must bear the name of the station "Poldhu" in the address. The Poldhu station only communicates with ships at night.

TELEPHONES

In accordance with an agreement entered into by the Government in 1905, the State took over from Jan. 1, 1912, the whole business of the National Telephone Company. Previously to the year 1912 the *National Telephone Company*, which was an amalgamation (completed in 1889) of various companies formed to develop the telephone industry of the country, conducted the greatest part of the telephone business in the United Kingdom in local areas under licence from the Postmaster-General, but the *trunk lines* connecting the various areas together were, in accordance with the Telegraph Act of 1892, worked by and were the property of the Postmaster-General.

In 1914 Portsmouth, which was the only municipality working telephones, transferred its undertaking to the Post Office. Hull, on the other hand, determined to work a system of its own.

Telephonic communication can be obtained between London and the principal provincial towns in England and Scotland, as far north as Aberdeen. Previous to the war London and certain provincial towns in England could also communicate with certain provincial towns in France, as well as with Brussels and certain provincial towns in Belgium. Communication could also be obtained between Post Office call offices and subscribers' stations in Inner London and Bâle, Geneva and Lausanne in Switzerland. The fees were: 3-minute calls in United Kingdom and France, 4*s.*, 6*s.*, 8*s.*, 10*s.*, or 12*s.*, according to distance; 3-minute calls United Kingdom and Belgium, 8*s.*; 3-minute calls London and Switzerland, 7*s.* 6*d.* A new four-wire telephone cable, fitted with inductance or loading coils, which are designed to minimise the attenuation and distortion of speech transmitted through the cable, is now in operation. This improvement has considerably extended the area over which submarine telephonic communication is practicable; the longest submarine cable laid is that between Nevin, in Carnarvonshire, and Howth, near Dublin, completed in Dec. 1913. It has a length of 64 nautical miles (nearly 74 miles). It will, however, be surpassed by the new Anglo-Dutch cable between Aldeburgh and Walcheren, which will have a length of 79 nautical miles.

TRUNK LINES.—The fees for the use of the trunk lines for a 3-minutes conversation are:

For	25 miles or under	4*d.*
"	50 " "	8*d.*
"	75 " "	1*s.* 0*d.*
"	100 " "	1*s.* 4*d.*
"	every additional 40 miles or fraction thereof	8*d.*

By prepaying a double fee the conversation may be extended to 6 minutes. Between 7 p.m. and 7 a.m. and during week-days when the traffic is light, *e.g.* before 9 a.m., between 1 and 2 p.m., and 5 and 6 p.m., reduced charges may be obtained for one or more quarter-hour periods.

LONDON TELEPHONE SERVICE (The Controller, London Telephone Service, 144A Queen Victoria St., E.C.). The rates of subscription are: (1) Ordinary Message-rate Service, *annual subscription* for connection with any exchange within 2 miles of the subscriber's premises, £5. *Message fees*, one penny for each call in the county of London, twopence for each call outside the county of London. The minimum yearly amount payable by each subscriber for message fees is 30*s.* (2) Party-line Message-rate Service, *annual subscription* by means of a line used by not more than two subscribers, £3, minimum yearly amount for message-fees payable by each party-line subscriber, £3. (3) Unlimited Service, *annual subscription*, for the first line, £20; for each additional line, £17. (4) Extension Lines, *additional annual subscription*, for a circuit not more than 110 yards in length in the same premises, 30*s.*; for a circuit not more than a quarter-mile in length, connecting the subscriber's offices in different premises, £4.

CALL-OFFICE FEES (subscribers or otherwise), 3*d.* for a 3-minutes' conversation.

INTESTATES' ESTATES

The **real estate** of an intestate descends in accordance with common law rules as modified by 3 & 4 Wm. IV, c. 106 and 23 & 24 Vict. c. 35 to the heir-at-law, customary heir or heirs, heir-in-tail, or legal personal representatives.

Copyhold or customary freehold land descends in accordance with the custom of the manor of which it is held, and may or may not be subject to a claim by the widow for freebench.

Gavelkind land, which is found chiefly in Kent, descends to all the sons equally.

Land held under the custom of *borough English*, which exists in some ancient towns and manors, descends to the youngest and not the eldest son.

The husband of a married woman, in addition to his marital right in respect of her personal property, is entitled as tenant by the curtesy during his life to her real estate if he has had a child by her born alive and capable of inheriting it.

The widow of an intestate, in addition to her share in his personal property, is entitled as tenant-in-dower during her life to one-third of his real estate, but this right can be defeated in so many ways, including a mere declaration by the husband, that it is almost obsolete.

Persons connected by affinity or marriage only, such as a mother-in-law or stepmother, may become entitled as heir-at-law of the person last entitled, but otherwise they do not take any share.

A posthumous child may inherit, but takes only as from the date of birth. An illegitimate child cannot inherit land from its reputed parent, but may be heir-at-law to its child or other issue.

DESCENT since Dec. 31, 1833, of a freehold estate in fee simple, not being trust or mortgage estate, subject to the right of the legal personal representatives (executors or administrator) to hold the land until all debts are paid and the estate is fully administered, and subject to the right of the widow in certain cases to £500 and of the real and personal property rateably.

If the owner leaves—	*The estate descends as to—*
1. Widow and no heir- at-law . . .	One-third to widow for life if her right to dower has not been barred, and subject to her claim the whole to Crown or mesne lord if any.
2. Widow and blood relations . . .	One-third to widow for life if her right to dower has not been barred, and subject to her claim the whole to heir-at-law of the husband or if he took otherwise than by purchase to the heir-at-law of the last purchaser.
3. Husband and no heir-at-law . . .	Husband takes the whole for life if he has had by the intestate a child born alive and capable of inheriting the land. On his death the Crown or mesne lord if any takes the whole.
4. Husband and blood relations . . .	Husband takes the whole for life subject to the same condition as to birth of a child capable of inheriting. On his death the heir-at-law of the wife or if she took otherwise than by purchase the heir-at-law of the last purchaser takes the whole.

RULES FOR ASCERTAINING THE HEIR-AT-LAW

1. Descent is traced in the first instance from the last purchaser, *i.e.* the person who last acquired the land otherwise than by descent or any escheat, partition, enclosure, or other process of law, which caused the descent to be traced by reference to that of other land.

2. The last owner is assumed to be the purchaser unless the contrary is shown.

3. The lineal descendants *ad infinitum* of the person from whom descent is traced represent their ancestor and must be exhausted before a younger and more distant relative can take.

4. The elder of two males in equal degree of the whole blood takes in preference to the younger, and males in preference to females of the same degree, except in the case of a female collateral relation of the whole blood, who takes in preference to a male collateral of the half blood.

5. Where two or more of the male issue are of equal degree of relationship to the person from whom descent is traced, the eldest only will take, but females take all together as coparceners.

6. If there is no child or other issue living of the last purchaser the inheritance descends to his father, and if he is dead descent is traced from him in accordance with the previous rules as if he was the purchaser.

7. A kinsman or relation of the half blood is capable of being heir and inherits next after a relation in the same degree of the whole blood and his children or issue where the common ancestor is a male and next after the common ancestor where such ancestor is a female.

8. If the father is dead and has no child or other issue living the inheritance descends to the paternal grandfather, and if he is dead descent is traced from him in accordance with the previous rules as if he was the purchaser.

9. On failure of the paternal grandfather and his issue the inheritance descends in the same manner to the paternal great-grandfather and his issue, and so to all the male paternal ancestors in succession and their issue.

10. On failure of all the male paternal ancestors and their issue the right of inheritance falls to the female paternal ancestors and their issue in succession, the mother of the more remote male paternal ancestor or her descendants taking in preference to the mother of a less remote ancestor and her descendants.

11. On failure of all the paternal ancestors male and female and their *issue*, the right of inheritance falls to the mother of the purchaser and her issue, and on failure to her male paternal ancestors in succession and their issue, the nearer ancestor and his issue taking in preference to a more remote ancestor and his issue.

12. On failure of all the male maternal ancestors and their issue the right of inheritance falls to the most remote female maternal ancestor and her issue, and in default to the other female maternal ancestors and their issue in succession, the more remote ancestor and her issue taking in preference to a nearer ancestor and her issue.

13. If there is no heir of the last purchaser descent is traced from the person last entitled as if he or she had been the purchaser.

In case of the death of an intestate before Jan. 1, 1834, the following rules applied:

1. Descent was traced from the person last seised of the land in question and not from the last purchaser.

2. No ancestor of the intestate could inherit.

3. Brothers and sisters of the intestate inherited directly from him or her without tracing descent from the common ancestor.

4. No relation of the half blood could take by inheritance from the intestate.

5. If the title which the person from whom the descent was to be traced had at his death was by descent from his mother, the land on failure of the maternal heirs would not descend to heirs on the paternal side but would escheat to the Crown.

EXAMPLES OF ABOVE RULES

If intestate leaves only—	*The heir-at-law is by preference—*
1. Father and son	1. Son. 2. Father.
2. Father, brother, and grandfather	1. Father. 2. Brother. 3. Grandfather.
3. Father, daughters, and son's child	1. Son's child. 2. Daughters equally. 3. Father.
4. Father, daughters, and son	1. Son. 2. Daughters equally. 3. Father.
5. Father, grandfather, and sister	1. Father. 2. Sister. 3. Grandfather.
6. Brother of half blood and sister of whole blood	1. Sister. 2. Brother.
7. Father's father and mother's father	1. Father's father. 2. Mother's father.
8. Mother and father's brother	1. Father's brother. 2. Mother.
9. Mother and brother	1. Brother. 2. Mother.
10. Mother and sisters	1. Sisters. 2. Mother.
11. Mother's brother and father's brother	1. Father's brother. 2. Mother's brother.
12. Father's maternal ancestor's descendant and mother	1. Father's maternal ancestor's descendant. 2. Mother.
13. Father's maternal ancestor's descendant and mother's paternal ancestor's descendant	1. Father's maternal ancestor's descendant. 2. Mother's paternal ancestor's descendant.
14. Mother, mother's son by another marriage, and father's daughter by another marriage	1. Father's daughter. 2. Mother. 3. Mother's son.
15. Mother, mother's father, and mother's grandfather	1. Mother. 2. Mother's father. 3. Mother's grandfather.
16. Brother's daughter and sister's son	1. Brother's daughter. 2. Sister's son.
17. Brother and grandfather's sisters	1. Brother. 2. Grandfather's sisters equally.

DISTRIBUTION OF INTESTATES' PERSONAL PROPERTY

The distribution of pure *personal property*, not including land, is regulated by the law of the country in which the intestate was domiciled at death.

The laws of England laid down by the Statutes of Distribution (22 & 23 Chas. II, c. 10, and 1 Jas. II, c. 17, § 7) as varied by the Intestates' Estate Act 1890 (53 Vict. c. 29) provide for the distribution of an intestate's personal property, including leaseholds, among the husband, wife, issue, and next-of-kin subject to the following rules:

The surviving husband, if any, takes his wife's personal property by marital right, unless deprived by a separation or protection order.

If there is no surviving husband, the issue of a female intestate are entitled, and if there is no issue the next-of-kin take.

The widow of an intestate dying in Great Britain or Ireland without issue takes £500 from his real

and personal estate rateably before distribution. She is entitled to one-third of the remaining personal property if her husband left issue and to one-half if he left no issue.

Children of the intestate take in preference to grandchildren or remoter issue, and the children of any deceased child take the share to which their parent would have been entitled if living.

Posthumous children share equally with their brothers and sisters. Illegitimate children take no share. Children of the half blood share equally with those of the whole blood.

Children of a deceased child or of a deceased brother or sister take in equal shares the portion which their parent would have taken if living.

Degrees of kinship to the intestate are reckoned by the civil law under which both upwards and downwards each generation counts for one degree. Thus from parent to child or vice versa is one degree, from grandparent to grandchild or vice versa are two degrees, and from brother or sister to brother or sister are also two degrees, viz. from the intestate upwards to the parent one and from the parent to the other brother or sister another degree.

Children of the intestate and their issue take in preference to an ancestor and issue of such ancestor, though they are in the same degree of relationship.

When all the issue or next-of-kin are in the same degree of relationship to the intestate they take *per capita*, *i.e.* altogether in equal shares, but if the intestate leaves a child or children and the issue of a deceased child, or a brother or sister and the issue of a deceased brother or sister, the persons entitled take *per stirpes*, *i.e.* the issue of the deceased child or of the deceased brother or sister take between them equally the share only which their parent would have taken if living.

The right of the widow may be barred by the provisions of her marriage settlement.

Every gift made by way of advancement by portion to any child of the intestate must be brought into account before such child or its issue can take any share. This is called bringing the portion into hotchpot and does not apply to real estate taken by the heir-at-law or to gifts for maintenance, education, apprenticeship, or amusement, or to small annual or other presents, or to gifts from a mother.

Strangers in blood, *e.g.* a mother-in-law, stepmother, or other relations of the husband or wife of the intestate, though related by affinity, take nothing.

EXAMPLES OF DISTRIBUTION OF PERSONAL PROPERTY

If an intestate leaves—	*The property is distributed*—
1. Widow only	One-half to widow, one-half to Crown.
2. Widow and child or children	One-third to widow, two-thirds to child or children equally.
3. Widow, child or children and grandchild of deceased child	One-third to widow, two-thirds to child or children and grandchild *per stirpes*.
4. Widow and grandchildren; no living child	One-third to widow, two-thirds to grandchildren.
5. Widow, child, father, and brother	One-third to widow, two-thirds to child.
6. Widow, father, and grandchild	One-third to widow, two-thirds to grandchild.
7. Widow, father, and brother	One-half to widow, one-half to father.
8. Widow, mother, three brothers and sisters and two nieces (children of deceased brother)	One-half to widow, one-fifth to mother, one-fifth to each brother and sister, and one-tenth to each niece.
9. Widow, mother, and nephews and nieces (children of deceased brother)	One-half to widow, one-quarter to mother, one-quarter between nephews and nieces equally
10. Widow and mother	One-half to each.
11. Grandmother, brothers, and sisters; no child or parent	Equally between brothers and sisters.
12. Grandmother, uncles and aunts	All to grandmother.
13. Paternal grandfather and maternal grandmother	One-half to each.
14. Two aunts, nephew and niece (children of deceased brother)	One-quarter to each.
15. Widow of deceased son and husband of deceased daughter (no other relation)	All to Crown.
16. Nephews, nieces, and child of deceased nephew or niece	Equally between surviving nephews and nieces.
17. Brother and children of deceased sister	One-half to brother, one-half equally between children.
18. Husband and child or children	All to husband, unless he has forfeited his right under a separation or protection order.
19. Mother, but no other relation	All to mother.
20. Great-grandfather, uncles and aunts	Equally between all.
21. Uncle or aunt and deceased uncle's child	All to uncle.
22. Brother's children and half sister's children	Equally between all.
23. Cousins and child of deceased cousin	All to cousins equally.

LETTERS OF ADMINISTRATION

For the purpose of administering and distributing the estate, letters of administration are granted, by the Probate Division of the High Court of Justice, or where the estate does not exceed £100 by the County Court. The Court has a discretion as to the person to whom the grant is made, but unless there is reason to the contrary letters will be granted to (a) the husband or wife of the deceased, (b) a child or lineal descendant to the remotest degree; or in default of descendants (c) a parent, (d) a brother or sister, (e) a grandfather or grandmother, (f) an uncle or nephew, (g) a great-grandfather or great-grandmother, (g) a cousin; or if all next-of-kin refuse administration a creditor of the intestate; and lastly any person whom the Court may select.

LEGAL INFORMATION

ABOUT VARIOUS IMPORTANT MATTERS

Births

Every birth must be registered within 42 days personally with the registrar, and notice must also be sent by post within 36 hours from the birth to the district medical officer of health.

The particulars required by the registrar are (1) date and place of birth; (2) name if any and sex of child; (3) name, surname, rank, profession or occupation of father; (4) name and maiden surname of mother; (5) signature, description, and residence of informant; (6) date of registration; (7) signature of registrar; and (8) if the birth was at sea, the nationality and last abode of father and mother.

The father or person in attendance on the mother must send the notification, and the persons responsible for registration are (1) the parents, (2) the occupier of the house where the birth took place, (3) a person present at the birth, or (4) the person having charge of the child. The information required for registration must be given by word of mouth and the register must be signed by the informant. There are penalties attached for failure to register or send the necessary notification.

On failure to register within 42 days, the registrar may require the attendance of any defaulter at a given time and place. Failure to comply may be punished by a fine of 40*s*.

The registrar may at the written request of any person liable register the birth at the residence of the person making the request or at the house where the child was born and is then entitled to a fee of 1*s*. Otherwise the registration is free when it takes place within the specified period of 42 days (21 days in Scotland).

After 3 months no registration can be made except in the presence of the superintendent registrar and on payment of fees amounting to 5*s*.

The Registrar-General's express authority must be obtained for any registration after 12 months and further fees amounting to 10*s*. must be paid. After 7 years this authority will not be given.

Registers of baptism are not legal evidence of the date of birth, though they are sometimes accepted informally if the date of birth was entered at the date of registration and noted on the certificate.

A certified extract from the parochial registers or from the general register established by 6 & 7 Wm. IV, c. 86, as amended by 1 Vict. c. 22, though the parochial registers are not as a rule evidence of the time, place, or order of birth, is accepted as evidence of the facts mentioned in it. The certificate of a district registrar is not strictly evidence, but is now generally received as such.

Birth certificates under the statutory provisions may be obtained in England from the Registry Office at Somerset House and in Scotland from the Registrar-General in Edinburgh.

Attested copies of French registers kept according to French law and accepted as evidence in French courts are evidence of births in France.

The particulars required on the registration of birth of an illegitimate child do not include any reference to the reputed father, unless he consents and signs the register.

An Index of Births since Aug. 17, 1836, is kept at Somerset House, and may be examined on payment of a fee of 20*s*. for a general search, 1*s*. for a particular search.

British Subjects

The following are British subjects by birth since Jan. 1, 1915.

(*a*) Any person born within His Majesty's dominions and allegiance. Birth within allegiance includes birth at any place where His Majesty exercises jurisdiction over British subjects.

(*b*) Any person born out of His Majesty's dominions whose father was then a British subject and either was born within His Majesty's allegiance or had received a certificate of naturalisation.

(*c*) Any person born on board a British ship in any place.

Birth on board a foreign ship in British territorial waters does not alone constitute a British subject.

All naturalised aliens are British subjects owing allegiance to the Crown, and enjoying in Great Britain and Ireland all the rights and privileges and subject to the duties and liabilities of British subjects by birth, unless expressly excepted by law.

Naturalisation of Aliens

It is probable that in the immediate future some restriction will be placed on the naturalisation of aliens, which is generally recognised as unduly lax, either by prohibition directly imposed on certain countries by name or more generally on countries which allow their subjects to maintain a double allegiance.

At present the law is laid down in an Act of 1914 (4 & 5 Geo. V, c. 17), which consolidated and amended the previous law as from Jan. 1, 1915.

Any alien who has resided in the United Kingdom for not less than one year immediately preceding the application and has previously resided in any part of His Majesty's dominions for four years during the last eight years before the application, may apply to the Secretary of State (the Home Secretary) at the Home Office, Whitehall, London, for a certificate of naturalisation. Instructions can be obtained free of cost at the Home Office.

The applicant must produce satisfactory evidence that—

(*a*) he has either resided within His Majesty's dominions for not less than the qualifying period of five years or that he has within the last eight years before the application been for not less than five years in the service of the Crown;

(*b*) he is of good character and has an adequate knowledge of the English language; and

(*c*) he intends to reside in His Majesty's dominions or to enter or continue in the service of the Crown.

The Secretary of State has an absolute discretion in granting or refusing the application, and there is no appeal from his decision. He has also power to accept four years' residence or five years' service as a qualification, although not within the eight years' limit.

A woman formerly a British subject may on the death of her alien husband or dissolution of her marriage with him recover her rights as a British subject on application without fulfilling the conditions as to residence.

The effect of a certificate when granted is to give to the person naturalised all the rights, powers, and privileges of a natural-born subject as from the date of the grant, but subject to the corresponding obligations, duties, and liabilities.

In cases of doubtful nationality special certificates may be granted to quiet the doubts.

Children under 21 may receive certificates of naturalisation either with their parents or in special cases separately, and in the former case may within a year after attaining 21 make a declaration of alienage and cease to be British subjects. No person other than the children mentioned above who is under disability may be naturalised. Aliens previously naturalised may receive certificates on such terms and conditions as the Secretary of State may think fit. Certificates may be revoked for fraud or misrepresentation and ordered to be given up and cancelled, under a penalty not exceeding £100 for disobedience. Similar certificates may be granted by the Governments of British possessions. In such a case any language recognised as on an equality with the English language may be substituted as part of the qualifications, and the grant shall be submitted to the Secretary of State for his approval or rejection.

The self-governing Dominions are not bound to recognise a certificate granted elsewhere, until their legislatures have adopted the Act, and they may at any time rescind their adoption of it.

Married Women and Infants

A wife takes the nationality of her husband, so that a female British subject marrying an alien becomes an alien and a female alien marrying a British subject becomes a British subject. The wife of a man ceasing to be a British subject may remain a British subject by making a declaration of her desire. The death alone of the husband does not alter the nationality of his widow, who, if she was a British subject before her marriage, must make an application as stated above before regaining British nationality.

Children under 21 follow the nationality of their father, and if he ceases to be a British subject they also become aliens, unless by the law of the new nationality they are not naturalised in that country or elsewhere.

The marriage of a widow being a British subject with an alien does not affect the nationality of her children by the former husband and they remain British subjects, whether residing within His Majesty's dominions or not. They may, however, cease to be British subjects on other grounds.

Any child whose father has so ceased to be a British subject may resume his British nationality by making a declaration to that effect within one year after attaining majority.

A British subject not under disability who becomes naturalised in a foreign country ceases to be a British subject.

A natural-born British subject who during his minority became also a subject of a foreign State and a natural-born British subject born out of H.M. dominions may, if of full age and not under disability, cease to be a British subject by making a declaration of alienage.

Conventions may be made with foreign States to enable naturalised subjects to divest themselves of their status as such subjects, and after an Order in Council announcing any such convention naturalised British subjects of the State may during the period provided in the convention make a declaration of alienage and shall be regarded as a subject of the State to which they originally belonged.

A declaration of alienage is not retrospective so as to discharge any previous obligation, right, or liabilities as a British subject.

Aliens may take, hold, and dispose of any property, real or personal, and title may be derived from or through them as if they were natural-born British subjects, with exceptions as to—

(1) holding property out of the U.K.;

(2) being qualified for any office or municipal, parliamentary, or other franchise;

(3) owning a British ship;

(4) any right or privilege not expressly given by the Act; and

(5) rights or interests under dispositions of property made before May 12, 1870, or any devolution by law on the death before that date of any person.

The Secretary of State may make regulations as to the form and registration of (1) certificates, (2) declarations of alienage or of resumption or retention of British nationality; (3) registration by diplomatic or consular officials of births and deaths of British subjects outside His Majesty's dominions; (4) the time, form, and manner of taking the oath of allegiance and registering the same, and evidence in respect of such oath; (5) transmission to the United Kingdom of particulars and documents; (6) fees to be charged, but in case of resumption of British nationality by the widow of an alien the fee for grant of a certificate shall not exceed 5*s.* and no order as to fees shall be binding in any British possession. Safeguards to protect the rights of the self-governing Dominions and the Acts and Ordinances of other British possessions are provided in the Act.

Provision is also made for evidence of declaration, certificates of naturalisation and entries in registers, and a penalty of imprisonment not exceeding three months is imposed in the United Kingdom for wilful false statements or representations.

A form of oath of allegiance in simple terms is given.

Certificates of Birth, Death, or Marriage

The cost of a certificate of birth, death, or marriage is 2*s.* 7*d.*, and 1*s.* for search if necessary. In the following cases the cost is reduced to—(1) 1*s.* for a certificate required for the purposes of (*a*) the Friendly Societies Act, 1896; (*b*) the Savings Bank Act, 1887; (*c*) the Assurance Companies Act, 1896, and the Trade Unions Amendment Act, 1896 (death of a child under 10 years of age); and (2) 6*d.* for a certificate required for the purpose of (*a*) elementary education; (*b*) the National Insurance Acts 1911 and 1913.

Any such certificate of a birth, death, or marriage since Aug. 17, 1836, can be obtained from the General Registry Office, Somerset House, W.C., on payment of these fees. They can also be obtained for any but strictly legal purposes, *i.e.* as evidence in court, from the registration officer having the legal custody of the registers containing the entry required. Certificates of baptism or marriage by a clergyman of the Church of England can also be obtained from the incumbent of the church where the ceremony was performed.

Copyright

Copyright is regulated by the Copyright Act, 1911 (which came into force July 1, 1912). It is a monopoly created by statute conferring upon the author of any literary, dramatic, musical, or artistic work, and practically without the observance on his part of any legal formality, the sole right to produce or reproduce his work or any part of it, in any form or manner whatever, and in any language, including the right to: (*a*) publish a book; (*b*) perform a dramatic or musical piece; (*c*) deliver a lecture, sermon, speech, address; (*d*) dramatise a novel; (*e*) "novelise" a

drama; (*f*) make any contrivance for the production of sound, or pictures, such as a "record," perforated roll, cinematograph film; and (*g*) to authorise any of these acts.

It will thus be seen that the mere act of writing a story or musical score, painting a picture, chiselling a sculpture piece, making a photographic negative, etc., is sufficient to endow the author with copyright, provided (1) that the work is original; (2) that, if published, it was first published within some part of His Majesty's dominions to which the Act extends, or in a foreign country being a member of the Copyright Union, or simultaneously within and without; and (3) that, if not published, the author was, at the date of its making, a British subject or resident in the dominion or foreign country aforesaid.

Copyright in *unpublished* works (with the exception of artistic works, other than engravings) subsists in perpetuity. Copyright in drawings, paintings, etc., whether published or not, ceases fifty years after the author's death. Copyright in *published* works, with the above exception, subsists for the life of the author and for a period of fifty years after his death. In the case of posthumous works (with the exception of drawings, paintings, etc.) the right subsists till publication and for fifty years thereafter. In the case of photographs, "records," and perforated rolls, the right subsists for fifty years from the making of the original plate from which the photograph, etc., was directly or indirectly derived.

Limitation of Time and Compulsory Licence.—After thirty years in the case of a published work, or after twenty-five years in the case of a work not yet published at the date of the Act, from the date of the death of the author, any person may publish the work on giving due notice of his intention to do so and paying to the owner of copyright 10% royalty of the published price.

Ownership of an unpublished manuscript after the death of its author is *prima facie* proof of ownership of the copyright in it. The author of a work is the first owner of copyright therein unless the work (*e.g.*, a photograph or engraving) has been made for valuable consideration or the person making it is employed by another under contract of service in the course of which employment the work was made.

The owner of copyright may assign it either wholly or partially, generally or subject to limitations to a particular country, for the whole term of copyright or for any portion of it, and may grant or retain an interest in the right by licence. *Publication* means simply the issue of copies to the public, but the issue of photographs or engravings of sculpture or architectural works of art is not a publication of such works, nor, for the purposes of the Act, is the performance of a play, the delivery of a lecture, the exhibition of an artistic work a publication of such works.

Copyright is infringed by anyone who, without the consent of the author, does anything the sole right to do which is conferred upon the author or owner, particularly, offers for sale or hire, distributes, exhibits, imports, performs, or lets a theatre for performance, but with, *inter alia*, the following exceptions: (1) quotation by way of fair criticism, including a newspaper summary; (2) the use, with acknowledgments, of short passages from copyright books (other than school books) *bona fide* for educational purposes; (3) the reporting of a public lecture unless expressly prohibited, and the reporting in a newspaper of an address of a political nature whether prohibited or not.

An action must be begun within three years of the alleged infringement. The validity of the right, the legal ownership of it, and the author of it as indicated on the title-page, are presumed in favour of the plaintiff unless the defendant expressly raises these issues. A successful action carries with it: injunction, damages, account, delivering up of infringing copies, and costs in the discretion of the Court.

As regards all works the copyright in which was subsisting before July 1, 1912, copyright, as defined by the Act, is substituted for the existing copyright.

Death

Every death must be registered with the registrar of deaths by (1) a relative present at the death or in attendance during the last illness; (2) some other relative; (3) a person present at the death; (4) the occupier of the house in which the death took place; (5) an inmate of the house; or (6) the person causing the body to be buried.

If written notice with a medical certificate of the cause of death is sent within 5 days from the death, 14 days are allowed for giving formal notice by word of mouth, otherwise personal notice must be given and the register signed by the informant within 5 days.

A penalty of 40*s.* is imposed for default.

The particulars required are: (1) date of death; (2) name, surname, sex, age, rank, profession or occupation of deceased; (3) cause of death; (4) signature, description and residence of informant; (5) signature of registrar; and (6) nationality and last abode of deceased if the death took place at sea.

The registrar will supply a certificate of registration which must be delivered to the clergyman or person performing the funeral service. If it is not so produced, the clergyman may perform the service, but must within 7 days give notice to the registrar.

If at the end of 14 days the registration has not been completed, the registrar may by notice in writing require anyone of the persons responsible to attend before him at a stated time and place for the purpose.

If the deceased has been attended during his last illness by a registered medical practitioner, a certificate of the cause of death signed by the latter must be delivered to the registrar. There is a penalty of 40*s.* imposed on any person who receives such a certificate and withholds it.

The registration may by request be made at the house of the informant or at that in which the death took place, in either of which cases a fee of 1*s.* is payable to the registrar, but otherwise registration is free.

After twelve months a death can be registered on the express authority of the Registrar-General only and on payment of fees amounting to 10*s.*

Infectious Diseases

Any person who (1) while suffering from a dangerous infectious disease wilfully exposes himself without proper precautions in any street, public place, shop, inn, or public conveyance, or enters a public conveyance without warning the owner, conductor, or driver that he is so suffering; (2) being in charge of a person so suffering so exposes such sufferer or causes or permits him to be so exposed; or (3) lends, transmits, exposes, or disposes of without previous disinfection bedding, clothing, rags, or other things which have been exposed to infection, is liable to a penalty of £5.

A person entering a public conveyance while

suffering from such disease is liable to a fine of 40*s.*, and may be ordered to pay the costs of disinfecting the conveyance if he entered without warning the owner or driver. Every such conveyance must be disinfected after conveying a person suffering from infectious disease, and the owner or driver may claim payment of the costs of disinfection before allowing his conveyance to be so used.

No house, rooms, or lodgings in which there has been a person suffering from infectious disease may be let until disinfected to the satisfaction of a medical practitioner, who must give a certificate to this effect, the penalty for an offence being a fine not exceeding £20 or imprisonment not exceeding one month with or without hard labour.

In cases within the Public Health Act, 1907, a person suffering from an infectious disease is not allowed to engaged in any trade unless precautions are taken to prevent the spread of the disease, nor may he take any book from a public or circulating library or return it unless disinfected after it has been exposed to infection. The medical officer of the district is charged with the duty of making inquiries on these points.

Clothes which have been exposed to infection must not be sent to a public laundry until they have been disinfected ; children who have suffered from an infectious disease must not attend school without a medical certificate ; notification of the presence of infectious disease must be sent to the district medical officer by dairymen on whose premises it has occurred, and the owner or driver of a public conveyance which has been used by a person suffering from an infectious disease.

In the metropolis and districts where the Infectious Diseases Prevention Act, 1890, is in force, persons suffering from an infectious disease who cannot receive proper attention and accommodation at home may be removed to an isolation hospital by order of a justice of the peace made on the certificate of a medical practitioner.

A district council may by notice in writing order the owner or occupier of any house likely to endanger the health of the occupier to take such steps by painting, whitewashing, papering, etc., as may be necessary to prevent or check infectious disease.

The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it must inform the owner and have it disinfected.

Notification of any case of certain infectious diseases, including smallpox, cholera, diphtheria, membranous croup, erysipelas, scarlatina, scarlet, typhus, typhoid, enteric, relapsing, continued, or puerperal fevers and plague, must be given to the district medical officer of health in writing or verbally. It must be given by the head of the family, relatives or other persons present in the building or in attendance on the patient. The medical practitioner in attendance is also required to send a certificate to the medical officer of health, and receives for it a fee of 1*s.* for every case in his private practice or in a public institution of which he is officer.

The list of diseases of which notification is required may be extended by orders made by the local authority from time to time with the approval of the Local Government Board, and varies in different districts.

Under various orders the following diseases must be notified, viz. acute poliomyelitis (infectious paralysis), anthrax, cerebro-spinal meningitis, chicken-pox, glanders, plague, hydrophobia, impetigo contagiosa, measles, german measles, mumps, ophthalmia neonatorum, whooping cough, yellow fever, and pulmonary tuberculosis (consumption).

On the outbreak of infectious disease in a public elementary school the school or any department of it may be closed, or any children liable to carry infections may be excluded. The principal of any school in which there is infectious disease is required to send a list of the names and addresses of all pupils other than boarders to the local authority.

It is the duty of the local authority to provide for the disinfection of infected bedding, clothing, and other articles, and to provide temporary accommodation free of charge for families compelled to leave their house where infection has appeared or for the purpose of having it disinfected.

Penalties are inflicted on all persons who give false answers to inquiries about the appearance of infectious disease in a house during the previous six weeks.

Landlord and Tenant

A tenant taking an unfurnished house or part of one does so at his own risk. He must, in the absence of agreement to the contrary, keep it wind and weather proof, and although the house is or becomes uninhabitable must continue to pay the agreed rent until his tenancy ends by mutual agreement or the expiration of his tenancy.

The landlord is under no liability to execute any repairs or alteration unless he has expressly agreed to do so or a statutory duty is imposed upon him.

The Housing of the Working Classes Act, 1890, applies where the rent does not exceed in London £20, in Liverpool £13, in Manchester or Birmingham £10, and elsewhere £8. In respect of property of this class there is an implied condition that it is reasonably fit for human habitation when taken, and if otherwise the tenant may leave and recover damages for any loss sustained.

By the Housing and Town Planning Act, 1909, similar conditions are imposed where the rent does not exceed, in the administrative county of London £40, in a borough or urban district with a population at the last census of 50,000 or more, £26, and elsewhere £16. These conditions do not apply when the tenancy is for a term of not less than three years or to a repairing lease. Under this Act the landlord must keep the property in the same condition during the tenancy, and power is given to him and to the local authority and their authorised agents to enter after 24 hours' notice and inspect the property.

A lease of a house or land for more than three years must be made by deed and properly stamped. What are known as the usual covenants are : (1) to pay rent ; (2) to pay taxes and outgoings other than such as are ultimately payable by the landlord ; (3) to keep the property in repair and so to give it up ; (4) to allow the landlord to enter and view the state of repair ; and (5) for quiet enjoyment by the tenant. The insertion of other covenants is a matter of agreement between the parties for their own protection and to prevent the property from becoming a nuisance. Every lease should contain a power of re-entry by the landlord on nonpayment of rent, and in some cases for breach of covenant. A counterpart or copy of the lease is handed to the landlord, and both lease and counterpart are prepared and stamped at the tenant's expense.

The tenant cannot investigate the title of the landlord to grant the lease, and must take or refuse it without inquiry. If the landlord is a

person in a fiduciary position, *e.g.* a trustee mortgagee, or person having a limited interest only, such as a tenant for life, the lease should be made to take effect in possession and not from a future date.

An agreement for a lease for three years or less must be in writing, signed by the landlord or his agent duly authorised by writing. It is prepared in duplicate and stamped at the expense of the tenant. As it is often an informal document or perhaps a common form bought from a stationer and containing stringent clauses and conditions which are not intended to be enforced, such as an undertaking by the tenant to rebuild the house if necessary, or to pay for the cost of making and paving adjoining roads, it should be carefully considered, and any alterations that appear necessary should be made before it is accepted or executed. The landlord under an agreement for a short tenancy should undertake liability for repairs. Any alterations, repairs, or improvements that are immediately required should be completed before the agreement is signed or the tenant enters into possession.

It may be assumed that the property has been inspected by the tenant, who will form his own opinion as to the state of repairs, the liability to annoyance by neighbours, neighbouring buildings such as schools or manufactories, or floods. The sanitary condition of the house and its water and drainage systems and the occurrence of any recent outbreak of disease in the neighbourhood should be carefully investigated. Inquiries as to the character of the last tenants, their reasons for leaving, and whether they left any debts, rates, or taxes unpaid, may prevent visits from undesirable persons or annoyance and demands from creditors, or gas, water, or rate collectors. The necessary connections for gas and water supplies should be made before entry.

On taking a furnished house an inventory in duplicate should be made, agreed, and signed, showing not only the articles of furniture, ornaments, and household goods, but also any defects in them.

Furnished lodgings are let under an implied agreement that they are reasonably fit for occupation and free from vermin or dangers from defective drains or infectious disease. In case of the death or illness of the lodger or any member of his family in them, reasonable expenses or damages incurred by reason or in consequence of such death or illness may be recovered from him or his representatives.

The person letting the lodgings has no lien on the goods or luggage of the lodger and cannot detain them until the rent is paid, but must sue for the rent in the courts. An offensive lodger cannot be summarily ejected, but if rent is in arrear may be kept out if he or she has left the rooms vacant, or an application must be made to a magistrate for assistance. A lease or agreement for tenancy comes to an end at the expiration of the agreed term or period, and no notice is required to terminate it. If the tenant remains in possession, he may be ejected by proper proceedings, unless the landlord agrees expressly or by implication to continue the tenancy. Payment and acceptance of rent raises an implied agreement for a yearly tenancy on the terms of the former occupation so far as they are applicable.

The length of notice to quit in other cases is determined by the duration of the tenancy. In the case of a yearly tenancy it must in the absence of custom or special agreement be a half-year's notice expiring at the end of the year of tenancy. A weekly or other tenancy for less than a year is determined by a notice equal to the period of tenancy, *e.g.* a week's notice is required for a weekly tenancy, a month's notice for a monthly tenancy, and a quarter's notice for a quarterly tenancy, and in all these cases the notice should expire at the end of a complete period of the tenancy.

It should be observed that the duration of a tenancy is not altogether dependent upon payment of rent, *e.g.* a tenancy may be a yearly one although, as is generally the case, the rent is paid quarterly.

A tenancy for a fixed term, *e.g.* for three years or more, cannot be ended except by mutual agreement during the period of the tenancy.

A tenant has no right to remove anything which has become a fixture during the tenancy, such as trees, plants, shrubs, outbuildings, or fittings, even though they were his property before they became affixed, and they must be left for the landlord. There are some statutory and customary exceptions in the case of agricultural tenancies, market gardens, and allotments, where the tenant is entitled to compensation for improvements, and also as regards what are known as tenant's fixtures used in trade or business.

If rent is in arrear, the landlord may (1) sue for it; (2) resume possession under the power or re-entry reserved in the lease or agreement; (3) distrain for it.

The common law power of distress could originally be exercised in respect of all chattels found on the premises.

Exceptions have been introduced including goods sent to a public trader to be worked up, *e.g.* cloth sent to a tailor; things in actual use, *e.g.* a horse that is being ridden; perishable articles; wearing apparel, bedding and tools of trade not exceeding the value of £5; and the goods of an undertenant at rackrent or lodger under certain conditions. In the last case a declaration must be made by the lodger claiming the property and offering to pay his rent to the landlord.

No distress can be levied between sunset and sunrise, and the bailiff must not break open a door or window to effect an entrance. If the landlord has re-entered, his power of distress is gone.

In case of fraudulent or clandestine removal to avoid payment of rent after it has accrued due, that is on the last instant of the day on which it is payable, the landlord may seize the goods at any time within 30 days wherever they may be found and may in the presence of a constable break open any lock or door for the purpose, or if the value of the goods removed does not exceed £50 may recover by an order of two justices the double value of them.

In the metropolitan police district a constable may detain any furniture van engaged in removing goods between 8 p.m. and 5 a.m. to prevent fraudulent removal (popularly known as shooting the moon).

The following are instances of illegal distress: (1) when the landlord has parted with his reversion or acquired it since the rent became due; (2) when there is no rent in arrear or the distress is made for payments which are not strictly rent, *e.g.* for furniture in a furnished house taken at an inclusive rent; (3) after valid tender; (4) when two distresses are levied for the same rent; (5) when the distress is made off the premises or by night; (6) when a door or window has been broken open to effect an entry; (7) when privileged goods have been distrained; (8) when the distraint is contrary to an agreement made with the

tenant or a stranger; (9) when goods are sold that are not in the inventory.

Examples of irregularities are: (1) selling the distress without serving a notice of distress and a copy of the inventory; (2) selling within the 5 days (which may be extended to 15 days) allowed for replevy; (3) selling without appraisement when required or otherwise than at the best price; (4) improperly dealing with any surplus after payment of arrears of rent, costs charges, and expense; (5) removing the goods after tender of the amount due.

There is an authorised scale of fees payable on a distress, which varies with the value of the goods seized.

Marriage

Marriage as recognised by the Christian Church is the voluntary union for life of one man with one woman to the exclusion of all others. Divorce is allowed in most countries, but is still generally forbidden by the Quakers and Roman Catholic Church and opposed to the feelings of many of the clergy of the Church of England.

The marriage of a Christian with a non-Christian is legal if celebrated as prescribed by English law, but in the country of a foreign husband's domicil it is subject to the local usages as regards divorce, polygamy, and domestic status of the wife.

By the common law of England a religious ceremony in accordance with the laws and usages of the Catholic Church was essential. By the Marriage Act of 1823 and amending Acts marriages may now be celebrated by any religious rites or with none at all.

Clandestine and irregular marriages were common in England until 1753, when Lord Hardwicke's Act provided that all marriages should be solemnised in the parish church or a public chapel of the Church of England either by licence or after publication of banns.

These clandestine marriages were generally solemnised by clergymen of more or less irregular antecedents in places like the Fleet and King's Bench prisons, Mayfair Chapel, or the Mint in Southwark, and as there was considerable traffic in them, registers were kept which may still be consulted.

When they were suppressed, parties who had reasons for avoiding publicity took refuge in the looser provisions of the law in Scotland, and by crossing the border could go through a ceremony (Gretna Green became famous in this respect) which was recognised as binding in England. An alteration in the laws of Scotland requiring a certain term of residence before marriage put an end to this form of evading the English restrictions.

Every marriage in England, unless by special licence or in accordance with the usages of Jews or Quakers, must now be solemnised in a church or chapel of the Church of England duly licensed for marriage, a registered Nonconformist church or building, or a registry office. It may be by banns or ecclesiastical licence, a superintendent registrar's certificate or certificate and licence, or in the case of seamen by a naval officer's certificate.

Marriages may also be solemnised at sea by a clergyman, or if there is no clergyman by the captain of the ship, and they are registered in England.

Capacity

The parties must be free from disability arising from youth, mental or physical incapacity, duress, relationship, previous marriage, want of consent, fraud, or otherwise.

The earliest age for marriage is 14 in the case of a male and 12 for females, but this is subject in England and Wales to the consent of parents or guardians when required. Absence of this consent does not by itself invalidate the marriage, but is a ground for punishing the guilty parties.

Apart from absolute disability such as arises from relationship or previous marriage, the tests of validity are simply whether (1) the legal requirements have been fulfilled and (2) the parties really consented of their own free will and with a competent understanding to marry one another. A mere contract to marry may be broken off on sufficient grounds, and a marriage under threats or duress, in a state of intoxication or imbecility of mind amounting to insanity, or under a mistake as to the nature of the ceremony or the identity of the person married, may be set aside by proper proceedings, especially if it has not been consummated, but a mistaken belief by one of the parties in the good character or habits, social position, or mental or physical condition not amounting to insanity or impotence of the other is not sufficient to invalidate the marriage.

A person who has been found lunatic by inquisition cannot marry even during a lucid interval until the inquisition has been superseded, but otherwise the validity of marriage by a person of unsound mind depends upon ability to consent.

Deaf and dumb persons can contract a valid marriage, and disabilities imposed by foreign law of a religious or penal character do not invalidate a marriage in this country.

The Court will punish severely any person who marries or attempts to marry one of its wards without its permission.

Marriages between persons within prohibited degrees of consanguinity or affinity are forbidden. A table of these degrees in the Book of Common Prayer has been altered by the Act of 1907, which now permits marriage with a deceased wife's sister, and it is only necessary to call attention to the fact that first cousins and more distant relatives are not forbidden to marry, but marriages with a deceased husband's brother or the daughter of a deceased wife are still illegal. The prohibitions apply to all persons domiciled in England, including Jews and Quakers, but not to foreigners residing here unless applicable by the laws of their own country.

Registrar's Certificate without Licence

In the case of marriage by registrar's certificate without licence notice must be given personally and in a prescribed form by one of the parties to the registrar of the district within which both parties have resided for not less than seven days, or his deputy, or to the superintendent registrar of marriages in that district. If the parties reside in different districts the notice must be given to the superintendent registrars, registrars, or deputies in both districts. This notice, for which a fee of 1*s.* is charged, is entered in the Marriage Notice-book, which is open free of charge for public inspection.

The particulars required are: (1) names and descriptions of the parties; (2) dwelling-place of each and length of residence there; (3) church or other building where the ceremony is to take place, and this must in general be within the district where one of the parties has dwelt for the period mentioned in the notice; (4) that the marriage is to be without licence; and (5) a declaration that (*a*) there is no lawful impediment, (*b*) that for seven days the usual place of residence has been within the district of the registrar to

whom notice has been given, and (*c*) that no consent of parents, guardians or other person is required, or if required that it has been given.

The notice is exhibited conspicuously in the registrar's office for 21 successive days next after the entry in the notice-book, and at the end of this time, if no objection has been made or sustained, a certificate is issued on the request of the party who has given the notice to the effect that notice of an intended marriage in the church or building named has been entered and there is no opposition to it. A fee of 1*s.* is charged for this certificate.

The marriage may then take place in the church or building mentioned and at any time within three calendar months from the entry of the notice, (1) in some building certified as a place of religious worship and registered for the solemnisation of matrimony, provided that (*a*) a registrar of the district or his deputy or an authorised person is present, (*b*) the ceremony is performed before two credible witnesses between 8 a.m. and 3 p.m. with open doors, and (*c*) the authorised formula of marriage is uttered by both parties; (2) at the office of the superintendent registrar, in which case no religious service is held; (3) in a church within the district of the superintendent registrar by whom the certificate was issued, but in this case the consent of the incumbent must be obtained and the ceremony, which must be by a qualified clergyman, may be according to the rites of the Church of England; (4) according to the usages of Quakers or Jews if the parties are of either of these persuasions, or by authority of the rules of Quakers according to their usages if the parties do not belong to their persuasion.

A caveat may be entered at the office of a superintendent registrar or registrar to prevent a marriage.

The registrar is entitled to a fee of 5*s.* for a marriage by certificate in his presence and 10*s.* for a similar marriage by licence.

Registrar's Certificate and Licence

When the marriage is to be by registrar's certificate and licence, notice is given and the certificate is obtained as in the case of a certificate alone, with the following differences.

1. If the parties do not live in the same district, notice need not be given to the registrar of both districts, but only to the officer of the district in which one of the parties resides, and it is sufficient if the notice states how long the applicant has resided there, without a statement as to the residence of the other party.

2. The declaration in the notice must state that the applicant has for fifteen days immediately preceding had his or her usual place of abode and residence in the district of the registrar to whom notice is given.

3. The notice is not publicly exhibited by the registrar.

4. The certificate may be obtained after one clear day after entry of notice.

The applicant, on payment of a fee of 30*s.* exclusive of stamps, then obtains a licence from the registrar, and the marriage may take place in any of the several modes in which a marriage by certificate alone may be had, except that no licence for a marriage in a church or chapel of the Church of England may be granted.

No marriage by registrar's certificate with or without a licence may be solemnised in any building registered and certified for religious service without the consent of the minister or one of the trustees, overseers, deacons, or managers, nor in any registered building of the Church of Rome or any church or chapel of the Church of England without the consent of the minister.

A marriage by certificate or certificate and licence is void if it is held (*a*) in any place other than that specified in the notice and certificate; (*b*) without due notice to the superintendent registrar; (*c*) without certificate or licence; (*d*) in the absence of the registrar of the district or superintendent registrar or of the authorised person whose presence is required.

The presence of the registrar or superintendent registrar is necessary at every marriage in a Non-conformist building, unless an authorised person, usually the minister or an official certified by the trustees as having been authorised for the purpose, has been appointed to take his place. If the presence of the registrar or superintendent registrar is required, notice must be given when notice of marriage is entered and the consent of the minister or trustees to his attendance must be obtained.

Ecclesiastical

Marriage according to the rites of the Church of England may be by (1) special licence; (2) common licence; (3) banns (spurrings, speirings, or callings); or (4) registrar's certificate with consent of the clergyman.

A special ecclesiastical licence enables the parties to be married at any convenient time and place. It is obtained at the Faculty Office, 23 Knightrider Street, Doctor's Commons, E.C., on assigning good and sufficient reasons. The fees, including stamp duty, are under £30 on the average.

A common licence is granted by the bishop as ordinary through the chancellor and his surrogates, or by the Archbishop through the Vicar-General. It can be obtained on personal application of one of the parties from a surrogate, the Commissary for Faculties at the Faculty Office, or the Vicar-General at his office, 3 Creed Lane, Ludgate Hill, E.C.

An affidavit must be made on application to the effect that (1) there is no legal impediment; (2) the applicant has had his or her usual place of abode in the parish where the ceremony is to take place for 15 days, and (3) any consent that is required has been obtained.

The stamp duty is 10*s.* and the fee varies from 35*s.* to £2 13*s.* in different dioceses. In Southwark it has recently been reduced to £2, and a special charge for soldiers remains at 10*s.*

As in the case of the registry office, a caveat may be entered against the grant of a licence or the celebration of an unlawful marriage.

Marriages, the validity of which is doubtful, may be confirmed by a Provisional Order of the Secretary of State followed by an Act of Parliament, or by a private Act of Parliament alone.

Banns

If the marriage is to be by banns, they must be publicly proclaimed on three successive Sundays before the ceremony can be performed, and the clergyman requires a few days' preliminary notice, so that a period between three and four weeks is generally necessary.

Notice should be given to the clergyman of the parish in which the parties reside, or if they are in different parishes to the clergymen of both parishes, and in the latter case a certificate must be obtained of due publication which is to be handed to the officiating minister. If one of the parties resides in Scotland, application should be made to the session clerk to publish banns, for which a residence of 15 days is required; or if in Ireland, after a residence of 7 days notice must be given to the

district registrar of marriages for the purpose of obtaining his certificate.

The fees for a marriage in church vary from *2s. 6d.* upwards in different parishes, the usual amount being a guinea to the clergyman and *5s.* to the clerk.

By the Naval Marriages Act, 1908, any officer, seaman, or marine on the books of one of H.M. ships may, if he wishes to be married at a registry office or a Nonconformist registered building, give notice to his commanding officer, who may after 21 days issue a certificate for the marriage. The other party must give notice to the registrar in the usual way. If the marriage is to be according to the rites of the Church of England, the chaplain or commanding officer of the ship must publish the banns on board for three successive Sundays, and then issue a certificate of the publication which must be produced to the officiating clergyman. The banns must also be published by the other party in the church where the ceremony is to take place.

Marriages Abroad

Marriages celebrated out of England are considered as valid in form if made in accordance with the local law.

In the case of marriages abroad under the Foreign Marriages Act, 1892, one of the parties must be a British subject. The ceremony must be with open doors in presence of the marriage officer and two witnesses. Any form may be used, including that of the Church of England, so long as a declaration of marriage is made by the parties in the prescribed form. The marriage officer is appointed by the Secretary of State, and is usually the ambassador, a consul, governor, high commissioner, or other official. The commanding officer of one of H.M. ships may perform the ceremony on his ship. Notices must be given as in England.

Marriages within the lines of a British army serving abroad may be celebrated by a chaplain or other person by order of the commanding officer, but all marriages abroad of officers or soldiers of H.M. land forces must be registered.

The Marriage with Foreigners Act, 1906, provides for marriage between a British subject and a foreigner, and enables the former to comply with foreign law by obtaining from the superintendent registrar in England or Wales or the registrar in Scotland or Ireland or other marriage officer a certificate which can be produced to the minister or officer solemnising the marriage abroad that due notice has been given in this country and no legal objection can be raised. The Act does not come into operation until an Order in Council has been made recognising the existence of provision in the country to which the foreigner belongs for the issue of a similar certificate for use if the marriage is celebrated in the United Kingdom.

Power is also given by an Act of 1915 (5 & 6 Geo. V, c. 40) to make similar regulations by Order in Council in respect of a marriage between a British subject resident in the United Kingdom and another resident elsewhere in any British Dominion, the condition for the issue of the Order being that the laws of the Dominion in question recognise the validity in the United Kingdom of the publication of banns or the certificate of a registrar or superintendent registrar as sufficient notice of marriage. The provisions of this Act may be extended by Order in Council to any British Protectorate.

In default of such Order enabling the Act to come into operation in the country where it is required, the parties interested should apply to the Registrar-General.

Persons domiciled in this country cannot contract a marriage abroad which is forbidden here.

General Notes

A husband married since 1882 is still liable for torts or wrongs committed by his wife, and, to the extent of property acquired through her, for her ante-nuptial debts, but he is not liable for her post-nuptial debts unless she has express or implied authority to pledge his credit.

A married woman in England is entitled to hold and dispose of as her separate estate certain property acquired since August 9, 1870, including her earnings, any personal property to which she has become entitled as next-of-kin of an intestate, and any sum not exceeding £200 acquired by deed or will, and also any property acquired since Jan. 1, 1883, and if married after the latter date all property belonging to her at the time of marriage or subsequently acquired.

A married woman judicially separated from her husband is regarded as a *feme sole* in respect of her property; and if cohabitation is resumed, she will remain entitled to it for her separate use, subject to any agreement that has been made concerning it.

The names to be given on application for a marriage licence or certificate or for the publication of banns are those by which the parties are generally known, although they differ from the baptismal name. If wrong particulars are given with the knowledge of both parties for the purpose of concealment, the marriage may be declared void; but if one party only is guilty of deceit, the marriage holds good.

All necessary certificates or licences must be produced to the officiating minister, registrar, authorised person, or marriage officer officiating or present at the ceremony.

On giving notice of the intended re-marriage of a divorced person, a copy of the divorce decree should be produced.

If a husband and wife are separated and one of them has not been heard of for seven years and there is no reason to suppose that he or she is still living, the other may marry again without being prosecuted for bigamy; but if the missing person reappears after the date of the second marriage, it is void and the issue by it are illegitimate.

A husband is liable to maintain the children of his wife born before his marriage until they attain the age of 16, but no similar duty is imposed on the wife in respect of her husband's children.

If a marriage engagement is broken off, there is no legal obligation to return any personal presents other than the engagement ring, although they may consist of jewellery or other valuable ornaments.

Persons who have been married at a registry office may have the marriage ceremony subsequently performed in church on production of the registrar's certificate of marriage, but no entry is made in the parish register.

The presence of the registrar or superintendent registrar is not required at a marriage according to the usages of Jews or Quakers, but in the one case the secretary of the synagogue and in the other the district registering officer of the society must be present and register the marriage.

The use of a marriage ring is not essential except so far as it forms part of the ceremonies of the Church of England, and in this case its place may be supplied by any available substitute.

No clergyman is compelled to officiate at the marriage of a person divorced for adultery, but must allow his church to be used for the purpose if required.

If a church is closed for repairs or other purposes, a licence for marriage in it is available for any place licensed for the solemnisation of matrimony within the parish, or if there is none for a church in any adjoining parish where marriages are solemnised.

Persons under 21 require the consent of their parent or guardian before marriage, except in the case of an illegitimate child. Such consent may be implied by acquiescence. If the parent or guardian is incapacitated, application for the purpose may be made to the courts.

A Mahommedan married to an Englishwoman can by Indian law divorce her by "talak." The only process required is to write her a letter of divorce telling her that he has put her from him, or it can be done by word of mouth before witnesses and her presence is not required. As a Mahommedan he is also allowed to have four wives of any creed or nationality except an idolater or fire-worshipper. The divorce may take place without any misconduct on the part of the wife and without any reason being assigned. If the parties are domiciled in India according to the domicil of the husband, the English courts have no jurisdiction to interfere.

The English courts recognise as valid a divorce obtained in the country where the husband is *bona fide* domiciled, even if it is obtained on grounds not sufficient for divorce in this country.

The Roman Catholic Church does not recognise a mixed marriage between a Protestant and a Roman Catholic unless it has been celebrated by one of their priests in accordance with the Papal decrees.

The position of a married woman in an Asiatic household is more or less that of a domestic slave to the oldest female ancestor of the husband; and in Africa, if the husband throws aside the restraints of civilisation, the wife or wives may be driven to hard manual labour.

An ecclesiastical licence is available for three lunar months, and a registrar's certificate or licence for three calendar months.

Marriages in Scotland

A regular marriage is one celebrated by a minister of any church, including a Jewish Rabbi or a Quaker, before two or more witnesses and after due publication of banns or publication of notice by the registrar. Any other marriage is known as an irregular marriage, though it is equally valid owing to the latitude allowed in Scotland, where consent of the parties testified by a declaration before witnesses after a qualifying period of residence is the only test imposed.

Males over 14 and females over 12 require no consent by their parents or guardians.

Before banns can be published one of the parties must have resided for 15 clear days immediately preceding the proclamation in the parish where they are to be proclaimed.

Proclamation is made in the parish church on two separate Sundays during service, but it is usual to complete the publication at two services on the same Sunday. Where the parties reside in different parishes, proclamation is made in both. An English certificate will be accepted when one of the parties resides in England.

Application for proclamation of banns is made to the session clerk of the parish church, and the fee is 2*s.* 6*d.* Satisfactory evidence of residence signed by two householders is required in the case of strangers.

Marriage may be celebrated by a minister of any denomination on production of a certificate of publication of banns, but at least two credible witnesses must be present. There are no restrictions as to the time or place of the ceremony, which may be in a private house at any hour. A schedule of the marriage signed by the parties, the officiating minister, and two witnesses must be handed to the registrar within three days after the ceremony.

If it is desired to dispense with banns, application may be made to the registrar, who, on proof that both parties have resided in Scotland for at least 15 days, publicly exhibits a notice of the intended marriage and in default of objection issues a certificate permitting the marriage.

If one of the parties has resided in Scotland for 21 days, an irregular marriage may be contracted by a mere declaration verbal or in writing before two competent witnesses of mutual consent to marry. Registration in this case is not essential, but may be effected on application to the sheriff of the county in which the declaration has been made. The fees are 25*s.*, and a copy signed by the registrar of the entry in the register is sufficient proof of the marriage.

By 6 Geo. V, c. 7, the parties to a joint application for warrant to register an irregular marriage must before making it obtain from the sheriff of the parish or district in which the marriage was celebrated a schedule of particulars to be filled up by the registrar, and no warrant can be granted without production of the schedule signed by the parties. The sheriff must within three days from grant of the warrant transmit the application and warrant with relative schedule to the registrar for entry.

The former liability to penalties for contracting an irregular marriage is abolished and as from April 19, 1916, it shall not be lawful to convict for such an offence.

Provision is also made for notice of an intended marriage by any person serving in the naval or military forces. It must be given to the registrar of the parish in which the intended wife shall have resided for fifteen clear days.

Names

There is no right of property in a name. The Courts will interfere to prevent fraudulent use of another man's name or trade name, but any man may carry on trade in his own name even if confusion and mistakes arise from the use of it, and he may give to his house or property any name that he pleases.

The assumption of the surname of another family will not be restrained unless it has been exclusively used in connection with a particular business.

Apart from fraud, therefore, the surname of a British subject can be changed at any time.

It is usual to secure recognition of the change and preserve evidence of it by advertisement and also by executing a deed for enrolment, but there is no absolute necessity to take either of these steps. A more formal method is to obtain a Royal licence for the purpose.

The Christian name is that which is given at baptism. It may, it is said, be changed at confirmation. If a child has been registered without a name or an alteration has been made at baptism, the name given at baptism may within twelve months after registration of birth be inserted in the register on delivering to the registrar or

superintendent registrar a certificate in prescribed form signed by the person who performed the ceremony. Provision is made for obtaining the certificate on payment of a fee not exceeding 1s.

In England a woman loses her maiden name on marriage, and after divorce she is still properly described by her married name, unless she has entirely abandoned it and become known by her maiden name, but there is no rule to prevent the adoption of any surname that may seem desirable. In case of a re-marriage the circumstances should be explained to the clergyman or registrar, to prevent any difficulty that might otherwise arise.

Enemy aliens are forbidden by an Order in Council made in October 1914, under the Defence of the Realm Act, to change their surnames.

Proposals have been made that the present lax system should be abolished. A Bill which has passed a third reading in the House of Lords provides for the registration and publication of the real names of all persons carrying on business under an assumed or trade name or title, and it may well be extended by imposing conditions of registration and publication on every change of surname.

Rule of the Road

The old adage says:

"The rule of the road is a paradox quite,
When you're right you are wrong, when you're left you are right."

This rule is reversed abroad, and also in case of persons using the footpath or pavement, who should keep to the right on meeting, and to the left on passing pedestrians going in the same direction.

A riderless horse led by a pedestrian or rider of another horse keeps to the right or offside for purpose of control in passing other traffic.

Pedestrians, although infirm or crippled, have the same liberty of using roads as vehicles, riders, or animals, and are equally responsible for loitering, obstruction, or carelessness. The rule of the road does not apply to them, and they must take precaution for their own safety. As a matter of courtesy or expediency they give way to other traffic, but the driver of a vehicle cannot by sounding a horn or otherwise escape the consequence of his negligence if they do not get out of the way.

When the middle of the road is used for tramways, all overtaking vehicles should pass tramcars on the left or near side. By a rule of 1904, if the overtaking vehicle was a motor car it was directed to pass on the near or offside, but this has now been altered.

Tramcars have no monopoly of the highway, and though they are confined to the line of rails, drivers must observe the usual courtesies in stopping or allowing other traffic to pass.

Organised bodies of pedestrians, such as processions or military parties, are expected to keep to the left or near side of the road and as close to the side as possible.

Servants

A servant may be summarily dismissed for: (1) deliberate disobedience to a reasonable order; (2) pregnancy; (3) drunkenness; (4) theft; (5) immoral conduct such that she cannot reasonably be trusted; (6) insulting or insubordinate behaviour incompatible with relation of mistress and servant; (7) habitual foul or abusive language disturbing peace of the family; (8) habitual carelessness or neglect of duty; (9) incompetency on the part of a skilled servant; (10) permanent incapacity caused by illness; or (11) conduct outside employment which makes it unsafe to continue the service.

With the exception of 1–4 the causes of dismissal are a question of degree, and in many cases could not be relied on. Summary dismissal on account of illness or at a late hour of the night would not be regarded with favour, especially if the servant is turned into the street without a home to go to.

A servant dismissed with wages in lieu of notice is not entitled to board wages.

A servant suspected of pregnancy cannot be medically examined without her consent.

The boxes of a dismissed servant cannot be detained and cannot be opened and searched for proof of theft.

Temporary illness does not justify dismissal. The charges for medical attendance must be paid by the mistress if she provides it or holds herself out as responsible for payment.

Trustees' Investments

Unless expressly forbidden by the instrument creating the trust, trustees may invest trust funds in or on (1) any Parliamentary stocks or public funds or Government securities of the United Kingdom; (2) real or heritable securities in Great Britain or Ireland; (3) stock of the Bank of England or Bank of Ireland; (4) India 3½% or 3% stock or any stock issued by authority of Parliament and charged on the revenues of India; (5) any securities bearing interest guaranteed by Parliament; (6) stock of the Metropolitan Board of Works or London County Council or debenture stock created by the Receiver for the Metropolitan Police District; (7) debentures or rentcharges or guaranteed or preference stock of any railway in Great Britain or Ireland which is incorporated by special Act of Parliament and which has paid not less than £3% per annum on its ordinary stock during each of the 10 years preceding the date of investment; (8) stock of any railway or canal company leased for not less than 200 years at a fixed rental to any such railway company as mentioned in (7), either alone or jointly with any other railway company; (9) Indian railway guaranteed debenture stock; (10) the B annuities of certain Indian railways and other like annuities hereafter created on the purchase of any other railway charged on the Indian revenues and which may be authorised by Act of Parliament to be accepted by trustees, or certain deferred annuities of the Indian Railway Company; (10) Indian guaranteed railway stock with fixed or minimum dividends in sterling; (11) debenture or guaranteed or preference stock of certain water companies in Great Britain or Ireland which have during each of the ten years before the date of investment paid a dividend of not less than 5% per annum on its ordinary stock; (12) nominal or inscribed stock of the corporation of any municipal borough with a population exceeding 50,000 at the last census before the date of investment, or similar stock of any county council authorised by statute or provisional order; (13) nominal or inscribed water stock issued by statutory corporations empowered to levy rates over an area with a population exceeding 50,000 at the last census before the date of investment, provided that such rates shall not during each of the ten years before the date of investment have exceeded 80% of the amount authorised to be levied; (14) any stocks, funds, or securities for the time being authorised for the investment of funds in court in England or Ireland, which under the present rules include (*a*) debenture,

preference, guaranteed, or rentcharge stock of railways in Great Britain or Ireland which during the ten years before the date of investment have paid a dividend on their ordinary stock or shares; (*b*) like stock of other railways guaranteed by railways which have paid dividends as in (*a*); (*c*) nominal debentures or debenture stock under the Local Loans Act, 1875, or the Isle of Man Loans Act, 1880, provided that such stocks are not redeemable within 15 years from the date of investment.

Express powers of investment are generally given by the instrument creating the trust and restrictions are often placed on the powers given above.

On certain conditions investments may be made in or on (1) any charge or mortgage of any charge made under the Improvement of Land Act, 1864; (2) the debenture stock of any railway or other company; (3) Government securities of the Isle of Man; (4) mortgage debentures of companies; (5) colonial stocks registered in the United Kingdom and mentioned as authorised investments in the *London Gazette*.

Investments may be made upon authorised securities notwithstanding that they are redeemable and the price exceeds the redemption value subject to restrictions on the stocks mentioned in 7, 9, 10, 11 and 12, and trustees may retain until redemption redeemable stocks, funds, or securities properly purchased.

The persons beneficially interested in the trust funds should be consulted before any investment or change of investment, and every consent required by the trust instrument should be obtained.

The trustees should exercise a reasonable discretion in making an investment although authorised as above or by the terms of the trust instrument, remembering that wide powers are often given to enable them to make suitable investments and not to invest the trust funds upon anything that may be authorised.

Especially with regard to investments on mortgage, which include mortgages on the security of certain long leaseholds, care should be taken, owing to the fall in value of land which no longer affords the same absolute security which it formerly possessed. A valuation of the land or houses should be made by an independent valuer, who should state in his report not only the present value but also what proportion of it may be safely advanced. The rough rule is that not more than two-thirds of the value of land or houses or one-half of the value of business property should be lent, but in many cases the trustees would not be protected by keeping within these limits.

Mortgages of wasting property such as mines or brickfields or of licensed houses are not desirable investments for trustees.

Mortgages of land in foreign countries, the colonies, Scotland, or Ireland are not desirable investments for various reasons, and particularly because of the difference in laws which regulate the tenure of real or immovable property not situate in England or Wales.

Bearer stocks, shares, or securities should not be taken as investments unless expressly authorised, and in any case trustees would consult their own interests by refusing to accept them.

In making investments, regard should be had to the interests of all parties. Persons who are entitled for life only are often anxious that a large income shall be secured for them at the cost of their successors, and it is the duty of trustees to hold the balance fairly.

Trustees advancing money on an unauthorised investment are liable to make good any loss incurred; but if they have improperly invested money on an authorised mortgage security which would at the time of investment be a good security for a smaller sum, the security will be treated as an authorised investment for the smaller sum and the trustees will only be liable to make good the excess over that amount with interest.

Trust money should never in the absence of express authority be advanced on personal security only, or employed in business, or used by a trustee in his own affairs, or left in the hands of a sole trustee, or kept in a bank longer than is absolutely necessary before reinvesting it.

The law does not recognise an acting trustee as distinct from his co-trustees, and makes every trustee liable for any breach of trust or loss that may occur by his neglect or default.

A trustee is not allowed to make any profit out of his trust unless, as in the case of a solicitor or other professional man, he is expressly authorised to charge and be paid for any work that is put in his hands by his co-trustees, and he cannot insist on being so employed against their wish.

Vaccination

Inoculation with the virus of smallpox was originally the accepted form of protection against it. The result was a mild form of the disease which acted as an anti-toxin against more serious attacks, but it is now strictly forbidden.

The discovery of vaccine provided a remedy the efficacy of which is not now questioned by scientific men. The objection to it arose chiefly from the adoption of arm-to-arm vaccination, by which the matter obtained from the vaccination of one person was transferred to another, probably in a weakened form and perhaps, as is still alleged, with the result of carrying infection.

Compulsory vaccination with pure lymph has now been adopted in the case of every child under fourteen born in England, unless within four months from its birth a statutory declaration is made by the parent or person having the legal custody of it to the effect that a conscientious belief is entertained that vaccination would be prejudicial to the health of the child. Such declaration, which requires no stamp, must be forwarded within seven days to the vaccination officer for the district.

The period allowed for vaccination is in the case of a parent six months from the child's birth, and in case of a person having custody of the child six months from receiving it.

In case of sickness or unfitness postponement is allowed for two months on production of a certificate from a private medical man, which is renewable for further successive periods of two months, if necessary.

Vaccination may be by a private medical practitioner or by the public vaccinator for the district. In the former case a certificate of successful vaccination must be sent within seven days to the vaccination officer of the district.

At the request of the parent or custodian of a child the public vaccinator will visit it and vaccinate it free of charge with pure glycerinated calf lymph or such other lymph as may be issued by the Local Government Board.

If a child is not vaccinated within four months from its birth the public vaccinator must visit the home after 24 hours' notice and offer to vaccinate it. The defaulting parent or custodian may be prosecuted by the vaccination officer on failure to comply with the regulations, and after an interval of four years may again be prosecuted.

The effect of vaccination as a protection against smallpox disappears in course of time, the popular belief being that it is exhausted at the end of seven years or when the scar has faded away. Medical opinion agrees that it is necessary to repeat the operation on attaining full age and probably again in middle life.

Re-vaccination is not compulsory, but will be performed free of charge by the public vaccinator, subject to the condition that the patient attends at a stated time and place after the operation for the purpose of examination. In default, a charge of 2*s*. 6*d*. will be made.

Wills

A will should be made in writing signed at the foot or end by the testator or by some person in his presence and by his direction in the presence of two or more persons present at the same time, who then in the presence of the testator and in the presence of each other sign their names on the will as witnesses. These formalities must be strictly observed, except in the case of soldiers engaged in actual military service and of mariners and seamen being at sea, for whom special provisions are made.

Any alteration or erasure afterwards made is void unless the will is re-executed with the same formalities. If any correction, alteration, or erasure has been made before execution it should be initialled by the testator and the witnesses.

The object to be attained should be carefully considered beforehand. If it is intended to make special provision for some particular person, it may be found necessary, *e.g.* in the case of a gift for the benefit of a lunatic, married woman, or infant under 21, to give powers of management to a guardian or trustee, and the effect upon previous or subsequent gifts to the same person must be taken into account.

A will speaks as from the death of the testator, so that a gift may fail because he has ceased to own the property comprised in it. On the other hand, additions may be made, such as the purchase of an outlying piece of land, which may be intended to be included in the gift of a house, but fails to do so. Horses, carriages, or jewellery should not be described as being in a particular place, because they will probably be moved after the date of the will.

When all known property has been dealt with, there should be a residuary gift of everything that may be undisposed of, including gifts that may have failed owing to death in the testator's lifetime, and special care should be taken to avoid overlooking property that may far exceed in value that which has been specifically given. As an example to be avoided, a case recently arose in which the family of the testator were given a small legacy, and the residue, which was erroneously believed to be insignificant but really included a large share of a rich estate worth many thousands of pounds, was left to strangers.

The will should appoint two or more trustworthy persons who are willing to act to be executors for the purpose of paying legacies and debt and winding up the estate, and guardians should be appointed for the infant children, if any.

When the property to be disposed of is small or is to be left absolutely to the person or persons whom it is desired to benefit, there is no objection to a home-made will or the use of a printed form such as may be obtained at a nominal price from a stationer, but in any other case, and especially where any property is intended to be given to two or more persons in succession, *e.g.* to a wife or husband for life and afterwards to children, the employment of a solicitor and the payment of a fee for his services may save the much greater expense of legal proceedings. The trouble caused by a will drawn by the village schoolmaster or a friend with a little legal knowledge is proverbial. Even an alteration made in a well-drawn will or a codicil to it may be attended by disastrous consequences.

Technical forms and expressions are required in a deed, but a will may be expressed in the simplest language. No attempt at legal phraseology should be made by anyone but an expert.

The full names of persons mentioned should be given, and property, especially houses or land, should be described as fully and exactly as possible, *e.g.* in giving a wardrobe, safe, or other receptacle it should be made clear whether the contents are to be included, investments in stocks or shares should not be described as money, and if the testator has several houses they should be carefully distinguished.

All property may be disposed of by will, but no person under the age of 21 can make a will. A married woman married since Dec. 31, 1882, can make a will disposing of any property belonging to her. If she was married before that date, it will be desirable to consult a solicitor as to her rights.

No person taking a legacy or gift under a will, or the husband or wife of such person, should be a witness to it. Though the validity of the will would not be affected, the gift would be absolutely void in such a case.

A legacy or gift to a child or issue of the testator who dies in his lifetime leaving issue living at the testator's death does not fail or lapse, as would be the case with a legacy or gift to any other relation or stranger, but takes effect as if the legatee had died immediately after the testator. This does not apply to a gift to a class such as such of the testator's children as shall be living at a certain time.

A will is revoked by the marriage of the testator, or by making a subsequent will which is inconsistent with it, or by some writing declaring an intention to revoke it, or by the burning, tearing, or destroying of it by the testator or by some person in his presence and by his direction with the intention of revoking it. It is not sufficient to cancel or obliterate the will by writing across it.

The following would be a sufficient gift to a wife:

I, John Jones, of 1 Fox Row, Oxford, give all property which I can dispose of by will to my wife Mary Jones absolutely and I appoint her sole executor.

Signed by the said John Jones in the presence of us both present at the same time who in his presence and in the presence of each other have hereto signed our names as witnesses. JOHN JONES (testator's signature)

Witnesses, James Smith, of 2 Fox Row, Oxford, gardener.
William Brown, of 3 Fox Row, Oxford, tailor's assistant. (signatures of witnesses)

The duty of making a will is obvious. Failure to do so may entail unexpected results and still the point has to be pressed, often until it is too late. An accident or sudden illness may deprive the most healthy person of an opportunity for making proper provision for his family or disposing of his property among his friends, while a distant

or unknown relation may succeed to the greater part of it.

One objector will say that making a will is like facing death too closely; another that it is unpleasant to bring two witnesses together without making a formal ceremony; and a third that it is not desirable to let everyone know his business. The last of these objections is perhaps the most prevalent, but it may easily be met by folding the will so that nothing but the final clause of attestation and the place for the signatures of the testator and witnesses is visible. The second is merely an excuse, because in the absence of two friends there is generally a clergyman at hand who would willingly call in his wife or servant to complete the will without appearing to confer a favour. The first objection is a morbid superstition opposed to the fact that a man who has settled his affairs is like the proverbial annuitant, secure from the haunting thought of trouble to come. One last consideration is that a will is not a final settlement, but it may be altered from time to time by codicils or by a new will to meet changed circumstances.

Any person, including a married woman or a spinster, may be trustee of a will. Infants and persons under disability such as lunatics or aliens should not be appointed.

Trust property should not be left under the control of one trustee where more than one were originally appointed. Statutory provision is made to enable vacancies to be filled up from time to time and may be exercised by persons nominated for the purpose by the instrument creating the trust, or by the surviving and continuing trustees or trustee or by the executors or administrators of the last surviving trustee.

The appointment of new trustees does not cast any doubt or reflection on the honesty or capacity of a sole continuing trustee, but is intended to relieve him from the responsibility of acting alone, and to enable receipts to be given for trust money which cannot in the absence of express authority be paid to a sole trustee.

Directions for Finding a Proved Will

Before the date of the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), wills were proved and generally deposited after probate in the ecclesiastical court of the bishop of the diocese or of the Ordinary of the place in which the testator lived. If he had property of value, *bona notabilia*, in more than one diocese or district, probate was obtained and the will deposited in the Prerogative Court of the archbishop of the province, or if necessary in the courts of both archbishops. In places or districts known as Peculiars or Royal Peculiars, the special Ordinary had jurisdiction to grant probate, and took the place of the bishop or Ordinary of the surrounding diocese or district.

Certain Courts Baron, *e.g.* in the manors of Mansfield, Cowley, and Caversham, also claimed the right of granting probate of the wills of tenants within the manor.

By the Act of 1857, which came into operation on Jan. 11, 1858, the jurisdiction in matters of probate and letters of administration was transferred to the Principal Registry at Somerset House and the District Registries then established. Wills which had been previously proved were at the same time distributed among these Registries according to the residence of the testators.

Indices are kept at Somerset House of wills proved in the Prerogative Court of Canterbury and of all wills proved and letters of administration granted under the Act of 1857. On payment of a fee of 1*s.* any index may be consulted and the original (or if it is not there a copy) of any will in it will be produced for examination. The names and addresses of the executors and the date and official number of the will may be taken, but no other extract may be copied by the reader.

If a copy is required of the whole or any part of the will, it may be ordered and obtained at a cost of sixpence a folio of ninety words for an ordinary copy or ninepence a folio for a certified copy. The latter, with an impressed stamp of one shilling, may be used as evidence in courts of law.

The original wills are kept in the Registries in which they were proved or to which they were sent on distribution, and may be seen there on payment of the prescribed fees. Copies of all wills proved and letters of administration granted since the Act are sent to Somerset House.

Indices of Yorkshire wills are published from time to time in the Record series of the Yorkshire Archæological Society's publications, and similar work is done elsewhere by other societies.

The following are the District Registries established under the Act of 1857:

Registry.	Registrar.	Salary.	District.
Bangor	G. H. Reid	£350	Carnarvon and Anglesey.
Birmingham	J. Glaisyer	£800	Warwickshire.
Blandford	H. F. C. de Crespigny	£250	Dorset.
Bodmin	W. H. L. Shadwell	£500	Cornwall.
Bristol	A. F. Nepean	£600	Bristol and Bath County Court Districts.
Bury St. Edmunds	R. Southey	£200	Suffolk, West.
Canterbury	H. M. Chapman	£350	East Kent and Canterbury.
Carlisle	E. L. Hunt	£700	Cumberland and Westmorland.
Carmarthen	H. M. Fraser	£400	Carmarthen, Cardigan, Pembroke, and the Deaneries of E. and W. Gower, including Swansea in Glamorganshire.
Chester	H. A. Jenner	£800	Chester.
Chichester	W. B. B. Freeland	£200	West Sussex.
Derby	C. T. E. Wilde	£600	Derbyshire.
Durham	W. J. Maynard	£500	Durham.
Exeter	C. H. Hardy	£1,000	Devon.
Gloucester	R. Fuller	£600	Gloucestershire (except Bristol County Court District).
Hereford	H. C. M. Nolan	£400	Herefordshire, Radnor, and Brecknock.
Ipswich	G. Pritchard	£450	E. Suffolk and N. Essex.
Lancaster	B. D. Adams	£700	Lancashire (except Salford and W. Derby Hundreds, and City of Manchester).
Leicester	H. Pickering Clarke	£500	Leicester and Rutland.
Lewes	J. W. Heisch	£350	East Sussex.

Registry.	Registrar.	Salary.	District.
Lichfield .	H. B. G. Faussett-Osborne	£800	Staffordshire.
Lincoln .	J. Strachan, K.C.	£500	Lincolnshire.
Liverpool.	J. C. Bromfield	£750	West Derby Hundred.
Llandaff .	R. Allen	£350	Glamorgan (except Deaneries of E. and W. Gower) and Monmouth.
Manchester	R. S. O. Mais	£800	City of Manchester and Salford Hundred.
Newcastle-on-Tyne	H. E. Edwards	£500	Northumberland.
Northampton	W. Young	£250	S. Northamptonshire and Bedfordshire.
Norwich .	C. H. Wilkinson	£700	Norfolk.
Nottingham	F. A. C. Oswald	£400	Notts.
Oxford .	J. T. Lewis	£500	Oxfordshire, Berks and Bucks
Peterbro'	C. S. Magee	£400	N. Northamptonshire, Huntingdon and Cambs.
St. Asaph	J. P. Lewis	£350	Flint, Denbigh and Merioneth.
Salisbury	J. F. M. Fawcett	£350	Wiltshire.
Shrewsbury	R. K. A. Green	£500	Shropshire and Montgomery.
Taunton .	E. T. Alms	£350	W. Somerset.
Wakefield	B. H. H. Thomson	£1,200	West Riding, Yorks.
Wells .	V. F. Engleheart	£300	E. Somerset (except Bath Co. Court District).
Winchester	G. G. Phillimore	£500	Hampshire.
Worcester	G. F. Adams	£500	Worcestershire.
York .	G. L. Simpson	£1,000	N. and E. Ridings Yorks, and York.

The Public Trustee

This office, which was created by Act of Parliament in 1906, is intended to allow the State, through an official called the Public Trustee, to act as an executor or trustee to any person who may desire it, either under a will or under a settlement. The need for the office arose out of the difficulty of finding trustees, and also out of the frequent occurrence of fraud. Since the office was created, with a staff of five men, on Jan. 1, 1908, it has met with wide popular acceptance. The staff now numbers 672 (of the permanent staff 208 are males and 464 females), and the value of the estates which have been placed in the care of the Public Trustee is £80,343,142. The value of the future estates represented by wills placed in his custody and applications from testators asking his acceptance of the office of executor under their wills is estimated at about £87,675,628. In 1914 an **Advisory Committee** was appointed, with a view to obtaining the benefit of criticism and advice on the investments made by the Public Trustee. It consists of—Rt. Hon. F. Huth Jackson; R. Martin Holland, C.B.; R. M. Kindersley; J. A. Mullens, junior. The outstanding features of the Public Trustee's department are its business-like organisation, its promptness and despatch, the great care and attention given to all personal matters, such as the education, maintenance, and welfare of children or other persons, and successful investment, so as to safeguard, as far as possible, not only the capital, but to procure as high a return of income as is compatible with security. Application may be made to the Public Trustee by letter or interview. The office is kept as free from all forms as possible. The Public Trustee can act under a will as **executor** and **trustee**. In the case of a will to be made, the appointment of the Public Trustee can be effected by the insertion of the following clause: "I appoint the Public Trustee executor and trustee of this my will." In the case of a will already made, the appointment of the Public Trustee can be effected by means of a codicil. He can also act under a settlement—**Marriage Settlements** or Voluntary Settlements—his appointment being effected in the same way as a private trustee. By the execution of a simple form of declaration of trust by the Public Trustee, a person can take advantage of the Public Trustee's expert knowledge of investment. The trust can be terminated at will by the creator of the trust. For the Public Trustee's services in this respect only half the usual capital fees are charged. He has also a valuable power to act as auditor of the accounts and condition of any trust. The Public Trustee can also act as administrator, either where there is no will, or where there is a will but no one willing to act as executor thereunder. The fees have been arranged upon a very low scale. The Public Trustee is not allowed to work for a profit, but merely to pay expenses. The principal fees are of two kinds—a fee upon capital, and a fee upon income. The fee upon capital is taken in two instalments, half at the beginning, and half at the end of the trust, such half ranging as follows:

On the first £1,000, 15*s.* %.
On the excess of £1,000 to £20.000, 5*s.* %.
On the excess of £20,000 to £50,000, 2*s.* 6*d.* %.
On the excess of £50,000, 1*s.* 3*d.* %.

The fee upon income is 1% up to £2,000, and thereafter at the rate of ½%, if, as is usual, the income be paid direct to the person entitled, otherwise 2% on the first £500, and 1% on the excess of £500 up to £2,000 and thereafter at the rate of ½%. A pamphlet giving full information as to the powers and duties of the Public Trustee may be obtained on application, and a personal interview can be had at any time during office hours.

Public Trustee, Charles John Stewart . £3,000
Assistant ditto, E. K. Allen . . £1,200–1,500
Legal Adviser, L. J. Fulton . . £1,000–1,200
Financial Adviser, E. W. Thomas . £1,000–1,200
Principal Clerks, R. S. Shuckburgh; E. C. Groves . . . . . £700–£900
Legal Supervisors, E. Philips, J. H. Jacob, G. A. Ross £500–700
Assist. Principal Clerk, P. F. Swain £500–700
Accountant, A. F. Day . . . £500–800
Deputy Public Trustee, Manchester, T. M. Young £800

Head Office, Kingsway, London, W.C. Hours. 10–4; Saturdays, 10–1. Telephone, Holborn 2400.
Branch Office, Albert Sq., Manchester. Telephone, City 6140.

Trading with the Enemy

The Public Trustee is custodian for England and Wales under the Trading with the Enemy Acts. Under these Acts, British registered companies have to make returns to him in respect

of enemy shareholders, British firms in respect of enemy partners, and British subjects in respect of any property, including bank balances, they may hold for enemies, and debts of £50 or upwards due to enemies.

It is important to note that an enemy for this particular purpose is any person or firm resident or carrying on business in enemy territory.

By the Royal Proclamation of Sept. 7, 1916, all persons resident in the United Kingdom, the Isle of Man, and the Channel Isles must make returns to the Public Trustee showing their claims against enemy firms or persons in respect of debts due to them, bank balances held for them, and all property of any description belonging to them situated in enemy territories. The Public Trustee also accepts similar returns in respect of such claims against firms or persons in territory occupied by the enemy.

A special "Trading with the Enemy" Department of the Public Trustee Office has been instituted to deal with the above matters, and the necessary forms can be obtained on application either personally or through the post.

Assistant-in-Charge, P. F. Swain.
Clerks-in-Charge :
Foreign Claims, G. W. Gough.
Vesting Orders, Board of Trade, H. C. Bischoff and R. Higson.
Vesting Orders by the Court, H. J. MacDougall.
Registration of Enemy Property, W. R. Edwards.
Patents, Designs, and Trade Marks Accountant, L. Jacobs.

Divorce and Separation

The ecclesiastical courts originally had exclusive jurisdiction to deal with matrimonial causes, and exercised it by granting divorce *a vinculo matrimonii*, which dissolved the marriage, or in cases of adultery and cruelty *a mensa et thoro*, which merely released the parties from their obligation to cohabit, and might be determined by reconciliation and cohabitation. This jurisdiction was not recognised or enforced till a much later date by the courts of law and equity, but when civil marriages had been established in England it was transferred to the Divorce Court which was established for the purpose, and it is now exercised by the Probate, Divorce, and Admiralty Division of the High Court, or in certain cases by metropolitan or stipendiary magistrates, or by justices of the peace.

The legal remedies open to a married person are : (1) a declaration of nullity of marriage, (2) divorce, (3) restitution of conjugal rights, (4) judicial separation, (5) a separation order, (6) a protection order for a wife, and (7) a deed of separation by mutual consent.

A marriage is void *ab initio* if there has been (*a*) absence of consent by one or both of the parties, (*b*) violation of the rules of relationship and affinity, (*c*) a previous and subsisting marriage, or (*d*) irregularity in the necessary ceremonials ; but it is only voidable where one of the parties is incapable of consummating it, or if one of them is under the age of consent. In these cases a decree of nullity must be obtained.

A husband may be divorced by his wife for : (1) adultery coupled with (*a*) cruelty, (*b*) desertion for two years without reasonable cause, or (*c*) disobedience to an order for restitution of conjugal rights ; (2) incestuous or bigamous adultery ; or (3) rape or certain heinous offences.

A wife may be divorced by her husband for adultery alone without other offence.

Adultery by the party seeking relief, connivance, condonation, collusion, delay in making the application, or conduct conducing to the offence, is, generally speaking, a ground for dismissing the action, but even in these cases the Court has a certain discretion to grant the application on recognised principles.

An order for restitution of conjugal rights may be made on the application of husband or wife. Disobedience was formerly punished by attachment, but the court now has power to regard it as constituting desertion, and to make a further order for divorce or judicial separation in proper cases.

Judicial separation may be granted to either husband or wife on the ground of : (1) adultery, (2) cruelty, (3) desertion without reasonable cause for two years or more, (4) disobedience to a decree for restitution of conjugal rights, or (5) unnatural offences.

A police magistrate, a stipendiary magistrate, justices in petty sessions, or the Divorce Court may grant a separation order on the application of a married woman when her husband has (1) been summarily convicted for an aggravated assault upon her, (2) been convicted on indictment of an assault upon her, and been fined more than £5 or sentenced to imprisonment for a term exceeding two months, (3) deserted her, (4) been guilty of persistent cruelty to her or wilfully neglected to maintain her and her infant children and so caused her to separate from him, or (5) is an habitual drunkard. Such an order has the effect of a decree for judicial separation on the ground of cruelty.

A similar order may be made on the application of a husband if his wife is an habitual drunkard.

On the wife's application, which must be made within six months from the offence, the order may give her the custody of her children and provide for the payment by the husband of a weekly sum not exceeding £2 for maintenance. The court fees and costs of the parties may also be included.

An order obtained by the husband may provide for the custody of the children, and for the wife's detention in a home for inebriates if she is willing and consents to it.

The wife's right to an order is barred if she has previously committed adultery, and an order, which may be varied or discharged on fresh evidence, must be discharged against the husband if his wife afterwards is guilty of adultery. Voluntary resumption of cohabitation puts an end to the order.

A wife deserted by her husband may apply to the Divorce Court, a metropolitan police magistrate, a stipendiary magistrate, or justices in petty sessions for an order protecting property acquired by her after the date of desertion. During the continuance of the order the wife is regarded as if she had obtained a judicial separation, and it continues notwithstanding resumption of cohabitation until it is discharged by the court. If it is made by a magistrate or justices it must be registered within 10 days in the district county court.

It may be discharged at any time for good reason, and if so discharged on the ground that there has been no desertion it becomes void *ab initio*, so that the parties are restored to their original rights.

A separation deed is made by the consent of both parties on terms that are mutually agreed. It usually contains a covenant by trustees to indemnify the husband against the wife's debts, and is void if it is made for an illegal consideration

or for the purpose of enabling one of the parties to carry on illicit intercourse with a third party, or if it is not followed by immediate separation.

Persons who have good grounds for obtaining a divorce and are not worth more than £50 (or £100 under special circumstances), may obtain facilities by writing to the Secretary, London Prescribed Officers (Poor Persons), at Room 756 Royal Courts of Justice, The Strand, London, and giving references to two persons, who must not be witnesses in the action, as to character and want of means.

In Nov. 1909 **a Royal Commission** was appointed to inquire into "the present state of the law and the administration thereof in divorce and matrimonial causes, and application for separation orders, especially with regard to the position of the poorer classes in relation thereto, and the subject of the publication of reports of such causes and applications," and to report whether any amendments should be made. The Report of the Commission was published in Nov. 1912 [Cd. 6478—1*s.* 9*d.*].

The Majority Report began by giving an outline of the history and present state of the law; from which it is shown that (1) in England, adultery is the only ground for divorce (coupled with certain additional offences if the suit is by a wife); while in Scotland, and nearly all other countries that allow absolute divorce, one or more further grounds are admitted. (2) In England, and in some of the British Colonies that allow absolute divorce, a distinction is made between the rights of the sexes; while in Scotland and most other countries they stand on an equality. (3) In England the administration of matrimonial law (with some minor exceptions under the Summary Jurisdiction Acts) is entirely concentrated in London; while in Scotland and most other countries very much greater facilities are afforded both as regards access to the Court and the system of legal assistance.

Some of the **principal recommendations** of the Majority Report were:

(1) The two sexes should be placed on an equal footing as regards any ground for divorce.

(2) **Five new grounds for divorce:** (*a*) desertion for three years; (*b*) cruelty (as defined); (*c*) incurable insanity after five years; (*d*) habitual drunkenness after three years from first separation order; and (*e*) imprisonment under commuted death-sentence.

(3) Grounds for **nullity of marriage** to be extended to five cases (including insanity and epilepsy, as well as other types of unfitness), if such facts are unknown to the other party at the time of marriage.

(4) The Court should have power to grant an order of **presumption of death** after seven years' absence.

(5) The High Court should hold sittings and exercise jurisdiction at every place where there is a District Registry of the High Court.

(6) Restriction on the publication of reports of proceedings.

Turning to some of the reasons given for various recommendations, it may be noted that, with reference to the proposed equality of the sexes, the Report points out that women "have been gradually emerging from the position they occupied in times when a wife was looked upon almost as her husband's chattel, and marriage was a matter of purchase, and when the husband's rights were far greater than the wife's," so that now the time has come when "it is impossible to maintain a different standard of morality in the marriage relation." Dealing with the general question of divorce reform, the Commissioners say: "We are of opinion that there is a necessity for reform in this country both in procedure and in the law, if the serious grievances which at present exist are to be removed, and if the opportunities of obtaining justice are to be placed within the reach of the poorer classes."

The Minority Report recommended that **the grounds of divorce should not be extended**; but otherwise agreed, generally speaking, with the recommendations of the Majority Report as to (1) the equal rights of the sexes; (2) the additional grounds for nullity of marriage; (3) the presumption of death to make a new marriage valid; (4) the practice in procedure, in general, but with certain exceptions (such as the proposed substitution of a divorce for a separation order); (5) the restrictions on publication.

In July 1913 Sir D. Brynmor Jones introduced in the House of Commons a Bill having for its object the repeal of the existing law and its restatement in a form embodying all the principal recommendations of the Majority Report. Owing to the crowded nature of the session, it was not proceeded with.

Statistics

In 1913 (the latest year for which statistics have been published) there were in the English courts 998 petitions for divorce (the largest number yet recorded) as against 920 in 1912. Only 72 cases were tried by a jury. There were 91 petitions for judicial separation. The number of cases in the Divorce Court has increased during the last ten years faster than the population. The number of petitions presented by husbands was 548 as compared with 450 petitions by wives; but this excess of petitions by husbands is decreasing. The decrees made absolute were 577. In no fewer than 481 of the 1,263 marriages in which there were petitions for dissolution, judicial separation, nullity, or restitution, the marriages had lasted 10 years and upwards; in 146, 10 years and less than 20. Of this same number (1,263) 493 were childless; in 372 cases there was only one child of the marriage, and in 194 cases two children. The number of divorced persons who remarried in 1913 was 854, 415 being men and 439 women; 322 divorced men married spinsters and 337 divorced women married bachelors. The number of separation orders granted by magistrates was 5,173. Few of these were in the agricultural counties, the largest number being in Lancashire (1,269), the Metropolitan Police District coming next with 1,089. In the Scottish courts in 1914 divorce or separation was granted to 200 wives and 153 husbands. In 41 cases the marriage had lasted 20 years or upwards, and in 189 cases between 10 and 20 years. In 238 of the cases there were no children of the marriage. In Ireland 8 decrees for divorce were granted, and 1 for nullity of marriage.

For the United States, official statistics are not available for a later year than 1906, but in that year 72,062 divorces were granted, 23,455 to husbands and 48,607 to wives. According to the Census of 1910 there were in the United States at that time 156,176 divorced men and 185,101 divorced women.

Divorce Law Reform Union (objects: to promote the reform and amendment of the laws relating to marriage, divorce, and separation). *Pres.* Sir A. Conan Doyle; *Organising Sec.* Mrs. M. L. Seaton-Tiedeman. *Office*, 19 Buckingham Street, W.C.

PROFESSIONAL FEES

Architects

The usual remuneration for an architect's services is a commission of 5% on the total cost of new work, if over £1,000. If under £1,000, an increased charge, regulated by special circumstances and conditions, is made, as is also the case for works requiring designs for furniture, fittings, and decorations. When several distinct buildings, being repetitions of one design, are erected at the same time, the usual commission is charged on the cost of one such building, and a modified arrangement made in respect of the others. If plans and specifications are prepared and approved, but the work subsequently abandoned, the charge is 2½% upon the estimated cost, with a further ½% if the architect should have procured tenders. An extra charge, by time, is made for material alteration of design. The architect is entitled during the progress of the works to payment by instalments on account at the rate of 5% on the amount of the certificates when granted, or alternatively on the signing of the contract to half the commission on the amount thereof, and the remainder by instalments during their progress. The usual charge per day depends on the architect's professional position, the minimum being three guineas. For estimating *dilapidations* and furnishing or checking a schedule of same, the charge is 5% on the estimate, but in no case less than two guineas. For sanitary reports the charge depends on the nature and extent of the services rendered. In all cases travelling and out-of-pocket expenses are paid by the client in addition to the fees. For valuing and negotiating the settlement of claims under the Land Clauses Consolidation Act and similar Acts, the charge is on Ryde's Scale.

Auctioneers and Estate Agents

I. SALES BY AUCTION

Freehold, Leasehold, and Copyhold Properties, including the preparation of particulars, and advising as to reserves: On the first £100, 5%; on the next £4,900, 2½%; on the residue, 1½%. In addition to the above charges—on amounts paid by the purchaser for *chattels*, *fixtures*, *fittings*, *trade stocks*, and other *movable effects*, *timber* and *tenant-right* under the Conditions of Sale, in addition to the purchase-money of the property: 5% on £500, and 2½% on residue, to include inventory and valuation.

Sale before Auction.—After issue of advertisements, the same scale as by auction.

Non-Sale.—A charge equivalent to one-fourth of the commission which would have been earned on a sale up to £5,000 calculated on the reserve price, to include valuation for reserves; on larger amounts by arrangement.

Sale after Auction.—In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary commission then payable.

Furniture, Trade Stocks, and Chattels.—5% on the amount realised, exclusive of preparation of catalogues.

Plant and Machinery.—5% on the amount realised, exclusive of preparation of catalogues.

Live and Dead Farming Stock, except Horses and Pedigree Cattle.—2½% on live stock, and 5% on dead stock, on the amount realised.

Horses and Pedigree Cattle.—5% on the amount realised.

When the lots referred to in the last four paragraphs are reserved or bought in by or on behalf of the vendor—half the commission on sale, calculated on the amount of reserve or buying-in price.

II. PRIVATE TREATY SALES

Freehold and Copyhold Estates and Houses, and Ground Leases.—5% on the first £100; 2½% on the next £4,900; 1½% on the residue; and a commission, in addition, on the amount paid for *chattels*, *fixtures*, *fittings*, *furniture*, *trade stocks*, and other *movable effects*, *timber*, and *tenant-right*, of 5% up to £500, and 2½% on the residue, to include inventory and valuation.

III. PURCHASES

Freehold, Copyhold, or Leasehold Property.—One-half of the Scale for Sale by Private Treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. Where no purchase is effected, the usual Scale for Valuation should be charged: one guinea % on the first £1,000; half a guinea % on the next £9,000; and a quarter of a guinea % beyond on the value of the property (see No. VII).

IV. LETTINGS

Business Premises, Unfurnished Houses, Flats, &c., or on disposing of all Leases (other than Ground Leases) by assignment or otherwise.—*Where the term is for three years or less, 5% on one year's rent; where the term is for more than three years, 7½% on one year's rent; and, in either of the above cases, upon the premium or consideration, 5% up to £1,000, and 2½% on the residue; and the commission on any sum obtained for fixtures, furniture, or effects of any kind, of 5% up to £500, and 2½% on the residue. When a property, which an agent has been instructed to let or sell, is let by him, and the tenant afterwards purchases, the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

On letting Furnished Houses or Flats, in Town or Country, or Shootings, including Collection of Rent.—5% on the first year's rental, and 2½% on the rental for the remainder of the term or for any extension thereof.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

For making or checking Inventories of Furniture and Effects.—A minimum fee of 2 guineas per day, exclusive of expenses.

On letting Land on Building Lease.—One year's ground rent on first £50; three-quarter year's ditto on next £50; half year's ditto on next £900; and one-quarter year's ditto on residue.

V. COLLECTIONS OR RECEIVERSHIPS

10% upon gross rental of *weekly property*; 5% upon gross rental of *other property or tithes*; 2½ to 5% on *ground rents*, according to the amount of the rents and the number of collections.

* In some counties the customary scale for lettings where the term is for more than one year is 7½% on one year's rent.

VI. LAYING-OUT OR DEVELOPMENT OF ESTATES

The charge varies with the character and size f the estate, but for *road construction*, 5% upon he outlay, exclusive of expenses.

VII. VALUATIONS

Valuation of Freehold, Copyhold, or Leasehold Properties.—A fee equivalent to a guinea % on the first £1,000; half a guinea % on the next £9,000; and a quarter of a guinea % beyond on the value of the property. In valuations for mortgage, if an advance is not made, one-third of the above charges, with a minimum fee of 5 guineas, may be made, provided that the intending mortgagee is informed of the arrangement. Where one valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

Compulsory Acquisition of Property.—The fee is on Ryde's Scale, exclusive of attendance on juries or umpires or at arbitrations, in respect of which the fee is 5 guineas per diem.

Valuing for Annual Rental.—(*a*) Agricultural Property, 5 guineas % up to £500, and 2½ guineas % beyond; (*b*) Urban and Residential Property: *Furniture, Fixtures, and Effects*, 5% up to £500, and 2½% on the residue; *Plant, Machinery, and Trade Stocks*, 5% on first £100, and 2½ guineas % on the residue; *Live and Dead Farming Stock*, 5 guineas % on first £100, and 2½ guineas % on the residue; *Hotel and Public House Fixtures, Fittings, and Stock*, 5 guineas % up to £1,000, and 3 guineas % on the residue.

Probate and Estate Duty Purposes: Freehold, Copyhold, and Leasehold Property, one guinea % on the first £1,000, and a quarter guinea % on the remainder; *Furniture and Effects, Live and Dead Farming Stock, and other Personal Property*, 2½ guineas % on the first £500, and 1½ guineas % on the remainder of the amount of valuation, to include inventory. Minimum fee, 5 guineas.

Valuations under the Finance (1909–10) *Act*, 1910. *For Survey, Completion of Government Returns, Valuation and Report.*—(a) *County Residential Properties, Agricultural Land, and Undeveloped Land*, one-half guinea % up to a "total value" of £20,000, and one-quarter guinea % on the balance above that amount; (b) *Urban Properties*, one-quarter guinea % on a "total value" of £20,000, and one-eighth guinea % on the balance above that amount. Minimum fee, 3 guineas.

Valuation for Rating Purposes and Assessment Appeals, not exceeding £100 gross assessment, 5 guineas; not exceeding £200, 9 guineas; not exceeding £300, 12 guineas; not exceeding £400, 14 guineas; and add one guinea to the last-mentioned fee for every additional £100.

Preparing Specification of Dilapidations and Settling the Amount, if required.—5 guineas % on the amount. Minimum fee, 5 guineas.

Marking, Valuation, and Sale of Timber and Underwood.—5 guineas % on amount realised. When valuing only, 5 guineas % on the first £100, and 2½ guineas % on the residue.

Valuation of Tenant-Right.—5 guineas % on the first £100, and 2½ guineas % on the next £900, and 1½ guineas % on the residue.

Medical

There is no fixed scale of charges for the medical profession, and scales of charges based on the supposed rental of patients' houses have no professional sanction of any kind and little legal weight. A medical man may either charge what he estimates his patient should be able to pay, or what he estimates the value of his individual services, and should the account be disputed it rests with the court to decide whether he has established his legal claim. Hence the wide variation of charges —there is the 3*d.* doctor, the 6*d.* doctor, who includes a bottle of medicine; the three visits for a guinea, with medicines extra, etc. The consulting physician's fees vary from £2.2.0. upwards, and the operating surgeon's charge has the widest of ranges. Emergency calls, long visits, night calls, are usually charged extra. Midwifery cases are usually charged at an inclusive fee, which it is customary to pay at the end of the attendances. The doctor's bill, which is presented half-yearly or quarterly, merely records "attendance and medicine" from date to date, but all visits and items are entered in the doctor's ledger, which he is always prepared to produce when requested.

Solicitors

Solicitors' charges are regulated by various Rules of Court, and their bills of costs are liable to taxation, at the instance of any party chargeable therewith. Apart from conveyancing business, solicitors' charges much depend on the nature of the proceedings taken, the importance of the issues involved, the time spent upon the case, and the expenses incurred, including stamps, fees to counsel and witnesses, etc. As to conveyancing matters, charges are regulated by the Solicitors' Remuneration Act, 1881, and the Schedules attached thereto; on sales, purchases, and mortgages, when the consideration money does not exceed £1,000, the solicitor for each party is entitled to 1½%; between £1,000 and £3,000 to a further fee of 1% on the amount above £1,000, in each case with a minimum fee of £5; as to leases, or agreements for leases, at rack rent, a lessor's solicitor is entitled for preparing, settling, and completing lease and counterpart, where the rent does not exceed £100, to a fee of 7½% on the rental, but not less in any case than £5, where the rent exceeds £100 but not £500, a further fee of 2½% in respect of each subsequent £100 of rent, and where the rent exceeds £500 to a fee of 1% for every subsequent £100 above £500. A lessee's solicitor for perusing draft and completing is entitled to a fee of one-half the amount payable to the lessor's solicitor. Fees are exclusive of stamps, counsel's fees, auctioneer's or valuer's charges, travelling or hotel expenses, fees paid on searches to public officers, on registrations, or to stewards of manors, costs of extracts from any register, record, or roll, or other disbursement reasonably and properly paid, or any extra work occasioned by changes occurring in the course of any business, such as the death or insolvency of a party to the transaction, as well as any business of a contentious character, or any proceedings in any court, but include law stationer's charges, and allowances for time of the solicitor and his clerks, and for copying and parchment, and all other similar disbursements. In most cases solicitors will usually give an approximate estimate beforehand of any particular transaction.

Surveyors

The scale of professional charges of members of the Surveyors' Institution accords with that authorised by the Auctioneers' and Estate Agents' Institute (*vide supra*).

WEIGHTS AND MEASURES

The fundamental units of the British systems of weights and measures are the Yard and the Pound for the imperial; the Metre and the Kilogram for the metric. The gallon, which is a standard measure of capacity for both liquids and dry goods, is based upon the Pound and contains 10 imperial standard pounds weight of distilled water, weighed in air against brass weights, with the water and the air at 62° F., and the barometer at 30 in.

MEASURES OF VOLUME

Avoirdupois Weight

16 drams (437·5 grains) = 1 ounce (*oz.*).
16 oz. (7,000 grains) = 1 pound (*lb.*).
28 lb. = 2 stones = 1 quarter.
4 quarters = 112 lb. =
8 stone = 1 hundredweight (*cwt.*).
1 cental (or new hundredweight) = 100 lb.;
a half-cental = 50 lb.
20 cwt. = 2,240 lb. = 1 ton.

Troy (Jewellers') Weight

The Troy ounce (= 480 grains), used for weighing gold and silver, is becoming obsolete. For quantities less than an ounce decimal parts (0·5, 0·4, 0·3, etc., down to 0·001) are employed; for larger quantities than an oz. multiples of the ounce. Precious stones are weighed in carats (the legal standard = 1 metric carat = 200 milligrams).
London, Paris, Amsterdam carat = 3·163 grains.
South African carat = 3·174 grains.

Apothecaries' Weight

20 grains = 1 scruple (℈1).
3 scruples (60 grains) = 1 drachm (ʒ1).
8 drachms (480 grains) = 1 Apothecaries' ounce (*oz. Apoth.*).
12 ounces = 1 pound.

The Apothecaries' ounce and pound are obsolete. The scruple and drachm are almost exclusively limited to old-fashioned prescriptions. Avoirdupois weight is used in the British Pharmacopœia.

Apothecaries' Liquid Measure

60 minims (*min.*) = 1 fluid drachm (*fl. dr.*) or "teaspoontul."
8 fluid drachms = 1 fluid ounce (*fl. oz.*).
20 fl. oz. = 1 pint.
4 teaspoonfuls = 2 dessert-sp. = 1 tablesp.

Dry Measure

4 gills = 1 pint.
2 pints = 1 quart.
4 quarts = 8 pints. = 1 gallon.
2 gallons = 1 peck.
4 pecks = 8 gallons = 1 bushel.
8 bushels = 1 quarter.
36 bushels = 1 chaldron.

The bushel frequently varies locally with the article measured. For corn and other grains the English bushel varies: for English wheat, 60 lb., for foreign, 62 lb.; for English barley, 50 lb.; for English oats, 39 lb., for foreign, 38 lb. and 40 lb.; for rye and maize, 60 lb. In the U.S. the bushel varies also according to the grain measured: wheat, 60 lb.; buckwheat, 48 lb.; barley, 48 lb.; oats, 32 lb.; flax seed, 56 lb.; millet seed, 50 lb.; hemp seed, 44 lb.; and bran, 20 lb.

Cubic Measure

1,728 cubic inches = 1 cubic foot.
46,656 cubic inches = 27 cubic feet = 1 cubic yard.

MEASURES OF LENGTH

12 inches (*in.*) = 1 foot (*ft.*)
36 inches = 3 feet = 1 yard (*yd.*).
5,280 feet = 1,760 yards = 1 mile.
5½ yards = 1 rod, pole, or perch.
100 links = 1 surveyor's chain = 22 yards.
10 chains = 1 furlong = 220 yards.
8 furlongs = 1 mile.
5,280 yards = 3 miles = 1 league.

Nautical Measures

6 feet = 1 fathom.
608 feet = 1 cable.
10 cables = 6,080 ft. = 1 nautical or sea mile or knot.
38 statute miles = 33 nautical miles.
60 knots = 1 degree = 69·04 Eng. miles.

English mile = 1,760 yards = 1·000
Scottish mile = 1,984 ,, = 1·127
Irish mile = 2,240 ,, = 1·273

MEASURE OF AREA

Square Measure

144 square inches = 1 square foot.
9 square feet = 1 square yard.
30¼ square yards = 1 rod, pole, or perch.
1 square chain = 16 rods.
40 square rods. = 1 rood.
4 roods = 10 chains =
4,840 yards = 1 acre.
640 acres = 1 sq. mile (3,097,600 sq. yards).

English acre = 4,840 sq. yards = 1·00000
Scottish acre = 6,150·4 sq. yards = 1·27034
Irish acre = 7,840 sq. yards = 1·61983

MISCELLANEOUS

Hay Weight

56 lb. = 1 truss of old hay. 60 lb. = 1 truss of new hay. 36 trusses = 1 load. 1 sq. yd. = 6 stone of new hay = 9 stone of old hay.

Straw Weight

36 lb. = 1 truss. 36 trusses = 11 cwt. 64 lb. = 1 load.

Fish Weight

1 barrel (anchovies) = 30 lb.
1 quintal = 112 lb.
4 fish = 1 warp.
33 warps (132 fish). = 1 long hundred.
10 long hundred (1,320 fish) = 1 thousand.
10 thousand (13,200 fish) = 1 last.
500 herrings = 1 code.
600 herrings = 1 mease.
615 herrings = 1 maze.
37½ gallons = ½ cran } for fresh
9⅜ gallons = ¼ cran } herrings.
26⅔ gallons = 1 barrel (cured herrings).

Ale and Beer Measure

4 gills = 1 pint.
2 pints = 8 gills = 1 quart.
4 quarts = 1 gallon.
9 gallons = 1 firkin.
2 firkins = 18 gallons = 1 kilderkin.
2 kilderkins = 36 gallons = 1 barrel.
1½ barrels = 54 gallons = 1 hogshead.
2 hogsheads = 108 gallons = 1 butt.
2 butts = 1 tun.

1 hogshead of claret = 46 gall.; 1 butt of sherry = 108 gall. 1 pipe of port = 115 gall.;

1 pipe of Madeira = 92 gall.; 1 hogshead of brandy = 45 to 55 gall.; 1 hogshead of rum = 45 to 50 gall.; 1 tun of wine = 240 gall.; 1 pipe or butt = 108 to 117 gall.; an anker = 10 gall.; a tierce = 42 gall.; a puncheon = 72 gall.

Other measures employed for specific articles are:

Ballast, pig of	=	56 lb.
Camphor (box)	=	1 cwt.
Cloves (matt)	=	80 lb.
,, (chest)	=	200 lb.
Coal (sack)	=	2 cwt.
Cocoa (bag)	=	1 cwt.
,, (cask)	=	1½ cwt.
Coffee (bag)	=	1¼ to 1½ cwt.
,, (bale, Mocha)	=	2 to 2½ cwt.
Cotton (bale, American)	=	400–500 lb.
,, (bale, Egyptian)	=	700–740 lb.
,, (bale, Indian)	=	500–600 lb.
Currants (caroteel)	=	5–9 cwt.
Flour (peck)	=	14 lb.
,, (sack)	=	280 lb.
Glass (stone)	=	5 lb.
,, (seam)	=	24 stone.
Gunpowder (barrel)	=	100 lb.
Honey (gallon)	=	12 lb.
Hops (pocket)	=	1–2 cwt.
,, (bag)	=	2½ cwt.
Lead (fodder)	=	2,184 lb.
Meat (butcher's, 1 stone)	=	8 lb.
Nuts (bag, Barcelona)	=	126 lb.
Shipping (ton of)	=	42 cub. ft.
Steel (faggot)	=	120 lb.
Tar (barrel)	=	25 gall.
Tobacco (hogshead)	=	12–18 cwt.
Wood (cord)	=	128 cub. ft.

Builder's Measurements

London stock or kiln bricks = 8¾ × 4¼ × 2¾ in., = 6·81 lb.
Welsh fire bricks = 8¾ × 4½ × 2½ ,, = 7·00 ,,
Paving blue bricks = 9 × 4½ × 3 ,, = 8·90 ,,
Dutch clinker bricks = 6¼ × 3 × 1½ ,, = 1·55 ,,
Paving tiles (square) = 6 × 6 × 1 ,, × 2·16 ,,

One rod of brickwork measures 16½ × 16½ × 1½ ft. = 306 cubic feet = 11¼ cubic yards; it requires 3 cubic yards of mortar.

A piece of wall paper is 12 yards long × 21 in. wide.

Timber and Wood

40 cubic feet of unhewn
50 ,, ,, ,, squared
600 superficial feet of 1 in. planks or deals
400 ,, ,, ,, 1¼ ,, ,, ,,
300 ,, ,, ,, 2 ,, ,, ,,
240 ,, ,, ,, 2½ ,, ,, ,,
200 ,, ,, ,, 3 ,, ,, ,,
170 ,, ,, ,, 3½ ,, ,, ,,
150 ,, ,, ,, 4 ,, ,, ,,
= 1 load.

120 deals = 1 standard hundred; a batten = 7 in. in width; a deal = 9 in. in width; a plank = 11 in. in width.

Specific Gravities of various Substances compared with the weight of a similar quantity of Water

Water	1·00	Clay	1·20
Alcohol	0·84	Coal (Welsh)	1·39
Aluminium	2·68	,, (Staff.)	1·27
Ash	0·84	Copper	8·95
Beech wood	0·85	Cork	0·24
Beer	1·02	Diamond	3·53
Blood	1·06	Ebony wood	1·33
Brass	8·40	Glass	2·89
Cedar wood	0·61	Glycerine	1·26
Chalk	2·79	Gold	19·26
Cherry wood	0·72	Granite	2·78
Gunpowder	0·93	Milk, cow's	1·03
Honey	1·45	,, goat's	1·04
Ice	0·92	Oak wood	1·17
Iron, cast	7·21	Platinum	21·50
,, bar	7·79	Silver	10·47
Ivory	1·83	Steel	7·83
Lead	11·35	Tin	7·29
Mahogany	1·06	Turpentine	0·99
Marble	2·70	Urine	1·01
Mercury	13·57	Wine	0·99
Milk, woman's	1·02		

Measure of Angles

A Right Angle is subdivided into:
60 seconds (60″) = 1 minute (1′).
60 minutes = 1 degree (1°).
90 degrees = 1 right angle or quadrant.
4 quadrants = 1 circle.

Diam. of circle × 3·1416 = circumference (sym. π).
Diam. squared × ·7854 = area of circle.
Diam. squared × 3·1416 = surface of a sphere.
Diam. cubed × ·5236 = solidity of sphere.
One degree of circumference × 57·3 = radius.
Volume of a cylinder = area of base × height.
Volume of a cone = ⅓ × area of base × height.

Weight of Water

1 cubic in. = ·0361 lb.
1 gallon = 10·0000 ,,
1 cubic foot = 62·3550 ,,
1 cubic foot = 6·2355 gall.
35·9233 feet = 1 ton.

ELECTRICAL UNITS

Electrical measurements are expressed in terms of the centimetre, the gramme, and the second (C.G.S. units). In 1893 an Electrical Congress met at Chicago, and unanimously agreed as to the definition of certain practical international units; after subsequent conferences the following were finally adopted by a Conference held in London in Oct. 1908:

As a unit of resistance, the international *Ohm*, which is based upon the ohm equal to 10^9 units of resistance of the C.G.S. system of electromagnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice 14·4521 grammes in mass, of a constant cross-sectional area and of the length of 106·3 cm.

As a unit of current, the international *Ampere*, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units, and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of nitrate of silver in water, deposits silver at the rate of 0·00111800 of a gramme per second.

As a unit of electromotive force, the international *Volt*, which is the electromotive force that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampere. It is represented sufficiently well for practical purposes by $\frac{1000}{1018}$ of the E.M.F. of a normal or saturated cadmium Westol cell at 20° C. prepared in the manner described in a certain specification.

As a unit of quantity, the international *Coulomb*, which is the quantity of electricity transferred by a current of one international ampere in one second.

As the unit of capacity, the international *Farad*, which is the capacity of a condenser charged to a potential of one international volt by one international coulomb of electricity.

As a unit of work, the *Joule*, which is equal to 10^7 units of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampere in an international ohm.

As a unit of power, the *Watt*, which is equal to 10^7 units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second.

As the unit of inductance, the *Henry*, which is the induction in a circuit when an electromotive force induced in this circuit is one international volt, while the inducing current varies at the rate of one ampere per second.

MEASUREMENTS IN MECHANICS

The British unit is the *Poundal*, which is the force which in one second retards or accelerates the velocity of a mass of one pound by one foot per second. The metric unit is the *dyne*. 1 poundal = 13,825·5 dynes.

A unit of force employed by engineers is the *weight of one pound*, *i.e.* the force equivalent to the gravitational attraction of the earth on a mass of one pound. Depending on gravity, it is not constant; it equals 32·17 poundals or 980 dynes.

The *Erg* is the energy expended when a force of one dyne acts over one centimetre; for practical purposes a unit ten million times as great, the *Joule*, is used. The *poundal-foot* is its equivalent. The metric unit is the *Watt*, the rate equal to one joule per second. The kilowatt equals 1,000 watts, the energy unit being the *kilowatt-second*. 3,600 kilowatt-seconds or 1 kilowatt-hour is a *Board of Trade unit* or *kelvin*. *Horse-power* (HP.) equals 550 foot-pounds per second, or 33,000 foot-pounds per minute; in the metric system 746 watts.

Unit of Heat.—The common unit, used in the British system, is the *British thermal unit* (B. Th. U.); it is the amount of heat required to raise one pound of water through one degree Fahrenheit.

YARN MEASURES

Cotton and Spun Silk.—120 yards = 1 skein: 7 skeins or leas = 1 hank; 18 hanks = 1 spindle. A Count is the number of hanks of 840 yards in 1 lb.

Reels of sewing cotton vary in length from 30 to 1,760 yards; the actual length is marked on each reel.

Worsted Yarn Measure.—80 yards = 1 skein; 7 skeins (560 yards) = 1 hank; counts are the number of hanks in a lb.

Linen Yarn Measure.—300 yards = 1 hank or lea; 20 hanks = 1 bundle. In the West of England wool is expressed by the number of hanks, of 320 yards in 1 lb.

SHIP'S WATCH AND TIME

A ship's crew when at sea is divided into two watches—the *starboard watch* (the captain's, sometimes commanded by the second mate), and the *port watch* (commanded by the first mate); in the Navy, the watches are commanded by the lieutenants. There are seven watches in the twenty-four hours, the twelve hours of the night being divided into three watches of four hours, and the twelve hours of the day into four watches, two of four hours, and two of two hours. These latter are termed "dog watches," their object being to change the turn of the watches every twenty-four hours, so as to increase the rest of the men on alternate nights. Thus the men who watch from eight to midnight on one night, watch from midnight till 4 a.m. on the next. The seven watches are:

First Afternoon Watch .	12 noon to 4 p.m.
First Dog Watch . .	4 p.m. to 6 p.m.
Second Dog ,, . .	6 p.m. to 8 p.m.
First Night ,, . .	8 p.m. to midnight.
Middle ,, . .	Midnight to 4 a.m.
Morning ,, . .	4 a.m. to 8 a.m.
Forenoon ,, . .	8 a.m. to noon.

Time is kept on board ship by means of "bells," the watch bell being struck with the clapper every half-hour. Thus 12.30 a.m. is one bell in the middle watch, the number increasing every half-hour until 8 bells is 4 a.m.

SHIP MEASUREMENT

The size of a ship is referred to in terms of tonnage. The methods of ascertaining the tonnage of a merchant vessel are laid down in the Merchant Shipping Acts. The word "tonnage," however, is used in different connections.

The *ton-register* is the unit of capacity of a ship, viz. 100 English cubic feet.

Gross tonnage is obtained by dividing the whole cubical capacity of a ship by 100.

Net tonnage is the gross tonnage *less* deductions for machinery, crew, and other spaces not used for passengers or cargo.

Measurement capacity is the cubic capacity of the hold, *i.e.* the amount of light measurement goods capable of being carried therein.

Dead-weight tonnage or *tonnage capacity* is the number of tons (2,240 lb.) which can be carried in the holds when the vessel is charged to the load-water line.

Displacement tonnage, used with reference to warships, is the actual weight of sea-water displaced by the vessel when charged with all its weight to the load-water line.

Load-water line is the line placed on the side of ships to indicate the extreme depth to which it is permissible to immerse a ship in loading it with cargo.

The *load draught* of a vessel is the distance in feet from the bottommost part of a vessel to the load-water line. The draught of vessels is always marked in feet on the stem and stern post.

The *freeboard* is the distance from the load-water line to the top of the uppermost deck. There is no regulation as to the amount of freeboard, which may be unlimited.

THE SPEED OF SHIPS

The speed of ships is expressed in knots or nautical miles. A nautical mile = 6,080 ft. as compared with the 5,280 ft. of a statute mile. The following table shows the equivalents:

Knots.	Miles.	Knots.	Miles.	Knots.	Miles.
1·00	1·152	11·00	12·667	20·00	23·030
1·25	1·439	12·00	13·818	20·50	23·606
1·50	1·727	13·00	14·970	21·00	24·182
1·75	2·015	14·00	16·121	21·50	24·758
2·00	2·303	15·00	17·273	21·75	25·045
3·00	3·455	15·50	17·848	22·00	25·333

TEMPERATURE

Temperature, or degree of heat, is measured by a thermometer. The three arbitrary scales usually employed are those of Fahrenheit, Centigrade, and Réaumur; conversion from one to another can be seen at a glance:

Réaumur	Centigrade	Fahrenheit	
°	°	°	
80	100	212	Water boils at sea-level.
76	95	203	
72	90	194	
68	85	185	
63·1	78·9	174	
60	75	167	Alcohol boils.
56	70	158	
52	65	149	
48	60	140	
44	55	131	
42·2	52·8	127	Tallow melts.
40	50	122	
36	45	113	
33·8	42·2	108	
32	40	104	
29·3	36·7	98	Blood heat.
28	35	95	
25·8	32·2	90	
24	30	86	
21·3	26·7	80	
20	25	77	
16	20	68	
12·4	15·3	60	Temperate.
10·2	12·8	55	
8	10	50	
5·8	7·2	45	
4	5	41	
1·3	1·7	35	
0	0	32	Freezing-point.
— 0·9	— 1·1	30	
— 4	— 5	23	
— 5·3	— 6·7	20	
— 8	— 10	14	
— 12	— 15	5	
— 14·2	— 17·8	0	Zero Fahr.
— 16	— 20	— 4	
— 20	— 25	— 13	
— 24	— 30	— 22	
— 28	— 35	— 31	
— 32	— 40	— 40	

TIME MEASURES

See Divisions of Time, *ante*, p. 35.

OLD WEIGHTS AND MEASURES

The cubit was the distance between the elbow and the tip of the middle finger, and was considered to be 18 in. The yard and inch or 37-in. cloth ell, afterwards known as the Scottish ell = 37·06 in. The English ell was 45 in. The hand, still used for measuring horses, was 4 in. The Roman mile was 1,000 paces of 5 ft. each = 1,614 English yards.

A hide of land, originally, possibly, the amount of land necessary to support a family, was a varying area, but as used for the purposes of assessment in Domesday Book (A.D. 1086) was 120 "acres," *i.e.* 120 times the amount of land which a plough team of eight oxen could plough in a single day. Hides were usually divided into fourths or virgates, the normal holding of a villein with two oxen. In some counties the carucate was used in place of the hide, and was somewhat larger, containing from 180 to 200 "acres."

BIBLICAL WEIGHTS AND MEASURES

Weights

	Grs. Troy.	£	s.	d.

TYPE

All type is of a uniform height, called "type high," a shilling standing edgewise representing the exact height, ⅐ in. Type is made up in *founts*, consisting of Roman and Italic, with capitals, figures, points, and signs, in all about 275 characters or sorts. Capitals are referred to as caps or upper case, small letters as lower case; the number of lower-case letters in a fount is in proportion to the frequency with which the various letters occur in printing, the following being a fair estimate:

a . 9,000	h . 6,000	o . 8,000	u . 4,500
b . 2,000	i . 9,000	p . 2,400	v . 1,500
c . 4,000	j . 500	q . 600	w . 2,500
d . 5,000	k . 800	r . 7,000	x . 500
e . 14,000	l . 5,000	s . 8,000	y . 2,500
f . 3,000	m . 3,000	t . 10,000	z . 300
g . 2,000	n . 8,000		

Measurement in printing is simplified by the adoption of a uniform *point-system*, the pica em being the standard. The type chiefly used in this ANNUAL is nonpareil, 6 point; the column contains 76 lines to the page, 12 pica ems wide.

THE METRIC SYSTEM

The metric system is in compulsory use in the whole of Europe except the United Kingdom and Russia, and in the United States; in all countries of the world, however, its permissive use has been legalised. The units of the metric system are the *metre*, the unit of length, the *litre*, the unit of capacity, and the *gramme*, the unit of weight. The metre is about one ten-millionth part of the earth's quadrant; the litre is a cube of which the side is one decimetre and represents the capacity of one kilogram of distilled water at 4° C. (= ·2201 gall.); the gramme is the weight of one cubic centimetre of water at 4° C. Sub-multiples and multiples of the fundamental units are expressed by the prefixes: deci = $\frac{1}{10}$th; centi = $\frac{1}{100}$th; milli = $\frac{1}{1000}$th; deka = 10 times; hecto = 100 times; kilo = 1,000 times.

Length

Myriametre (*Mm.*)	= 10,000 metres	= 6·2137 miles.
Kilometre (*km.*)	= 1,000 „	= 0·62137 „
Hectometre (*hm.*)	= 100 „	= 328 ft. 1 in.
Dekametre (*dam.*)	= 10 „	= 393·7 inches.
METRE (*m.*)	fundamental unit	= 39·37 „
Decimetre (*dm.*)	= $\frac{1}{10}$th of a metre	= 3·937 „
Centimetre (*cm.*)	= $\frac{1}{100}$th „ „	= 0·3937 „
Millimetre (*mm.*)	= $\frac{1}{1000}$th „ „	= 0·0394 „

Area

Hectare (*h.*)	= 100 ares	= 10,000 sq. metres = 2·471 acres.
Are (*a.*)	= 100 „	„ = 119·6 sq. yds.
Centare (*ca.*)	= 1 sq. metre	= 1·550 sq. in.

Capacity

Kilolitre (*kl.*)	= 1,000 litres	= 264·17 gall.
Hectolitre (*hl.*)	= 100 „	= 26·417 „
Dekalitre (*dal.*)	= 10 „	= 2·6417 „
LITRE (*l.*)	fundamental unit	= 1·0567 quarts.
Decilitre (*dl.*)	= $\frac{1}{10}$th of a litre	= 0·845 gill.
Centilitre (*cl.*)	= $\frac{1}{100}$th „ „	= 0·338 fl. oz.
Millilitre (*ml.*)	= $\frac{1}{1000}$th „ „	= 0·27 fl. dr.

Weight

Tonne (*t.*)	= 1,000 kilograms	= 2204·6 pounds.
Quintal (*q.*)	= 100 „	= 220·46 „
Kilogram (*kg.*)	= 1,000 grammes	= 2·2046 „
Hectogram (*hg.*)	= 100 „	= 3·5274 oz.
Dekagramme (*dag.*)	= 10 „	= 0·3527 „
GRAMME	fundamental unit	= 15·432 grains.
Decigramme (*dg.*)	= $\frac{1}{10}$th of a gramme	= 1·5432 „
Centigramme (*cg.*)	= $\frac{1}{100}$th „ „	= 0·1543 grain.
Milligramme (*mg.*)	= $\frac{1}{1000}$th „ „	= 0·0154 „

METRIC EQUIVALENTS

The central figure in heavy type in each table indicates the value of the column corresponding, thus: centimetre = 0·393 inch, and 1 inch = 2·540 centimetres. By shifting the point higher multiples can once be ascertained, thus: 3 centimetres = 1·181 inches; 30 centimetres = 11·81 inches; 300 centimetres = 118·1 inches.

FOREIGN WEIGHTS AND MEASURES

In most countries the metric system of weights and measures is now compulsory, but the following countries, in addition to the United Kingdom and the United States, still retain distinctive weights and measures:

China.—Liang or tael = 1·3 oz.; 10 hiang = 1 chin or catty = 1·3 lb.; 100 chin = 1 tan or picul = 133·3 lb.; ts'un = 1·41 in.; 10 ts'un = 1 ch'ih = 14·1 in.; 10 ch'ih = 1 chang = 11·75 ft.; 1 li = ½ mile.

Egypt.—The feddan, the unit of measure for land = 1·03808 acres. The ardeb, the measure of capacity = 43·555 gall. = 5·44436 bush.; the okieh = 1·3207 oz.; the rotl = ·99049 lb.; the oke = 2·7513 lb.; and the qantâr = 36 okes = 100 rotls = 99·049 lb. An ardeb of wheat = 334 rotls; of beans = 345 rotls; of barley = 267 rotls; of maize = 312 rotls, and of cotton seed = 270 rotls.

Greece.—The oke = 2·80 lb.; the stater = 123·20 lb.; the livre = 1·05 lb.; the pike = ¾ yard.

Japan and Cho-sen.—Ken = 5·965 ft.; chô = 60 ken = 1/7 mile; ri = 36 chô = 2·44 miles; square ri = 5·9552 sq. m.; liquid koku = 39·703 gall.; dry koku = 4·9629 bush.; liquid to = 3·9703 gall.; dry to = 1·9851 peck.

Russia.—16 vershoks = 1 arshin = 28 in.; 3 archins = 1 sajène = 7 ft.; 500 sajènes = 1 verst = 0·663 mile; 1 sq. verst = 0·4394 sq. m.; 1 dessiatine = 2·70 acres; 3 zolotniks = 1 loth; 32 loths = 1 pound = 1/36 lb.; 40 pounds = 1 pood = 36 lb. English; 8 shtoffs = 1 vedro = 2·705 gall.; 8 chetveriks = 1 chetvert = 5·771 bush.

Turkey.—400 drams = 1 oke = 2·832 lb.; 44 okes = 1 cantar = 125 lb. Donum (land measure) = 1,098·76 sq. yd.

United States.—The weights and measures of the United Kingdom are in use, but the gallon of wine = 0·833 imperial gall.; the ale gallon = 1·01695 imp. gall.; the bushel = 0·9692 imp. bush. Instead of the cwt. the cental of 100 lb. is employed, the short ton = 2,000 lb.; the long ton, 2,240 lb.

SOME COLONIAL MEASURES

In some British colonies particular measures are used:

In *British India* the maund, which in Bengal = 40 sers = 82⅔ lb.; in Bombay = 28 lb.; in Madras = 25 lb. The guz, a measure of length in Bengal = 36 in.

In the *Straits Settlements*, *Hong Kong*, *British North Borneo*, and *Sarawak* commercial weights are: 1 kati = 16 tahil = 1⅓ lb.; 1 pikul = 100 katl = 133⅓ lb.; 1 koyan = 40 pikul = 5,333⅓ lb.

In *Canada* the cwt. = 100 lb. and the ton 2,000 lb., as in the United States.

1914 . .	15,126.170	8,772,102	23,898,272	6,250,569	261,134	30,409,975
1915 . .	21,301,000	7,934,389	29.235,389	7,598,923	248,415	37,082,727

There are colonial mints at Sydney (opened in 1855), Melbourne (1872), and Perth (1899), where gold coins are struck of identically the same design as those struck at the Royal Mint, but with *mint marks* (S., M., P.) on the reverse side above the date. There is a mint in Birmingham, worked by a private company, where coinages for foreign governments are struck, and where, occasionally, silver and bronze coins for imperial or colonial use have been struck. A full account of the work of the Mint, with tables giving the amount of the coinage of gold, silver, and bronze in the United Kingdom and Colonies in detail, and a résumé of the coinages of foreign countries, is given in the Annual Reports of the Deputy Master and Comptroller of the Mint.

The **coins** struck at the Royal Mint are sovereigns, half-sovereigns, half-crowns, shillings, sixpences, threepences, pence, halfpence, and farthings. Maundy fourpences, twopences, and pence are also struck in small quantities, and five-pound and two-pound gold pieces on special occasions. The following figures show the operations of the Royal Mint during the past three years:

Gold Coin Issued

	1913.	1914.	1915.
Sovereigns .	24,583,789	11,501,170	20,280,000
Half-sovereigns	3,055,000	3,625,000	1,021,000
	27,638,789	15,126,170	21,301,000

Silver Coin Issued

	1913. £	1914. £	1915. £
England & Wales	1,206,279	5,152,069	5,940,328
Scotland . .	198,900	404,500	648,900
Ireland . .	118,800	536,000	625,400
Colonies . .	410,375	157,955	384,295
	1,934,354	6,250,524	7,598,923

Bronze Coin Issued

	1913. £	1914. £	1915. £
United Kingdom	306.350	257,234	240,600
Colonies . .	8,175	3,900	7.815
	314,525	261,134	248,415

Number of Pieces Struck

	1913.	1914.	1915.
Imperial:			
Gold . .	30,633,962	18,752.241	22,338,027
Silver .	32,296.527	92,455,843	105,231,514
Bronze .	87,158,672	77,237,096	76,003,101
Colonial:			
Silver .	16,905,000	12,330,000	2,100,000
Bronze .	6,169,000	2,335,000	960,000
Nickel-bronze	12,273,600	10,752,000	nil

In 1915 £1,200,000 worth of gold coins, £199,695 worth of silver coins, and £4,991 worth of bronze coins were withdrawn from circulation.

Life and Wear of Silver Coins.—The ages at which silver coins reach the stage of illegibility is:

Half-crowns . . .	64·66 years.
Florins . . .	45·41 ,,
Shillings . . .	41·61 ,,
Sixpences . . .	28·22 ,,
Threepences . . .	32·76 ,,

(The average age of a sovereign on its withdrawal is about 24 years, and of a half-sovereign 15 years).

Standard Gold is the gold used in the coinage of the United Kingdom. Pure gold is 1,000 "fine" or 24 carats. For the purposes of coinage pure gold is mixed with a certain amount of alloy, and the result is expressed either (1) as "carats," *i.e.* the amount of gold in 24 parts of alloy (standard gold contains twenty-two twenty-fourths), or as (2) "fineness," *i.e.* the amount of gold in 1,000 parts of alloy. The *fineness* of standard gold is 916·6 of gold, the alloy being 83·3 of copper. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy oz. of standard gold is worth £3.17.10½, and one troy oz. of pure gold £4.4.11½.

The balance of trade between the different countries of the world is generally settled by shipments of specie, and in normal times this remitting of gold whenever exchange moved much below the gold point took place practically as a matter of routine. But the war has caused chaos here, as in so many other directions. The increased cost of freight and of insurance against risks which have never before been faced in warfare between civilised peoples have moved the practical gold point considerably, and increased the difficulty of adjusting the adverse balance of trade. One outcome of this was the visit of the Commission to the U.S. in Sept. of 1915 to arrange for a loan to the value of £100,000,000. As a proof of the sound financial position of the Allies in the present war, regard must be had to (1) the gold holdings of the great State Banks, and (2) to the predominant position of the British Empire with regard to the gold supply of the world. The great State Banks held in 1915 gold as follows:

Bank of England agst. notes	£51,338,430	Belgium('14)	£10,977,000
Treasury Note Reserve .	28,500,000	Denmark .	5,930,000
France .	200,611,000	Holland .	33,655,000
Russia .	160,726,000	Norway .	3,644,000
Italy .	53,661,000	Spain .	34,490,000
Germany .	122,066,000	Sweden .	6,594,000
Austria-Hungary (1914)	51,578,000	Switzerland	9,953,000
		U.S. Treas'ry	49,549,000

In addition to the gold held by the Bank of

England, a very large amount is held by English, Scottish, and Irish Banks.

Gold Production.—The gold production of the world in 1915 was £96,915,000. The British contribution to this total was over 60%:

Australasia	£9,202,000	Transvaal	£38,617,000
Canada	3,900,000	Rhodesia	3,823,000
India	2,366,000	United States	20,300,000
West Africa	1,707,000	Other c'ntries	17,000,000

Standard Silver.—Standard silver contains 925 parts of silver and 75 parts of copper per 1,000. The market price of silver varies for many reasons, but whatever may be the market price of the metal, one oz. of standard silver is always converted into 5*s.* 6*d.* in silver coin. The difference between the nominal value of silver coin and its intrinsic value is retained by the State, both to meet expenses of coinage and as a source of profit. Silver, therefore, is only a token coinage. The price of silver is very much less staple than that of gold, and large discoveries of recent years have depreciated the metal.

India is a large buyer and absorber of silver, and her demands at different times of the year cause fluctuations in the price. During 1915 the highest price of silver was 27½*d.* and the lowest $22\frac{5}{16}$*d.*, the average for the year being 23·674*d.* The variations in the price may be seen from the following figures:

	d.		*d.*
1880	52¼	1912	$28\frac{1}{16}$
1900	28¼	1913	$27\frac{5}{8}$
1910	$24\frac{1}{8}$	1915	$23\frac{7}{16}$

The world's production of silver in 1915 is estimated at 195,985,600 oz., valued at £19,708,999.

Copper is the third metal employed in coinage, and the resultant coins are, like silver coins, only token money. Pure copper would not be sufficiently hard for coinage, and a bronze mixture is employed, consisting of copper 95 parts, tin 4 parts, and zinc 1 part. One ton of this mixture yields £418 in pence, or £373.6.8 in halfpence or farthings. As copper is so necessary for use in war, the variation in its price has been remarkable. Consequently, it is not surprising that the market price of copper in 1916 beat all records for 100 years. In the Napoleonic wars it touched £200 a ton. In the Franco-German war it reached £108 per ton; during the Secretan corner in 1888 it touched £105 a ton, but collapsed in the following year to £35 a ton. In July 1914 the price for standard copper was £59.15.0, but in April 1916 it had risen to £118.5.0. The world's production of copper in 1915 was 1,061,000 metric tons.

Bank of England notes are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

Treasury Notes of the value of £1 and 10*s.* are also issued, and are legal tender to any amount.

Legal Tender.—Bank of England notes are legal tender in England and Wales for every purpose (except by the Bank of England itself), but a creditor cannot be compelled to give change. Gold coins are legal tender to any amount, silver coins up to a sum of £2, 1*d.* and ½*d.* coins up to 1*s.*, and farthings up to 6*d.*

Currency of British Dominions and Colonies

Aden.—As India (*q.v.*).

Australia.—Of the same denominations as the United Kingdom, but of special design.

Bahama Islands.—Bank of Nassau notes value £1 and 4*s.* British silver and bronze coins legal tender without limit.

Bermudas.—The same as the U.K. Treasury notes legal tender until 1917. Silver coin legal tender to any amount.

British Guiana.—Accounts are kept in dollars and cents ($ = 4*s.* 2*d.*). British gold, silver, and bronze coins in circulation, with a local coin, the "groat," fourpenny piece.

British Honduras.—The standard is the gold *dollar* = 4*s.* 1⅓*d.* The British sovereign and half-sovereign are legal tender for $4.86 and $2.43 respectively. Paper dollar; silver, 50, 25, 10 and 5 cents.; nickel-bronze, 5 cent piece; bronze cent piece.

Canada.—The standard is the *dollar* of 100 cents. Value of U.K. money fixed by law: £1 = $4.86\frac{2}{3}$; 5*s.* = $1.2. Notes for 5, 4, 2, 1 dollars and 25 cents. Silver, 1 dollar, 50, 25, 10, 5 cents; bronze cent.

Ceylon.—The standard is the Indian *rupee* = 1*s.* 4*d.*, 15 to the £1. Currency notes, Rs.1,000, 100, 50, 10, 5. Silver, 50, 25, and 10 cent pieces; nickel, 5 cent piece; copper, 1 cent and ½ cent pieces (6¼ cents = 1*d.*).

Cyprus.—The standard is the *piastre* = 1⅓*d.* English gold coins current; silver, 18, 9, 4, 3 piastres; copper, 1, ½, ¼ piastres (9 piastres = 1*s.*).

East Africa.—The standard is the Indian *rupee* = 1*s.* 4*d.*, 15 to the £1. Silver, 50, 25 cents; nickel (perforated), 10, 5, 1, ½ cent; aluminium (perforated), 1, ½ cent.

Egypt.—The standard is the gold *pound* of 100 piastres = £1.0.6¼; 97½ piastres = £1. Gold coin, £E; silver, 20, 10, 5, 2, 1 (= 2½*d.*) piastres; nickel, 1, ½, $\frac{1}{5}$, $\frac{1}{10}$ piastre; bronze, $\frac{1}{10}$, $\frac{1}{20}$ piastres.

Falkland Islands.—Of the same denomination as the United Kingdom.

Federated Malay States.—The standard is the dollar = 2*s.* 4*d.*; $60 = £7. For other coins, *see* Straits Settlements.

Fiji.—As in the United Kingdom.

Gambia.—*See* Nigeria.

Gibraltar.—As in the United Kingdom.

Gold Coast.—As in the United Kingdom.

Hong Kong.—Standard—the British, Mexican, and Hong Kong dollars are current, variable with the price of silver, now = 2*s.* 2*d.* Silver, 50, 20, 10, 5 cent pieces; copper, 1 cent.

India.—The standard is the *rupee* = 1*s.* 4*d.*, 15 to the £1. Notes, Rs. 100, 50, 10, 5; silver, ½, ¼, ⅛ rupee; nickel (scalloped), $\frac{1}{8}$ rupee (anna = 1*d.*); copper, 2, 1 (= ¼*d.*), ½, ⅓ pice.

Jamaica.—As in the United Kingdom.

Jersey.—As in the United Kingdom.

Malta.—British coins and Treasury notes current. Additional copper coin, ⅓*d.*

Mauritius.—The standard is the Indian *rupee* = 1*s.* 4*d.*, 15 to the £1. Silver, 20, 10 cent; bronze 5, 2, 1 cent.

Newfoundland.—The standard is the gold *dollar*, as in Canada (*q.v.*). Silver, 50, 20, 10, 5 cent; bronze, 1 cent.

New Zealand.—As in the United Kingdom.

Nigeria.—The standard is the *sovereign*. Silver special coinage introduced in 1913, 2*s.*, 1*s.*, 6*d.*, 3*d.*; nickel (perforated), 1*d.*, $\frac{1}{10}$*d.*

Seychelles.—As in Mauritius (*q.v.*).

Sierra Leone.—*See* Nigeria.

Straits Settlements.—The standard is the dollar = 2*s.* 4*d.*; $8.57 = £1. Silver, 20, 10, 5 cent; copper, 1, ½, ¼ cent.

Uganda.—*See* East Africa.

Union of South Africa.—As in the United Kingdom.

Moneys of Foreign Countries

(Revised by Thos. Cook & Son, Bankers, Ludgate Circus, London, E.C.)

In consequence of the financial situation created by the war, the rates shown are in many cases nominal only, but represent the nearest values at Nov. 1, 1916.

Abyssinia.—The Maria Theresa dollar is the current coin, but the standard is the *talari* = 2*s.* (10 = £1). Silver, ½, ¼, $\frac{1}{10}$ talari; copper, the besa, $\frac{1}{160}$ of a talari; bars of salt are accepted as currency everywhere, as are also cartridges.

Argentina.—The standard (*nominal*) is the gold *peso* of 100 centavos, of the value of 4*s.* par; the *actual* is the paper peso of value 1*s.* 9¼*d.*; this circulates mostly, together with 50, 20, 10 centavo coins, and nickel and copper fractional money.

Austria-Hungary.—The standard is the *krone* (= 100 hellers) = 6*d.* Gold, 100, 20, 10 krone piece; silver, 5, 2, 1 krone; nickel, 20 heller = 2*d.*; 10 heller = 1*d.*; 2 heller = ½*d.*; 1 heller = $\frac{1}{10}$*d.*

Belgium.—The standard is the *franc* of 100 centimes = 9½*d.* (25 francs = £1). Gold, 20 francs; silver, 5, 2, 1 franc. No gold, however, has been minted since 1882, nor silver 5 franc since 1876; note circulation instead.

Bolivia.—The standard is the *nominal* gold *boliviano* of 100 centavos; the *actual*, the silver boliviano = 1*s.* 7½*d.* (12·5 bolivianos = £1). There are actually two gold coins struck, the British and Peruvian £1 and ½£. Silver, 50, 20 centavos; nickel, 10, 5 centavos.

Brazil.—The standard is the *nominal* gold *milreis* of 1,000 reis = 2*s.* 3*d.* par value; the actual is the paper milreis = 1*s.* (at date, but subject to fluctuation). Silver, 2,000, 1,000, 500 reis; nickel, 400, 200, 100 reis; bronze, 40, 20 reis (100 reis = 1⅝*d.*).

Bulgaria.—The standard is the *lev* of 100 stotinkis = 8*d.* (nominal 6*d.*). Gold—there are a few gold coins of 100, 20, 10 leva, but foreign 20 and 10 franc pieces circulate; silver, 5, 2, 1, ½ leva; nickel, 20, 10, 5, 2½ stotinki (centimes).

Chile.—The standard is the nominal gold *peso* of 100 centavos, value 1*s.* 6*d.*; the *actual*, the paper peso, of varying value, now = 10*d.* Gold coins, 20 (condor), 10 (doblon), 5 (esaudo) pesos; silver, 1 peso, 20, 10, 5 centavos; bronze, 2½, 2, 1, ½ centavos (£1 has a legal value of 13⅓ pesos).

China.—100 candareens = 10 mace = *tael* of silver = 3*s.* Silver, 50, 25, 10 cents; nickel, 5 cents; copper, 2, 1, ½, $\frac{1}{10}$ cent.

Colombia.—The standard is the nominal gold *peso* = 3*s.* 11½*d.*, the *actual* the paper peso = ½*d.* The English £ is received in all transactions at a value of 5 pesos. Silver, ½ dollar, peseta, and real; nickel, 5, 2, 1 pesos.

Costa Rica.—The standard is the gold *colon* of 100 centesimos = 1*s.* 10*d.* Silver, 50, 25, 10, 5 centesimos.

Cuba.—The standard is the gold *peso* equal to U.S. gold dollar = 4*s.* 1½*d.* new (1915) coinage. Gold, 20, 10, 5, 4, 2, 1 pesos; silver, 1 peso, 40, 20, 10 cents; nickel, 5, 2, 1 cents.

Denmark.—The standard is the gold *krone* of 100 ore = 1*s.* 2½*d.* (18 kroner = £1). Gold coins, 20, 10 kroner; silver, 2, 1 kroner, 25, 10 ore.

Ecuador.—The standard is the silver *sucré* of 100 centavos = 2*s.* Gold coins, 20, 10 sucrés; silver, 1 sucré, 50, 40, 10, 5 centavos; nickel and copper pieces.

France.—The standard is the *franc* of 100 centimes = 9½*d.* (exchange = 8½*d.*). Gold coins, 20, 10 francs; silver 5, 2, 1, ½ francs, 20 centimes; bronze, 10, 5 centimes. Algeria, Madagascar, and Tunis have the same currency. In Indo-China there is a silver coinage of 1, ½, ⅙, $\frac{1}{10}$ piastre (piastre = 1*s.* 10*d.*). Bronze, $\frac{1}{100}$, $\frac{1}{200}$ piastre.

German Empire.—The standard is the *mark* of 100 pfennig = 11¾*d.* (present value = 8½*d.*). Gold coins, 20, 10 mark; silver, 5, 2, 1, ½ mark; nickel, 25, 10, 5 pfennig; during the war iron coins are in use of 10, 5 pfennig.

Greece.—The standard is the nominal *drachma* of 100 lepta = to the franc = 9½*d.* The *actual* is the paper drachma of same value. Gold coins, 20, 10, 5 drachmæ; silver, 5, 2, 1 drachmæ, 50, 20 lepta.

Guatemala.—The standard is the nominal silver *peso* of 100 centavos = 4*s.*; the *actual* is an enormously depreciated paper peso, at present worth about 1½*d.* Nickel coins, the real (= 6*d.*), ½, ¼ real.

Haiti.—The standard is the nominal gold *gourde* of 100 centavos = 4*s.*; the *actual*, the paper gourde, value 5*d.* Nickel, 50, 20, 10, 5 centavos; bronze, 3, 2, 1 centavos.

Honduras.—The standard is the silver *peso* of 100 centavos = 4*s.* Silver, 50, 25, 10, 5 centavos; bronze, 2, 1 centavos.

Italy.—The standard is the *lira* of 100 centesimi = 9½*d.* (exchange = 8*d.*). Gold coins, 20, 10 lire; silver, 5, 2, 1 lire, 50 centesimi; nickel, 20 cents; bronze, 10, 5, 2, 1 cents.

Japan.—The standard is the gold *yen* of 100 sen = 2*s.* 1½*d.* (9·75 yen = £1). Gold coins, 20, 10, 5 yen; silver, 50, 20, 10 sen; nickel, 5 sen; bronze, 5 sen, 1 rin. Cho-sen coinage is now the same as Japan.

Liberia.—The standard is the U.S. *dollar* of 100 cents; silver, 50, 25, 10 cents; copper, 2, 1 cent.

Luxemburg.—As France.

Mexico.—The standard is the nominal gold dollar of 100 centavos = 2*s.*, the actual the silver dollar of same value. There is no metallic currency in Mexico at present, but enormous quantities of doubtful paper.

Monaco.—As France.

Montenegro.—The *perper* and the *para*, nominally equal in value to the Austrian krone and heller.

Morocco.—The standard is the silver *piastre* = 3*s.* Silver coins, 1, ½, ¼ piastre.

Netherlands.—The standard is the gold *florin* or *gulden* of 100 cents = 1*s.* 8*d.* (12 florins = £1). Gold coins, 10, 5 florins; silver, 2½, 1, ½ florins; nickel, 5 cents; bronze, 2½, 1, ½ cents. The colonies have the same coinage as the mother-country.

Nicaragua.—The standard is the gold *cordoba* of 100 centavos = 4*s.*, the actual the silver peso = 1*s.* 8*d.* Gold coins, 10, 5, 2½, 1 cordobas; silver 1, ½, ¼ cordobas, 10, 5 centavos; bronze, 1, ½ centavos.

Norway.—The standard is the gold *krone* of 100 ore = 1*s.* 2½*d.* (18 krones = £1). There is only paper money circulated (20, 10, 5, 2, 1 kroner; 50, 25, 10 ore), and some few nickel coins.

Oman.—The *mahmūdi* of 20 gaj = 1*s.* 0½*d.* The Maria Theresa dollar and the Indian rupee also circulate.

Panama.—The standard is the gold *balboa* of 2 pesos = 4*s.* 2*d.* 20, 10, 5, 2½, 1 balboas; 1 peso; 50, 20, 10, 5 centavos.

Paraguay.—The standard is the nominal silver *peso* of 100 centavos, subject to fluctuations now = 2*s.* The actual is the paper peso, equal

to about 3*d*. With the exception of a few nickel coins, paper is the circulating medium.

Persia.—The standard is the silver *kran* of 20 shahis = 4*d*. (60 krans = £1). Silver, 5, 2, 1 krans, 10, 5 shahis; copper, 4, 2, 1 shahis, 1 pul (= $\frac{1}{2}$*d*.).

Peru.—The standard is the gold *libra* of 10 soles = £1. Silver, 1, ½, ⅕, $\frac{1}{10}$, $\frac{2}{10}$ sol; bronze, 2, 1 centavo (100 centavos = 1 sol).

Portugal—The standard is the nominal gold *escudo* of 100 centavos = 4*s*. 5¼*d*.; the actual is the paper escudo = about 2*s*. 11*d*. English sovereign legal tender for 4½ escudos. Silver, 50, 20, 10 centavos; bronze, 4, 2, 1, ½ centavos.

Rumania.—The standard is the gold *leu* of 100 bani = 7½*d*. Gold coins, 50, 25, 20, 12½, 10 lei; silver, 5, 2, 1 lei, 50 bani; nickel, 20, 10, 5 bani.

Russia.—The standard is the gold *rouble* of 100 kopecks = nominal 2*s*. 1½*d*., actual 1*s*. 5*d*. (9·46 roubles = £1). Gold coins, 15, 10, 7½, 5 roubles; silver, 1 rouble, 50, 25, 20, 15, 10, 5 kopecks. Credit notes, 500, 100, 50, 25, 10, 5, 3, 1 rouble. *Finland* has the gold *markha* of 100 penni = 8*d*. Gold, 20, 10 markha; silver, 2, 1 markha, 50, 25 penni; bronze, 10, 5, 1 penni.

Salvador.—The standard is the nominal gold *peso* of 100 centavos = 3*s*. 11½*d*.; the actual, the silver peso = 1*s*. 7*d*. Silver, 25, 10, 5 centavos.

Serbia.—The standard is the *dinar* of 100 paras= 9½*d*. (exchange = 6*d*.). Gold coins, 20, 10 dinars; silver, 5, 2, 1 dinars, 50 paras; nickel, 20, 10, 5 paras; bronze, 2 paras.

Siam.—The standard is the gold *tical* of 100 satangs = 1*s*. 6*d*. (13 ticals = £1). Gold coin, the clos = 10 ticals; silver, 1, ½, ¼ ticals; nickel, 10, 5 satang; bronze, 1 satang.

Spain.—The standard is the *peseta* of 100 centesimos = 10*d*. Gold coins, 25, 20, 10, 5 pesetas; silver, 5, 2, 1 pesetas, 50 centimes.

Sweden.—The standard is the gold *krona* of 100 öre = 1*s*. 2½*d*. (18 krona = £1). Gold coin 20, 10, 5 kronor; silver, 2, 1 kronor, 50, 25, 10 öre. Bank notes, 1,000, 100, 50, 10, 5, 1 kronor.

Switzerland.—As in France.

Turkey.—The standard is the gold 100 *piastre* piece (£T1) = 18*s*. (111 piastres = £1). Silver, 20, 10, 5, 2 piastres; nickel, 1 piastre (= 40 para), 20, 10, 5 para.

United States.—The standard is the gold *dollar* of 100 cents = 4*s*. 1½*d*. Gold coins, 20, 10, 5 dollar pieces (double and half eagle). Paper notes of 1,000, 500, 100, 50, 20, 10, 5, 2, 1 dollar; silver, 50, 25, 10 cents; bronze, 5, 1 cent. The Philippines have the *peso* = 50 U.S. cents, as the standard (9·6 pesos = £1).

Uruguay.—The standard is the nominal gold *peso* of 100 centesimos = 4*s*. 4*d*.; the actual is the silver peso = about 4*s*. 1½*d*. Silver, 1 peso, 50, 20, 10 centesimos; nickel, 5, 2, 1 centesimos.

Venezuela.—The standard is the gold *bolivar* of 100 centavos = 9½*d*. Gold coins, 50, 20, 10, 5 bolivares; silver, 5, 2, 1 bolivares, 50, 20 centavos.

CIVIL LIST PENSIONS, 1915-16

Joseph Comyns Carr (art, literature, and drama), £200.

William Hurrell Mallock (literary work), £150.

Mrs. Marjory Mines (widow of late Prof. George Mines), £100.

William Biscombe Gardner (lithographer), £100.

Mrs. Amy Bullen (widow of late F. T. Bullen, author), £50.

Miss Fanny Louise Bryant (daughter of late Thomas Bryant, R.R.C.S., surgeon), £30.

Dr. Thomas Ross (history of architecture), £200.

Lady Murray (widow of the Editor of the "New English Dictionary"), £170.

Mrs. Illingworth (widow of the late Dr. J. H. Illingworth, philosophical work), £100.

W. H. Davies, poet, £50, in addition to his existing pension of £50.

Dr. George Cunningham, dentistry, £50.

Greenwich Hospital, originally a Royal Palace, was appropriated as "a memorial of the virtues of good Queen Mary, of the love and sorrow of King William, and the great victory of La Hogue," to receive disabled seamen and relieve the widows and orphans of seamen. The funds are derived from the investment of over £4,000,000 of capital, landed estates, house property at Greenwich, freehold ground and other rents of property in London, etc. In 1865 it was resolved to close the Hospital as an asylum for disabled seamen, and to devote the Hospital funds to pensions for officers and men, the education and maintenance of their children, gratuities to relatives dependent on men who died in the naval service, etc. The buildings are now used as a Royal Naval College. Est. income, 1916–17, £204,666; expenditure, £204,382. *Director*, C. H. R. Stansfield.

The New HAZELL, 1917

Land Values Duties—

Increment Value Duty.—£1 for every £5 of the increment value of any land accruing after April 30, 1909. (So far as it has not been previously paid, the duty is payable on the occasion of the fee simple of the land or any interest in the land being transferred on sale, being leased for more than fourteen years or passing on death. In lieu of the occasion, passing on death, in the case of land held by bodies corporate or unincorporate the duty is payable in 1914, and in every subsequent 15th year.

Reversion Duty.—£1 for every £10 of the value of the benefit accruing to the lessor through the determination of any lease of land.

	£	s.	d.
(Duty to be paid on the determination of the lease.)			
Undeveloped Land Duty.—A yearly duty of ½*d.* for every £1 of the site value.			
Mineral Rights Duty.—A yearly duty of 1*s.* for every £1 of the rental value of rights to work minerals and of mineral way-leaves. This duty is now subject to the Excess Profits Duty.			
Lease or **Tack** :			
(1) For any definite term not exceeding a year :			
Of any dwelling-house, or part thereof, at a rent not exceeding the rate of £10 per annum .	0	0	1
(2) For any definite term less than a year :			
Of any furnished dwelling-house or apartments where the rent for such term exceeds £25 .	0	5	0
Of any lands, tenements, or heritable subjects except or otherwise than as aforesaid. (The same duty as a lease for a year at the rent reserved for the definite term.)			
(3) For any other definite term, or for any indefinite term :			
Of any lands, tenements, or heritable subjects—			
Where the consideration, or any part thereof, moving to the lessor or to any other person, consists of any money, stock, or security :			
In respect of such consideration. (The same duty as a conveyance on a sale for the same consideration. See heading "**Conveyance** or **Transfer** on sale of any property, etc.")			
Where the consideration, or any part thereof, is any rent :			
In respect of such consideration : If the rent, whether reserved as a yearly rent or otherwise, is at a rate or average rate :			

—	If the term does not exceed 35 years, or is indefinite.			If the term exceeds 35 years, but does not exceed 100 years.			If the term exceeds 100 years.

Containing less than 10 lb. of moisture in every 100 lb. weight thereof . . . . lb.	0 6 1½
Note.—The minimum weight of packages of Tobacco allowed to be imported into the United Kingdom is 80 lb. gross. Packages of Tobacco must contain Tobacco only, and under Tobacco are included Cigars, Cigarillos, Cigarettes, and Snuff.	
WATCHES. *See* Clocks.	
WINE:	
Not exceeding 30° of Proof Spirit gal.	0 1 3
Exceeding 30° but not exceeding 42° of Proof Spirit . . gal.	0 3 0
And for every degree or part of a degree beyond the highest above charged, an additional duty gal.	0 0 3
The word "degree" does not include fractions of the next higher degree.	
Wine includes Lees of Wine.	
Additional:	
On Still Wine imported in bottles . . . gal.	0 1 0
On Sparkling Wine imported in bottles . . gal.	0 2 6
All Wines must be entered according to their commercial designations, those from Spain being also described on the entry as "Red" or "White."	

* The term "sweetening matter" does not include Saccharin.

Customs Drawbacks

	Rates of Drawback £ s. d.
Articles subject to *ad valorem* duties and Cinematograph Films: If it is proved to the satisfaction of the Commissioners of Customs and Excise that an import duty has been duly paid in respect of any of these articles, and that the article has not been used in Great Britain or Ireland, a drawback equal to the amount of duty paid shall be allowed on that article if exported as merchandise.	
BEER: Imported or brought into Great Britain or Ireland and subsequently exported as merchandise, or shipped for use as ships' stores, or removed to the Isle of Man, of an original gravity of 1055° for every 36 gal.	1 4 3*
" " "	1 5 3*
according to the duty paid on importation. (And so on in proportion for any difference of gravity.)	
CHICORY. *See* Coffee.	
COCOA: Goods exported or shipped for use as ships' stores, in the manufacture or preparation of which in Great Britain or Ireland any duty-paid cocoa, or cocoa butter, or cocoa husks and shells, has or have been used, a drawback equal to the duty paid in respect of the quantity of that cocoa, or cocoa butter, or cocoa husks and shells, as the case may be, which appears to the satisfaction of the Treasury to have been used in the manufacture or preparation of the goods.	
COFFEE, Chicory, Mixtures of Coffee and Chicory: Roasted Coffee or Roasted Chicory, or any mixture of Roasted Coffee and Roasted Chicory exported or shipped for use as ships' stores, if it is shown to the satisfaction of the Commissioners of Customs and Excise that the duties on importation have been duly paid, and subject to conditions prescribed by the Commissioners:	
Coffee . . . 100 lb.	2 2 0*
Chicory . . 100 lb.	1 14 4*
Mixtures of Coffee and Chicory 100 lb.	1 14 4*
No drawback is allowed on any Coffee, Chicory or mixture, if any substance, other than Coffee, Chicory or a substance necessarily or ordinarily used in the manufacturing of Chicory, is mixed therewith.	
FRUIT, DRIED (Figs, Fig Cake, Raisins, Currants): Goods exported or shipped for use as ships' stores, in the manufacture or preparation of which in Great Britain or Ireland any of the following articles, viz.: Dried Figs, Fig Cake, Raisins or Currants have been used, a drawback equal to the duty in respect of the quantity of the article which appears to the satisfaction of the Treasury to have been used in the manufacture or preparation of the goods, if it is shown to the satisfaction of the Commissioners of Customs and Excise that the duties on importation have been duly paid.	
GLUCOSE. *See* Sugar.	
MOLASSES: Produced by a Refiner in Great Britain or Ireland from imported sugar and delivered by him to be used solely for purposes of food for stock, or to a Licensed Distiller for use in the manufacture of Spirits† . . . cwt.	0 3 1½*
Used in the manufacture of goods other than Beer. *See* Sugar.	
SACCHARIN used in the manufacture of goods other than Beer. *See* Sugar.	
SUGAR: Sugar which has passed a refinery in Great Britain or Ireland, and on which the proper Import duties have been paid—upon being exported, or deposited in any bonded warehouse for use as ships' stores or removed to the Isle of Man, a drawback equal to the duty on Sugar of the like polarisation.	
Goods (other than Beer) exported or deposited in any bonded warehouse for use as ships' stores, or removed to the Isle of Man, in the manufacture or preparation of which in Great Britain or Ireland any imported duty-paid Sugar, Glucose, Saccharin or Molasses has been used, a drawback equal to the duty in respect of the quantity of that article which appears to the satisfaction of the Treasury to have been used in the manufacture or preparation of the goods, or, in the case of residual products, to be contained therein.	
TOBACCO: (1) Tobacco manufactured in Great Britain or Ireland on being, by any licensed manufacturer, exported as merchandise, or shipped as stores, or deposited in any bonded warehouse to be used as ships' stores, or exported by parcel post:	
Cigars . . . . lb.	0 6 3*
Cigarettes . . . lb.	0 6 1½*
Cut, Roll, Cake, or other manufactured Tobacco . lb.	0 6 0*
Snuff (not being offal Snuff) lb.	0 5 9*
(2) Shorts, stalks, or other refuse of Tobacco, including offal Snuff,	

* This drawback only takes effect where it is shown that the import duty has been paid at the corresponding rate.

† Drawback is not payable in respect of Molasses produced from non-duty-paid Sugar in refineries working in bond.

	Rates of Drawback. £ s. d.
TOBACCO—*cont.*	
on being, by any licensed manufacturer, exported as merchandise, or deposited:	
in an approved bonded warehouse for exportation as merchandise;	
in a bonded warehouse approved for the manufacture of sheepwash, etc.; or	
for abandonment in an approved King's Warehouse lb.	0 5 7½*

The above rates of drawback are allowed on Tobacco, etc., containing 14% of moisture, a proportionate increase or deduction being made if the moisture is less or more than 14%.

A deduction is made from the drawback for every lb. of inorganic matter in excess of 22% (calculated on the Tobacco, etc., exclusive of water), but the Commissioners of Customs and Excise may allow drawback at the full rate on Tobacco (including Cigars and Cigarettes), and shorts, stalks, or other refuse of Tobacco not of the fineness of Snuff, if they are satisfied that there has been no artificial increase of inorganic matter during manufacture.

The following are the minimum weights for Drawback Tobacco, viz.:

British Manufactured Tobacco

(i) When removed direct from the premises of a licensed manufacturer—
- (*a*) for exportation as merchandise to places other than the Channel Islands—
  - Cigars . . . 12 lb. net.
  - Cigarettes . . 8 ,,
  - Other manufactured Tobacco . . 20 ,,
- (*b*) for shipment as stores—
  - Cigars, Cigarettes, and Snuff . . . 2 ,,
  - Other manufactured Tobacco . . 7 ,,
- (*c*) for exportation by Parcel Post—
  - Manufactured Tobacco including Cigars, Cigarettes, and Commercial Snuff (subject to Post Office regulations as to gross weight of parcels) . . 2 ,,

(ii) When deposited in an approved bonded warehouse—
- For ships' stores or for exportation by Parcel Post . . 80 lb. gross.

* This drawback only takes effect where it is shown that duty has been paid at the corresponding rate.

Stalks, Shorts, or other Refuse of British Manufactured Tobacco, including Offal Snuff

(i) When deposited in a King's Warehouse for abandonment, or in an approved bonded warehouse for the manufacture of sheepwash, or for exportation as merchandise—in packages of not less than 50 lb. and not more than 100 lb. net.

(ii) But when exported direct from the premises of a licensed manufacturer, or deposited in an approved bonded warehouse for exportation, the maximum quantity per package may under certain conditions be extended up to a limit not exceeding 1,400 lb.

Note.—Tobacco of any description for exportation to the Channel Islands must be in packages of not less than 80 lb. gross.

Note.—Goods not prohibited to be imported into or used in Great Britain or Ireland, composed of any article liable to duty as a part or ingredient thereof, shall be chargeable with the full duty payable on such article, or, if composed of more than one article liable to duty, then with the full duty payable on the article charged with the highest rate of duty. (*See* Customs Tariff Act, 1876.)

Where any manufactured or prepared goods contain, as a part or ingredient thereof, any article liable to any duty of Customs, duty shall be charged in respect of such quantity of the article as shall appear to the satisfaction of the Treasury to be used in the manufacture or preparation of the goods, and in the case of goods so containing more than one such article, shall be charged in a similar manner on each article liable to duty at the rate of duty respectively applicable thereto, unless the Treasury shall be of opinion that it is necessary for the protection of the revenue that duty should be charged in accordance with the Customs Tariff Act, 1876.

Any rebate which can be allowed by law on any article when separately charged, shall be allowed in charging goods in respect of the quantity of that article used in the manufacture or preparation of the goods.

As respects the first levying or repealing of any duty of Customs, the time at which the importation of any goods shall be deemed to have had effect shall be the time at which the entry of the goods under the Customs Act is delivered, instead of the time mentioned in sect. 40 of the Customs Consolidation Act, 1876. (*See* Finance Act, 1901.)

The value of any article for the purposes of *ad valorem* duty shall be taken to be the price which an importer would give for the article if the article were delivered, freight and insurance paid, in bond at the port of importation, and duty shall be paid on that value as fixed by the Commissioners of Customs and Excise.

* Syrups or other liquors intended to be consumed only in a diluted form are exempt.

THE SUGAR PROBLEM

The United Kingdom normally obtained a large part of its sugar from Germany and Austria-Hungary. Thus, during the three years 1911-13 the imports of refined and unrefined sugar averaged 37,234,000 cwt. per year, of which 19,866,000 cwt., or 53%, came from those two countries. When the outbreak of war put an end to supplies from that source, wholesale prices immediately rose to an extremely high level, and the retail price of the cheapest "granulated" sugar, which had been 2*d.* per lb., became 4½*d.*, partly on account of the panic buying by a section of consumers. The intervention of the Government, through the Royal Commission on Sugar Supplies, ensured the maintenance of supplies for this country, and the maximum retail price of granulated sugar, as recommended by the Advisory Committee of Retail Traders, was put at 3¾*d.* in the middle of August 1915, and 3½*d.* at the end of October. Even this, however, represented an advance of 75% on the prices which obtained previously, and consumption fell heavily, apparently by about 10%, in the latter part of the year 1914-15.

Quantities of Sugar, etc., retained for Home Consumption

Year.	Sugar.	Molasses.	Glucose.	Saccharin.
	cwt.	cwt.	cwt.	oz.
1913	32,062,825	1,488,393	1,259,494	1,069,239
1914	34,280,475	1,407,016	1,458,707	1,265,664
1915	33,559,911	1,381,735	1,170,278	1,799,294

LONDON'S LOST PROPERTY

The property found in public carriages and deposited with police by drivers and conductors during 1915 is classified as under:—

Bags	10,958
Clothing (men's) . . .	4,767
„ (women's) . . .	5,463
Jewellery	2,246
Miscellaneous articles . .	18,676
Opera glasses	255
Purses	3,879
Rugs	207
Sticks	1,537
Umbrellas	28,479
Watches	537
Total .	77,004

Articles 33,714 in number and of the value of £32,811.5.6 were restored to their owners, the unclaimed residue (with a few exceptions) being, after three months, returned to the drivers and conductors who deposited them with police. The awards paid to drivers and conductors numbered 33,874.

During 1915 the number of new houses in the Metropolitan Police district was 5,549. In thirteen out of the last thirty-six years the number has exceeded 20,000 and in six of them 25,000.

LOCAL TAXATION LICENCES

The following duties on licences are levied by County Councils, who have had transferred to them (Order in Council, Oct. 19, 1908) within their county the powers, duties, and liabilities of the Commissioners of Inland Revenue. The licences taken out in respect of armorial bearings, carriages (including motor cars), and male servants are known as Establishment Licences. Licences, except licences to drive motor cars and cycles, are obtainable at any postal money order office.

LONDON BURGLARIES, 1915

Burglaries decreased by 162, the figures being 272 in 1914 and 110 in 1915. Apprehensions for burglary decreased by 122 and convictions by 97. Housebreakings decreased by 482, the figures being 1,348 in 1914 as compared with 866 in 1915. Arrests for housebreaking decreased by 40 and convictions by 12. Violence to the person was used in 3 cases of housebreaking; 488 of these offences were committed in houses left with no person in charge. In 39 cases of burglary and 186 cases of housebreaking the value of the property stolen was less than £5; 8 burglaries and 17 housebreakings occurred in which the loss amounted to £100 and upwards. In 36 cases of burglary and 65 cases of housebreaking no loss was ultimately sustained. Shop-breakings decreased by 255; the apprehensions decreased by 117.

SPORTING RECORDS

(For addresses of Associations governing Sport, see end of Section)

THE OLYMPIC GAMES

The Olympic Games were the outcome of a meeting of delegates from different nations, held at Paris on June 16, 1894. They are held every fourth year in a different country. The first meeting was held at Athens, 1896; at Paris, 1900; St. Louis, 1904; London, 1908; and Stockholm, 1912. The Sixth Olympiad was to have been held at Berlin, 1916, but it is improbable if any Games will be held for many years to come, or if England will again take part in them. The placings of the competing countries in the 1912 games were as follows: United States, 26 events won; Sweden, 23; United Kingdom, 10; Finland, 9; France, 8; Germany, 6; Italy, 5; S. Africa, 4; Canada, Hungary, and Norway, 3 each; Australasia and Belgium, 2 each; and Denmark, Greece, and Switzerland 1 win each.

Winners of the Marathon Race

ATHLETICS

The **Amateur Athletic Association** abandoned the Championships after the war broke out, and determined instead to organise athletic meetings for members of His Majesty's forces. The existing champions of England (those of 1914) are as follows:

100 Yards: W. R. Applegarth, Polytechnic Harriers, 10 sec.

220 Yards: W. R. Applegarth, Polytechnic Harriers, 21⅕ sec., equals "world's record."

Quarter-mile: C. N. Seedhouse, Blackheath Harriers, 50 sec.

Half-mile: H. Baker, New York A.C., U.S.A., 1 m. 54⅖ sec.

One Mile: G. W. Hutson, Surrey A.C., 4 min. 22 sec.

Four Miles: G. W. Hutson, Surrey A.C., 19 min. 41⅕ sec.

Two Miles Steeplechase: S. Frost, Sparkhill Harriers, 11 min. 10⅗ sec.

Two Miles Walk: R. Bridge, Lancashire W.C., 13 min. 57⅕ sec.

120 Yards Hurdles: G. H. Gray, Salford Harriers, 15⅘ sec.

440 Yards Hurdles: J. C. English, Manchester A.C., 59⅗ sec.

High Jump: W. M. Oler, Jun., New York A.C., U.S.A., 6 ft. 2⅓ in.

Long Jump: P. C. Kingsford, L.A.C., 23ft. 3¼in.

Hop, Step, and Jump: I. Sahlin, Sweden, 46 ft. 0½ in.

Pole Jump: R. Sjoeberg, Sweden, 11 ft. 2 in.

Putting the Weight: A. R. Taipale, Finland, 44 ft. 7½ in.

The New HAZELL, 1917

Throwing the Hammer : C. Lind, Sweden, 163 ft. 3½ in.

Throwing the Discus : A. R. Taipale, Finland, 144 ft. 6½ in.

Throwing the Javelin : M. Koczau, Hungary, 195 ft. 11 in.

One Mile Relay Race : Polytechnic Harriers beat Surrey A.C., 3 min. 31⅗ sec. British record.

Ten Miles Running Championship : T. Fennah, Crewe Harriers, 53 min. 33⅖ sec.

Seven Miles Walking Championship : R. Bridge, Lancashire W.C., 52 min. 32 sec.

The **Oxford and Cambridge University Sports** 1914 ended in the victory of Cambridge by six events to four.

Cambridge have won 25 times, Oxford 22 times, and there have been 3 ties (1864, 1899, 1912).

The **Cross-country Championships** winners in 1914 were : **International,** England (at Chesham) ; **National,** Surrey Athletic Club ; **Scottish,** Bellahouston Harriers ; **Welsh,** Newport Harriers ; **Irish,** Clonliffe Harriers ; **Northern,** Hallamshire Harriers ; **Southern,** Herne Hill Harriers.

Oxford *v.* Cambridge

1905, Camb.; 40 runs.	1911, Oxon; 74 runs.
1906, Camb.; 94 runs.	1912, Camb.; 3 wkts.
1907, Camb.; 5 wkts.	1913, Camb.; 4 wkts.
1908, Oxon; 2 wkts.	1914, Oxon; 194 runs.
1909, Drawn.	1915, Not played.
1910, Oxon; inn. & 126 runs	1916, Not played.

Cambridge have won 38 and Oxford 34 times.

England *v.* Australia

Of the 102 matches played, England has won 46 and Australia 35. Of the matches played in England, the home team won 17 and Australia 8, and 17 were drawn. In matches played in Australia, England has won 30 and Australia 27, and 3 have been drawn.

Various Records.—Highest individual score, A. E. J. Collins (who was killed in the war, Nov. 1914), 628 not out in House Match at Clifton College, 1899; highest individual score in first-class match, A. C. Maclaren, 424, for Lancs. v. Somerset, at Taunton, July 1895; highest individual aggregate in one season (first-class), T. Hayward, 3,518, in 1906; highest average in one season (first-class), Major R. M. Poore, 91·23; 13 centuries in one season, C. B. Fry and T. Hayward; 6 successive centuries, C. B. Fry; highest single innings in first-class match, New South Wales v. South Australia, 918, and Yorks v. Warwickshire, 887; lowest single innings, Oxford Univ. v. M.C.C., 12, in 1887, and Northants v. Glos., 12; greatest number of first-class wickets in one season, 290, by T. Richardson.

Eton *v.* Harrow

1901, Harrow; 10 wkts.	1909, Drawn—rain.
1902, Harrow, 8 wkts.	1910, Eton; 9 runs.
1903, Eton; inn. & 154 runs.	1911, Eton; 3 wkts.
1904, Eton; inn. & 12 runs.	1912, Eton; 6 wkts.
1905, Drawn.	1913, Eton; 9 wkts.
1906, Eton; 4 wkts.	1914, Eton; 4 wkts.
1907, Harrow; 79 runs.	1915, Not played.
1908, Harrow; 10 wkts.	1916, Not played.

In 1916 two one-day matches, not counting in the series, were played between Eton and Harrow. The first, at Harrow, resulted in a victory for Eton by 88 runs, and the second also in a victory for Eton by 27 runs.

CROQUET

(*Croquet court, 35 yds. by 28 yds.*)

Winners of the principal events in 1914:

The Championships.—Gentlemen: P. D. Matthews. Ladies: Miss E. M. Bramwell. Mixed Doubles: C. L. Callaghan and Mrs. G. G. Lockett.

Champion Cups.—Gentlemen: H. W. J. Snell. Ladies: Miss D. D. Steel.

Gold Medals.—Gentlemen: C. L. Callaghan. Ladies: Miss N. E. Coote.

Roehampton Challenge Cup.—Upper Division: Capt. A. F. Becke.

County Championship.—Middlesex.

Club Championship.—Hurlingham.

FOOTBALL

Association

The records of matches between the countries stand as under:

Scotland *v.* England. Scotland has won 18, England, 13, drawn 12.

England *v.* Wales. England has won 28, Wales 2, drawn 6.

Ireland *v.* Wales. Wales has won 16, Ireland 12, drawn 5.

Wales *v.* Scotland. Scotland has won 27, Wales 4, drawn 8.

Ireland *v.* Scotland. Scotland has won 26, Ireland 2, drawn 3.

Ireland *v.* England. England has won 28, Ireland 2, drawn 3.

The records of matches between the various Leagues are as under:

English League *v.* Southern League. English League has won 3, Southern League 1, drawn 1.

English League *v.* Irish League. English League has won 19, Irish League 0, drawn 2.

Scottish League *v.* Irish League. Scottish League has won 16, Irish League 3, drawn 0.

English League *v.* Scottish League. English League has won 12, Scottish League 7, drawn 5.

Scottish League *v.* Southern League. Southern League has won 2, Scottish League 2, drawn 1.

Southern League *v.* Irish League. Southern League has won 3, Irish League 0, drawn 2.

League Championships:

First League Champions

1901-2, Sunderland.	1909-10, Aston Villa.
1902-3, Sheffield Wed.	1910-11, Manchester U.
1903-4, Sheffield Wed.	1911-12, Blackburn Rovers.
1904-5, Newcastle U.	1912-13, Sunderland.
1905-6, Liverpool.	1913-14, Blackburn Rovers.
1906-7, Newcastle U.	1914-15, Everton.
1907-8, Manchester U.	1915-16, Not played.
1908-9, Newcastle U.	

In the last Championships played, Chelsea and Tottenham Hotspur, being at the bottom of the First League table, descended to the Second League, whilst Derby County and Preston North End, being the first pair of the Second League, obtained promotion to the First League.

Southern League Champions

1901-2, Portsmouth.	1909-10, Brighton.
1902-3, Southampton.	1910-11, Swindon.
1903-4, Southampton.	1911-12, Q. P. Rangers.
1904-5, Bristol Rovers.	1912-13, Plymouth A.
1905-6, Fulham.	1913-14, Swindon.
1906-7, Fulham.	1914-15, Watford.
1907-8, Q. P. Rangers.	1915-16, Not played.
1908-9, Northampton.	

The New HAZELL, 1917

Association Cup Winners

1900-1, Tottenham Hotspur.	1908-9, Manchester U.
1901-2, Sheffield United.	1909-10, Newcastle U.
1902-3, Bury.	1010-11, Bradford City.
1903-4, Manchester City.	1911-12, Barnsley.
1904-5 Aston Villa.	1912-13, Aston Villa.
1905-6, Everton.	1913-14, Burnley.
1906-7, Sheffield Wed.	1914-15, Sheffield United.
1907-8, Wolverhampton W.	1915-16, Not played.

Cambridge and Oxford.—Cambridge has won 20, Oxford 18, drawn 3.

RUGBY

The records of **International matches** are as follows:

England *v.* Scotland. Scotland has won 17, England 15, drawn 9.

England *v.* Wales. England has won 15, Wales 14, drawn 2.

England *v.* Ireland. England has won 24, Ireland 12, drawn 2.

England *v.* France. England has won 9, France 0, drawn 0.

Wales *v.* Scotland. Wales has won 16, Scotland 13, drawn 1.

Wales *v.* Ireland. Wales has won 19, Ireland 9, drawn 1.

Wales *v.* France. Wales has won 7, France 0, drawn 0.

Ireland *v.* Scotland. Scotland has won 25, Ireland 9, drawn 3.

Ireland *v.* France. Ireland has won 6, France 0, drawn 0.

County Champions

1901-2, Durham.	1908-9, Durham.
1902-3, Durham.	1909-10, Gloucester.
1903-4, Kent.	1910-11, Devon.
1904-5, Durham.	1911-12, Devon.
1905-6, Devon.	1912-13, Gloucester.
1906-7, Devon and Durham	1913-14, Midland Counties.
	1914-15, Not decided.
1907-8, Cornwall.	1915-16, Not decided.

Cambridge and Oxford. Oxford has won 18, Cambridge 14, drawn 9.

GOLF

Record Drive.—J. Braid, 395 yds.; Ladies, Miss C. Leitch, 254 yds.

The Open Championship was instituted in 1860 and until 1892 was decided in a single day over 36 holes. In 1892 play was extended to 72 holes and two days; in 1898 it was decided that any competitor who was 20 strokes behind the leading score at the end of the second round on the first day be compulsorily retired. In subsequent years other modifications were found necessary, and for the 1914 championship it was decided that qualifying rounds be held on courses other than the championship course; that all competitors play one round on each course, and that the first 100 (hundred) scores play on the championship four rounds of the green; that any ties for the last place play off.

Open Championship

Previous winners:

1901, J. Braid (309).	1909, J. H. Taylor (295).
1902, A. Herd (307).	1910, J. Braid (299).
1903, H. Vardon (300)	1911, H. Vardon (303).
1904, J. White (296).	1912, E. Ray (295).
1905, J. Braid (318).	1913, J. H. Taylor (304).
1906, J. Braid (300).	1914, H. Vardon (306).
1907, A. Massy (312).	1915, Not decided.
1908, J. Braid (291).	1916, Not decided.

Amateur Championship

Previous winners:

1901, H. H. Hilton.	1909, R. Maxwell.
1902, C. Hutchings.	1910, John Ball.

ESPERANTO

The **British Esperanto Association** (Incorporated) was established in October 1904 as a centre for the promotion of the use of Esperanto in the British Empire as an international medium of communication. This neutral auxiliary language was compiled by Dr. Zamenhof of Warsaw, and its progress, though at first slow, has recently been increasingly rapid. On the outbreak of war there were about 2,000 official societies, besides numerous local groups situated in all parts of the world. More than 100 magazines, partly or wholly in Esperanto, were appearing regularly; representing almost every branch of human activity.

The chief magazines published in England are *The British Esperantist* (the official organ of the Association) and *The Esperanto Monthly* (for teachers and classes).

Examinations are held by the B.E.A. and other bodies, and the language is taught in evening schools under the London County Council and other educational authorities. It is recognised as a grant-earning subject by the Board of Education.

Congresses of from 1,000 to 3,000 members have been held regularly yearly since 1905 in the following towns: Boulogne, Geneva, Cambridge, Dresden, Barcelona, Antwerp, Cracow, Berne, Paris, and San Francisco.

President, British Esperanto Association, J. M. Warden, F.F.A.
Secretary, Montagu C. Butler.
Office, 17 Hart Street, London, W.C.

GEORGE V	Second son of Edward VII	1910	WHOM GOD PRESERVE.		

GREAT OFFICERS OF STATE

The Earl Marshal is the eighth of the great officers of State, and takes precedence next after the Lord High Constable. The latter office ceased to be hereditary in 1521, since which it has been only temporarily revived for successive coronations. The Lord High Constable and the Earl Marshal were formerly judges of the ancient Court of Chivalry; but when the former office ceased to be hereditary, the sole jurisdiction in questions of honour and arms was vested in the Earl Marshal, who is head of the College of Arms (see p. 202). He attends the Sovereign in opening and closing Parliament. It is also his duty to make arrangements for the order of all state processions and ceremonials, especially coronations, royal marriages and funerals. With the Lord Great Chamberlain he assists at the introduction of all newly-created peers into the House of Lords. The office of Earl Marshal is hereditary in the family of the Duke of Norfolk. His Grace is styled Earl Marshal, and "Hereditary Marshal of England," and he appends the letters "E.M." to his signature.

The Lord Chamberlain, an important officer of the King's Household, is always a member of the Government of the day, and prior to 1782 was also a member of the Cabinet. The Lord Chamberlain has the control of the establishment attached to the chapels royal; of officers and servants attached to the royal chambers, except of those of the bedchamber; and over the medical men of the Household. The royal tradesmen are appointed by him. He directs all great royal ceremonies, receives all applications to attend levees and drawing-rooms, superintends the royal wardrobe and the jewel house at the Tower, and **licenses theatres and plays,** his power extending to the cities of London and Westminster, and certain other parts of the Metropolis, as well as to those places within which the Sovereign may reside occasionally. The power of licensing theatres elsewhere belongs to the justices. For the **Examiners of State Plays** (an office which was established under the Licensing Act 1737, and confirmed by the Theatre Regulation Act 1842, which brought all London theatres under the control of the Lord Chamberlain's office) see p. 135.

The Lord Steward is also an important official of the King's Household. He is also always a member of the Government of the day. Under him are the Treasurer and Comptroller of the Household, but the duties of all three are in practice performed by the Master of the Household.

THE BRITISH EMPIRE

The British Empire consists of the United Kingdom of Great Britain and Ireland, the Empire of India, and the British Dominions beyond the Seas, including the self-governing Dominions, and the Crown Colonies, Protectorates, and other Dependencies, the whole forming one Empire under George V, King and Emperor, whose title rests upon the Act of Settlement, 1701, which settled the succession to the throne on the Princess Sophia of Hanover and the "heirs of her body being Protestants."

THE KING AND THE ROYAL FAMILY

George V, *R.I.*, **by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India.**

His Majesty George Frederick Ernest Albert, second but only surviving son of His late Majesty King Edward VII and of Queen Alexandra ("The Queen Mother"), *b.* at Marlborough House June 3, 1865; *cr.* Duke of York, Earl of Inverness and Baron Killarney, 1892, and Prince of Wales and Earl of Chester, 1901; *succeeded* to the Throne (in his 45th year) May 6, 1910; proclaimed King, May 9, 1910; crowned at Westminster Abbey, June 22, 1911; *married* July 6, 1893, H.S.H. Princess Victoria Mary Augusta Louisa Olga Pauline Claudine Agnes ("Princess May") of Teck, *b.* May 26, 1867, and has issue.

Residences—Windsor Castle, Berkshire; Buckingham Palace, S.W.; York Cottage, Sandringham, Norfolk; Barton Manor, Osborne, I. of W.; Balmoral, Ballater, Aberdeenshire.

Princess May Helen Emma of Teck, *b.* Jan. 23, 1906.

Prince Rupert Alexander George Augustus of Teck, *b.* Aug. 24, 1907.

The *late* Prince Maurice Francis George of Teck, *b.* Mar. 29, *d.* Sept. 15, 1910.

THE CIVIL LIST

In the Civil List of 1910, which was based on that of His late Majesty, no provision was made for the Prince of Wales, as the income of the Duchy of Cornwall, £87,000, was regarded as sufficient; but in the event of his marrying, the Princess of Wales will receive £10,000 per annum, to be increased to £30,000 should she survive His Royal Highness. Provision was also made that each of His Majesty's sons shall receive £10,000 a year on attaining his majority, to be increased to £25,000 a year on marriage; and each daughter £6,000 a year on attaining her majority or marrying. Certain pensions, also, which were granted by the late Sovereign were transferred to the Consolidated Fund, as was done also at the death of Queen Victoria. The provisions, and the effect of the Civil List Act of 1910, will be seen, therefore, in the following statement:

Schedule to the Civil List Act, 1910

	£
Their Majesty's Privy Purse	110,000
Salaries of H.M.'s Household, etc.	125,800
Expenses of H.M.'s Household	193,000
Works	20,000
Royal Bounty, etc.	13,200
Unappropriated	8,000
Total	£470,000

Provision for other members of the Royal Family:—	£
Queen Alexandra	70,000
Princess Christian (Schleswig-Holstein)	6,000
Princess Louise, Duchess of Argyll	6,000
Duke of Connaught	25,000
Duchess of Albany	6,000
Duchess of Edinburgh	6,000
Princess Henry of Battenberg	6,000
*Grand-Duchess of Mecklenburg-Strelitz	3,000
His late Majesty's daughters	18,000
Total	£146,000

* Suspended during the war.

The King in addition to his Civil List receives the revenues of the Duchy of Lancaster. His Majesty pays income tax on the Privy Purse.

Duchy of Lancaster

The honour of Lancaster was confiscated in 1266, owing to Earl Ferrer's rebellion. In 1267 Henry III granted it to his son Edmund, whom he created Earl of Lancaster. In 1361 the estates, title, and honour came to John of Gaunt in right of his wife Blanche, and on the accession of his only son Henry IV to the throne, in 1399, the duchy and honour became merged in the crown.

The revenue of the Duchy of Lancaster in 1915 amounted to £114,983, made up of—rents and profits of courts, £63,252; royalities and dues, £32,941, etc. Expenditure consisted of—outlay for the benefit of the estate, £11,834; deducted under various Acts of Parliament, £10,775; allowances, donations, charities, £4,806; salary of the Chancellor of the Duchy, £2,000; expenses of management, £7,922. The sum of £63,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse.

Duchy of Cornwall

In 1337 Edward III created Cornwall a duchy for his son Edward, the Black Prince, who was thus the first English duke. The revenue of the Duchy of Cornwall in the year ended Dec. 31, 1915, was £206,398, and was derived principally from rents and profits of courts, £115,776; annuity in lieu of Tin Coinage Duties, £16,216; and dividends on stock, £11,501. The payments included—Outlay for the benefit of the estate, £20,779; deductions under various Acts of Parliament, £25,693; allowances, donations, and charities, £8,055; expenses of management, £11,992. The sum of £82,547 was paid on account of His Royal Highness the Prince of Wales.

HIS MAJESTY'S HOUSEHOLD

Privy Purse Office

Wrench, Frederick Stringer ('03).
Wylie, James Owens ('09).
Young, Robert ('07).

KNIGHTHOOD AND OTHER ORDERS

In modern days knighthoods are conferred as a mark of the Sovereign's esteem, or as a reward for services of any kind, military or civil. They are bestowed by the Sovereign, or the Lord Lieutenant of Ireland as representing him, or by letters patent. The Orders of Knighthood are: the Garter, the Thistle, St. Patrick, the Bath, St. Michael and St. George, Star of India, the Indian Empire, and the Victorian Order.

There are over 800 knights not belonging to any of these orders who are termed knights bachelor.

In 1904 King Edward VII commanded the creation of a **Central Chancery of all the Orders of Knighthood,** and the issue of insignia and registration of warrants is now carried out by the Lord Chamberlain's Department, the *Comptroller* of which is Col. Sir Douglas Dawson, K.C.V.O., C.M.G., St. James's Palace, S.W.

The Most Noble Order of the Garter

Originally established by King Edward III in 1348, it is now limited to the Sovereign and such other descendants of George I as may be elected to be members of it, and to twenty-five Knight Companions; but sovereigns and princes of other realms, and extra Knight Companions, may be admitted by special statutes. Its abbreviation is K.G., and it is the highest order of knighthood. Its **insignia** and habit are most elaborate and imposing, and include **the George**—a gold medallion of St. George and the Dragon, suspended from a blue ribbon; **the Garter,** which is worn below the knee of the left leg, and is made of dark blue velvet, edged with gold, its motto being *Honi soit qui mal y pense* (Evil be to him who evil thinks); a mantle of blue velvet lined with taffeta, with the star of the order embroidered on the left breast; a hood and surcoat of crimson velvet, and a hat of black velvet; a collar of gold weighing 30 oz., and the star with the cross of St. George in the centre, encircled by the Garter. The following is a full list of the members of the Order, the date of creation being prefixed in each case:—

THE SOVEREIGN

Wales, H.R.H. Prince of

1910. H.M. the Queen (Lady of the Order).
1901. H.M. Queen Alexandra (Lady of the Order).
1867. Connaught, H.R.H. Duke of.
1902. Connaught, H.R.H. Prince Arthur of.

1902. Aosta, Duke of.
1914. Belgians, King of the.
1914. Denmark, King of.
1891. Italy, King of.
1912. Japan, Emperor of.
1906. Norway, King of.
1909. Portugal, King Manuel, of.
1893. Russia, Emperor of.
1902. Russia, Hereditary Grand Duke Michael Alexandrovitch of.
1866. Schleswig-Holstein, H.R.H. Prince Christian of.
1902. Spain, King of.
1905. Sweden, King of.

THE KNIGHT COMPANIONS:

1914. Beauchamp, Earl.
1902. Bedford, Duke of.
1894. Breadalbane, Marquess of.
1915. Chesterfield, Earl of.

1905. Richmond and Gordon, Duke of.
1892. Rosebery, Earl of.
1909. Selborne, Earl of.
1913. Spencer, Earl.
1902. Wellington, Duke of.

Prelate, The Bishop of Winchester.
Chancellor, The Bishop of Oxford.
Registrar, The Dean of Windsor.
Garter Principal King of Arms, Sir Alfred S. Scott-Gatty, K.C.V.O.
Gentleman Usher of the Black Rod, Admiral Sir Henry F. Stephenson, G.C.V.O., K.C.B.
Sec. Col. Sir Douglas Dawson, G.C.V.O., C.M.G.

Garter King of Arms. The holder of this important office is, within the College of Arms, above all other officers. He has, under the Earl Marshal, the regulation of the proceedings at State ceremonies, and the guidance of coronations; and he controls and manages all matters concerning the Order of the Garter. At the commencement of every Session he lays on the table of the House of Lords the roll of the lords temporal, and he introduces all newly created peers. The present holder of the office is Sir Alfred S. Scott-Gatty, K.C.V.O. *Office*, College of Arms, Queen Victoria Street, E.C.

The Most Ancient and Most Noble Order of the Thistle

Originally established in 1540, remodelled in 1687, and again in Queen Anne's reign (1703). It was by a statue of 1827 declared that this Order should consist of the Sovereign and 16 knights. Its abbreviation is K.T., and the **badge,** the gold St. Andrew, is suspended from a green ribbon; **motto,** *Nemo me impune lacessit.* The following is a list of the Knights of the Order:—

THE SOVEREIGN

H.R.H. the Duke of Connaught.
H.R.H. Prince Arthur of Connaught.

Duke of Atholl	Earl of Haddington.
Duke of Montrose.	Marquess of Aberdeen.
Duke of Roxburghe.	Lord Hamilton of Dalzell.
Earl of Rosebery.	Earl of Mar and Kellie.
Earl of Hone.	Lord Reay.
Marquess of Zetland	Viscount Haldane.
Lord Balfour of Burleigh.	Lord Kinnaird.
	Lord Lovat.
Earl of Erroll.	

Chancellor, The Duke of Atholl.
Dean, Rt. Rev. Andrew Wallace Williamson, D.D.
Secretary, Sir Duncan Alexander Dundas Campbell, Bart., C.V.O.
Lyon King of Arms, Sir J. Balfour Paul, C.V.O.
Gentleman Usher of the Green Rod, Earl of Mansfield.

The Most Illustrious Order of St. Patrick

Established in 1783 by George III. Statutes revised 1905. Consists of the Sovereign, a Grand Master, who is the Lord-Lieutenant of Ireland for the time being, and 22 Knights. Its abbreviation is K.P.; its **badge** is suspended from a sky-blue ribbon, with **motto** *Quis separabit?* The Knights rank amongst themselves in the order in which they have been invested, as given *infra.* The following is a list of the Knights of the Order:—

THE SOVEREIGN

Grand Master, The Lord-Lieutenant of Ireland.
H.R.H. the Duke of Connaught.

Earl of Gosford	Lord Castletown.
Earl of Listowel.	Lord Pirrie.
Earl of Dunraven.	Earl of Granard.
Lord Monteagle.	Earl of Arran.
Marquess of Ormonde.	Earl of Shaftesbury.
Viscount Iveagh.	Earl of Bessborough.
Earl of Bandon.	Earl of Donoughmore.
Lord Clonbrock.	Viscount Powerscourt.
Earl of Enniskillen.	Viscount Midleton.
Earl of Mayo.	Earl of Cavan.
Earl of Meath.	(1 vacancy).

Chancellor, The Chief Secretary.
Ulster King of Arms and Registrar, Maj. Nevile R. Wilkinson, F.S.A.
Secretary, Sir Francis Lambart, Bart., C.V.O.; *Genealogist*, H. Farnham Burke, C.V.O., C.B.
Usher of the Black Rod, Sir John Olphert, C.V.O.
Dublin Herald, Capt. Guillamore O'Grady.
Cork Herald, Capt. R. A. L. Keith.
Athlone Pursuivant, George Dames Burtchaell.

The Most Honourable Order of the Bath

Originally established by King Henry IV at his coronation, 1399, this order fell into neglect in the seventeenth century, but was revived in 1725 under George I. It was remodelled by the Prince Regent in 1815, to commemorate the auspicious termination of the long and arduous contest in which the empire had been engaged, and was further enlarged in 1845, and now has three classes :—

G.C.B. . .	. Knight Grand Cross.
K.C.B. . .	. Knight Commander.
C.B. . .	. Companion.

The G.C.B.'s are not to exceed 57 for military service, exclusive of the Sovereign and princes of the blood, and those distinguished foreigners upon whom may be conferred the honorary dignity, and 27 for the civil service; of the second class there may not be more than 150 for military and 114 for the civil service, excluding those admitted as honorary members, and except in certain special circumstances when there is power to increase the numbers. Of Companions there may be 1,056, of whom 732 may be for military and 324 for civil service. An officer must have received a medal or some similar honour, or have been specially mentioned in despatches for distinguished service in action before he can be nominated. The **badge** is suspended by a crimson ribbon, with **motto** *Tria juncta in uno* (Three joined in one).

Great Master, H.R.H. the Duke of Connaught.
Dean, The Dean of Westminster.
Bath King of Arms (vacant).
Registrar and Secretary, The Comptroller of the Lord Chamberlain's Department, St. James's Palace, S.W.
Genealogist, H. Farnham Burke, C.V.O., C.B.
Gentlemen Usher, Col. Sir C. Wyndham Murray, C.B.

The Most Distinguished Order of St. Michael and St. George

Instituted in 1818, and is the order to which subjects of His Majesty who have taken a distinguished part in colonial and foreign affairs are generally admitted. It consists of the Sovereign, a Grand Master, and three classes of members :—

G.C.M.G. . .	. Knight Grand Cross.
K.C.M.G. . .	. Knight Commander.
C.M.G. . .	. Companion.

The ordinary members of the first class are limited to 100, exclusive of princes of the blood, honorary members, and additional members. The second class is similarly limited to 300, and the third class to 725 ordinary members.

The motto of the Order is *Auspicium melioris ævi*.

Prelate, The Rt. Rev. Bishop H. H. Montgomery, D.D.
Chancellor, Earl Grey, G.C.B., G.C.M.G., G.C.V.O.
Secretary, The Permanent Under-Secretary of State for the Colonies (Sir G. V. Fiddes, K.C.M.G., C.B.)
King of Arms, Sir M. F. Ommanney, G.C.M.G., K.C.B., L.S.O.
Registrar, The Senior Assistant Under-Secretary of State for the Colonies (H. J. Read, C.B., C.M.G.).
Gentleman Usher of the Blue Rod, Sir William Alexander Baillie Hamilton, K.C.M.G., C.B.
Chancery of the Order, Colonial Office, Downing Street, S.W.

The Most Exalted Order of the Star of India

Established by letters patent in 1861 and enlarged in '66, '75, '76, '97, 1902, and 1911. Its **badge** is worn pendent from a light-blue ribbon with white stripes edgewards; **motto**, "Heaven's Light our Guide." It consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and three classes of members :

G.C.S.I. . .	Knight Grand Commander.
K.C.S.I. . .	Knight Commander.
C.S.I. . .	Companion.

Of the first class there may be 44, of the second class 100, and of the third (or Companions) 200; but extra and honorary members may be, and have been, from time to time appointed.

Secretary, The Foreign Secretary to the Government of India.
Registrar, The Comptroller of the Lord Chamberlain's Department for the time being.

The Most Eminent Order of the Indian Empire

Instituted Dec. 31, 1877, to commemorate the proclamation of H.M. Queen Victoria as Empress of India, and **enlarged** in '86, '87, '92, '97, 1902, and 1911, as a means of rewarding those whose services to the Indian Empire have merited the Imperial favour. This order **consists** of the **Sovereign**, a **Grand Master**, who is the Viceroy of India for the time being, and of **three classes of members**—viz. Knights Grand Commanders (G.C.I.E.), Knights Commanders (K.C.I.E.), and Companions (C.I.E.). Of the first class there may be 40, of the second class 120, while 40 appointments may be made annually to the third class, to which no limit of number is assigned. Extra and honorary members may be, and have been, from time to time appointed. The **motto** of the Order is *Imperatricis Auspiciis*; the badge is suspended from a riband of Imperial purple.

Secretary, The Foreign Secretary to the Government of India.
Registrar, The Comptroller of the Lord Chamberlain's Department for the time being.

The Royal Victorian Order

was created and instituted by H.M. Queen Victoria by letters patent under the Great Seal, April 1896. Those admitted to the order are to be British subjects who may have rendered important personal services to the Sovereign; or foreigners upon whom His Majesty may think fit to confer the distinction, and who are to rank as honorary members. Members of the order are divided into five classes :—

Knights Grand Cross . . .	G.C.V.O.
Knights Commanders . . .	K.C.V.O.
Commanders	C.V.O.
Members of the Fourth Class .	M.V.O.
Members of the Fifth Class .	M.V.O.

Members of the first and second classes receive the honour of knighthood. The first and second classes rank after the corresponding classes of the Order of the Indian Empire; the third class ranks after Knights Bachelors; the fourth class after Companions of the Order of the Indian

Empire; and the fifth class after the eldest sons of Knights.

Chancellor, The Lord Chamberlain for the time being.

Secretary, The Keeper of His Majesty's Privy Purse for the time being.

The Order of Merit

Created by King Edward VII on June 26, 1902. It is designed to include British subjects who have won conspicuous distinction in the naval and military services, or in letters, art, and science. It carries with it no special title or order of precedence. The badge of the Order consists of a cross of red and blue enamel of eight points, having the words "For Merit" in gold letters within a laurel wreath on a blue enamel centre. The reverse of the badge shows the King's Royal and Imperial cipher in gold, and the whole is surmounted by the Imperial Crown enamelled in colour, and suspended by a ribbon of Garter blue and crimson. The members of the Order are:—

Admiral of the Fleet Sir E. H. Seymour.
Lord Rayleigh.
Viscount Morley.
Lord Fisher.
Lord Cromer.
Viscount Bryce.
Prof. Henry Jackson.
Mr. Thomas Hardy.
Sir William Crookes.
Sir George Trevelyan.
Sir Edward Elgar.
Admiral of the Fleet Sir A. K. Wilson.
Sir Joseph J. Thomson.
Sir Archibald Geikie.
F.M. Viscount French of Ypres.
Viscount Haldane.
Admiral Sir J. R. Jellicoe.

Honorary Members:

F.M. the Marquis Yamagata.
F.M. the Marquis Oyama.
Admiral Count Togo.

Sec. Col. Hon. Sir Hy. Charles Legge, K.C.V.O.
Registrar, Francis Morgan Bryant, M.V.O., I.S.O.

The Distinguished Service Order

Instituted by H.M. Queen Victoria, who, holding that the means of adequately rewarding the distinguished services of officers in the naval and military service of the Crown who had been honourably mentioned in despatches were limited, instituted and created for the purpose of rewarding individual instances of meritorious or distinguished service in war a new naval and military Order of distinction. The Royal Warrant promulgating the statues of the Order was issued from the War Office on Sept. 6, 1886. **Foreign officers** who have been associated in naval and military operations with our forces are eligible to be honorary members; and the Order ranks next to the Fourth Class of the Royal Victorian Order. The **badge** (which consists of a gold cross, enamelled white, edged gold, having on one side thereof in the centre, within a wreath of laurel enamelled green, the Imperial Crown in gold upon a red enamelled ground, and on the reverse, within a similar wreath and on a similar red ground, the Royal Cypher G.R. V.) is to be suspended from the left breast by a red riband edged blue of one inch in width.

Secretary and Registrar, Sir R. H. Brade, K.C.B., War Office.

The Imperial Service Order

Instituted by H.M. King Edward VII in August 1902 as a decoration for members of the Civil Service of the Empire, to be conferred after long and meritorious service. Only members of the administrative or clerical branches of the Civil Service are eligible as Companions, and their number must not exceed 700, 250 for the Home Civil Service, 250 for the Civil Services of the Colonies and Protectorates, and 200 for the Civil Service of India (100 appointments being reserved for Europeans and 100 for natives of India). Appointments to the Order are made on the recommendation of a Secretary of State after 25 (or in India 20 and in unhealthy Colonies 16) years' service, or for "eminently meritorious service." The statues of the Order were revised in March 1912. Women as well as men are eligible for the Order. Companions of the Order may add the letters "I.S.O." after their names, and take precedence after Companions of the Distinguished Service Order.

Secretary and Registrar, R. F. Reynard, I.S.O., Home Office, S.W.

The Imperial Order of the Crown of India

Instituted Dec. 31, 1877, enlarged Jan. 30, 1900, and consists of the Sovereign and such as the Sovereign may think fit to appoint of the Princesses of His Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives or other female relatives of any of the persons who have held, now hold, or may hereafter hold, the offices of Viceroy and Governor-General of India, Governors of Madras or Bombay, Principal Secretary of State for India, or Commander-in-Chief in India.

Registrar, The Comptroller of the Lord Chamberlain's Department for the time being.

Order of the Hospital of St. John of Jerusalem in England

This Order is not to be confused with the ancient Order of St. John of Jerusalem, or Knights of Malta. It dates only from 1888, and has for its object the carrying on of ambulance and other charitable work. Its charter of incorporation is under the name of "The Grand Prior of the Order of the Hospital of St. John of Jerusalem in England"; it consists of Knights and Ladies of Justice, Chaplains, Knights and Ladies of Grace, and Esquires. Appointments to the Order carry neither rank, style, title, nor personal precedence. The badge is a white enamelled Maltese cross with a lion and unicorn in alternate angles.

LORD GREAT CHAMBERLAIN

A State office of great antiquity entirely distinct from that of Lord Chamberlain of the Household. The Lord Great Chamberlain assists, with the Earl Marshal, at the ceremony of the introduction of new peers; he issues tickets for the opening and prorogation of Parliament, and orders of admission for viewing the Palace of Westminster when Parliament is not sitting. He arranges the preparation of Westminster Hall for a coronation, the trial of a peer, or for any other ceremony taking place therein. He walks on the right of His Majesty when he opens Parliament in person. The office, which is hereditary, has descended through the two sisters and co-heiresses of the 4th Duke of Ancaster, who *d.* in 1779, to its present holders, the Earl of Ancaster, the Marquess of Cholmondeley, and the Marquess of Lincolnshire, who act in rotation, Lord Lincolnshire performing the duties during the present reign.

Sec. Capt. T. D. Butler, C.V.O. . . . £200
Clerk, W. B. Paley. £100
Resident Supt. House of Lords, T. Whitehead £300
Office, Royal Court, House of Lords, S.W.

	Lt.-Col. T. L. Coxhead, D.S.O.	Maj. A. W Waite.

LYON OFFICE, SCOTLAND

The Court of the Lord Lyon is the department regulating the bearing of coats-of-arms in Scotland. Differing from the College of Arms in England, it is a Government Office, and all the fees exigible by it are paid over to His Majesty's Treasury.

Lyon King of Arms, Sir James Balfour Paul, C.V.O., LL.D.
Heralds.—*Ross*, A. Ross.
Rothesay (and Lyon Clerk), F. J. Grant.
Albany, W. R. Macdonald.
Pursuivants.—*March*, Capt. G. S. C. Swinton.
Unicorn, J. H. Stevenson.
Carrick, Sir D. A. D. Campbell, Bt., C.V.O.
Office, H.M. Register House, Edinburgh.

OFFICE OF ARMS, IRELAND

In Ireland, Ulster King of Arms has the sole heraldic jurisdiction, and has the same duties in Ireland as the Earl Marshal has in England. Like the Lyon Office, however, it is a Government Department. Ulster is *ex-officio* Registrar and Knight Attendant on the Order of St. Patrick and executive officer of this Order. He furnishes each year to the House of Lords "**Ulster's Roll**" of the Peers of Ireland. The titles of **Ulster King of Arms** and **Athlone Pursuivant** were created in 1552; the Heralds of the Order of St. Patrick were created on the institution of that Order in 1783; but the office itself, under the designation of "Ireland King of Arms," had its origin in 1382,

Ulster King of Arms, Maj. Neville R. Wilkinson, C.V.O.
Athlone Pursuivant and Deputy Ulster, George Dames Burtchaell.
Registrar, Thos. Ulick Sadleir.
Heralds of the Order of St. Patrick:
Dublin Herald, Capt. Guillamore O'Grady.
Cork Herald, Capt. R. A. L. Keith.
Office, Dublin Castle.

THE BARONETAGE OF THE UNITED KINGDOM

The rank of Baronet was instituted by James I in May 1611, professedly to raise money for the support of troops in Ulster. The price of the honour was £1,095. The Baronetage of Ireland, instituted in 1619, was for a similar purpose. In 1624 James I, just before his death, devised a further scheme, this time for the colonisation of Nova Scotia, which was carried out by his successor Charles I, who created the first baronets "of Scotland or of Nova Scotia." The dignity of Baronet is hereditary, descending to heirs male of the body (in the case of Scottish baronets to collateral heirs male of the grantee as well as to those of his body); a Baronet is described as "Sir A. B., Bart.," and his wife as "Lady." In consequence of many wrongful assumptions of the title a Commission was appointed in 1906 to consider steps necessary to protect the dignity of the order, and as a result of its recommendations an Official Roll of Baronets is now kept in the Home Office and is published regularly in the *London Gazette*. In the following list, Baronets of Scotland and Ireland are distinguished by the letters I, S. Baronets of England were created between 1611 and 1707; of Scotland or Nova Scotia between 1625 and 1707; of Ireland between 1619 and 1800; of Great Britain between 1707 and 1800; of the United Kingdom from 1801 to the present time. Baronetcies merged in the peerage are not included.

Registrar of the Baronetage, Harry B. Simpson, C.B., Home Office, S.W.
Asst. do. R. F. Reynard, I.S.O.

KNIGHTS BACHELOR

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Order of Knighthood. The Register of Knights Bachelor instituted by James I in the 17th century having in 1908 lapsed, a voluntary association under the title of the Society of Knights Bachelor (which in 1912 by Royal Command became the "Imperial Society of Knights Bachelor") was formed, with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. An annual Knightage is published from information supplied by the authorities, and can be obtained on application.

The officers of the Society are: *Knight Principal*, Sir Henry Pellatt, Kt., C.V.O.; *Hon. Registrar*, Sir William Bull, Kt., M.P.; *Secretary*, Willoughby Bullock; *Registry and Library*, Clifford's Inn, E.C.

(*The following list of Knights Bachelor is exclusive of those who have afterwards received the higher honour of K.C.B., etc.*)

Abbot-Anderson, Sir W. Maurice, M.V.O.
A'Beckett, Hon. Sir Thomas.
Acland, Sir Reginald B. Dyke, K.C.
Adam, Sir Frank F., C.I.E.
Adamson, Sir William, C.M.G.
Adcock, Sir Hugh, C.M.G.
Addis, Sir Charles S.
Adkins, Sir Ryland, M.P.
Affleck, Sir James O., M.D.
Agg-Gardner, Sir James T., M.P.
Aikins, Sir James A. M.
Aikman, Sir Robert S.
Alexander, Sir George.
Allan, Sir Hugh M., C.V.O.
Allen, *Col.* Sir Charles, V.D.
Allen, Sir Harry B., M.D.
Allison, Sir Robert A.
Allom, Sir Charles.
Ames, Sir Herbert B.
Anderson, Sir George.
Anderson, Sir John.
Anderson, Sir R. Rowand.
Angers, Hon. Sir Auguste R.
Angier, Sir Theodore V. S.
Anthony, Sir John.
Arbuthnot, Sir George G.
Archambault, Hon. Sir Horace.
Armstrong, Sir Charles H.
Armstrong, Sir Walter.
Arthur, Sir Allan.
Arunáchalam, Sir Ponnambalam.
Ashton, *Maj.* Sir Ralph F.
Aske, Sir Robert W., LL.D.
Astbury, Hon. Sir John M.
Atkin, Hon. Sir James R.
Avory, Hon. Sir Horace E.
Ayling, Hon. Sir William B.
Azopardi, Sir Vincenzo F., C.M.G.
Baddeley, Sir John J.
Bahadur, Sir Rai.
Bailey, Sir Rowland, C.B., M.V.O., I.S.O.
Baillache, Hon. Sir Clement M.
Baines, Sir Jervoise A., C.S.I.
Baker, Sir Augustine F.
Ballantyne, Sir Henry.
Bancroft, Sir Squire B.
Bandaranaike, Sir Solomon D., C.M.G.
Banerjee, Sir Gooroo.
Banerji, Sir Pramada.
Bankes, Rt. Hon. Sir John E.
Barclay, Sir Thomas, LL.B.
Barclay, Sir Thomas.
Barker, *Col.* Sir Francis W. J.
Barker, Sir Frederic E.

Yule, Sir David.
Yusuf, Sir Haji M.

The Albert Medal was instituted in 1866, and extended in 1867 and 1877, for the purpose of rewarding acts of heroism performed by civilians at sea or on land. The **first class** are awarded a decoration consisting of a gold oval-shaped badge bearing the words on a garter "For Gallantry in Saving Life at Sea," or "on Land," as the case may be. Members of the **second class,** whose acts of bravery, though meritorious, have not been so striking, receive a bronze badge with the same inscription.

The **Kaisar-i-Hind** Medal was instituted in 1900, and is bestowed for the rendering of public service in India, without distinction of race or sex. It consists of two classes: a gold medal for the first class, and a silver medal for the second class.

The **Territorial Decoration** (T.D.) was established in 1908, and is restricted to commissioned officers of twenty years' good service in the Territorial Force.

The **Edward Medal** was established in 1907, and is awarded to those who in course of industrial employment endanger their own lives in saving or endeavouring to save others.

The **Royal Red Cross** (R.R.C.) was founded in 1883. It is conferred upon ladies of any rank, who may be brought to the Sovereign's notice for acts of mercy in attending to the sick and wounded in time of war.

Medals which are not in the gift of the Crown are the medals of the Royal Humane Society, those given by the Board of Trade for gallantry in saving life at sea, the medals of the Royal National Lifeboat Institution, and Lloyd's Honorary Silver medal. The Stanhope Gold Medal, the most prized of all, is awarded annually by the Royal Humane Society for the most gallant of all the acts of rescue for which the society have awarded medals during the year. The ribbon of the Stanhope Gold Medal has a broad dark blue centre edged with yellow and black borders.

THE VICTORIA CROSS

The Victoria Cross is the most highly prized of all awards. It was instituted on Jan. 29, 1856, and consists of a Maltese cross, in bronze, 1½ in. in diameter. In the centre is the Royal crest (lion and crown), and beneath it a scroll, with the inscription "FOR VALOUR." It is suspended from a bronze laureated bar, connected with the Cross by a V. On the reverse of the bar are engraved the name, rank, and corps of the recipient. The ribbon is red for the Army and blue for the Navy. Previous to the Great War the Cross had not been conferred on native ranks of the Indian Army, but now no branch of His Majesty's Forces is excluded. The Cross carries with it a pension of £10 per annum to non-commissioned officers and men, with an extra £5 for every clasp.

The following is a list of those who have been awarded the V.C. in the present war, together with all surviving recipients previous to the Great War. * Posthumous.

Acton, *Pte.* A., Border R. . . . 1915

Other ribbons commonly seen at present are the "Queen's" South African Medal—**Ribbon,** centre orange bordered with blue, outside edges red; the "King's" South African Medal—**Ribbon,** green, white, and orange; Meritorious Service (Army and Royal Marines), for non-commissioned officers of or above the rank of sergeant—**Ribbon,** crimson with white edges for Army, navy blue for Royal Marines; Long Service and Good Conduct—**Ribbon** (Army) crimson with white edges, as for Meritorious Service Medal, (Navy) blue with white edges, (Territorial) green with a yellow centre. The Imperial Yeomanry and the Hon. Artillery have also long-service medals.

Decorations issued up to July 24, 1916: V.C. 160; D.S.O. 1,676; M.C. 3,851; D.C.M. 6,279.

BADGE FOR WAR SERVICES

Officers and men who have served at home or abroad since Aug. 4, 1914, and who, on account of age or physical infirmity arising from wounds or sickness caused by military service, have left the services are entitled to a silver badge. It is in the form of a circle, 1¼ in. in diameter. The circle bears the words, "For King and Empire—Services rendered," and circumscribes the imperial cipher surmounted by a crown. It is worn on the right breast or on the right lapel of the jacket with plain clothes only.

BADGE FOR THE WOUNDED

All officers and soldiers wounded since Aug. 4, 1914, are entitled to wear on the service dress jacket strips of gold russia braid, No. 1, 2 in. in length sewn perpendicularly on the left sleeve of the jacket to mark each occasion on which wounded. In the case of officers, the lower end of the first strip of gold braid is immediately above the upper point of the flap on cuff. Warrant officers, non-coms. and men wear the lower edge of the braid 3 in. from the bottom of sleeve. The additional strips, marking each subsequent occasion on which wounded, are placed on either side of the original one at ½ in. intervals.

OTHER WAR DECORATIONS

Distinguished Service Order, denoted by the letters D.S.O. after the recipient's name. Founded 1886, to recognise the special services of officers in the Army and Navy. Ranks after the 4th class of the Royal Victorian Order. **Badge,** white and gold cross with a red centre, bearing the imperial crown surrounded by a laurel wreath. **Ribbon,** red edged with blue. Numbers unlimited.

Military Cross, instituted 1915. Conferred on captains, commissioned officers of a lower grade, warrant officers, and Indian and Colonial military forces. **Badge,** a cross of silver, bearing the imperial crown on each arm, with the letters G.R.I. in the centre. **Ribbon,** white with purple stripe. Position, on the left breast, immediately following the Victoria Cross, and before all decorations and medals, but after all orders.

The New HAZELL, 1917

The Military Medal, instituted 1916. Conferred on non-commissioned officers and men and women "for individual or associated acts of bravery on the recommendation of a Commander-in-Chief on the field." Worn immediately before all war medals on the left breast. **Ribbon,** dark blue with three white and two crimson strips alternating in the centre.

Distinguished Conduct Medal, instituted 1862, For the Army (non-commissioned officers and men). Conferred for "individual acts of distinguished conduct in the field." Obverse, a military trophy, with, in the centre, the Royal Arms; reverse, inscription, "For Distinguished Conduct in the Field." **Ribbon,** three stripes equal width, outside red, centre blue.

Conspicuous Gallantry Medal, instituted 1874. For petty officers and seamen of the Royal Navy, and non-commissioned officers of the Royal Marines, to reward "acts of pre-eminent bravery in action with the enemy." **Ribbon,** three stripes of equal length, outside blue, centre white.

Distinguished Service Cross (formerly the Conspicuous Service Cross), instituted 1901, renamed 1915, for "distinguished service before the enemy." Confined to warrant officers or subordinate officers of the Royal Navy until 1915, when it was extended to all officers below the rank of Lieutenant-Commander, in addition to those previously eligible. **Ribbon,** three stripes equal width, outside white, centre blue.

Distinguished Service Medal, instituted 1915, awarded to chief petty officers, men, and boys of all branches of the Royal Navy, to non-commissioned officers and men of the Royal Marines, and to all other persons holding positions in H.M. service afloat, for distinguished conduct in war in cases where the award of the Conspicuous Gallantry Medal would not be applicable. **Ribbon,** three stripes equal width, outside blue, centre red.

[In the case of those who have already one of the above decorations, and again perform such service as would render them eligible for the award of the particular decoration or medal, a bar is awarded. On undress and service dress uniform this bar is indicated by the wearing of a small silver rose on the riband. For the V.C. a miniature bronze replica of the Cross may be worn.]

PRECEDENCE IN THE UNITED KINGDOM

The Sovereign.

The Prince of Wales.

Younger Sons of the Sovereign.

Grandsons of the Sovereign
Brothers of the Sovereign.
Uncles of the Sovereign.
Nephews of the Sovereign.
Ambassadors.
Archbishop of Canterbury.

Gentlemen of the Privy Chamber.
Eldest Sons of the younger Sons of Peers.
Eldest Sons of Baronets.
Eldest Sons of Knights of the Garter.
Eldest Sons of Knights Grand Cross in the precedence of their fathers.
Members of the Royal Victorian Order (5th Class).
Younger Sons of Baronets.
Esquires.
Younger Sons of Knights.

Knights of the Thistle and Knights of St. Patrick have no relative precedence accorded to them by statute in the Table of General Precedence.

Ladies.—Precedence of Ladies is always derived from the father, or husband, except in the case of a Peeress in her own right.

A Dowager Peeress, or Baronetess, while a widow, takes precedence of the wife of the incumbent of the title.

The children of a living Peer, or Baronet, have precedence above the children of the previous possessor of the title. If the daughter of a Peer marries a Peer, she takes her husband's rank, but if she marries the eldest or younger son of a Peer she ranks either according to her own inherent precedence or according to that of her husband, whichever happens to be the higher, whatever the courtesy title may be.

Lieutenants and Sheriffs of Counties have the first place in their own counties during office, the Lieutenant taking precedence of the Sheriff, but neither has assigned to him any place in the Official Scale of General Precedence. In London and other corporations the Mayor has first place, followed by the aldermen, sheriff, chief officers, and livery.

Divines, naval and military officers, members of the legal and medical professions, graduates of universities, citizens and burgesses, have no precedence assigned to them, either by statute or on any fixed principle.

THE PARLIAMENT OF GREAT BRITAIN AND IRELAND

Parliament is composed of the *Sovereign* and the *Three Estates of the Realm*, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Temporal sitting together and forming the House of Lords. The Sovereign alone has the power of summoning or proroguing or dissolving Parliament, and gives the Royal Assent to measures which have passed both Houses. Unless it be dissolved by the Crown, Parliament exists five years from the date on which it was first to meet. The *demise of the Crown* does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary; and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign.

THE HOUSE OF LORDS

The peerage collectively may be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scottish and Irish peers only a portion are peers of Parliament. Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any borough or county constituency in Great Britain. The petition of every claimant to a title of nobility is referred to the *Committee for Privileges* of the House of Lords, a body which is composed of the Lord Chancellor, the ex-Lord Chancellors, and the Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

The *House of Lords* is composed of two of the estates of the realm, the *lords spiritual* and *temporal*. The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics. The Archbishops and the Bishops of London, Durham, and Winchester are always entitled to sit; the other bishops only receive a writ of summons when the voidance of a see decreases the total number of lords spiritual to less than twenty-six, and then in order of seniority of appointment. The Bishop of Sodor and Man is not included in this rotation, and has no vote in Parliament. A bishop ceases to be a lord of Parliament on resigning his see.

The following list shows those who are, and who are not, spiritual lords of Parliament:

Apptd.			
1903	*Canterbury*	Randall Thos. Davidson	*b.* 1848
1909	*York*	Cosmo Gordon Lang	*b.* 1864

The *temporal lords* may be divided into peers whose right to sit and vote in the House is hereditary, representative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the *Scottish peers* send sixteen representatives to the House of Lords, who are elected immediately after every general election, and sit until Parliament is dissolved. The *Irish peers* elect twenty-eight representatives for life. The *Lords of Appeal*, of whom there may not be more than four appointed, enjoy the dignity of a baron for life.

The *lords temporal* are divided into dukes, marquesses, earls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scottish or Irish title (by which he may be generally known) to that under which he sits as a peer of the United Kingdom. The lords spiritual and temporal have each an equal vote in the house, whatever may be their rank.

The House of Lords has both *legislative and judicial powers*. Previously to 1911 it had power to alter or reject any Bill sent up from the House of Commons. The *Parliament Act* of that year provides that if a Money Bill, having been passed by the House of Commons, and sent up to the House of Lords at least one month before the end of the session, is not passed by that House without amendment within a month, it may become an

Act on the royal assent being signified. If any Public Bill (other than a Money Bill or a Bill containing any provision to extend the maximum duration of Parliament beyond five years) is passed by the House of Commons in three successive sessions (whether of the same Parliament or not), and, having been sent up to the House of Lords at least one month before the end of the session, is rejected or unacceptably amended by the House of Lords in each of those sessions, that Bill may receive the royal assent, provided that two years have elapsed between the second reading in the first of the three sessions and the final reading in the third.

The House of Lords is the highest appellate court of the United Kingdom. It may in certain cases try members of its own body; it tries any person who may be impeached by the House of Commons, and it also decides claims to the peerage.

The following is the *present composition of the House of Lords*: Peers of the Blood Royal, 3; Archbishops, 2; Dukes, 21; Marquesses, 25; Earls, 126; Viscounts, 47; Bishops, 24; Barons, 364; Scottish Representative Peers, 16; Irish Representative Peers, 28; total, 656.

The *Lord High Chancellor*, who is appointed by mere delivery of the Great Seal to him by the sovereign, is principal legal adviser of the Crown, is by prescription Speaker of the House of Lords, and may act in that capacity even though he be not a peer; he is by virtue of his office a privy counsellor, and as the first existing great officer of State he takes precedence of all but princes of the blood royal and the Archbishop of Canterbury. He presides, if present, when the House of Lords is sitting as an appellate court. He is president of the Chancery Division of the High Court and of the Court of Appeal, and is one of the Judicial Committee of the Privy Council. In the absence of the sovereign he reads the King's Speech at the opening and prorogation of Parliament, and he is always one of the Commission for giving the royal assent to bills. He is visitor of all hospitals of royal foundation, the general guardian of all infants, idiots, and lunatics, and has the general supervision of all charitable trusts. His patronage is very extensive. He nominates the puisne judges and county court judges; and, except for Lancashire, he appoints the county magistrates, generally accepting the nominations of the lords-lieutenant and the borough justices. He is the patron of twelve canonries and a large number of livings. On retiring from office he receives a pension of £5,000 a year, but in such case he commonly assists the Lord Chancellor and the Lords of Appeal in Ordinary in the transaction of the judicial business of the House of Lords. The holder of the office may not be a Roman Catholic. The present Lord Chancellor is Lord Buckmaster.

The *Chairman of Committees in the House of Lords* is appointed at the commencement of every session. The holders of the office have been:

Earl of Redesdale (*d.* 1886)	1851–1886
Duke of Buckingham and Chandos (*d.* 1889)	1886–1889
Earl of Morley (*d.* 1905)	1889–1905
Earl of Onslow (*d.* 1911)	1905–1911
Earl of Donoughmore	1911–

The *Chairman of Committees* and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present, any lord may be chosen to act.

The *Serjeant-at-Arms* of the House of Lords attends the Lord Chancellor with the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of Black Rod. *The Gentleman Usher of the Black Rod* is an officer of the House of Lords appointed by the Crown who assists at the introduction of Peers.

Clerk of the Parliaments

The *Clerk of the Parliaments* is the chief officer of the House of Lords, and Registrar of the House in its judicial capacity. By him, in conjunction with the Clerk Assistant and the Reading Clerk, are performed such duties as making minutes of the proceedings, swearing peers and witnesses, and signifying the royal assent to bills which have passed both Houses.

ALPHABETICAL LIST OF PEERS AND BISHOPS

The following list contains in alphabetical order the names of peers of whatever classification whether theybe English, Scottish, Irish, of Great Britain, or of the United Kingdom, **those who are not entitled to a seat in the House of Lords having an * prefixed.**

It also includes the diocesan bishops, whether they be lords of Parliament or not, the distinction between these being indicated in the same manner.

The initials **S.P.** and **I.P.** are used to signify that the lord is a Scottish or Irish peer, representative Scottish and Irish peers having a † prefixed.

The **abbreviations** *H.*, *n.*, *s.*, *bro.*, *un.*, *h.b.*, *g.s.*, etc., will be readily understood to mean heir, nephew, son, brother, uncle, half-brother, grandson, etc.

Methods of Address

Archbishops.—The Most Rev. His Grace the Lord Archbishop of ——. Addressed as, My Lord, Archbishop, or, Your Grace.

Dukes.—His Grace the Duke of ——. Addressed as, My Lord Duke, or, Your Grace. The eldest sons of Dukes and Marquesses take, by courtesy, their father's second title. The other sons and daughters are styled Lord Arthur, Lady Mary, etc.

Marquesses.—The Most Hon. the Marquess of ——. Addressed as, My Lord Marquess.

Earls.—The Right Hon. the Earl of ——. Addressed as, My Lord. The eldest sons of Earls take, by courtesy, their father's second title; the younger sons are styled "the Hon.," and the daughters, Lady ——.

Viscounts.—The Right Hon. the Viscount ——. Addressed as, My Lord. The sons and daughters of Viscounts and Barons are styled, without distinction, "the Hon."

Bishops.—The Right Rev. the Lord Bishop of ——. Addressed as, My Lord.

Barons.—The Right Hon. Lord ——. Addressed as, My Lord.

PRINCIPAL OFFICERS OF HOUSE OF LORDS

Chairman of Committees, The Rt. Hon. the Earl of Donoughmore, K.P. (£2,500).
Clerk of the Parliaments, Sir Henry J. L. Graham, K.C.B. (£2,000).
Clerk Assistant, Hon. Sir Edward P. Thesiger, K.C.B. (£1,500).
Reading Clerk, and Clerk of Outdoor Committees, E. H. Alderson (£1,200).
Counsel to Chairman of Committees, Albert Gray, C.B., K.C. (£1,800).
Chief Clerk and Clerk of Printed Papers, C. L. Anstruther (£1,200).
Senior Clerks: W. H. Hamilton-Gordon, *Clerk of the Journals* (£1,000); Hon. A. McDonnell, *Principal Clerk of Private Committees* (£1,000); A. H. Robinson, *Clerk of Private Bills and Taxing Officer for Private Bills* (£1,200); H. P. St. John, *Principal Clerk, Judicial Department, and Taxing Officer (Judicial)* (£1,100); V. M. Biddulph (£700).
Other Clerks: Hon. E. A. Stonor, H. J. F. Badeley; C. Headlam, *Clerk of Public Bills*; J. B. Hotham, E. C. Vigors, G. D. Luard, G. Proby; W. G. G. Leveson-Gower, *Clerk Attending the Table*; R. O. W. Pemberton and A. W. G. Hinchliffe (£100–£600).
Accountant and Receiver of Fees, T. Ambrey Court (£500–£650).
Librarian, A. H. M. Butler (£1,000).
Assistant Librarian, C. T. Clay (£340).
Examiners for Standing Orders, Hon. E. Gully, C.B., and J. F. Symons-Jeune.
Clerk for Standing Orders, H. S. Green.
Gentleman Usher of the Black Rod, Admiral Sir Henry F. Stephenson, G.C.V.O., K.C.B. (£1,000).
Yeoman-Usher and Sec. to Lord Great Chamberlain, Capt. T. D. Butler, M.V.O. (£500).
Serjeant-at-Arms, Capt. the Hon. Sir Seymour John Fortescue, K.C.V.O., C.M.G., R.N. (£1,000).
Deputy Serjeant, R. Muir Mackenzie (£350).
Resident Superintendent, T. Whitehead (£300).

THE HOUSE OF COMMONS

The Act of Union with Ireland increased the **number of members of the House of Commons to 658,** and though it stood nominally at this figure until the end of the Parliament of '80–85, the disfranchisement of 4 constituencies returning 6 members, and the suspension of 12 writs in 7 cities and boroughs, had reduced the total of members to 640. The **Redistribution Act** did not alter the apportionment of members to Ireland or Wales, but increased the number returnable by Scotland from 60 to 72, and these 12 new seats being added to the nominal number of the House brought it up to 670, distributed as follows:—

	Counties	Boroughs	Universities	Total
England and Wales	253	237	5	495
Scotland . .	39	31	2	72
Ireland . .	85	16	2	103
	377	284	9	670

With certain exceptions any male of full age may be elected to represent a constituency in the House of Commons. English and Scottish peers are entirely **disqualified,** but Irish peers (with the exception of the 23 Representative Peers) may be returned for any constituency in Great Britain. All English, Scottish, and Irish judges; clergymen of the Established Church of either of the two kingdoms; Roman Catholic priests; the holders of various offices specially excluded by statute (including revenue officers); persons who have been convicted of certain offences; aliens (unless a certificate of naturalisation has been granted to them by the Secretary of State, and they have taken the oath of allegiance); imbeciles; Government contractors (except contractors for Government loans); and sheriffs and returning officers within the constituencies for which they act,—all these **are disqualified.** By the resolution moved by Mr. Lloyd George as Chancellor of the Exchequer on August 10, 1911, and carried by 256 votes against 158, provision is made "for the payment of a **salary at the rate of four hundred pounds a year** to every Member of the House, excluding any Member who is for the time being in receipt of a salary as an officer of the House, or as a Minister, or as an officer of his Majesty's Household."

The Speaker is the first to take the oath and subscribe the roll in a new House of Commons, and is followed by the other members, who are presented to him by the clerk. Members returned after a general election are introduced by two other members. The **form of oath** taken is as follows: "I, ————, do swear that I will be faithful and bear true allegiance to His Majesty King George, his heirs and successors, according to law. So help me God." **An affirmation** to the same effect as the oath is permitted.

A seat in the House is vacated on acceptance of any office of profit under the Crown; and there are certain disabilities attached to bankruptcy. The principal members of the Government, on accepting office, vacate their seats, and are eligible for re-election *; but the rule does not apply to such offices as Secretary to the Treasury or other similar appointments which are not held direct from the Crown. No member of the House of Commons can, as a matter of fact,

* In June 1915, on the formation of a Coalition Government, a Special Act was passed, rendering unnecessary the re-election of members of the House of Commons during the months of May and June of that year, on acceptance of office; another Act was passed in July 1916 making further temporary provision for a similar purpose, and also for removing disabilities under which some Ministers suffered through the limited scope of the 1915 Act.

resign his seat, but this end is attained by his acceptance of the **"Chiltern Hundreds."** By obtaining "the stewardship of His Majesty's Chiltern Hundreds, or the stewardship of the Manor of Poynings, of East Hendred and Northstead, or the Escheatorship of Munster," a member may rid himself of his duties.

When a seat becomes vacant during a session, a new **writ** is moved for at the commencement of an ordinary sitting, generally by one of the whips of the party to which the late member belonged. **During the recess** the Speaker may, on the production of a certificate signed by two members that a member has died, or accepted an office held direct from the Crown, or has been called to the House of Lords, or that the seat has become vacant by the bankruptcy or lunacy of a member, order a writ to be issued for a fresh election to fill the vacancy thus caused. But a writ may not be issued during the recess on the acceptance of the Chiltern Hundreds or of the like offices.

PARLIAMENTARY REGISTRATION

The right to vote in the election of a member of Parliament is confined to those adult males whose names appear on the register of voters in force for some county or borough. No man can be registered who has within the **twelve months preceding July 15** received parochial assistance other than medical relief, or who is an alien, unless naturalised.

In counties the qualifications are as follow: **Freehold** of inheritance or by purchase of the clear annual value of 40*s.* and upwards. Freehold for life must be of the clear annual value of £5, unless the same comes by descent, marriage, devise, or promotion to any benefits or office, in all which cases 40*s.* clear annual value is sufficient. **Freeholders** by purchase are required to be six months in possession previous to July 15; by descent, etc., no length of possession is necessary. **Copyhold** of the clear annual value of £5 or upwards. **Copyholders** are subject to the same terms of possession as freeholders. **Leasehold,** if created originally for a term of not less than sixty years, of the clear annual value of £5 or upwards; if for a term of more than twenty, but less than sixty years, the clear annual value must be £30. **Leaseholders** by purchase are required to be twelve months in possession previous to July 15; by descent, etc., no length of possession is necessary. Persons qualified in respect of any of the foregoing qualifications must send in their claims to the overseers on or before July 20.

Counties and Boroughs: Occupation as owner or tenant of any land or tenement of a clear yearly value of not less than £10. **Occupation as owner or tenant** of any dwelling-house. The term "dwelling-house" includes part of a house in which the landlord or superior tenant does not reside. When he does reside, his under-tenants are held to be lodgers. **Occupation** by virtue of any office, **service,** or employment, of any dwelling-house which is not inhabited by a person under whom such office, service, or employment is held. In the above three classes of occupiers the occupation need not be of the same premises, but may be of different premises, occupied in immediate and unbroken succession in the same constituency. **Occupation** as **lodger** of any lodgings of a clear yearly value, if let unfurnished, of £10. Successive occupation is also allowed in the case of lodgings, but it must be from one part to another part of the same house. In all cases of occupation, whether as owner or tenant, servant or lodger, **twelve months' occupation is required up to the 15th day of July** in any year. **Lodgers** must claim every year, and when claiming for the first time must send in their claims to the overseers on or before August 20. The **revised register** comes into operation on **Jan. 1 in each year.** No new register has been compiled since the outbreak of the war, and the one existing up to 1916 is very stale. The proposals of the Government as presented to the House in August 1916 provided for a further extension of the life of Parliament (which was first elected in Dec. 1910); no alteration was to be made in the existing qualification for the franchise, but a new register was to be brought into force, the period of qualification being postponed from July 15 to Nov. 1, to make the register as fresh as possible. Persons engaged on war work who were on the existing register and had since lost their qualification were to be placed on the new register, as well as those who were in the course of qualification, but had not completed the process owing to the war.

Revising barristers are appointed every year, for London and Middlesex by the Lord Chief Justice, and for other places by the senior judge of assize. The barrister so appointed makes a circuit and holds **open court** for the **revision of the register** in each borough and at or near every polling place in the county. An **appeal** lies from his decision to the King's Bench Division of the High Court, but no further appeal is possible without its express sanction. Any person not having his name on any list of voters, or receiving a notice of objection, should apply to the **registration agent** for his district of the political party to which he belongs. Such agents are appointed and paid by the various party organisations in most constituencies, and make it their business to know the intricacies of the law on the subject.

ELECTION OF A MEMBER OF PARLIAMENT

Under the provisions of the Ballot Act, the returning officer is required, in the case of a county election within two days after the day on which he receives the writ, and in the case of a borough election on the day on which he receives the writ or the following day, to give notice of election. The **day of nomination** is to be fixed as follows: in the case of an election for a county or district borough, not later than the ninth day after the day on which he receives the writ, with an interval of not less than three clear days between the day on which he gives the notice and the day of nomination; and in the case of an election for any borough other than a district borough, not later than the fourth day after the day on which he receives the writ, with an interval of not less than two clear days between the day on which he gives the notice and the day of nomination.

The candidate is **nominated** in writing, subscribed by two registered electors as proposer and seconder, and by eight other electors, who must also be registered in the same constituency. If at the expiration of one hour more candidates stand nominated than there are seats to be filled up, the returning officer is to adjourn the election and take a poll.

The **poll** is to take place on such day as the returning officer may appoint, not being, in the case of an election for a county or district borough, less than two or more than six clear days, and not being, in the case of an election for a borough other than a district borough, more than three clear days after the day fixed for the nomination.

Sundays, Christmas Day, Good Friday, and any day set apart for a public fast or thanksgiving are not counted. There is a special allowance of time in the case of the constituency of Orkney and Shetland.

Where there is an **equality of votes,** the returning officer, if a registered elector of the county or borough, may give an additional vote, but shall not in any other case be entitled to vote at an election for which he is returning officer. But the returning officer may, if qualified, decline to give the **casting vote**; and, if he be not qualified, or if he decline to act, the names of the two candidates are endorsed on the writ and a double return made. Neither candidate returned may vote until the right to the seat has been determined.

A **petition** may be presented by a person qualified to vote, a person claiming to have the right to be returned, and by a person alleging himself to have been the candidate; the petition may be presented on various grounds, and it may allege bribery and corruption. All election petitions are **tried** by two judges, who determine and report to the Speaker whether or not the election was void, and whether corrupt practices have been committed; the names of the persons proved to have been guilty of such corrupt practices; and whether during the election there was an extensive prevalence of corrupt practices. When such a report as the latter is made to the House, it is usual to appoint a **Royal Commission,** on whose report, if it disclose a serious state of things, the writs for a fresh election may be suspended, so that the constituency remains temporarily unrepresented.

Any **member returned** for **two or more places** in any part of the United Kingdom is to make his selection for which of the places he will serve within one week after it shall appear that there is no question upon the return for that place.

PARLIAMENTARY PROCEDURE

The most striking feature in the procedure of the **House of Commons** is the great power vested in the **Speaker.** The Speaker must abstain from debating, unless in committee of the whole House; and even there he rarely takes advantage of his right. The member of the House who is elected to the office of Speaker acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the casting vote. The chief duty of the Speaker undoubtedly is the preservation of order. He holds office until a dissolution. He has a residence in the Palace of Westminster, and receives a **salary of £5,000 per annum**; he ranks as first Commoner, and is usually awarded upon retirement a pension of £4,000 and a peerage. The following have been **Speakers since the meeting of the first reformed Parliament:**

Sir C. Manners-Sutton	1833–35
J. Abercromby	1835–39
C. Shaw-Lefevre (Vct. Eversley)	1839–57
J. E. Denison (Vct. Ossington)	1857–72
Sir H. Brand (Vct. Hampden)	1872–84
A. W. Peel (Vct. Peel)	1884–95
W. C. Gully (Vct. Selby)	1895–05
J. W. Lowther	1905–

Chairman of Committee

The Chairman of Committee of Ways and Means is a member of the House of Commons who is elected when the House goes into Committee of Ways and Means, or Supply, for the first time in a new parliament, and holds office until the dissolution of that parliament. He is nominated by the Government, but is regarded as an officer of the House. The **salary** of the office is £2,500 a year. The Chairman of Ways and Means usually presides when the House is in committee, whether on financial business or on a bill, and in his absence the Deputy Chairman, or failing him, the Chairman may request one of several temporary chairmen nominated by the Speaker at the commencement of each session to act for him. His place is not in the chair of the Speaker, but at the table where the Clerk, who retires with the Speaker, has sat. When the House is informed of the unavoidable absence of the Speaker, the Chairman of Ways and Means exercises his authority as Deputy Speaker. He may also take the chair as **Deputy Speaker,** when requested to do so by the Speaker, without any formal communication to the House. The recent **holders of the office** include:

H. C. Raikes	1874–80
Sir Lyon Playfair (Lord Playfair)	1880–83
Sir A. Otway	1885–85
L. H. Courtney (Lord Courtney)	1885–92
J. W. Mellor	1893–95
J. W. Lowther	1895–05
Grant Lawson	1905
A. Emmott (Lord Emmott)	1906–11
J. H. Whiteley	1911–

Deputy Chairman

The House made provision in 1902 for the appointment of a **deputy chairman,** who is elected in the same way as the Chairman of Committee of Ways and Means, and is also regarded as an officer of the House. The salary of the office is £1,000 a year. The Deputy Chairman, in the unavoidable absence of the Chairman of Ways and Means, is entitled to exercise all the powers vested in the Chairman of Ways and Means, including his powers as Deputy Speaker. The Deputy Chairman may also take the chair as Deputy Speaker, when requested to do so by the Speaker, without any formal communication to the House. Holders of the office:

A. F. Jeffreys	1902–05
L. Hardy	1905–06
J. Caldwell	1906–10
J. H. Whiteley	1910–11
D. Maclean	1911–

The Serjeant-at-Arms

The Serjeant-at-Arms of the House of Commons carries the **mace** when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order. The admission of strangers to the galleries and the maintenance of order in the precincts of the House are under his charge.

The House in Committee

The business of the House of Commons is transacted very largely "in committee." When the **whole House is in committee** the Speaker vacates the chair, the mace is placed under the table, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expenditure of public money take place in **Committee of Supply,** while in **Committee of Ways and Means** resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also

grand committees, **Select Committees** chosen for specific purposes, and committees for the consideration of private bills.

Committee of Supply

The sums necessary to defray the charge for the Army, Navy, Civil Services, Customs, Post Office, etc., are voted annually by the House of Commons in **Committee of Supply.** The sums required are **granted** for the **financial year ending** on March 31. **The Estimates,** framed by the respective departments and approved by the Treasury, are laid upon the table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the **Supplementary Estimates. Votes of credit** for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the resolution embodying the vote for the number of men for the army is founded the **Army (Annual) Bill,** which provides, during twelve months and no more, for the discipline and regulation of that force. The system of granting supplies for only twelve months involves a meeting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and a means of continuing it periodically in such strength as the House itself may deem to be necessary.

Committee of Ways and Means

This Committee (1) considers any proposals relative to old or new taxes and duties submitted to it by the Chancellor of the Exchequer, and (2) votes sums of money from the Consolidated Fund sufficient in amount to make good the supplies granted for the maintenance of the services of the year. Resolutions relative to taxation may be acted upon by the proper officers as soon as passed. At the end of the session a measure which on the one hand applies out of the Consolidated Fund the whole sum granted to His Majesty for the service of the financial year, and on the other hand appropriates the supplies in accordance with the votes already passed in Committee of Supply, is passed, and is known as the **Appropriation Bill.**

Sittings of the House

The **course of business** is now as follows:—On Mondays, Tuesdays, Wednesdays, and Thursdays the House meets at 2.45 o'clock, and, after prayers, proceeds till 3 p.m. with petitions, motions for unopposed returns, and leave of absence to members, giving notice of motions, and unopposed private business. **Questions** are commenced at 3, and no question, unless of an urgent character, is taken after 3.45. Any member who desires an oral answer to his question may distinguish it by an asterisk, and if he do not so distinguish it the answer is printed and circulated with the votes. No **motion for the adjournment of the House** may be made until all the questions asked at the commencement of business (and questions may not be asked at any other time) have been disposed of, and if leave to make such motion be given, by forty members rising in their places to support it, the debate upon it takes place at 8.15 that same evening, the business then under discussion being interrupted for the purpose. After questions **bills** may be brought in and committees nominated, and a member may now, after notice, present a bill without an order for its introduction, and when a bill is so presented its title is read by the Clerk, and the bill is then deemed to have been read a first time, a day is fixed for the second reading, and the Bill is sent to be printed. Opposed business is suspended at 11 p.m. On Fridays the House meets at noon, and opposed business is suspended at 5 p.m. **Government business** has precedence at every sitting except the sittings on Fridays, when Bills in charge of unofficial members have precedence. At 8.15 p.m. on Tuesdays and Wednesdays up till Easter, and at 8.15 p.m. on Wednesdays up till Whitsuntide, the business then under discussion is interrupted, and precedence is given to private members' motions after any motion for adjournment of the House or any private business set down for discussion at that hour has been disposed of. After Whitsuntide Government business has precedence at all sittings except the sittings on the third and fourth Fridays after Whit Sunday, at which Bills in charge of unofficial members have precedence.

Supply

Thursday is now the weekly Supply day. Twenty days are allotted for the actual consideration of the votes, with a power of adding three more, apart from estimates supplementary to those of a previous session, or any vote of credit or supplementary or additional votes for war expenditure. Of the days so allotted not more than one is allotted to any vote on account, and not more than one sitting to the report of that vote. At 10 o'clock on the last day but one of the allotted days the outstanding votes are put in classes of the Civil Service Estimates, and in totals so far as the Estimates for the Navy, Army, and the Revenue Departments are concerned, and a similar procedure is observed on the last allotted day in regard to the reports of the outstanding votes.

PRINCIPAL OFFICERS OF HOUSE OF COMMONS

Clerk of the House, Sir Courtenay Peregrine Ilbert, G.C.B., K.C.S.I., C.I.E. (£2,000).
Clerk Assist. Arthur W. Nicholson, C.B. (£1,800).

Principal Clerks: Sir H. A. Ferguson-Davie, Bt., *Public Bills and Fees*; S. L. Simeon, *Committee and Private Bill Office*; G. C. Giffard, *Clerk of the Journals* (£850–£1,000).
Senior Clerks: A. I. Dasent, H. West, Arthur H. Ellis, P. A. Bull, F. R. Williams Wynn, F. C. Holland, and J. W. G. Bond (£650–£800).
Assistant Clerks: H. C. Dawkins, R. P. Colomb, B. H. Fell, J. S. Horsburgh Porter, F. C. Bramwell, W. T. Legge, C. R. Turner, W. K. Gibbons, W. P. Johnston, R. N. Bailey, G. F. M. Campion, H. S. Green, O. C. Williams, G. W. B. Throckmorton, B. H. Coode, L. F. Schooling, G. C. Tylor, A. W. M. Bull, and R. W. T. Cox (£120–£600).
Examiners of Petitions for Private Bills: Hon. Edward Gully, C.B.; J. F. Symons-Jeune (£800).
Taxing Master, Hon. Edward Gully, C.B. (£50).
Clerk to Examiners and Taxing Master, H. S. Green (£50).
Clerk in Public Petitions Office, A. A. Taylor (£400).
Clerks in Admission Order Office: Capt. G. T. Payne, Capt. W. G. A. Garton (£200–£300); *in Serjeant-at-Arms Office*, C. J. H. Shearn (£300); *in Committee and Private Bill Office*, J. W. Gardner (£250).
Collector of Fees on Private Bills, C. L. Lockton (£500–£600).
Secretary to Chairman of Ways and Means, J. S. Horsburgh Porter (£100).

Vote Office: Principal Clerk, Philip Smith (£450–£650). *Assistant Clerk*: J. G. Mounsey (£100–£350).
Editor of the Official Debates, W. Turner Perkins (£650).
Assistant Editor, P. F. Dawney, B.A. (£400).
Librarian, A. Smyth (£1,000–£1,200).
Assistant Librarian, Vivian Kitto (£400–£600).
Shorthand Writer, W. Hodgson.
Secretary to Speaker, Hon. Edward Cadogan.
Serjeant-at-Arms, Vice-Ad. Sir Colin R. Keppel, K.C.I.E., K.C.V.O., C.B., D.S.O. (£1,200).
Deputy Serjeant, F. R. Gosset (£800).
Assistant Serjeant, Walter Erskine (£650).
Chaplain, Rev. Canon W. H. Carnegie, M.A. (£400).
Speaker's Counsel, Ernest Moon, K.C., C.B. (£1,800).

LIST OF MEMBERS

The following is a list of members returned at the General Election in Dec. 1910, corrected by the results of bye-elections up to date. A prefixed * denotes that the member was not in the last Parliament.

For pollings in the various constituencies, and the numbers of registered electors, see pp. 183–97.

Abraham, Rt. Hon. W. (Lab., *b.* '42), Glamorgan, Rhondda.
***Acland,** Rt. Hon. F. Dyke (L., *b.* '74), Cornwall, Camborne.
***Adamson,** W. (Lab., *b.* '63), Fife, W.
Addison, Rt. Hon. C., M.D. (L., *b.* '69), Shoreditch, Hoxton.
Adkins, Sir W. R. (L., *b.* '62), Lancs. S.E., Middleton.
***Agg-Gardner,** Sir J. T. (U., *b.* '46), Cheltenham.
Agnew, Sir G. W., Bt. (L., *b.* '52), Salford, W.
Ainsworth, J. S. (L., *b.* '44), Argyll.
***Aitken,** Sir W. Max, Bt. (U., *b.* '79), Ashton-under-Lyne.
Alden, Percy (L., *b.* '65), Middlesex, Tottenham.
***Allen,** A. A. (L., *b.* '68), Dumbarton.
Allen, Rt. Hon. C. P. (L., *b.* '61), Gloucester, Stroud.
***Amery,** L. C. M. S. (U., *b.* '73), Birmingham, S.
***Anderson,** W. C. (Lab., *b.* '71), Sheffield, Attercliffe.
***Anstruther-Gray,** Major W. (U., *b.* '59), St. Andrews Burghs.
Archdale, E. M. (U., *b.* '53), Fermanagh, N.
Archer-Shee, Major M. (U., *b.* '73), Finsbury, C.
Armitage, R. (L., *b.* '66), Leeds, C.
***Arnold,** Sydney (L., *b.* '78), Yorks. W. Riding, Holmfirth.
Ashley, W. W. (U., *b.* '67), Lancs. N., Blackpool.
Asquith, Rt. Hon. H. H. (L., *b.* '52), Fife, East.
***Astor,** Hon. Waldorf (U., *b.* '79), Plymouth.
Baird, J. L. (U., *b.* '74), Warwickshire, Rugby.
Baker, Rt. Hon. Harold T. (L., *b.* '77), Lancs. N.E., Accrington.
Baker, J. Allen (L., *b.* '52), Finsbury, E.
Baker, Sir R., Bt. (U., *b.* '79), Dorset, N.
Baldwin, Stanley (U., *b.* '67), Worcester, Bewdley.
Balfour, Rt. Hon. A. J. (U., *b.* '48), London, City.
Balfour, Sir R., Bt. (L., *b.* '44), Lanark, Partick.
Banbury, Rt. Hon. Sir F. G., Bt. (U., *b.* '50), London, City.
***Baring,** Sir G., Bt. (L., *b.* '71), Devon, Barnstaple.
***Barlow,** C. A. M. (U., *b.* '71), Salford, S.
Barlow, Sir J. E., Bt. (L., *b.* '57), Somerset, Frome.
Barnes, Rt. Hon. G. N. (Lab., *b.* '59), Glasgow, Blackfriars.
***Barnett,** Capt. R. W. (U.), St. Pancras, West.
Barnston, H. (U., *b.* '70), Cheshire, Eddisbury.
Barran, Sir J. N., Bt. (L., *b.* '72), Hawick Burghs.
Barran, R. H. (L., *b.* '58), Leeds, N.
Barrie, H. T. (U., *b.* '60), Londonderry, N.
Barton, A. W. (L., *b.* '62), Oldham.
Bathurst, Hon. A. B. (U., *b.* '72), Gloucester, Cirencester.
Bathurst, Charles (U., *b.* '67), Wilts, Wilton.
Beale, Sir W. P., Bt. (L., *b.* '39), Ayrshire, S.
***Beauchamp,** Sir E., Bt. (L., *b.* '49), Suffolk, Lowestoft.
***Beck,** A. C. T. (L., *b.* '76), Essex, Saffron Walden.
Beckett, Hon. Gervase (U., *b.* '66), Yorks. N. Riding, Whitby.
Bellairs, Commdr. C. (U., *b.* '71), Maidstone.
***Benn,** A. Shirley (U., *b.* '58), Plymouth.
Benn, I. Hamilton (U., *b.* '63), Greenwich.
Benn, W. W. (L., *b.* '77), Tower Hamlets, St. George-in-the-East.
Bentham, G. J. (L., *b.* '63), Lincs., Gainsborough.

Yoxall, Sir J. H. (L., *b.* '57), Nottingham, W.

REGISTERED ELECTORS AND POLLINGS, DECEMBER 1910 TO DATE

The following table shows the total number of **registered electors,** with other details, in the United Kingdom on the existing register:

	England and Wales.	Scotland.	Ireland.	United Kingdom.
Population 1911	36,070,492	4,743,224	4,390,219	45,203,935
County Electors:				
Owners	568,326	65,098	10,686	644,110
Occupiers	3,263,643	391,141	558,575	4,213,359
Lodgers	141,859	47,473	5,750	195,082
Total County	3,973,828	503,713	575,011	5,052,552
Borough Electors:				
Occupiers	2,548,164	285,878	115,090	2,949,132
Lodgers	205,751	39,938	3,885	249,574
Freemen, etc.	22,198	29,370	3,351	54,919
Total Borough	2,776,113	355,186	122,326	3,253,625
University Electors	21,323	26,010	4,138	51,471
Grand Total	**6,771,264**	**884,909**	**701,475**	**8,357,648**

The following is an **alphabetical list of the Parliamentary constituencies of the United Kingdom,** with the names of the member or members returned by each, and, where there was a contest, the figures declared to have been polled by the candidates, at the **General Election of December 1910** and subsequent bye-elections. The names of the county and borough divisions are given in parentheses after the names of the counties or boroughs: thus, the Luton or South Division of Bedfordshire appears as Beds (S. or Luton). Therefore, in seeking for the figures with regard to any special division of a county or borough, the county or borough should be turned to in its proper alphabetical place, and the local division will be readily found. The few places which, like the City of London, Leicester, etc., still return two members, are distinguished in the alphabetical list of constituencies by a figure (**2**). The figures in brackets, *e.g.* [6688], show the number of electors on the existing register.

Aberdeen (N.) [10,167]
D. V. Pirie (L) . . 4282
R. Scott-Brown (U) . 2546

Aberdeen (S.) [13,791]
G. B. Esslemont (L) . 5862

J. H. Dransfield (U) . 4511
On the appointment of Mr. Pease as Postmaster-General, he was returned unopposed (Jan. 26, 1916).

The New HAZELL, 1917

THE KING'S MINISTERS

From an early period the monarchs of England were advised on public affairs by a **Privy Council,** matters of State being discussed in the Sovereign's presence. The selection by the Sovereign of a few of the whole number was no doubt the origin of the Cabinet Council. It was not until the Restoration, says Macaulay, that the interior council began to attract general notice. The Sovereign cannot now constitutionally preside at a Cabinet Council.

The Chief of the Cabinet and of the Ministry is called the **Prime Minister** or **Premier.** He is the **leader of the House** of Parliament of which he is a member. By Royal Warrant dated Dec. 2, 1905, the **precedence of the Prime Minister** was definitely settled, and he was given "place and precedence next after the Archbishop of York." Only Princes of the Blood Royal, the Lord High Chancellor, and the two Archbishops, therefore, rank above him. It is he who at the summons of the Sovereign forms an administration, of which he is the head. It is upon his advice that as vacancies occur the archbishops, bishops and deans, and the highest judges are appointed, and over one hundred Crown livings are filled; and upon his recommendation that peerages, baronetcies, and the Garter are conferred, and such high appointments as the Lord-Lieutenancy of Ireland, the Viceroyalty of India, the principal ambassadorships and colonial governorships, and the lord-lieutenancies of counties, are made by the Crown. **When a Ministry resigns,** it is the function of the Sovereign to call upon some statesman to form another administration. There is no restriction upon the Royal choice, but the statesman usually selected is the leader of the opposing party in one of the two Houses.

The **offices** which invariably give the holder **Cabinet rank** are those of First Lord of the Treasury, Lord Chancellor, Lord President of the Council, the Secretaries of State for the Home Department, Foreign Affairs, the Colonies, for War, and for India, Chancellor of the Exchequer, and First Lord of the Admiralty.

The **offices** the holders of which may or may not be included in the Cabinet include those of Lord Privy Seal, Chancellor of the Duchy, First Commissioner of Works, Postmaster-General, Lord-Lieutenant of Ireland, Lord Chancellor of Ireland, Chief Secretary for Ireland, Secretary for Scotland, President of the Board of Trade, President of the Board of Agriculture, President of the Local Government Board, President of the Board of Education. In 1912 Sir Rufus Isaacs, Attorney-General, was made a member as a personal distinction, and in the Coalition Government formed in 1915 the holder of the new office of Minister of Munitions was in the Cabinet, as was also Lord Lansdowne, "Minister without Portfolio," and the Attorney-General. The Coalition Government numbered 23 members and continues at that number, in spite of the creation of the new office of Labour Adviser to the Government, owing to the combining by Lord Crewe of the offices of Lord Privy Seal and President of the Board of Education. A small War Committee of the Cabinet was subsequently formed, as it was felt that the constitution of the Cabinet was too unwieldy for effective control. **Members** of the Cabinet are necessarily **Privy Councillors,** and their deliberations are confidential. Ministers holding office direct from the Crown, on going from one such office to another, do not vacate their seats. There is, in effect, no limit to the duration of a Ministry but the confidence of the Commons; it will not now resign upon the adverse vote of the House of Lords, nor if it be defeated upon a trifling matter in the Commons, but only when it is defeated upon some question of importance. On July 14, 1915, for the first time in the history of the British Cabinet, a Prime Minister of the Dominions (Sir R. Borden, Prime Minister of Canada) was present by invitation at its deliberations; on March 10 and June 9, 1916, Mr. W. M. Hughes, Prime Minister of Australia, was present; and on Oct. 25, 1916, the Rt. Hon. W. F. Massey and the Rt. Hon. Sir Joseph Ward, Bt., of New Zealand, were present.

Early in the war it was arranged that Ministers, including some not in the Cabinet, should pool their salaries. On Dec. 16, 1915, Sir Frederick Smith (Attorney-General) announced that the two law officers had surrendered voluntarily about £5,000 each from their salaries and fees and that they were participating also in the pool.

ADMINISTRATIONS SINCE 1783

Prime Minister

W. Pitt, 1783–1801.
H. Addington, 1801–1804.
W. Pitt, 1804–1806.

THE CIVIL SERVICE

ADMIRALTY

(*See special* Naval Section)

AGRICULTURE AND FISHERIES, BOARD OF

Offices, 4–6 and 8 Whitehall Place, 3 and 21 St. James's Square, 43 and 54 Parliament Street, S.W., and Craven House, Northumberland Avenue.

The Board of Agriculture for Great Britain was established in 1889, and consists of the Lord President of the Council, His Majesty's Principal Secretaries of State, the First Commissioner of the Treasury, the Chancellor of the Exchequer, the Chancellor of the Duchy of Lancaster, and the Secretary for Scotland, with such other persons as His Majesty may from time to time think fit to appoint during his pleasure. By the Board of Agriculture and Fisheries Act of 1903, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture, the designation of which was at the same time altered. The expression "agriculture" is defined to include "horticulture." The business of the Board is transacted in five divisions.

1. **The Animals Division** is charged with the administration of the Diseases of Animals Acts, 1894 to 1914, the Markets and Fairs (Weighing of Cattle) Acts, 1887 and 1891, and certain sections of the Dogs Act, 1906. The Diseases of Animals Acts and the Orders made thereunder deal with the steps to be taken to prevent the spread of certain contagious diseases among animals in Great Britain; and with the regulation of the importation, into Great Britain, of ruminating animals, and swine, horses, dogs, and other canine animals, and hay and straw from certain countries; the transit of animals, and the exportation of horses.

2. **The Fisheries Division** is charged with powers and duties in England and Wales under the Sea Fisheries Regulation Acts, the Salmon and Freshwater Fisheries Acts, the Cran Measures Act, 1908, the Herring Fishery (Branding) Act, 1913, and certain Acts relating to Shell Fisheries. It also conducts the English share of the International Fisheries Investigations in the North Sea and adjacent waters, and carries out independent research work.

3. **The Intelligence Division** is charged with correspondence and inquiries relating to insect and fungus attacks of plants and diseases of bees, experiments, and general farming subjects; conducts business in connection with the Sale of Food and Drugs, Fertilisers and Feeding Stuffs, Destructive Insects and Pests, and other Acts. It also deals with Agricultural Education in England and Wales and Forestry, and superintends experimental and research work; issues leaflets and the monthly *Journal* of the Board.

4. **The Land Division** administers the Small Holdings and Allotments Acts, and is concerned with transactions under the Universities and College Estates Acts, sales of glebe land, and the sanctioning of charges on land for works of improvement, and grants of land or advances of money under the Light Railways Act, 1896; the appointment of arbitrators and umpires, in certain cases, under the Agricultural Holdings Acts, and business relating to charges under these Acts. It is also entrusted with the business relating to the improvement of light-horse breeding and live stock.

5. **The Statistical, Tithe, and Establishment Division** collects the annual Agricultural Returns of acreage and produce of crops and live stock, statistics of fisheries, prices of agricultural produce, statistics of diseases of animals, etc., and prepares reports thereupon. Business in this division relates also to the reapportionment and redemption of tithe rentcharge, corn rents, and extraordinary tithe rentcharge, the merger of tithe rentcharge, the definition of disputed boundaries in certain cases, the redemption of rents under sect. 45 of the Conveyancing Act, 1881, the enfranchisement of copyhold land, exchanges of lands, the regulation and inclosure of commons under the Inclosure Acts, the constitution of Land Drainage Districts, and the sanction of loans under the Land Drainage Act, 1861. Matters relating to the staff of the Department are dealt with in this Division.

The administration of the Ordnance Survey and of Kew Gardens is under the control of the Board.

Estimates, 1916–17, £335,160.

President, Rt. Hon. Earl of Crawford and Balcarres £2,000

ARMS, COLLEGE OF, OR HERALDS' COLLEGE

Queen Victoria Street, E.C.

In 1483 the Royal Offices of Arms were, by a charter of Richard III, erected into a Corporation and given a house by the river—near where the College of Arms now stands—as their headquarters. In a charter dated in 1555 Queen Mary confirmed their powers and privileges, and this Queen also gave them for their office Derby House, the old town house of the Earls of Derby. This

* Absent on military or naval service.

was destroyed in the Great Fire of London, and the present building was erected on its site, Sir Christopher Wren being the architect. The Corporation consists of **three Kings of Arms, six Heralds, and four Pursuivants.** The general **duties of the members** are to attend the Sovereign on all full State occasions; to publish certain royal proclamations, and to marshal certain royal solemnities, such as coronations, funerals, etc.; to arrange for changes of name and Arms by Royal Licence, grants of Arms and of Supporters, by warrant of the **Earl Marshal** (the Duke of Norfolk); to prepare and record the pedigrees of the nobility and gentry; and it is the duty of the Heralds and Pursuivants to attend in the Public Office of the College, between the hours of 10 and 4, one of each rank in monthly rotation.

Earl Marshal, His Grace the Duke of Norfolk, K.G., G.C.V.O.

KINGS OF ARMS

Garter Principal King of Arms, Sir Alfred Scott-Gatty, K.C.V.O.
Clarenceux King of Arms, William H. Weldon, C.V.O.

Public Office, College of Arms, Queen Victoria Street, London, E.C.

CENTRAL CONTROL BOARD (LIQUOR TRAFFIC)

Canada House, Kingsway, W.C.

Lord D'Abernon, K.C.M.G. (*Chairman*); Major Hon. Waldorf Astor, M.P.; W. Waters Butler; Rev. Henry Carter; Colonel John M. Denny; John Hodge, M.P.; Sir William H. Lever, Bt.; R. S. Meiklejohn, C.B.; Sir George Newman, M.D.; John Pedder, C.B.; R. R. Scott, C.S.I.; Philip Snowden, M.P.; W. Towle.
Secretary, J. C. G. Sykes, C.B.

CHARITY COMMISSIONERS

Ryder Street, St. James's, S.W.

The Charity Commission was created by the Charitable Trusts Act, 1853 (16 & 17 Vict. c. 137) for the better administration of charitable trusts in England and Wales. The original jurisdiction of the Commissioners has been largely extended by the Charitable Trusts Act, passed in '60, and other Acts. Endowments settled in 1915, £275,445. Amount given by will for charitable purposes in 1915 without any requirement for permanent investment, £1,525,752. Stocks and investments held by the Official Trustees of Charitable Funds on Dec. 1, 1915, £34,167,136, divided into 34,557 separate accounts. Aggregate income, 1915, £1,026,058.

* At the Customs Branch.
† At Geological Survey Museum.

THE COLONIAL OFFICE

Downing Street, S.W.

The authority of the Crown throughout the British Dominions beyond the seas is exercised by the **Secretary of State for the Colonies.**

The direct executive action of the department is mainly confined to Crown Colonies, Protectorates, etc. In the self-governing Colonies the department is the channel of communication in regard to all matters arising in the Colonies affecting foreign powers and matters of general Imperial concern.

As a result of a pledge given by him at the Imperial Conference 1907, Lord Elgin during that year rearranged and reorganised the Office in three branches or divisions.

I. The **Dominions Division,** dealing with the affairs of the Self-governing Dominions of the Empire, and with those Crown Colonies and Protectorates in the Pacific and in South Africa, which are intimately connected with the Self-governing Dominions. Emigration questions are dealt with by this department. Linked to it is the **Secretariat of the Imperial Conference.**

II. The **Crown Colonies Division,** dealing with the administration and political work of the Crown Colonies and Protectorates.

III. The **General Department,** dealing with the general routine business of the Office and various matters common to all the Colonies, especially the Crown Colonies, such as currency, banking, postal and telegraph matters, education, etc. There are Standing Committees in connection with this department, dealing with Patronage and Promotions, Finance, Concessions and Railways, and Pensions.

Estimates, 1916–17, £58,850.

Principal Secretary of State for the Colonies, Rt. Hon. A. Bonar Law, M.P. . . £5,000
Private Secretaries, J. C. C. Davidson, *A. C. Parkinson, and Miss Watson.

Registrar of Chancery Court, A. O. Smith.
Steward and Clerk of Halmotes, F. A. Manley.
Deputy ditto, etc. G. Aynsley Smith.
Mining Surveyor, Sir Lindsay Wood, Bt.
Receivers, Smiths, Gore & Co.

ECCLESIASTICAL AND CHURCH ESTATES COMMISSIONERS

Millbank, Westminster, S.W.

The Ecclesiastical Commissioners owe their origin to the Act 6 & 7 Will. IV, c. 77, which provided that the two Archbishops, the Bishop of London, the Lord Chancellor, Lord President, First Lord of the Treasury, and the Chancellor of the Exchequer, for the time being, as well as a Secretary of State named by the Sovereign, with five others therein named, should be of the commission. A subsequent Act added all the remaining bishops in England and Wales, the Chief Justice, and others. The function of the Ecclesiastical Commissioners is to make increased provision out of their common fund (arising from a readjustment of cathedral and episcopal revenues) for the cure of souls in necessitous parishes. The proceedings of the Commissioners are controlled by numerous Acts of Parliament, and various duties have from time to time been imposed upon them—*e.g.* the formation of new parishes and alteration of boundaries where required, the augmentation and endowment of poor benefices in populous places, the sale and leasing of glebe lands, etc., etc. Since 1840, when the Common Fund was first created, the Commissioners have augmented or endowed over 8,000 benefices. The total increase in the incomes of benefices and provision for curates' stipends resulting from the operations of the Commissioners exceeds £1,360,000 per annum. The gross income from Estates for the year ended Oct. 31, 1915, amounted to £1,765,000, and the outgoings to £285,000. The net rental of £1,480,000, together with the income of £567,000 from invested funds, made the **total net revenue** carried to the Common Fund £2,047,000.

The amount appropriated to fresh augmentations to be made in the year 1916 was £400,000. A scheme for the administration of a **Pension Fund** for facilitating the retirement of aged or infirm clergy holding poor benefices was framed in 1907 and enlarged in 1915. In 1908–10 the Commissioners carried out a special scheme of raising to £200 per annum the income from all sources of benefices which at the Census of 1901 had populations of 500 or more.

The following are the principal payments and appropriations out of the Common Fund:

Annual payments to about 8,000 benefices	£963,000
Payments to the Bishops in respect of incomes from Bishops' estates	100,000
Payments to chapters, vicars choral, etc.	151,000
Amount appropriated to the augmentation and endowment of benefices and expended for the improvement of parsonage houses, etc.	405,000
	£1,619,000

Commissioners, Earls Brownlow, Portsmouth, Beauchamp, Viscount Halifax, Lord Burghclere, Rt. Hon. C. B. Stuart-Wortley, K.C., M.P., Rt. Hon. H. Hobhouse, Sir Lewis T. Dibdin, D.C.L., and Sir C. N. Nicholson, Bt., M.P.

Secretary, S. E. Downing.
Financial Adviser and Actuary, J. A. Archer.
Assist. Secretary, C. Hogg.
Accountant, S. S. Brister.
Principal Clerks, G. H. Wheeler, H. A. Gregg.
Assist. Accountant, G. A. Andrews.
1st Class Clerks, Sen. Div. J. Kershaw, R. W. Fowell, A. E. Palmer, W. Telfer, E. J. Davies, A. N. Allan.
Head of Registry and Estab. Clerk, W. H. Webb.
1st Class Clerks, Jun. Div. S. Mills, W. H. Mouncey J. W. Lintott, E. H. B. Phillips, S. J. Gunningham, F. C. Marillier, W. Green.
Assist. to Head of Registry, etc. J. J. Dwyer.

LEGAL DEPT.

Official Solicitor, Steward of the Manors and Clerk of the Halmote Court of Durham, F. A. Manley.
Asst. Solicitors, H. De B. Porter and F. G. Turner.

EDUCATION, BOARD OF

Whitehall, S.W.

Since April 1, 1900, the central educational authority for England and Wales has been the Board of Education, established by the Board of Education Act, 1899. This Board took the place of the Education Department and of the Department of Science and Art, and is charged with the superintendence of matters relating to education in England and Wales. The Board also exercises certain educational powers formerly exercised by the Charity Commissioners. The Board consists of a President, Parliamentary Secretary, etc. The President is appointed by His Majesty, and holds office during his pleasure.

Estimates, 1916–17, £15,186,732.

*** *This list does not include those officers of the Board who have been lent to other Departments or who are on active service. Where offices are left blank, the officers filling the posts are either on active service or have been lent to another Department.*

Lecturer, B. A. Spencer, F.S.A. £200
Instructors, E. C. Alston, G. Haywood . . . £300

EXCHEQUER AND AUDIT DEPARTMENT

Victoria Embankment, E.C.

The office of Comptroller and Auditor-General was created by the Exchequer and Audit Act, 1866, taking the place of the Comptroller-General of the Exchequer. The Comptroller-General and his assistant are appointed by letters patent, and can only be dismissed by the Crown on an address from both Houses of Parliament. The Treasury obtains its money through the agency of the Comptroller-General, who, upon the Sovereign's order, countersigned by two Lords of the Treasury, gives the Lords of the Treasury a credit upon the Exchequer account at the Bank of England. The amount is then transferred by the bank to the credit of the Paymaster-General. The Comptroller-General examines and audits the accounts of the various departments, to see that the credit given to the Treasury is spent in accordance with the Parliamentary grants, his reports being presented to the House of Commons and referred to the Public Accounts Committee. Estimated expenses of the Department for 1916–17, £67,720.

Comptroller and Auditor-General, Sir H. J. Gibson, K.C.B. £2,000
Private Secretary, T. E. Jenner . . . £100
Assistant ditto J. W. Cawston, C.B. . . . £1,500

Johnson, W. Ll. Davies, J. E. Luxford, J. Bell, J. W. Bullock, W. S. Carter, J. Putnam, H. Greer, T. E. Jenner, T. Petherbridge, A. J. Evans, R. J. Redfern, W. B. Evans, L. S. Stone, J. W. A. Hayden, E. L. Curtis, J. Brand, E. G. Clayton, J. M. Davies, W. H. Andrews, H. Hesford, H. T. S. Forbes, H. W. Park, C. L. de Wolff, A. Hogan, A. W. Couzens, E. H. Weaver, E. W. A. Petts, H. J. Gage £350–500
Examiners, 157 . . . . . £100–350

THE FOREIGN OFFICE

Downing Street, S.W.

This is the department of Government which conducts official intercourse with other States. By constitutional law the authority of the Sovereign is supreme; but by constitutional custom he may only act by the advice and on the responsibility of a Minister—the Secretary of State for Foreign Affairs. Constitutional practice requires the sanction of the Sovereign to matters of foreign policy. The Foreign Secretary conducts general negotiations, prepares or supervises dispatches, and periodically gives receptions to the representatives of Foreign Powers. But questions of importance come before the Prime Minister or are discussed by the whole Cabinet under his presidency. The requisite continuity of general policy, amidst shifting political parties, is maintained by means of the Permanent Staff of the Department.

The **representatives of the Crown abroad** are members either of the Diplomatic Service or of the Consular Service, the duties of the former body being, generally speaking, political and ceremonial, of the latter, commercial and legal; though in the less important posts diplomatists undertake consular work, and occasionally consuls act in a diplomatic capacity.

The **Diplomatic Service** consists of (*a*) Ambassadors, (*b*) Ministers Plenipotentiary and Ministers Resident, (*c*) Chargés d'Affaires.

The **Ambassador**, according to historical theory, represents the person of his Sovereign, and so can claim direct access to the Sovereign to whom he is accredited. Further, he takes first rank in order of precedence.

The **Minister** is regarded as a mere agent of the Sovereign, and therefore holds an inferior position, though otherwise he has powers and duties similar to those of an Ambassador.

The **Chargé d'Affaires**, unlike the two former, is accredited not to the Sovereign, but to the Minister for Foreign Affairs of the State in which he resides. Usually he is appointed to act temporarily, in the absence of the Ambassador or Minister.

Counsellors and **Secretaries** are attached to the Embassies and Legations, and often **Military and Naval Attachés and Commercial Attachés.**

The Consular Service consists of (*a*) Consuls-General, (*b*) Consuls, (*c*) Vice-Consuls, and (*d*) Consular Agents. **A Consul,** in addition to giving general assistance to British subjects abroad, has in particular to deal with numerous matters connected with shipping; to issue periodical reports on the trade of the place where he resides; to celebrate or register marriages where one of the parties is British; to register the births of British subjects; to take oaths and declarations, and perform other notarial functions. Besides this, in countries in whichex-territorial jurisdiction is exercised, he administers justice, where a British subject is concerned, either in his own court, or in conjunction with the native tribunal.

The **salaries** are as follows: Consuls-General, £900 to £1,200; Consuls, £600 to £800; Vice-Consuls, £300, rising by £20 to £500.

The names of the British Diplomatic and chief Consular representatives abroad are given in the articles on the countries to which they are accredited, or where they are stationed.

Estimates, 1916–17, £66,271.

Principal Secretary of State for Foreign Affairs, Rt. Hon. Viscount Grey of Fallodon, K.G., P.C. £5,000
Private Sec. Hon. James Eric Drummond, C.B. £300

Oppenheimer, Denmark, Holland, Norway, and Sweden (£1,200); and Lord Herbert Hervey, Spain, Portugal, and Morocco (£900–1,000).

FRIENDLY SOCIETIES REGISTRY

Central Office, Dean Stanley Street, Westminster, S.W.

A barrister was appointed in 1829 to certify the Rules of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies, and by the Friendly Societies Act, 1875, the Central Office of the Registry of Friendly Societies was constituted. The Central Office exercises important functions under various other Acts. Estimates, 1916–17, £22,337.

Chief Registrar, G. Stuart Robertson £1,200–1,500
Assist. Registrars, T. Hall Hall, G. Dudley Barlow, John Fox . . . £600–800

GENERAL REGISTER OFFICE

Somerset House, W.C.

The registration of births and deaths is credited to Thomas Cromwell, who is said to have introduced it when Vicar-General in 1538. The laws relating to England was consolidated by an Act of 1874, and that for Ireland by an Act of 1880. In Scotland registration depends on an Act of 1854, with later amending Acts. Expenses, 1916–17, £47,715.

Registrar-General, Sir Bernard Mallet, K.C.B. £1,200
Private Sec. T. A. Saunders .

Staff Clerks, W. J. McDonnell (£350–450), C. E. Hampson, C. H. Martin, W. O. D. Jones, R. A. Moad, W. F. Cook, T. A. Saunders, D. Ll. Evans . . . £300–400

THE HOME OFFICE

Whitehall, S.W.

The Home Office is the senior of the Departments of the Principal Secretaries of State. Its functions, which formerly extended to foreign, colonial, and military affairs, are now strictly confined to the United Kingdom, and in some matters to England and Wales only. The affairs of the Isle of Man and the Channel Islands, however, still come to the Home Office.

The Home Secretary is the medium of communication between the Crown and its subjects, and receives Addresses and Petitions. He is responsible for the King's peace, attends to the general administration of criminal justice, police, and prisons, and advises the Sovereign in the exercise of the prerogative of mercy. He supervises lunatic asylums, reformatories, and industrial schools; enforces all rules and orders of a legislative character for the protection of the life and health of the community generally, more particularly the statutes passed for protecting workers in mines, quarries, factories, and workshops. Estimates, 1916–17, £266,801.

Principal Secretary of State for Home Affairs, Rt. Hon. Sir Herbert Samuel, M.P. £5,000
Private Secs. S. W. Harris, C.B.; G. G. Whiskard.

LEE CONSERVANCY BOARD

Surrey House, Victoria Embankment, W.C.

Controls the River Lee and its tributaries, and is responsible for the management of the Lee and Start Navigation. The Board consists of 15 members, of whom 14 are elected by local authorities and one by the barge-owners on the river.

Chairman, E. B. Barnard, D.L.
Clerk of the Board, S. R. Hobday.
Engineer and Manager, C. N. Tween, M.Inst.C.E.

LOCAL GOVERNMENT BOARD

Whitehall, S.W.

This department was established by the Local Government Board Act, 1871, and superseded the Poor Law Board, which had dealt only with Poor Law matters, and had existed since 1847, when it took the place of the Poor Law Commissioners. The Local Government Board became the **central department for Poor Law, Public Health, and other Local Government matters**, and many duties were transferred to it that had previously been carried out by departments of the Home Office and the Privy Council. The year after the Board was established considerable changes were made by the Public Health Act, 1872, and new duties of a very extensive character were imposed on the department.

The expenses of the Board for the year 1916–17 were estimated at £356,797.

President, Rt. Hon. Walter Long, M.P. . £5,000
Private Sec. F. L. Turner . . . £300

Medical Inspectors, S. A. Copeman, M.D., F.R.S., F.R.C.P., W. W. E. Fletcher, M.B., F. St. George Mivart, M.D., E. P. Manby, M.D., R. A. Farrar, M.D., E. J. H. Coutts, M.D., A. Eastwood, M.D., T. Carnwath, M.B., H. A. Macewen, M.B., M. J. Rees, M.D., J. R. Hutchinson, M.D., J. E. Chapman, M.R.C.S., M. B. Arnold, M.D., F. R. Seymour, M.D., J. P. Candler, M.D., A. S. MacNalty, M.D., Lt.-Col. E. Wilkinson, F.R.C.S. £500–800

Assist. Inspector (non-professional), C. J. Huddart £400–600

Assist. Medical Inspector, Miss I. D. Cameron, M.D. £350–500

Inspectors of Foods, A. W. J. MacFadden, C.B., M.B. (*Chief*), J. M. Hamill, M.D., J. S. Low, M.B., G. C. Hancock, M.R.C.S., G. W. Monier-Williams, Ph.D., F.I.C. £500–800

Assist. Inspector of Foods, A. R. Litteljohn, M.R.C.S. £420–600

Bacteriologist for Glycerinated Calf Lymph, F. R. Blaxall, M.D. . . . £500–800

Assist. Bacteriologist, H. S. Fremlin, L.C.R.P. £300–450
Chief Inspector Alkali, etc., Works, W. S. Curphey £800
Inspectors, A. C. Fryer, Ph.D., F. N. Sutton, E. M. Fletcher, T. L. Bailey, R. D. Littlefield £420–600
Resident Inspector, H. Porter . . . £500–600
Sub-Inspectors, H. J. Bailey, A. C. Carter £300–400
Comptroller of Housing and Town Planning, J. A. E. Dickinson, LL.B. . . . £850–1,000
Chief Town Planning Inspector, R. Unwin £900
Inspector, G. L. Pepler £600–800
Housing Inspectors, W. H. Collin, E. Leonard, C. T. Clifton, M.I.C.E., C. H. Eyles, H. S. Stewart, H. A. Chapman . £400–600
Geological Adviser, J. B. Hill, F.G.S. . £400–600

METROPOLIS WATER ACTS

Water Examiner, C. Perrin, M.Inst.C.E. . £850

LORD GREAT CHAMBERLAIN'S OFFICE

Royal Court, House of Lords, S.W.

(*See also* p. 142)

Lord Great Chamberlain, The Marquess of Lincolnshire, K.G.
Secretary, Capt. T. D. Butler, C.V.O. . £200
Clerk, W. B. Paley £100
Resident Supt. House of Lords, T. Whitehead £300

METEOROLOGICAL OFFICE

South Kensington, S.W.

The Meteorological Office was established in 1854, and is under the management of a Committee, appointed by the Treasury, constituted as follows:—The Director; Rear-Admiral J. F. Parry, C.B., Hydrographer of the Navy; Capt. J. M. Harvey, of the Marine Department, Board of Trade; Mr. T. H. Middleton, C.B., of the Board of Agriculture and Fisheries; Mr. G. L. Barstow, C.B., of the Treasury; Prof. A. Schuster, F.R.S., and Major H. G. Lyons, R.E., F.R.S., nominated by the Royal Society. The members of the Committee hold office for five years, and are eligible for reappointment. Except the Director, who receives £1,000 per annum, the members do not receive remuneration for their services. The office is charged with the duty of **collecting meteorological reports** by telegraph and wireless, with a view to the issue of **gale warnings and forecasts of weather**; of collecting for public use statistics about the weather from land stations in the British Isles and elsewhere, as well as from ships of the Royal Navy and the Mercantile Marine; and of promoting the practical applications of the science of meteorology by special researches. The **Branch Office at South Farnborough** (*Meteorologist in Charge*, Capt. C. J. P. Cave, R.E.), the **Kew Observatory** at Richmond (*Supt.* C. Chree, Sc.D., F.R.S.), the Observatory at **Eskdalemuir**, Dumfries (*Supt.* A. Crichton-Mitchell, D.Sc.), the Western Observatory, **Valencia**, co. Kerry (*Supt.* L. H. G. Dines, M.A., A.M.I.C.E.), the Aerological Observatory, **Benson**, near Wallingford (*Director*, W. H. Dines, F.R.S.), and the Weather Station at **Falmouth** are administered by the Meteorological Office. **Daily Weather Reports** can be had on payment of a subscription of £1 per annum, or £2 if delivered to the subscribers by hand. **Harvest Forecasts** are issued daily at 2.30 p.m. from June 1 to Sept. 30, and can be sent by telegraph on prepayment of the cost of the telegrams. There are also issued **Weekly Weather Reports,** published on Fridays, giving, for the week ended the previous Saturday, a summary of wind, temperature, rainfall, and duration of bright sunshine in the United Kingdom, for agricultural and sanitary purposes; **Monthly Weather Reports**, giving the results from about 300 stations in the British Isles, together with a rainfall map based on data from about 1,000 stations; a **Geophysical Journal**, issued monthly, giving the results of observations in Meteorology, Terrestrial Magnetism, Atmospheric Electricity, and Seismology at the Observatories and other publications.

Director and Chairman of Committee, Sir Napier Shaw, LL.D., Sc.D., F.R.S.
Secretary, R. Corless, M.A.
Chief Clerk, T. D. Bell.
Supt. Marine Division, Capt. M. W. Campbell Hepworth, C.B., R.D., R.N.R.
Supt. Forecast Division, R. G. K. Lempfert, M.A.
Supt. Statistical Division, Maj. E. Gold, R.E., D.S.O.
Supt. Instruments Division, F. J. W. Whipple, M.A.

METROPOLITAN ASYLUMS BOARD

Victoria Embankment, E.C.

This body of 73 members is charged with the control of various institutions for mental defectives, fever and small-pox hospitals, hospitals for sick children, schools and homes for certain classes of children, a training-ship for boys, the metropolitan casual wards, land and river ambulance services, also, by arrangement with the L.C.C. and the London Insurance Committee, sanatoria for consumptives (under the National Insurance Act, 1911), etc. *Office*, Victoria Embankment, E.C.

Chairman of the Board, R. Woolley Walden, J.P.
Vice-Chairman, The Very Rev. Canon Sprankling.
Clerk to the Board, Sir Duncombe Mann.
Assistant Clerks, J. Mallett, G. A. Powell.
Treasurer and Accountant, Morris Heyes, A.C.A.
Deputy Treasurer and Accountant, Ernest Walter, A.C.A.
Principal Medical Officer, H. E. Cuff, M.D., F.R.C.S.
Controller of Supplies, G. J. Cooke.
Engineer-in-Chief (*actg.*), T. Cooper, M.I.C.E., Sheffield House, Sheffield Street, W.C.

MINT, THE ROYAL

Tower Hill, E.

Reorganised in 1870, when the office of Master of the Mint was combined with that of Chancellor of the Exchequer, without salary, and the Deputy Master and Comptroller made the administrative officer. The buildings on Tower Hill date from 1810. Of the Colonial branches that at Sydney was opened in 1855, Melbourne in 1872, Perth in 1899, and Ottawa in 1908; up to 1909 the Australian mints coined only sovereigns and half-sovereigns, but in 1910 arrangements were made for Commonwealth silver and bronze coinage.*

Administrative expenses, 1916–17, £171,161.

Master and Worker, The Chancellor of the Exchequer.
Deputy Master and Comptroller, Sir Thomas Henry Elliott, K.C.B. £1,750
Chief Clerk, F. L. D. Matthews . . £500–700
Sen. Clerk and Reg. D. J. Scourfield . £300–400
Staff Clerk, S. A. Cole £300–400

* Prior to 1915 all the Commonwealth silver and bronze coins were struck in England, but in that year the Melbourne Mint commenced the coinage of Commonwealth silver coin.

Superintendent Operative Depart. Sir Edward Rigg, C.B., I.S.O., M.A. . £700–900
Assist. ditto, T. R. Sacheverell, W. J. Hocking (£360–500); H. W. L. Evans £350–450
Chemist and Assayer, Sir T. K. Rose, D.Sc. . £700–900
Assist. Assayers, S. W. Smith, B.Sc. (£350–600); J. Phelps, M.A. (£350–550); W. A. C. Newman, B.Sc. . £300–550

BRANCHES OF THE ROYAL MINT

Sydney Mint, New South Wales

Deputy Master, E. H. S. von Arnheim, I.S.O. . £1,100
Superintendent, D. J. K. Colley . £550–750

Melbourne Mint, Victoria

Deputy Master, M. L. Bagge . £1,100
Superintendent, A. M. Le Souëf . £800–900

Perth Mint, Western Australia

Deputy Master, J. F. Campbell . £1,100
Superintendent, A. Ventris . £700–800

Ottawa Mint, Canada

Deputy Master, J. Bonar, LL.D. . £900–1,100
Superintendent, A. H. W. Cleave . £650–900

MINISTRY OF MUNITIONS

Whitehall Place, S.W.

Minister, Right Hon. Edwin S. Montagu, M.P.
Private Secretaries, J. A. Barlow, M. Heseltine, Capt. L. L. Cohen.
Parliamentary Secretaries, Right Hon. C. Addison, M.D., M.P., and the Hon. Neil Primrose, M.P.
Private Secretaries to Dr. Addison, H. H. Piggott and F. G. Kellaway, M.P. (Parliamentary).
Private Secretary to Mr. Primrose, F. L. Jeffcoate.
General Secretary (Advisory), Sir H. Llewellyn Smith, K.C.B.
Private Secretaries, S. W. Clark and W. Carter.
General Secretary (Executive), E. B. Phipps, C.B.
Private Secretary, W. H. Webbe.
Assistant Financial Secretary, S. H. Lever.
Private Secretary, Arthur Collins.
Assistant General Secretaries (Advisory), W. H. Beveridge, C.B., and C. F. Rey.
Assistant General Secretaries (Executive), R. V. Vernon, R. H. Carr, and Owen H. Smith.
Deputy Assistant General Secretary, U. Wolff.
Representative in the House of Lords, Lord Elphinstone.
Legal Adviser, The Treasury Solicitor.
Technical Adviser, Col. Sir Hilaro Barlow, Bart., C.B.
Adviser on Physical Subjects, Dr. R. T. Glazebrook, C.B., F.R.S.
Adviser on Land Valuation—Sir Howard Frank.
Representative of Imperial Munitions Board, Canada, The Hon. R. H. Brand, C.M.G.
Representatives on Inter-Allied Munitions Bureau—M. S. Amos and A. Wigglesworth.
Liaison Officer with General Headquarters, France, Major-General J. E. W. Headlam, C.B., D.S.O.

Secretariat

Whitehall Place, S.W.

PARLIAMENTARY AND GENERAL BRANCH

Assistant General Secretary, R. V. Vernon.
Legal Assistant, E. Chetham Strode.
E. V. Bacon, Sir R. W. Carlyle, K.C.I.E., C.I.E., Sir A. Diack, K.C.I.E., C.V.O., M. Leigh, A. Lucas, F. Newbery, W. E. Philip, L. P. Sidney, M. F. Wells.

REQUIREMENTS AND STATISTICS BRANCH

Director, W. T. Layton.
M. S. Birkett, E. F. Carritt, C. W. Guillebaud, S. H. Leake, G. I. H. Lloyd, W. M. Page.

ESTABLISHMENT BRANCH

Assistant General Secretary—R. H. Carr.
Administrative Officers, W. C. Barber, H. Bellman, Major-Gen. Sir H. N. Bunbury, K.C.B., G. A. Burling, Major-Gen. F. Lorn Campbell, Mrs. W. L. Courtney, J. A. Cutforth, Miss Davey, Gerald Duckworth, J. W. Dulanty (*Establishment Officer, Whitehall Place*), E. G. Fabb, Mrs. Gillmore, A. J. Hill, A. S. Hines, Lieut. H. S. Horne, Major W. R. Larkin, F. C. Linfield, G. F. Marshall, F. A. Merrington, Capt. A. E. Moore (*Establishment Officer, Munitions Inventions*), F. Morley-Mower, Mrs. Moreland, L. Notley, H. P. Phoenix, A. E. Rider, Miss K. Robinson, C. Sainsbury, E. J. Schollar, H. Simmonds (*Establishment Officer, Trench Warfare*), H. E. Spry, I.C.S. (*Establishment Officer, Explosives Supply*), A. E. Taylor, Mrs. C. B. L. Tennyson, C. D. Warren, A. W. Watson, I.C.S. (*Establishment Officer, Whitehall Gardens*), Mrs. Wells, E. G. Westell.

SPECIAL INTELLIGENCE BRANCH

Director, Sir Hedley le Bas.
Assistant Director—D. Caird.

Department of Munitions Finance

Whitehall Place, S.W.

Assistant Financial Secretary, S. H. Lever.
Private Secretary, Arthur Collins.
Advisers—M. M. Beeton, J. Mann, F. Palmer, R. C. Rann.
Director of Munitions Finance, S. Dannreuther.
Director of Munitions Accounts, O. T. Barrow, C.S.I.
Deputy Directors, G. H. Duckworth, P. G. Henriques, H. G. Judd.
Assistant Directors—W. Acason, F. G. Bowers, A. E. Ford, F. J. Howard, W. W. Jenkinson, L. Middleton, H. Porter, S. E. Smith, A. E. Watson, H. Wingfield, H. T. Witt, W. Hayden (Deputy), R. C. Smallwood (Deputy).
Technical and Administrative Officers, W. L. Addyman, G. J. Allen, C. J. Anderson, P. F. Atkin, S. S. Ayles, S. H. Bersey, J. W. Bloe, F. H. Blore, Mrs. L. M. Bouchier, H. C. O'Brien, A. W. Brodie, A. Cathles, G. E. Chambers, L. E. Chapman, E. W. R. Cheetham, H. E. Chiosso, H. A. Dent, G. T. Devonshire, H. Eccott, E. T. Fowell, T. H. Fraser, Miss M. Glinnie, G. A. Goodricke, B. M. Graham, L. H. Greening, W. Grimshaw, S. R. Hargraves, W. H. Head, J. Hill, H. Holl, J. Horne, C. M. Houston, C. H. Howard, W. A. Hunt, C. J. Jenkins, E. J. Jones, R. A. Kines, Lieut. A. Lewis, C. H. McLintock, E. G. Marlow, P. J. Mavrogordate, C. G. Melrose, J. Milne-Atkinson, R. G. Miller, W. H. Nash, H. W. Nalsh, Lt. P. E. Noble, W. C. Osmond, F. L. Petre, J. E. Pitcher, C. E. Platt, T. R. Reynolds, V. Ribton-Turner, J. A. Robertson, R. W. Seward, H. H. Sherwood, C. H. Sims, C. Sinclair, G. R. Smyth, W. C. Stewart, J. Taylor, G. J. Weir, T. Whitaker, A. D. Wykes, J. R. Young.

Controlled Establishments Division

28 Northumberland Avenue, W.C.

Assistant General Secretary, Owen H. Smith.
Advisers, W. B. Clode, K.C., G. Collis, C. R. J. Coutts, Sir Campbell Finlay, F. N. Keen, The Hon. Trevor Lewis, R. H. Macaulay, N. Merz, R. Miller, J. W. B. Pease, W. Russell, E. A. Uthwatt, A. Wallace.
Technical and Administrative Officers, S. C. Agnew, Seager Berry, R. P. Barrow, C. E. C. Browne, Capt. H. C. Bullen, H. C. Clarke, A. G. Cross, F. T. Cooksey, A. L. Dickinson, Lt.-Col. P. W. d'Alton, E. Dobell, F. L. Fisher, G. R. Freeman, A. V. Frere, G. F. Garnsey, H. M. Jones, W. B. Keen, L. Maltby, W. McIver, B. Mott, C. L. Morgan, J. W. McLeod, P. Nichols, W. Piercy, H. C. Powel, W. G. Rayner, Capt. H. R. Sankey, Capt. H. R. Stainforth, L. Vigers, C. S. Weir, L. P. Williams, A. W. Wyon.

Department of Munitions Design

Whitehall Place, S.W.

Director-General, Major-General The Hon. F. R. Bingham C.B. (*Military Adviser*).
Deputy Director-General, Lieut.-Col. F. J. Byrne and Lieut.-Col. H. de B. Miller, D.S.O.

The New HAZELL, 1917

MUSEUM, THE BRITISH

Bloomsbury, W.C.

Founded in the year 1753, when the collection of Sir Hans Sloane and the Harleian collection of manuscripts were acquired, and an Act of Parliament was passed "for providing one general repository for the better reception and more convenient use of the said collections, and of the Cottonian Library, and of the additions thereto." The famous collection of MSS. made by Sir Robert Cotton, which was presented to the nation by Sir John Cotton, his descendant, in 1700, was virtually, however, the beginning of the Museum. The above collections were in 1753 designated "The British Museum," deposited in Montagu House, Bloomsbury, in 1754, and opened Jan. 15, 1759. The Museum galleries are closed till further notice. Admission to the **reading-room** is by ticket. A **reader's ticket** is granted to persons over twenty-one years of age on a written application, stating fully object of researches, etc., and accompanied by a recommendation from a householder, who must be a person of recognised position, and who must certify from personal knowledge that the applicant will make proper use of the reading-room. The authorities will not accept the recommendations of hotel and lodging-house keepers in favour of their lodgers. The total number of **visitors to the Museum** in 1915 was 733,091. The **visitors to the reading-room** numbered 178,410, a daily average of 588. Administrative expenses, 1916–17, £93,263.

Director and Principal Librarian, Sir F. G. Kenyon, K.C.B., F.B.A., Litt.D. . . £1,700
Assist. Sec. A. R. Dryhurst . . £600–700

MUSEUM, THE NATURAL HISTORY

Cromwell Road, S.W.

The Natural History Collections were removed from the British Museum at Bloomsbury to South Kensington in 1880, the new Museum in Cromwell Road being opened in 1881. The departments are five in number—Zoology, Entomology, Geology, Minerals, and Botany. The Exhibition Galleries are open free daily except on Good Friday and Christmas Day. The total number of visitors to the Natural History Museum in 1915 was 433,581. The number of visitors on Sundays in 1915 was 48,409. The number of students in the five Departments in 1915 was as follows: Zoology, 8,020; Entomology, 3,354; Geology, 2,531; Minerals, 510; and Botany, 3,226, making a general total of 17,641. Administrative expenses, 1916–17, £43,631.

Director, Sir L. Fletcher, LL.D., F.R.S. . £1,200
Assist. Secretary, C. E. Fagan, I.S.O. . £700
Assist. 1st Class, B. H. Soulsby, M.A. . £500
Clerks, W. H. R. Holl, W. J. Anderson £250–350
Assist. 1st Class (Library), B. B. Woodward £500
Keeper of Zoology, Dr. S. F. Harmer, M.A., F.R.S. £800
Assist. do. W. R. Ogilvie-Grant . £520–650
Assists. 1st Class, G. A. Boulenger, LL.D., F.R.S., O. Thomas, F.R.S., F. J. Bell, M.A., R. Kirkpatrick, Dr. W. T. Calman, C. T. Regan, M.A., W. P. Pycraft . £300–500
Assists. 2nd Class, A. S. Hirst, J. G. Dollman, B.A., G. C. Robson, B.A., C. C. Treatt, H. A. Baylis, B.A., A. K. Totton £150–300
Keeper of Entomology, Dr. C. J. Gahan, M.A. £700–800

Assists. 1st Class, Sir G. F. Hampson, Bt., E. E. Austen, J. H. Durrant, G. J. Arrow £300–500
Assists. 2nd Class, F. W. Edwards, B.A., K. G. Blair, B.Sc., N. D. Riley, B. F. Cummings, F. Laing, M.A., B.Sc. £150–300
Keeper of Geology, Dr. A. S. Woodward, F.R.S. £800
Assist. do. Dr. F. A. Bather, F.R.S. . . £650
Assists. 1st Class, R. B. Newton, Dr. C. W. Andrews, F.R.S., G. C. Crick, W. D. Lang, M.A. £300–500
Assist. 2nd Class, W. N. Edwards, B.A. £150–300
Keeper of Mineralogy, Dr. G. T. Prior, M.A., F.R.S. £800
Assists. 1st Class, L. J. Spencer, M.A., Dr. G. F. H. Smith, M.A. £300–500
Assist. 2nd Class, W. Campbell Smith, M.A. £150–300
Keeper of Botany, Dr. A. B. Rendle, F.R.S. £800
Assists. 1st Class, A. Gepp, M.A., E. G. Baker £300–500
Assists. 2nd Class, H. F. Wernham, D.Sc., J. Ramsbottom, B.A., A. J. Wilmott, B.A. £150–300

[Since the outbreak of war, 58 members of the staff have joined the Naval or Military Forces of the Crown.]

Wigglesworth £350–500
Female, J. J. Brown, M. M. Dalglish, E. M. Gardner, E. A. McCleverty, M. B. Murby, A. E. Otter, E. E. Page, E. G. Roe, H. Todd, E. G. Woodgate . . £300–400

WELSH COMMISSION

City Hall, Cardiff

Estimates, 1916–17, £314,923, of which salaries, wages, and allowances are £34,873.

Chairman, Thomas J. Hughes . . . £1,500
Private Sec. T. Ll. Roberts.
Deputy Chairman, H. Meredith Richards, M.D. £1,200
Commissioners, J. Rowland, M.V.O.; Hon. Violet Douglas-Pennant (£1,000); the Chief Registrar of Friendly Societies.
Secretary, Thomas Jones, M.A. . £850–1,000
Assist. ditto, A. M. Leveaux, P. E. Watkins £550–700
Accountant, J. C. Morgan . . £550–700
Assist. ditto, F. J. Alban . . £350–500
Legal Adviser, A. M. Bulloch . . £500–700
Medical Officer, D. Ll. Williams . £500–800
1st Class Clerks, H. E. James, J. H. Jones, J. T. Davies, J. J. Scott, T. E. Metcalfe, D. E. Jones, W. G. Hayward . £350–500

Outdoor Staff

Chief Inspector, J. Evans . . £550–700
Inspectors, J. O. Evans, R. T. Williams £350–500

NATIONAL PHYSICAL LABORATORY

Teddington, Middlesex

Opened in 1902. Under the ultimate control of the Royal Society, the Laboratory is managed by an Executive Committee and a General Board. The Government provides £7,000 a year towards the working expenses, and an additional sum of about £1,500 a year is received in subscriptions from various institutions and individuals. The Laboratory also derives an income of about £30,000 from standardising and other fees. In addition a Government grant is received to cover the expenses of the Aeronautics work. The Laboratory is now organised under four Departments, and in each the work consists of research into matters of scientific and commercial importance, maintenance of standards, and the testing of instruments and materials. The results of research work are published in the "Collected Researches of the National Physical Laboratory." A large number of instruments of all kinds are tested at fixed charges, particulars of which can be obtained from the Director. (1) The **Physics Department** comprises Divisions for Thermometry and Heat, General Electrical Measurements, Maintenance of Electrical Standards, Electrotechnics and Photometry, Optics, Measurements of Length and Standardisation of Glass Vessels and Weights (Metrology), and for Radium and X-ray work. Tide predictions are also undertaken. (2) The **Engineering Department** is fully equipped for the investigation of the behaviour of materials under repeated and alternating stresses, repeated impact, etc., as well as for general engineering and mechanical tests. An aeronautics section is included in the department where researches are carried out for the Government Advisory Committee for Aeronautics. Tests on road materials are carried out for the Road Board. (3) The **Metallurgy Department** carries out researches as to the constitution of metals and alloys, as well as investigations, in conjunction with the Engineering Department, into the causes of failures occurring in engineering practice. New buildings, for which the funds were provided by the generosity of Sir Julius Wernher, were erected in 1910 for the accommodation of the work of this department. (4) The **William Froude National Tank**, for experiments on models of ships. This tank was constructed through the generosity of Sir A. F. Yarrow.

Chairman, The President of the Royal Society.
Ditto of Executive Committee, Lord Rayleigh, O.M.
Director, R. T. Glazebrook, C.B., D.Sc., M.A., F.R.S.
Supt. Engineering Dept. T. E. Stanton, D.Sc., F.R.S., M.Inst.C.E.
Supt. Metallurgical Dept. W. Rosenhain, D.Sc., F.R.S.
Senior Assist. Physics Dept. J. A. Harker, D.Sc., F.R.S.
Supt. William Froude National Tank, G. S. Baker, M.Inst.N.A.

H.M. NAUTICAL ALMANACK OFFICE

3 Verulam Buildings, Gray's Inn, W.C.

First published in 1767 by the Admiralty.

Superintendent, P. H. Cowell, D.Sc., F.R.S. £650
Chief Assistant, B. F. Bawtree . £400–500
Assistants, J. A. Sprigge, W. F. Doak, M.A., T. C. Hudson, B.A. £300–400

PAYMASTER-GENERAL, DEPARTMENT OF

Whitehall, S.W.

The office of Paymaster-General was, by statutes passed in 1835 and 1848, consolidated with various other offices. The Paymaster-General is appointed by sign-manual warrant. His duties are to make all payments required by the various departments out of moneys placed to his account by the Lords of the Treasury.

Paymaster-General, Rt. Hon. Arthur Henderson, M.P. £2,000
Assistant ditto, C. L. Davies . . £1,100
Principal Clerks, C. Smith and F. W. Bartlett £600–800
Senior Examiners, W. M. P. Smith, C. E. Doubleday, W. J. Phillips, F. W. Luck, E. E. U. Davies, A. Carwithen, and E. H. Eagar £400–550

THE PORT OF LONDON AUTHORITY

Head Offices, 109 Leadenhall Street, London, E.C.

Under the provisions of the Port of London Act, 1908, the Port of London Authority was constituted by the Board of Trade, and came into being on March 31, 1909. The Authority consists of a chairman, a vice-chairman, 10 members, and 18 members elected by persons and bodies representative of the trading interests of the port. The first election took place in March 1913, the "elected" members having at the formation of the Authority been nominated by the Board of Trade. The election, however, did not result in any change in membership. The election due to be held in March 1916 was postponed under the provisions of the Elections and Registration Act, 1915. It is provided that one of the two members appointed by the Board of Trade and one of the members appointed by the London County Council shall be appointed after consultation with organisations representative of the labour interests of the Port.

The Authority took over the London and India, Surrey Commercial, and Millwall docks, the net available income of which was estimated at £809,000 a year, as well as the rights, powers, and duties of the Conservators of the River Thames below the landward limit of the port, and certain powers and duties of the Watermen's Company. The purchase money was provided by the issue of Port of London A and B stocks, bearing interest at the rate of 3% and 4% respectively, to the total value of £22,363,000.

The Authority is self-supporting, its funds being provided by the tonnage dues on shipping and by port rates on goods.

The work of the Authority is divided among seven committees, as follows: General Purposes Committee, Dock and Warehouse Committee, River Committee, Finance Committee, Staff Committee, Stores Committee, and Law and Parliamentary Committee.

In the following table is shown the value of the total imports and exports (excluding coastwise goods) of the United Kingdom and the six leading ports:

	1914	1915
United Kingdom	£1,222,830,636	£1,335,823,979
London . .	396,190,333	496,833,942
Liverpool . .	338,232,100	393,169,056
Hull . .	67,839,670	73,123,662
Manchester . .	52,883,507	56,673,867
Southampton .	38,182,775	17,717,274
Glasgow . .	48,720,403	56,909,724

The Port of London Authority handled 2,819,332 tons of import goods on its dock premises during the 12 months ended March 31, 1916, an increase of 431,304 tons, or 18% over the previous 12 months. These figures do not include a considerable tonnage of goods warehoused in premises leased to merchants or goods temporarily landed in transit by shipowners.

The export traffic handled by the Authority in the same period was 872,289 tons.

The total amount of **Port stock** authorised to be issued at March 31, 1916, under the Port of London (Amendment) Act, 1914, is £32,647,156, of which there has been issued £27,090,459. The **expenditure and revenue** for the year ending March 31, 1916, were £4,342,625 and £4,574,683.

Chairman, The Rt. Hon. Lord Devonport.
Vice-Chairman, The Rt. Hon. Lord Ritchie of Dundee.
Appointed Members, Adm. Sir A. M. Field, K.C.B. (*Admiralty*); J. G. Broodbank, H. Gosling (*Board of Trade*); J. W. Domoney, Lord Ritchie of Dundee (*Corporation of London*); (vacancy), J. D. Gilbert, M.P., W. Devenay, A. F. Buxton, (*L.C.C.*); Capt. A. W. Clarke (*Trinity House*).
Elected Members, F. C. Allen, I. H. Benn, M.P., C. E. Brightman, Sir E. Cornwall, M.P., G. T. Crosfield, C. S. S. Guthrie, Sir John Humphery, C. F. Leach, L. A. Martin, H. T. Moore, Sir Owen Philipps, K.C.M.G., M.P., Sir Geo. Saltmarsh, C. F. Torrey, Sir M. C. Turner, F. S. Watts, W. Weddel, R. White, W. Varco Williams.
Chief Engineer, C. R. S. Kirkpatrick, M.I.C.E.
Secretary, F. Ayliffe.
Dock and Warehouse Manager, H. Norris.
Chief Police Officer, E. C. S. Baker.

POST OFFICE

Chief Office, St. Martin's-le-Grand, E.C.

The Penny Post was inaugurated in 1840. The Money Order branch dates from 1792 (see 42*nd Report of Postmaster-General*, 1896). Postcards were first issued in 1870, Postal Orders in 1881; the Parcel Post dates from 1883. Imperial Penny Post dates from Christmas 1898. The Post Office Savings Bank was brought into operation in 1861, and in 1870 the Post Office assumed control of telegraphic communication in the U.K. The Telephone Service dates from 1892. The Post Office also undertakes the collection of duties and taxes for the Inland Revenue Department, the issue of licences for the Customs and Excise Department and the County Councils. It also receives a large amount of money on behalf of the National Health Insurance Commissioners. It pays Old Age Pensions.

The administrative expenses of the Post Office were estimated at £26,537,145 in 1916–17.

Postmaster-General, The Rt. Hon. Joseph A. Pease, M.P. £2,500
Assist. Postmaster-General, Herbert Pike Pease, M.P. £1,200
Private Sec. to Postmr.-Gen. and Asst.-Postmr.-Gen., L. W. A. Atkin-Berry . £200
Secretary to the Post Office, G. E. P. Murray, C.B. £1,750–2,000
Private Sec. T. R. Gardiner . . . £150
Joint Second Secs. H. S. Carey, C.B., and A. M. J. Ogilvie, C.B. . . £1,250–1,400
Assist. Secs. E. W. Farnall, C.B.; W. G. Gates; A. B. Walkley; L. T. Horne; A. G. Ferard; E. Raven . . £1,000–1,200

H. G. Dainton, W. R. Storr, E. T. Crutchley, L. Hide, R. T. Whitaker, C. J. G. Dugdale, S. E. Sifton, V. R. Kenny, T. B. Braund, H. F. Weiss, J. C. Johnston, A. S. Langlands, A. W. Bain, J. G. Henderson, F. N. Gossling, R. H. A. Newsome, T. Kearney, S. H. Hunt, C. J. Miles, W. Smith, T. H. Boyd, R. H. James, A. B. Bond, G. Muir, A. J. McCarraher, W. R. Roberts, W. Ferguson, H. Townshend, L. E. J. Maude, E. B. Davies, D. Spottiswoode, P. W. McIntyre, G. P. Hall, and A. E. Stocker . . . £150–450

PRIVY COUNCIL OFFICE

Whitehall, S.W.

The Privy Council is a body of persons who are nominated by the Sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born or naturalised British subject. It is customary to include in the body the royal princes and the archbishops ; several of the principal officers of State and of the Household become privy councillors by virtue of their office ; the principal Secretaries of State are of course sworn of the Council before they can take part in the deliberations of the select number who are known as the Cabinet Council ; and the rank is bestowed upon Ambassadors and the principal Colonial Governors and statesmen, and frequently upon politicians who have never been in office, as an honorary distinction. All Privy Councillors should be addressed as "Right Honourable."

The **Lord President of the Council** is appointed by letters patent under the great seal ; his duty is to manage the debates in council, to propose matters from the Sovereign at the council table, and to report to His Majesty the resolutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of the Privy Council to meet and proclaim the new Sovereign. For the ordinary business of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the granting of **charters of incorporation** to public and private bodies, and the bringing into operation by means of **orders in council** of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times as it may deem necessary and desirable. **Royal proclamations,** summoning or proroguing or dissolving Parliament, and for many other purposes, are made by and with the advice of the Privy Council before being issued.

Several public departments have grown out of or are even now committees of the Council. The **Board of Trade,** although it is now an entirely separate department, is still officially entitled the Committee of Council for Trade. The **Board of Education** was a Committee of the Privy Council ; and there are still a **Universities Committee,** which reviews the statues made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a **Judicial Committee** for appellate business.

The **Privy Council in Ireland,** a smaller body than that in England, advises the Lord-Lieutenant, and exercises some of the powers possessed by the Council in Great Britain, but in relation to Irish affairs only.

Lord President of the Council, Most Hon. Marquess of Crewe, K.G. £2.000

Private Sec. G. Cunningham, C.B. . . £300

Clerk of the Council, Sir Almeric FitzRoy, K.C.B., K.C.V.O. . . . . .

Deputy ditto and Chief Clerk, J. C. Ledlie . £900

Senior Clerk, C. J. Dalrymple Hay . . £800

Staff Clerk, A. W. Whittaker, . . £300–400

Secretary, G. A. Calder £1,500

Assistant Sec. and Chief Clerk, H. G. H. Barnes £600–800

Solicitor, C. L. Nicholson . . £1,200–1,500

Chief Clerk to ditto, D. F. Buckley . £400–700

QUEEN ANNE'S BOUNTY

3 Dean's Yard, Westminster, S.W.

Queen Anne's Bounty was established in 1704, to augment poor livings in the Church of England. It also assists the clergy, by loans on security of the revenues of benefices, to build, etc., residences and farmhouses, etc. The fund is managed by governors appointed by Royal Charter. Applications for grants can be made at any time, but no applications received after Feb. 1 can be considered during the current year. In 1915 the grants amounted to £18,101, and the benefactions received to £16,746. The amount available for distribution in 1916 was £24,941. The capital fund, held by the Governors in money and stock for various benefices, amounted to upwards of £7,300,000.

Secretary and Treasurer, W. R. Le Fanu.

Chief Clerk, Wm. Lipscomb.

1st Class Clerks (*Senior Division*), G. Simpson, J. F. Sapsford, V. G. Bromhead, R. G. Rowland, E. Jump.

Ditto (*Junior Division*), M. Rogers, W. Russell, D. Smeaton, W. Holford, W. J. P. Smith.

Junior Clerks (*Upper Division*), A. G. Spencer S. D. Knight.

Solicitor, F. G. Hughes.

* Allowances of £100.

Assist. ditto, W. G. Hannah.
Architect, W. A. Hughes.
Assist. ditto, M. Skinner.

RECORD OFFICE, THE PUBLIC

Chancery Lane, W.C.

For the safe custody of the Public Records. Present building completed in 1900. Estimates, 1916–17, £22,995.

Keeper of the Records, The Master of the Rolls.
Deputy, Sir H. C. Maxwell-Lyte, K.C.B. . £1,400
Assist. Keeper and Sec. H. Rodney . . £800
Assist. Keepers, E. Salisbury, R. H. Brodie, H. Hall, E. G. Atkinson, J. G. Black, C. G. Crump £520–700
Clerks, A. St.-J. Story-Maskelyne, R. C. Fowler, J. V. Lyle, M. S. Giuseppi, C. Johnson, A. E. Stamp, H. E. Headlam, J. B. W. Chapman, C. J. Flower, S. C. Ratcliff, M. C. B. Dawes, C. H. Jenkinson, J. J. O'Reilly, O. C. Chapman, J. G. Phillimore, W. R. Cunningham, R. L. Atkinson £150–500

The Search Rooms are usually open daily, with certain exceptions, from 10 to 4.30; Saturdays 10 to 2. The Museum is closed for the duration of the war. [The number of registered applications for the production of Records, State Papers, etc., in 1914 was: In the Legal Search Room, 49,861; in the Literary Search Room, 64,005: total, 113,866.]

THE ROAD BOARD

Queen Anne's Chambers, Broadway, Westminster, S.W.

Under the provisions of the Development and Road Improvement Funds Act, 1909, the Treasury appoints five persons to constitute a **Road Board** "for the purposes of improving the facilities for road traffic in the United Kingdom, and of the administration of the road improvement grant." The grant consists of the proceeds, less cost of collection, of the motor spirit duties, and the excess or balance of the net proceeds, less cost of collection, of all excise duties payable in respect of carriage licences after payment to local authorities through the Local Taxation Accounts of sums specified in Part V of the Revenue Act, 1911.

Since August 1915 the proceeds of these duties have been retained in the Exchequer under the provisions of the Finance Act, 1915.

In their sixth report [114, 6d.] the Board state that their **income** during the year 1915–16 was: from motor-spirit duties £461,356, from carriage-licence duties £233,039, and from interest from investments £114,008. These amounts, added to previous income, brought up the total receipts of the Board from the date of constitution to £7,240,195.

Up to March 21, 1916, the Board had made or indicated grants and loans amounting in the aggregate to £5,929,177, £4,770,530 by way of grant and £1,158,647 by way of loan.

The grants made to March 31, 1916, were apportioned to the following objects:

Improvement of road crusts . .	£3,253,444
Road widenings and improvement of curves and corners	293,744
Road diversions	69,895
Reconstruction and improvements of bridges	86,525
New roads and bridges	538,849
Total . . .	£4,242,457

The balance available for grants on March 31, 1916, was £2,507,665.

In addition, the Board had advanced £674,864 by way of loan. As a result of the war, the Board's advances will be greatly reduced during 1916–17 (it is estimated to about £200,000), and will be confined to important roads the improvement of which cannot properly be postponed. The Board have undertaken at the request of the Army Council (1) to supervise and arrange for the construction and maintenance at the cost of the Army Council of new roads and the improvement of private roads required for military purposes; (2) to arrange with highway authorities for the improvement of public roads required for military purposes; (3) to settle by negotiation with highway authorities the amounts payable by the Army Council in respect of damage caused by extraordinary traffic in connection with military movements. Similar work has been undertaken for the Ministry of Munitions and the Admiralty. The following statement shows the total estimated expenditure on works sanctioned by the various departments up to June 30, 1916 which have been or are being carried out by or under the supervision of the Board.

Dept.	Estimated cost of work sanctioned
War Office. . .	£1,689,498
Admiralty . .	60,404
Ministry of Munitions .	59,719
Total .	1,809,621

THE BOARD

Sir George S. Gibb (*Chairman*) . .	£3,000
Right Hon. Lord Pirrie, K.P., Right Hon. Lord Kingsburgh (Sir John Hay Macdonald), Lord St. Davids, Lord Montagu of Beaulieu (*unpaid*)	
Secretary, W. Rees Jeffreys . . .	£1,000
Assist. ditto, H. R. Watling . . .	£575
Manager and Engineer, H. P. Maybury .	£1,500

E. W. E. Liddington, G. McIsaac, C. H. Stranger (Edinburgh), H. A. White £300–400
Minor Staff Officers, R. J. Palmer, *J. P. Stevenson, E. C. Briggs (£200–300), J. Boyd, P. Brownlow, S. E. Lovatt, J. M. Newnham £200–250
Examiners of Printers' Accounts, A. J. Biggs (£300–450), G. W. Riley . £275–375
Technical Assists. (Paper), H. A. Bromley, A. E. Dawe, E. A. Dawe, E. J. H. Stallybrass £200–350
Technical Assists. (Printing), J. E. H. Wilson (Dublin) (£250–350), J. Paterson, J. C. Rowden, J. Stone (Edinburgh), J. H. Whitehead £200–300
Receiver of Printing, D. S. Todd . £200–300
Examiner of Binders' Accounts, J. E. Penn £200–£300

THAMES CONSERVANCY

2 and 3 Norfolk Street, Strand, W.C.

The Conservators of the River Thames were constituted a body corporate by Act of Parliament in 1857, and their powers altered by various Acts from time to time. Under the Port of London Act, 1908 (see above), the number of Conservators was reduced from 38 to 28, and their responsibilities were confined to the non-tidal reaches of the river between Cricklade and Teddington. The Conservators are appointed by the Corporation of London, the London County Council, the Metropolitan Water Board, the Board of Trade, the Port Authority, and the Councils of the riverside counties, boroughs, and urban districts. The whole of the works on the upper river, the control of the navigation, the registration of vessels, the prevention of pollution of the whole of the Thames watershed, and the protection of the fisheries are entrusted to the Conservators.

Chairman, Rt. Hon. Lord Desborough, K.C.V.O.
Vice-Chairman, Sir Robert Buckell.
Secretary of the Conservancy, F. W. Geary.

TRADE, THE BOARD OF

Whitehall Gardens, S.W.

The first Committee for Trade appears to have been appointed in the year 1622, during the reign of James I. It was reconstituted by Charles I. Charles II instituted a Council for Trade and another Council of Foreign Plantations. These were amalgamated in 1672, but in 1675 their duties were transferred to the Privy Council. In 1695, under William III, and from time to time afterwards, the Council was revived; but on the motion of Burke it was abolished in 1782. In 1786 a permanent Committee was formed under an Order in Council, which still regulates the legal constitution of the Board. The working of the Department, whose chief offices are at Whitehall Gardens, is now assimilated to that of the other great offices of State, its work being done by the President aided by a permanent staff. Estimates, 1916–17, £360,011.

President, Rt. Hon. Walter Runciman, M.P. £5,000
Permanent Sec. Sir Hubert Llewellyn Smith, K.C.B. £2,000

Secretary, G. T. Reid . . . £500–600
First-Class Investigating Officers, J. P. Street and F. Popplewell . . £300–400

THE TREASURY

Whitehall, S.W.

The Lord High Treasurer, once the third great officer of State, had of old the appointment of all officers employed in collecting the revenues of the Crown, and the disposal of all plans and ways relating to the revenue.

Since the days of George I the powers and duties of the office of the Lord High Treasurer have been invariably executed by Commissioners, consisting of the First Lord of the Treasury, the Chancellor of the Exchequer, and from two to five other Commissioners, who are usually designated Junior Lords. The First Lord, if he fill that office only, takes little share in the management of the department; but some special duties, such as recommending for Civil List Pensions, appertain to his position. A number of appointments are in his gift, and he is an *ex-officio* trustee of the National Gallery and British Museum. For nearly eighty years prior to 1885 the office of First Lord was invariably held by the Prime Minister of the day. The departmental duties of the junior lords are almost nominal. The Parliamentary Secretary to the Treasury is principal Government Whip. The Commissioners forming the Treasury Board seldom meet; and in fact the real work of the department is performed by the Chancellor of the Exchequer, who is its effective head, aided by the Financial Secretary and the permanent staff.

The Chancellor of the Exchequer sees that the estimates sent in by the spending departments are framed with due regard to economy, is made acquainted with the views of the revenue departments regarding probable receipts, and then prepares and introduces his Budget. Like the First Lord of the Treasury, he is provided with an official residence in Downing Street.

Estimates, 1916–17, £121,457.

First Lord of the Treasury, Rt. Hon. Herbert Henry Asquith, K.C., M.P. (*Prime Minister*) £5,000

Private Secs. (total allowance, £1,500), M. Bonham Carter, E. H. Marsh, C.M.G., D. Davies; Hon. C. H. Lyell, M.P. (*unp.*)

2nd Division Clerks, B. I. Mare, R. W. Peek £70–300
Assistant Clerk, J. F. Martin . £45–150

TRINITY HOUSE

Tower Hill, London, E.C.

Trinity House was incorporated in the year 1514, by King Henry VIII. In the present day the Trinity House exists in several capacities: (1) **As the General Lighthouse Authority** for England and Wales, the Channel Islands, and Gibraltar, it deals with the Lighthouses, Light-vessels, Buoys, Beacons, Fog-signals, and removal of dangerous Wrecks on our shores, exercising control over the Local Light Authorities within their own area, as well as over the other General Lighthouse Authorities of the United Kingdom. There are **District Stations** at Blackwall, Sunderland, Yarmouth, Harwich, Cowes, Penzance, Milford Haven, Cardiff, and Holyhead. (2) **As the Chief Pilotage Authority** of the Kingdom it has the management of all matters relating to Pilots and Pilotage in the London, English Channel, and certain other Districts on our coasts. (3) **As an Ancient Corporation** it possesses estates and almshouses, and awards pensions and bounties to distressed mariners and their widows. (4) **As Nautical Advisers** two of the Elder Brethren in turn assist the Judges in the Admiralty Division of the High Courts of Justice in determining marine causes tried at law. The **Elder Brethren** consist of members of the Royal Family and statesmen, retired officers of high rank in the Royal Navy, and commanders in the Mercantile Marine.

Vere Street, Marylebone

Trustees, The First Commissioner of Works and the Rev. F. S. Webster (Rector of All Souls').
Treasurer, W. J. Downer, C.B., C.M.G., I.S.O.

THE LAW COURTS

For Scotland, see p. 363. For Ireland, see p. 371.

ENGLAND AND WALES

The English Courts of Law having jurisdiction in actions between parties are the **House of Lords,** the **Supreme Court of Judicature,** with its two main divisions—the Court of Appeal and the High Court of Justice—and the **County Courts.** In addition to these Courts, which have jurisdiction over all England, there are certain **local Courts of Record,** of which the chief are: The Lord Mayor's Court in the City of London (which has a concurrent jurisdiction with the High Court in all matters affecting residents within the city or in which the cause of action arises in the city), the Chancery Court of Lancaster, the Liverpool Court of Passage, and the Salford Hundred Court. The **House of Lords** is composed of the Lord Chancellor, the Lords of Appeal, and such members as have held high judicial office. The **High Court of Justice** consists of three divisions: (1) Chancery (administration of trusts, company cases, mortgages, patents, etc.), (2) King's Bench (contracts, torts, bankruptcy, etc.), (3) Probate, Divorce, and Admiralty (wills, matrimonial cases, and maritime cases). The **County Courts** have jurisdiction in most claims for debt or damages not exceeding £100, and in cases under the Workmen's Compensation Act to any amount; and (outside London) in Bankruptcy. They also have a limited jurisdiction in Chancery, Probate, and Admiralty proceedings. There is a right of appeal to the High Court on questions of law, where more than £20 is claimed; otherwise, by leave. (Plaints issued, 1914, 935,703; fees received, £415,415.) The **Courts having criminal jurisdiction** are the House of Lords, the Court of Criminal Appeal (established 1907), the High Court of Justice (King's Bench Division), the Central Criminal Court, the Courts of Oyer and Terminer and Gaol Delivery (usually called the Assizes), the Courts of General Quarter Sessions in counties and boroughs, and the Petty Sessional Courts, metropolitan, county, and borough. The costs, either of the prosecution or the defence, in criminal cases can now, by order of the Court, be made payable out of local funds. To the **Court of Criminal Appeal** any person convicted on indictment may appeal on a question of law, or, by leave, on a question of fact, or mixed law and fact, or against the sentence unless that is fixed by law. But there is no power to order a new trial. In the **King's Bench Division,** and at **Quarter Sessions,** appeals are heard from summary proceedings. The trials of many serious offences take place at Quarter Sessions; but the most important are sent to the Assizes. The Central Criminal Court acts as the Assizes for London and some adjacent districts, and as Quarter Sessions for the City. Besides these Courts there are certain **Ecclesiastical Courts:** these are of three degrees of jurisdiction over the Established Church. First, purely spiritual courts, including the Archdeacon's Court, the Bishop's Consistory, and the Archbishop's Court; second, courts of mixed spiritual and secular jurisdiction—*e.g.* the Court of Arches and the Court of the Official Principal of York; and, third, courts of purely secular constitution—*e.g.* the Judicial Committee of Privy Council, which is the Court of Final Appeal in ecclesiastical causes. The judgments of the **Judicial Committee** may be upheld and enforced by any of the High Courts of Justice.

The **Archdeacon's Court** is a court of first instance, and appeals lie to the bishop; but its aid is seldom invoked.—**Consistory.** Every bishop has his Consistory Court held before his Chancellor or Commissary, in his cathedral church, or other convenient place in his diocese. In this court are granted **faculties** for the alteration, repair, and renovation of churches. Nothing can be added to or taken from the **ornaments of the Church** except a faculty is obtained for the purpose, and appeal lies from each Consistory Court to the Court of Arches or to the Privy Council. The **Archbishop's Court,** distinguished from the **Provincial Court,** is the canonical tribunal for the hearing of spiritual causes. The old **Court of Arches,** modified as stated, unites the powers of the *jus canonicum* with new powers conceded by the Church Discipline Act, 1841, and the similar statute of 1874, exercising authority in both Provinces.

APPELLATE TRIBUNALS

House of Lords

The Lord High Chancellor

The Rt. Hon. Lord Buckmaster (*app.* 1915) £10.000
Private Sec. Hon. A. E. A. Napier . £500

2nd Assistant Officer, Geo. J. W. Rigley . £150

THE METROPOLITAN POLICE

Scotland Yard, S.W.

Established by Act of Parliament (1829), and the protection of the district by watchmen was discontinued by that statute and entirely intrusted to the then newly appointed force. The Metropolitan police **area** is 699·42 sq. m., and embraces all places within a radius of fifteen miles of Charing Cross, except the City of London, which has its own police. The Metropolitan police have jurisdiction on the river Thames. The **Thames** police are selected principally from sailors, and patrol in boats and steam and motor launches. The Metropolitan police, to the number of over 2,000, are also employed in H.M. dockyards, and in the principal military stations of the War Department.

The **strength of the force** on the date Sept. 26, 1916 (latest returns), was 22,323, consisting of 36 superintendents, 650 inspectors, 2,995 sergeants, and 18,642 constables.

The **rateable value** of the Metropolitan Police area for 1915–16 was £57,318,343. The **police rate** levied on the parishes in 1915–16 was 8½*d.* in the £, of which about 7*d.* was required for ordinary police purposes, about 1¼*d.* for the deficiency in the pension fund, and ¼*d.* for riot expenses under the Riot (Damages) Act, 1886. The rate produced £2,025,453, while £900,488 was received as Exchequer contributions. The pay of the Metropolitan Police force for 1914 – 15 was £2,303,530.

The **supreme government** of the Metropolitan police is vested in the **Commissioner** appointed by and acting under the control of the Home Secretary.

Commissioner, Sir E. R. Henry, G.C.V.O., K.C.B., C.S.I. £2,500
Assistant Commissioners, Major Sir E. F. Wodehouse, K.C.V.O., C.B., B. H. Thomson, C.B., Hon. F. T. Bigham, and F. L. D. Elliott . . . . each £1,200

CITY OF LONDON POLICE

This force is under the control of a Commissioner, who is appointed by the Lord Mayor, Aldermen and Common Council, subject to the approval of His Majesty the King. The **total strength** of the force is 1,161, consisting of 1 Assistant-Commissioner, 1 chief clerk and superintendent, 1 superintendent Executive Department, 1 superintendent Detective Department, 6 chief inspectors, 25 inspectors, 17 sub-inspectors, 94 sergeants, and 1,015 constables.

In addition to the above, 46 constables and 1 sergeant are employed on **private service duty** at the expense of persons engaging their services, the charge being at the rate of £230 per annum for the sergeant and £186 per annum for each constable.

The Detective Department consists of 1 superintendent, 1 chief inspector, 7 inspectors, 3 sub-inspectors, and 60 constables.

There is a private hospital for members, under the care of the surgeon of the force.

The Police area is divided into four divisions (exclusive of the chief and detective offices), each under the immediate charge of a chief inspector, assisted by 4 inspectors and 3 sub-inspectors.

The total cost of the force is about £205,643 per annum, one-fourth of which is paid from the City's cash, the remainder by a rate on the assessable rental of the City. The City Police, unlike the Metropolitan Police Force, is supported entirely by the citizens, without Imperial aid. The pay of the force is considerably in advance of any other similar body in the United Kingdom.

Commissioner, Sir William Nott-Bower, C.V.O. . . £1,700
Assist. do. Captain Donald Bremner . £1,000
Chief Clerk and Sup. John Stark . . £550

CENTRAL CRIMINAL COURT

Old Bailey

The Central Criminal Court was constituted in 1834, taking the place of the former sessions at the Old Bailey. The persons named in the Commission are the Lord Mayor, Lord Chancellor, any person who has been Lord Chancellor or a Judge of any superior Court and the present Judges of any of the Superior Courts, the Dean of Arches, the Aldermen of the City of London, the Recorder, the Common Serjeant, and the Judges of the City of London Court.

Office hours: 10 to 4; during August 10 to 2; Saturdays, 10 to 1.

Clerk of the Court, Herbert Austin.
Deputy and 1st Clerk of Arraigns, Forrest Fulton.
2nd Clerk of Arraigns, Grenville Richard Fulton.
3rd Clerk of Arraigns, Charles Graham Grant.
Clerk of Indictments, Wilfrid Walter Nops.

Days appointed for holding Sessions in 1917:

Jan. 9.	April 24.	July 17.
Feb. 6.	May 15.	Sept. 4.
Feb. 27.	June 19.	Oct. 9.
Mar. 20.		

QUARTER (OR GENERAL) SESSIONS IN COUNTIES

Quarter Sessions must be convened once in each of the four quarters of the year, the dates determining the period at which they must be held being October 11, December 28, March 31, and June 24.

The justices are empowered (Assizes and Quarter Sessions' Act, 1908) to fix the next holding of the court at any day not more than fourteen days earlier or fourteen days later than these dates. Brewster Sessions (including a general annual licensing meeting, and transfer sessions) are regulated by s. 10 of the Licensing (Consolidation) Act, 1910.

COUNTY OF LONDON SESSIONS

Sessions House, Clerkenwell, E.C.

Chairman, Sir Robert Wallace, K.C. . £2.000

* Missionary Bishops.

CONVOCATION

There are two Convocations, or Provincial Synods, of the clergy of the Church of England for the two Provinces of Canterbury and York. The greater importance of the Synod of Canterbury, until recent years, has led to its being commonly spoken of as **Convocation.** It was silenced in 1717, and its meetings were, with few exceptions, merely formal until 1852, from which date it has regularly met for business, generally thrice yearly for a week at a time. It consists of two Houses. In the Upper House sit the Archbishop and Bishops of the province in their scarlet Convocation robes; in the Lower House, the Deans, Archdeacons, and Proctors elected to represent the cathedral chapters and the beneficed clergy. The members of the Lower House wear the academic dress, the doctors their scarlet gowns. With every new Parliament a new Convocation is summoned by the Archbishop in obedience to a royal writ. When the Crown desires to refer to the Convocation any question affecting the Church, **Letters of Business** are issued directing it to take that question into its consideration. If the Convocation wishes to make any alteration in the canons of the Church, it prepares draft amended canons, and submits them to the Crown, both Convocations concurring in the same proposals. If the advisers of the Crown approve, the "royal licence" is issued, and the canons are enacted and promulgated by the Convocations and bind the ecclesiastical courts. Where the law of the Church has been settled by statute—as is the case with the rubrics and services of the Prayer-Book, and many other matters—it cannot be altered without the authority of Parliament. In the absence of Letters of Business, Convocation is free to discuss all questions concerning the interests of the Church and the spiritual welfare of the nation.

Province of Canterbury.— *Vicar-General*, Lord Parmoor, K.C.V.O., K.C.; *Registrar*, F. H. Lee, 1 The Sanctuary, Westminster, S.W.; *Apparitor-General*, (vacant); *Prolocutor of the Lower House of Convocation*, The Ven. Archdeacon of Leicester; *Actuary*, K. J. Muir Mackenzie.

Province of York.— *Vicar-General*, Sir P. W. Baker-Wilbraham, Bt.; *Registrar and Notary*, A. V. Hudson, Minster Yard, York; *Treasurer*, Canon G. M. Argles, York; *Synodal Sec.*, Canon H. Robinson, The Rectory, Badsworth, Pontefract; *Prolocutor*, The Bishop of Beverley.

HOUSES OF LAYMEN

The first House of Laymen for the Province of Canterbury assembled with the Houses of Convocation at the opening of the Parliament of 1886. The representation originally consisted of a certain number of members elected by the various diocesan conferences, a fixed number being allotted to each diocese irrespective of population. By the resolution of the Representative Church Council, which was confirmed by Convocation in Feb. 1906, the representation was altered, and the elections are now made with reference to the population of each diocese, and on the principle of giving one representative for the first 100,000 or under of the population, and one more for every further complete 100,000, and any additional fraction of 100,000.

There are now no ex-officio or nominated members, but the House may co-opt, on the proposal of the Chairman, not more than 3 members. The House is bound to avoid discussions upon doctrine. Like Convocation, the

House of Laymen is elected with every fresh Parliament.

Province of Canterbury.—*Chairman*, Lord Parmoor, K.C.V.O.; *Vice-Chairman*, Chancellor P. V. Smith, LL.D.; *Secretary*, Sydney W. Flamank, Church House, Westminster, S.W.

Province of York.—*Chairman*, Duke of Northumberland, K.G.; *Vice-Chairmen*, Viscount Halifax and J. A. Brooke; *Secretary*, E. P. Charlewood.

REPRESENTATIVE CHURCH COUNCIL

The Representative Church Council consists of the two Houses of Convocation and the two Houses of Laymen meeting together as one body for consultative purposes. It is intended that all the members shall by-and-by be elected *ad hoc* by the clergy and laity. The Constitution adopted in Nov. 1905 places large powers in the hands of the laity, and practically puts them on an equal footing with the clergy. Care has been taken, however, that this shall not interfere with the inherent rights of the episcopate.

STATISTICS

The number of clergy in England and Wales is about 23,000, of whom 14,750 are beneficed, and 7,770 are assistant curates. A summary of the **voluntary offerings** of the Church of England for the latest available year (1915) shows that £784,524 was contributed for home work, £1,097,845 for foreign work, £82,709 for educational work, £170,090 for the clergy (educational and charitable assistance), and £619,235 for philanthropic work, making a total of £2,754,402. In addition to this, the funds raised by church collections or parochial machinery, and administered for parochial purposes alone, amounted to £5,452,910.

CHURCH OF IRELAND

St. Patrick is universally recognised as the Apostle of Christianity in Ireland, and he probably went to that country as a missionary bishop A.D. 432. He planted there a native church and raised up a native priesthood, and during the sixth and seventh centuries missionaries from Ireland poured out to Britain and other European countries. Up till the twelfth century the Irish Church was independent, but it then became subject to Rome, and so remained till the Reformation. In 1800, by the Act of Union, the Church was united to the Church of England. In '69 the Irish Church Disestablishment Act was passed, taking effect on Jan. 1, '71. Since then the Church has flourished in spite of the loss of the revenues and property formerly belonging to her. The government is in the hands of a **General Synod** composed of three distinct orders—the bishops, the clergy, and the laity. The bishops form one House; and 216 of the clergy with 432 of the laity form a Second House—the House of Representatives. The three orders sit together to constitute the Synod. This latter House is elected triennially by the 21 diocesan synods throughout the country. The General Synod meets annually at Dublin on the second Tuesday after Easter. The affairs of each diocese are managed by a diocesan synod acting through a diocesan council. The financial affairs of the Church are in the hands of **the Representative Church Body,** composed of the archbishops and bishops, 13 clergymen, and 26 laymen chosen by the diocesan representatives in the General Synod, with 13 co-opted members, making a total of 65 members. This body holds the property of the Church in trust. The sum handed over by the Church Temporalities Commission to this body was £8,081,075, which comprised £7,581,075, the life annuities of the bishops and clergy paid as commutation money, and £500,000 compensation for private endowments. The funds in hand on Dec. 31, 1915, amounted to £9,321,354, and are appropriated to the following purposes. Commutation capital, £191,469; Parochial sustentation, £6,249,540; Episcopal sustentation, £590,237; Glebes capital, £404,310; Miscellaneous capital, £2,290,108 (this includes over £126,000 for superannuation of the clergy); total, £9,321,354. The annuitants now only amount to about 54, and the interest on commutation capital more than pays these, so that in many dioceses 10 or 12% is paid to the clergy as bonus on their stipends. The voluntary contributions received by the Representative Body in 1915 amounted to £149,827. The **number of clergy** in the church is 13 bishops, about 1,300 incumbents, and 370 curates. The Church population is 576,000. The incumbents are elected by **Boards of Nomination,** consisting of 1 bishop, 3 diocesan and 3 parochial members. The incumbents nominate their curates. Bishops are chosen by the members of the diocesan synods, and the Primate by the bishops from amongst themselves.

Secretary of the Representative Church Body: Anthony F. Maude, 52 St. Stephen's Green, Dublin.

EPISCOPAL CHURCH IN SCOTLAND

The Episcopal Church in Scotland has seven bishops—viz.:

	App.	Born
Brechin, Primus (1908), Most Rev. W. J. F. Robberds, D.D.	1904	1863
Glasgow and Galloway, Right Rev. A. Ean Campbell, D.D.	1904	1856
Moray, Ross, and Caithness, Right Rev. A. J. Maclean, D.D.	1904	1858
Argyll and the Isles, Right Rev. Kenneth Mackenzie, D.D.	1907	1863
St. Andrews, Dunkeld, and Dunblane, Right Rev. C. E. Plumb, D.D.	1908	1864
Edinburgh, Right Rev. George H. S. Walpole, D.D.	1910	1854
Aberdeen and Orkney, Right Rev. Anthony Mitchell, D.D.	1912	1868

There are 415 churches and mission stations, 190 parsonages, 354 clergy, and 55,597 communicant members. *Registrar* and *Lay Clerk* to the Episcopal Synod, George J. Wood, W.S. *Offices*, 14 Young Street, Edinburgh.

The **Representative Church Council,** constituted in 1876, is recognised as the organ of the Church in matters of finance, but cannot deal with questions of doctrine or worship, nor with matters of discipline, save to give effect to the canonical sentences of the Church. There are 729 members —355 clerical, 30 official, and 340 laymen. *Secretary and Treasurer*, R. T. Norfor, C.A. *Offices*, 13 Queen Street, Edinburgh.

TITHE COMMUTATION

The value of £100 worth of tithe rent-charge :

	£	s.	d.		£	s.	d.
1835	100	0	0	1913	74	14	9¾
1909	69	18	5¼	1914	75	16	4
1910	70	7	8	1915	77	1	4¼
1911	71	4	1¾	1916	83	2	6¾
1912	72	14	2½				

The average for the 80 years since the passing of the Tithe Commutation Act, 1836, is £91.11.1¾. The total amount of tithe rent-charge payable in England and Wales in 1915 was £2,841,629.

PRESBYTERIAN CHURCHES

CHURCH OF SCOTLAND

Christianity was introduced into Scotland in the fourth century, and the Church that resulted differed in several respects from the rest of Western Christendom. The chief distinction lay in its government. Three orders of clergy were recognised : bishops, priests, and deacons ; but the bishops had no dioceses, and were in subordination to the abbots who presided over the great missionary college at Iona. St. Columba, the first of these abbots, like some of his successors, was a simple presbyter. Gradually the early Scottish Church assimilated to the Roman use, although it was not till the fifteenth century that metropolitans were appointed, with jurisdiction over the other secs. At the Reformation prelacy was abolished, and the Church of Scotland was constituted on its present basis. A long conflict ensued between the adherents of prelacy and presbytery, but in the end the latter prevailed, and the Reformation constitution was ratified by William and Mary, and in 1707 was confirmed by the British Parliament.—**Doctrine.** The standards of the Church of Scotland are the Confession of Faith and the Larger and Shorter Catechisms compiled by the Westminster Assembly of 1643. The doctrine they contain is Protestant and Evangelical, following the theological teaching of Augustine and Calvin.—**Polity.** The Church of Scotland is Presbyterian in government—*i.e.* it recognises the equality of all presbyters. Its congregations are ruled by a board of elders—laymen elected for life from the Church members. This is known as the **Kirk Session,** and the minister of the parish is *ex-officio* president. Its duties are chiefly spiritual, but they are also temporal and disciplinary. Over the Session is the **Presbytery,** consisting of the ministers and one elder from each congregation within a certain district. Over this again is the **Synod,** composed of the presbyteries of a province ; and over all is the **General Assembly,** the supreme court of the Church, which meets yearly in Edinburgh in May. The Assembly is summoned by its own warrant. The King's Commissioner is present at its sittings. When its business is concluded it is dissolved by its Moderator, who at the same time fixes the date when the next assembly shall meet. The Royal Commissioner then also dissolves the Assembly in the name of the King, and appoints the next meeting to be held on the date fixed by the Moderator.—**Worship.** The Church of Scotland uses no liturgy in the conduct of public worship, but the order of service to some extent prescribed by the Westminster Directory of Worship (1643). At present the tendency in the Church is towards greater uniformity and order, and a few clergymen use the Euchologion, a service-book issued by the Church Service Society.—**Statistics :** ministers, 1,788, including 140 probationers and 200 missionaries (including wives), elders, 12,714 ; communicants, 721,137 ; parishes, 1,442 ; churches, 1,693 ; presbyteries, 84 ; synods, 16 ; income, £486,733, exclusive of bequests, teinds or tithes, and Government grants. There are 12 churches in England connected with the Church of Scotland, and 6 at popular places of resort on the Continent, and vigorous missions are carried on in India, Africa, and China. Commissioned chaplains for Presbyterian troops are chosen chiefly from the Church of Scotland, but clergymen of the United Free Church of Scotland and of the Presbyterian Churches in England and Ireland are also eligible for appointments. His Majesty has decreed that during his year of office the Moderator of the General Assembly of the Church of Scotland should take rank in Scotland after the Lord Chancellor. His Majesty has followed the example of Queen Victoria and King Edward in appointing Royal Chaplains from the Church of Scotland, and in attending worship at Crathie parish church while in Balmoral.

Moderator for 1916, The Right Rev. John Brown, D.D., Glasgow ; *Lord High Commissioner*, The Duke of Montrose, K.T. ; *Principal Clerk*, The Very Rev. David Paul, D.D., LL.D., Edinburgh ; *Depute Clerk*, Rev. J. A. McClymont, D.D. ; *Procurator*, Christopher N. Johnston, K.C., LL.D., Sheriff of Perth ; *Agent*, Alan L. Menzies, W.S., 54 Castle Street, Edinburgh. *Offices of the Church*, 22 Queen Street, Edinburgh.

UNITED FREE CHURCH OF SCOTLAND

This Church was formed by the union of the Free Church of Scotland and the United Presbyterian Church. In 1900 the United Presbyterian Synod agreed to union unanimously, and the Free Church Assembly agreed by a majority of 557 in a house of 615 members.

The Free Church of Scotland originated in the claim made by a majority in the Established Church (commonly known as the Evangelical party) to be free of control by the State in determining her own affairs. The conflict with the civil courts related to the right to refuse to ordain a presentee to a parish when the majority of the congregation would not join in a "call" to him, and the right to admit other ministers than those of the civil parishes to sit in Church courts. On both points the courts of law decided against the Church, and the Government refused relief. The

result was the **Disruption** on May 18, 1843, when 474 ministers, headed by Dr. Chalmers, left the Establishment and formed the Free Church, surrendering all State support in order to possess "spiritual independence."

The **United Presbyterian Church** was constituted in 1847 by the Union of the Secession and the Relief Churches. The **Secession Church** owed its origin to the action of the Rev. Ebenezer Erskine, of Stirling, who in 1732, along with 3 other ministers, seceded from the Established Church in protest against its defection from Reformed principles and its suppression of their ministerial freedom.

Moderator, Very Rev. Sir Geo. Adam Smith, D.D., LL.D., Principal of the University of Aberdeen; *Principal Clerks*, Rev. Archibald Henderson, D.D., Crieff, Rev. C. Jerdan, D.D., Greenock; Rev. James Harvey, M.A., Edinburgh; *Clerk Depute*, R. R. Simpson, W.S. *Offices*, 10 Albyn Place, Edinburgh.

Statistics, 1915: *Home Field:* congregations, 1,521; stations, 35; ministers, 1,604; ordained preachers and missionaries, 24; colleges, 3; professors, 15; elders, 17,427; deacons and managers, 19,069; communicants, 516,075. *Foreign Field:* congregations, 230; out-stations, 1,411; missionaries (men and women), 540; native agents, 1,121; communicants, 61,935. *Continental Stations*, 25. *Total income* of the Church, £968,485.

FREE CHURCH OF SCOTLAND

A considerable number of ministers, elders, and communicants of the Free Church were opposed to union with the United Presbyterian Church. It seemed to them to involve the surrender of the principle of National religion (the United Presbyterian Church being voluntary—*i.e.* opposed to the principle of Establishment) and of the Confession of Faith, which was qualified in the United Free Church by two Declaratory Acts, and largely nullified by a change of formula. Holding these opinions (which were identical with those professed by the Free Church in 1843), they could not consistently enter into the union. They were therefore extruded by the majority who are now in the United Free Church from the use of the Free Church buildings and funds. The extruded parties went to law, and eventually in Aug. 1904 judgment was pronounced in favour of the Free Church. The effect of the decision was that the whole of the funds and heritable property of the Free Church vested in the non-uniting minority; and as they were clearly unable to occupy all the churches or administer the funds, a Royal Commission was appointed on Dec. 17, 1904, to inquire into the matter. Following on the Commissioners' report an Act of Parliament was passed in 1905, under which an Executive Commission was set up which has allocated the property, etc., as between the two Churches.

The Church consists of 5 synods, 12 presbyteries, and 1 Mission presbytery, 97 ministers, and 178 congregations.

Moderator, Rev. Angus Mackay, Kingussie; *Clerk*, Rev. Prof. J. K. Cameron. *Free Church Offices*, The Mound, Edinburgh.

UNITED ORIGINAL SECESSION CHURCH

This Church, popularly known as "**Auld Lichts,**" was constituted in 1842, and represents the Seceders who, on doctrinal grounds, left the Established Church with Ebenezer Erskine in 1733.

Moderator, Rev. Thomas Matthew, Kilwinning; *Synod Clerk*, Rev. James Young, 28 Bellevue Crescent, Ayr; *Synod Treasurer*, John Kyle, Pollokshaws.

Statistics: Presbyteries, 4; churches, 28; ministers, 21; elders, 176; communicants, 3,256; income, £5,719.

PRESBYTERIAN CHURCH OF ENGLAND

The revival of Presbyterianism in England in the earlier portion of the last century was due to the influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the Disruption, and on the other of the consolidation of the dissenting Presbyterianism of Scotland which led up to the formation of the United Presbyterian Synod in 1847. The English section of that Synod united with the older Presbyterian body in England in 1876, so forming the Presbyterian Church of England. Of the present congregations, 28 trace back their existence to the seventeenth century, 42 to the eighteenth century, while the remaining 285 have been established within the last 115 years.

Moderator and *General Secretary*, (vacant); *Financial Secretary*, John Leggat; *Foreign Missions Secretary*, Rev. Dr. P. J. Maclagan. *Offices of the Church*, 7 East India Avenue, Leadenhall Street, E.C. *Publications Office*, 21 Warwick Lane, E.C.; *Manager*, T. French Downie.

Statistics: The Church consists of 355 fully organised congregations and 8 preaching-stations, providing accommodation for 189,456 persons. A large number of fully equipped mission stations also exist in connection with town congregations, and these have an average attendance of about 12,000 persons. The number of ministers, including professors, is 370, with 28 ordained and 16 medical missionaries in the foreign field, besides 7 missionary teachers and 41 lady missionaries, 4 of whom are fully qualified doctors, 1 certified nurse, and 56 ordained native ministers. There are also 21 licentiates, and about 22 theological students preparing for the ministry, of whom 77 are on war service. The College was transferred from London to Cambridge in Oct. 1899.

PRESBYTERIAN CHURCH OF WALES

While the Wesleys and Whitefield were forming the Methodist movement in England, Howell Harris, Daniel Rowlands, and others were prosecuting a similar movement in Wales. The first Methodist Association meeting was held in 1743 at Watford, Glamorganshire, and from this time to the end of the century the word "Methodist" only was used to denote this Church. When, however, the Wesleyan Methodists began operations in Wales, a distinctive name became necessary, and therefore the term-prefix "Calvinistic" was adopted. It is, however, really Presbyterian and is affiliated with the United Free Church of Scotland and with the Presbyterian Church of England. This society is principally confined to Wales, but branches exist in England, America and Australia.

Secretaries, Rev. E. P. Jones, B.A., Cardiff, and Rev. John Thickens, 165 Brondesbury Park, London, N.W.

Statistics: Churches, 1,452; sitting accommodation, 582,897; members, 184,694; Sunday scholars, 192,746; ministers, 1,346.

PRESBYTERIAN CHURCH IN IRELAND

Presbyterianism arose in Ireland through the plantation of Ulster by Scottish settlers in the reign of James I. The colonists were at first received as members of the Established Church, which was Calvinistic in doctrine and recognised the validity of Presbyterian orders. After 1634, however, the Irish prelates endeavoured to depose all Presbyterian ministers who would not submit to episcopal ordination and follow the Anglican ritual. In self-defence the Presbyterians left the Established Church, and in 1642 they organised their first presbytery at Carrickfergus. During the protectorate of Cromwell the Presbyterians were kindly treated, but after the Restoration the severest pains and penalties were enforced against them for their nonconformity. At the Revolution of 1688 the gallant conduct of the Presbyterians in defending Londonderry and supporting William III gained for them the *regium donum*, an annual bounty of £1,200, which was afterwards increased from time to time. By the Irish Church Act of 1869 they lost the *regium donum*, but the commutation granted by Government, supplemented by the gifts of the people, has more than compensated for the loss.

Moderator, Rt. Rev. Thomas West, D.D., Antrim; *Assembly Clerk*, Rev. W. J. Lowe, M.A., D.D., Church House, Belfast.

Statistics: Synods, 5; presbyteries, 36; churches, 562; ministers, 644; elders, 2,319; missionaries, 39; communicants, 104,306; income, £294,924.

METHODIST CHURCHES

1. Wesleyan Methodist

John Wesley and his younger brother Charles, together with George Whitefield, when studying at Oxford University, formed a society which came to be called the Methodists. In 1739 Whitefield took to preaching in the open air, and at his instigation Wesley followed suit. That same year the first Methodist chapel was opened. Three years later the movement was extended to Newcastle and Lincolnshire, and under the energetic and persevering advocacy of the Wesleys it gained a large number of adherents. A year afterwards rules were drawn up for the members of this newly formed denomination, and the movement rapidly spread throughout England and gained a firm foothold in Ireland and Scotland. The Methodists were subjected to much persecution at this time, and John Wesley, who is said to have travelled about 5,000 miles a year, often went in peril of his life.

President of Conference, 1916-17, Rev. J. G. Tasker, D.D. (1917-18, Rev. Simpson Johnson); *Secretary*, Rev. Simpson Johnson. *Offices*, Wesleyan Methodist Connexional Buildings, Westminster.

Statistics: Great Britain, churches, 8,504; members, 494,993; ministers, 2,603; lay preachers, 19,211; Sunday scholars, 893,527.

2. United Methodists

This denomination, which was constituted in 1907, is the outcome of the amalgamation of three Methodist Churches—the **Methodist New Connexion**, the **Bible Christian Church**, and the **United Methodist Free Church.** The first of these churches was the result of a movement headed by Alexander Kilham which sought to place the governing power of the people called Methodists in the hands of the members instead of in those of the ministers. Kilham was expelled from the Methodists, and he and the 5,000 men who followed him formed the New Connexion. The Bible Christians were originally the followers of one William O'Bryan, a local preacher whose energetic methods were declared irregular. This Church was formed in 1816 and became very popular in the western counties. The United Methodist Free Church consisted of several Methodist Societies which combined in the year 1857.

President of Conference, 1916-17, Rev. T. J. Cox (1917-18, Rev. James Wright); *Secretary*, J. R. Bennett, J.P. *Publishing House*, 12 Farringdon Avenue, London, E.C.

Statistics: Churches, 2,727; members, 157,852 ministers, 671; Sunday scholars, 287,887.

3. Primitive Methodist

The Primitive Methodist Church is an offshoot of the Wesleyan Methodist. It was founded through the agency of two Wesleyan local preachers Bourne and Clowes, and its first Conference was held at Hull in 1820. The separate Church, however, really came into existence some ten years before this date. The idea of Bourne and Clowes and their associates was that the Wesleyan Methodists had departed somewhat from the fundamental methods of their founders, and they endeavoured to compel the people to come in by means of camp and other open-air meetings. The whole movement was a "growth" rather than a "secession," and the underlying principles of the Primitive Methodists are still similar to those of the Wesleyans.

President of Conference, 1916-17, Rev. A. T. Guttery (1917-18, Rev. J. Tolefree Parr). *Gen. Sec.* Rev. M. P. Davison. *Offices*, Holborn Hall, Clerkenwell Road, London, E.C.

Statistics: Churches, 4,870; members, 205,323; ministers, 1,157; Sunday scholars, 436,077.

4. Wesleyan Reform

When various Methodist bodies decided to form themselves into the United Methodist Free Church, a goodly number of people refused to join, and the outcome of this was the Wesleyan Reform Union.

Statistics: Churches, 197; members, 8,317; ministers, 22; Sunday scholars, 22,883.

5. Independent Methodist

The Independent Methodists are an offshoot of the Wesleyan Methodist Church and membership is chiefly confined to the North of England. The constitution is democratic and the ministers are mostly unpaid.

Statistics: Churches, 145; members, 8,770 ministers, 404; Sunday scholars, 27,204.

THE CONGREGATIONALISTS

The Separatist or Independent Church began as far back as the reign of Queen Mary, but the first Separatist body known to history is that of which one Richard Fitz was the minister. It is recorded that the members were thrown into prison about the year 1567. Later the Independents, Barrow, Greenwood, and Penry, were thrown into prison for denying the ecclesiastical supremacy of the sovereign. A few years afterwards an Independent Church was formed at Gainsborough, and another at Scrooby, and some of the members of this latter Church crossed the Atlantic in the *Mayflower* and founded Plymouth colony. By the Act of Uniformity, following the

Restoration, the position of the Independents was made almost impossible, and members and ministers suffered persecution until the passing of the Toleration Act.

Chairman Congregational Union of England and Wales, 1916-17, Rev. D. Burford Hooke, D.D. (1917-18, Rev. Bernard J. Snell, M.A., B.Sc.); *Secretary*, Rev. R. J. Wells; *Chief Clerk*, C. Stancliff. *Offices*, Memorial Hall, Farringdon Street, London, E.C.

Statistics: British Isles, churches, 4,994; members, 491,253; ministers, 3,105; Sunday scholars, 653,609.

THE BAPTISTS

It has been claimed that the Lollards were really Baptists, and there are expressions in the writings of some of the Reformers which appear to favour Baptist views. Most, if not all, the Baptists who suffered death for their faith during the Reformation period were immigrants from the Low Countries. Doubtless there were Englishmen as early as the regin of Henry VIII who held that the immersion of believers only is taught in the New Testament. The strongest presumptive evidence of these early English Baptists is to be found in the Statute Book and in the Articles of the Established Church. It is an attested fact that a few years after the Elizabethan Settlement in 1578 there were a number of Baptist communities in London. For a long time there were two main bodies of Baptists—the Particular or Calvinistic, and the General or Arminian. When some of the General Baptist Churches drifted into Arianism, those General Baptists who continued to hold evangelical views formed the New Connexion of General Baptists. The Particular Baptists formed the Baptist Union in 1813, but General Baptist Churches were admitted to membership in 1835. At the final meeting of the General Baptist Association of the New Connexion in 1891 a resolution to amalgamate completely with other Baptist Churches was passed, and the Churches connected therewith joined the various county associations.

President of the Baptist Union, 1916-17, Rev. Thomas Phillips, B.A.; *Secretary*, Rev. J. H. Shakespeare, M.A. *Offices*, Baptist Church House, Southampton Row, London, W.C.

Statistics: British Isles, churches, 3,144; members, 411,949; pastors, 2,112; Sunday scholars, 547,903. World figures: churches, 68,415; members, 7,069,463, of which the United States has 6,003,211. The British Isles come next, Russia, with 60,295, being third, and Sweden fourth.

THE SALVATION ARMY

The Salvation Army is Methodist in its origin, its founder, William Booth (*d.* Aug. 20, 1912), having been for fifteen years a Methodist New Connexion minister. In 1865 he established the Christian Mission in the East End of London, and about 1878 the Mission became known as the Salvation Army, military methods and titles being adopted to a certain extent. The authority of the General for the time being is absolute, and he has the power, under the Army's constitution, to nominate his successor.

Commander-in-Chief, General Bramwell Booth. *Headquarters*, Queen Victoria Street, London, E.C.

Statistics: Corps and outposts, 9,635; officers, cadets, and paid workers, 23,708.

BRITISH AND FOREIGN UNITARIAN ASSOCIATION

As its name implies, the Unitarian body is one which holds the doctrine of the unity of God. It places emphasis on freedom and character in religion. There are orthodox doctrines which it rejects, such, for instance, as the Trinity, the deity of Christ and the infallibility of the Bible. The British and Foreign Unitarian Association was formed in 1825, and has for its object the diffusion of the principles of Unitarian Christianity. *Sec.* W. Copeland Bowie. *Offices*, Essex Hall, Essex Street, Strand, London, W.C.

THE SOCIETY OF FRIENDS

The Society of Friends, whose members are sometimes called Quakers, was founded by George Fox in the Commonwealth period. Theologically the Quakers are in the main evangelical, but they hold pronounced views on the unlawfulness of oaths, of military duty, and of a professional ministry. For a long time they preserved a distinctive simplicity of speech and dress, and it was required of members that they should not marry out of the Society. The Society of Friends sustains active missions in some of the poorer districts of London, and it has been the pioneer of the Adult School Movement; it carries on foreign mission work in India, Madagascar, Syria, Ceylon and Japan. About 120 missionaries are supported in these fields. *Headquarters*, Devonshire House, 136 Bishopgate Street, London, E.C.

Statistics: Great Britain and Australasia: members, 20,007; Sunday scholars, 19,273; Ireland, 2,310 members.

THE COUNTESS OF HUNTINGDON'S CONNEXION

Selina Countess of Huntingdon appointed Whitefield as her chaplain in 1748, and afterwards erected a number of chapels in which the liturgy of the Church of England was used, though the preachers were not usually ordained clergymen. Not a few of these chapels have become distinctly Congregational, but a number still remain faithful to their original traditions. *Sec.* E. Dolby Shelton. *Offices*, 41 Holborn Hall, London, W.C.

Statistics: Sitting accommodation, 13,310; members, 2,237; Sunday scholars, 3,032; ministers, 29.

MORAVIAN CHURCH

This Church is that branch of the visible body of Christ which took a separate form at Lititz in Bohemia in 1457. After many persecutions due to Roman influence it was thought to be exterminated as the result of the Thirty Years' War, but it was renewed in 1722 in Saxony. From thence it has spread as an international missionary body and now has congregations in all parts of the world. The Holy Scriptures are the only rule of faith and life, but on individual points and doctrine no detailed standard is imposed. It is governed by Synods, whose membership is made up both of ministers and lay representatives. Between Synods the administration is carried on by an Executive Board.

Statistics: British province, sitting accommodation, 12,313; communicants, 3,735; Sunday scholars, 5,735; ministers, 50.

Provincial Board for Great Britain, Rt. Rev. Bishop Hassé, D.D. (*President*); Rev. J. N. Libbey (*Sec.*); Rev. W. C. Batt (*Treas.*). *Offices:*

Moravian Church House, 32 Fetter Lane, London, E.C.

CHURCHES OF CHRIST

The Churches of Christ have 15,182 members and 17,978 Sunday scholars.

General Secretary, J. Flisher, 4 Heslington Street, Moss Side, Manchester.

DISCIPLES OF CHRIST

The Disciples of Christ originated in Western Pennsylvania, U.S.A., in 1809, under the leadership of Thomas and Alexander Campbell, Presbyterian ministers. From America the movement spread to this country, where one Church was organised as early as 1821.

President of the Association, Rev. Richard Dobson; *Hon. Secretary*, Rev. Leslie Morgan, B.A., B.D., Priory Road, Hornsey, London, N.

Statistics: Sitting accommodation, 6,200; members, 1,666; ministers, 15; Sunday scholars, 1,957.

FREE CHURCH OF ENGLAND

This body, whose first convocation was held in 1864, is Episcopal and Protestant, "free to go into any parish and preach the Gospel, free to use a revised Prayer-Book, free to associate the laity with the clergy in the government of the Church, and free to hold communion with other Christians."

Statistics: Sitting accommodation, 8,140; members, 1,352; ministers, 24; Sunday scholars, 4,196.

THE BROTHERHOOD MOVEMENT

One of the most remarkable religious movements of this generation is the Brotherhood. This essentially democratic concern has embraced a great concourse of men. The movement is non-political and unsectarian, but the great majority of the meetings are held in churches. The Pleasant Sunday Afternoon movement, out of which the modern Brotherhood movement sprang, was started by Mr. John Blackham, of West Bromwich, in 1875, and the Brotherhood now numbers some 2,000 societies with a membership of about half a million. The aim of the movement is "to lead men and women into the Kingdom of God, to unite in Brotherhoods of mutual help, to win the masses of the people for Jesus Christ, and to encourage the study of social service," etc.

Secretary of the National Brotherhood Council, Wm. Ward, 37 Norfolk Street, Strand, London, W.C.

President of the Annual Conference, 1916-17, Dr. J. Clifford.

CHRISTIAN ENDEAVOUR UNION

Founded 1881 by Dr. F. E. Clark. Membership, over 4,000,000. The object of the Society is to increase mutual acquaintance amongst the youth of the Churches. Each society is attached to a particular Church, and its efforts are devoted to strengthening that Church.

Secretary, Rev. W. Knight Chaplin, Williston, Leytonstone, London.

THE ROMAN CATHOLIC CHURCH

The total number of Roman Catholics throughout the world, ruled by about 1,300 archbishops and bishops, is estimated at 301,170,000. There are in **Great Britain and Ireland** about 5,862,600 (*i.e.* about 3,242,670 in Ireland, and the remainder in Great Britain); and in the whole of Europe about 190,630,000. **Ireland** is divided into 4 ecclesiastical provinces, subdivided into 28 dioceses, ruled by 4 archbishops and 23 bishops (*v. infra*). The number of priests in Ireland in 1916 was 3,737, serving 2,466 parochial and district churches, situated in 1,115 parishes. The 26 archbishops and bishops of Great Britain (*v. infra*) consist of: 1st, for England and Wales, 4 archbishops with 12 suffragans and 3 auxiliaries; 2ndly, for Scotland, 2 archbishops (of St. Andrews and Edinburgh, and of Glasgow), with 4 suffragans and 1 coadjutor archbishop. The number of priests in England and Wales in 1916 was 3,892, with 1,891 churches, chapels, and stations; in Scotland, 576, with 427 churches, chapels, and stations. The **United States** have about 16,564,109 Roman Catholics, 14 archbishops, and 97 bishops, about 19,572 priests, about 15,163 churches and chapels, and 1,669,391 pupils in Catholic schools. In the **British** possessions of **North America** there are about 3,291,117 Roman Catholics, 47 archbishops and bishops, about 4,500 priests, and 3,400 churches, chapels, and stations.

THE JEWS

The numbers of Jews in the various countries of Europe, according to the "Jewish Year-Book," are as follows: Russia, 5,215,805; Austria-Hungary, 2,076,378; Germany, 607,862; Rumania, 215,909; Turkey, 106,977; Holland, 103,988; France, 100,000; Great Britain and Ireland, 244,697; Italy, 44,037; Switzerland, 12,264; Serbia, 5,729; Greece, 8,350; Denmark, 3,476; Sweden and Norway, 4,554; Bosnia and Herzegovina, 8,213; Belgium, 15,000; Bulgaria, 37,653. **Total in Europe,** 8,814,921. Outside Europe no satisfactory enumeration is possible, but Asia is estimated to contain 459,746; Africa, 351,750; the Americas, 2,212,568; and Australia, 17,403. There are probably about 11,876,985 Jews in existence at the present date, and of late years the number living in Palestine has noticeably increased. The Jews are returning to the land of their ancestors as tillers of the soil. It is estimated that there are over 100,000 Jews in Palestine. The number of Jews in London is estimated at 150,000, and in other parts of Great Britain and Ireland at 94,697.

In **England,** full emancipation was granted to the Jews in 1858. They possess a special **Jewish Board of Guardians** (Middlesex Street, Bishopsgate), which provides for indigent Jews. There are seven large Jewish elementary schools in London, the principal being the Jews' Free School, Bell Lane, Spitalfields. Ministers are trained for the various congregations at the **Jews' College,** Queen Square House, Guilford Street, W.C. *Principal*, Prof. A. Büchler, Ph.D.; *Secretary*, A. M. Hyamson, F.R.Hist.S.

Ecclesiastical matters are under the control of the *Chief Rabbi*, Dr. Joseph H. Hertz (elected 1913). *Office*, Mulberry St., Commercial Rd., E.

SOCIETIES

Anglo-Jewish Association, 85 London Wall, E.C. *Sec.* M. Duparc.

Jewish Board of Deputies, 23 Finsbury Square. *Solicitor* and *Sec.* Charles H. L. Emanuel, M.A.

Jewish Colonisation Society, 2 Rue Pasquier, Paris. A trust created by the late Baron Hirsch for the purpose of helping persecuted Jews in all parts of the world; its chief work has been the formation of colonies in Argentina.

"Zion" Association of East London Zionists. *President*, Rev. J. K. Goldbloom. *Office*, 4 Fulbourne Street, London, E.

Jewish National Fund Commission for England. *Sec.* H. R. Finebloom. *Central Office*, 4 Fulbourne Street, London, E. There are local and provincial agencies in Belfast, Birmingham, Bradford, Dublin, Twickenham, Edinburgh, Glasgow, Leeds, London (5), Liverpool, Manchester, Newbridge (Mon.), Newcastle, Plymouth, and Swansea.

The **Zionist Movement,** founded by the late Dr. Theodore Hertzl, aims at (1) the organisation of the Jews; (2) the opening of the door to Palestine; (3) the successful establishment of a home for the Jews there; (4) the working up of the State into a model State after the home has been established; and (5) the realisation of the Jewish mission by imparting to the world the social solutions and ideals of righteousness developed by the spiritual genius of the race.

UNIVERSITIES

THE UNIVERSITY OF OXFORD

UNIVERSITY OFFICERS, ETC.	Elect.
Chancellor, The Earl Curzon of Kedleston, D.C.L., *All Souls*	1907
High Steward, The Earl of Halsbury, D.C.L., *Merton*	1896
Vice-Chancellor, Very Rev. T. B. Strong, D.D., Dean of *Ch. Ch.*	1913
Proctors, Rev. J. M. Thompson, M.A., *Magd.*; H. H. E. Craster, D.Litt., *All Souls.*	
Burgesses, Lord Hugh R. H. Cecil, M.A., *Hertford*, 1910; Rowland E. Prothero, M.A., M.V.O., *All Souls*, 1914.	
Assessor of the Chancellor's Court, Sir E. J. Trevelyan, D.C.L., *All Souls*	1910
Deputy Steward, Sir T. Raleigh, K.C.S.I., D.C.L., *All Souls*	1905
Public Orator, A. D. Godley, M.A., *Magd.*	1910
Member of the Medical Council of the United Kingdom, A. Thomson, M.A., *Ex.*	1899
Bodley's Librarian, Falconer Madan, M.A. *Brasenose*	1912
Sub-Librarians, A. E. Cowley, D.Litt., *Magd.*, 1899; H. H. E. Craster, D.Litt., *All Souls*	1912
Keeper of Archives, R. L. Poole, M.A., *Magd.*	1909
Radcliffe's Librarian, W. H. Jackson, M.A., D.Sc., *New Coll.*	1900
Keeper of the Ashmolean Museum, D. G. Hogarth, M.A., *Magd.*	1909
Keeper of Art Galleries, C. F. Bell, M.A., *Magd.*	1909
Registrar of the University, C. Leudesdorf, M.A., *Pembroke*	1906
Assistant Registrar and Secretary to the Boards of Faculties, E. S. Craig, M.A., *Univ.*	1907
Radcliffe Observer, A. A. Rambaut, D.Sc. (Dub.), M.A., *Queen's*	1897
Secretary to the Curators of the University Chest and Board of Finance, William B. Gamlen, M.A., *Exeter*	1873
Acting Curator of Sheldonian Theatre, A. W. Macan, D.Litt., *Univ.*	1916
Acting Curator of Schools, Rev. G. B. Cronshaw, M.A., *Queen's*	1910
Registrar of the Chancellor's Court, John D. Peel, M.A., *Magd.*	1908
Coroners of the University, W. T. Brooks, M.A., *Ch. Ch.*, 1899; F. E. Marshall, M.A., *St. John's*	1908
University Counsel, George J. Talbot, K.C., M.A., *All Souls*	1915
Solicitor, John D. Peel, M.A., *Magd.*	1908
Bedels, H. M. Lodge, *Divinity*; (vacant), *Medicine*; E. Parker, *Law*; (vacant), *Arts.*	
Organist, F. Iliffe, D.Mus., *St. John's*	1900
Clerk of the University, E. H. Bellamy	1900
Secretary to Delegates of—	
Examination of Schools, P. E. Matheson, M.A., *New Coll.*; A. W. Pickard-Cambridge, M.A., *Ball.*	
Extension of Teaching, J. A. R. Marriott, M.A., *New Coll.*	
Local Examinations, H. T. Gerrans, M.A., *Worcester.*	
University Museum, Prof. H. L. Bowman, D.Sc., *Magd.*	
University Press, C. Cannan, M.A., *Trinity.*	
Women Students, R. W. Jeffery, M.A., *Brasenose.*

1869	*Non-Coll.*	W. F. Reddaway, *Censor*	1907	—	—	—	31

* As so many undergraduates are on active service, any figures in this column would be misleading.

PROFESSORS	Elect.
Agricultural Botany, R. H. Biffen, M.A., *Cath.*	1908
Agriculture (*Drapers*), T. B. Wood, M.A., *Caius*	1907
Anatomy, A. Macalister, M.D., *St. John's*	1883
Ancient History, J. S. Reid, Litt.D., *Caius*	1899
Anglo-Saxon (*Elsington and Bosworth*), H. M. Chadwick, M.A., *Clare*	1912
Arabic (*Sir T. Adam's*), E. G. Browne, M.A., M.B., *Pemb.*	1902
Arabic (*Lord Almoner's*), A. A. Bevan, M.A., *Trin.*	1893
Archæology (*Disney*), W. Ridgeway, Sc.D., *Caius*	1913
Astronomy and Geometry (*Lowndean*), H. F. Baker, Sc.D., *St. John's*	1914
Astronomy (*Plumian*), A. S. Eddington, M.A., *Trin.*	1913
Astrophysics, H. F. Newall, M.A., *Trin.*	1909
Bio-Chemistry, F. G. Hopkins, M.A., *Trin.*	1915
Biology (*Quick*), G. H. F. Nuttall, Sc.D., *Magd.*	1915
Botany, A. C. Seward, M.A., *St. John's*	1906
Chemistry, W. J. Pope, M.A., *Sidney*	1908
Chinese, H. A. Giles, M.A., *Trin.*	1897
Civil Law (*Regius*), W. W. Buckland, M.A., *Caius*	1914
Divinity (*Regius*), V. H. Stanton, D.D., *Trin.*	1916
,, (*Lady Margaret's*), J. F. Bethune-Baker, D.D., *Pemb.*	1911
,, (*Norrisian*), F. C. Burkitt, M.A., *Trin.*	1905
,, (*Hulsean*), W. E. Barnes, D.D., *Pet.*	1901
,, (*Ely*), A. E. Brooke, D.D., *King's*	1916
Ecclesiastical History (*Dixie*) (vacant).	
English Literature (*King Edward VII*), Sir A. T. Quiller-Couch, M.A., *Jesus*	1912
Experimental Physics (*Cavendish*), Sir J. J. Thomson, O.M., M.A., *Trin.*	1884
Fine Art (*Slade*), E. S. Prior, M.A., *Caius*	1912
Genetics (*Arthur Balfour*), R. C. Punnett, M.A., *Caius*	1912
Geology (*Woodwardian*), T. McK. Hughes, M.A., *Clare*	1873
German (*Schröder*), K. Breul, Litt.D., *King's*	1910
Greek (*Regius*), H. Jackson, O.M., Litt.D., *Trin.*	1906
Hebrew (*Regius*), R. H. Kennett, D.D., *Queens'*	1903
International Law (*Whewell*), L. Oppenheim, M.A., *Trin.*	1908
Latin (*Kennedy*), A. E. Housman, M.A., *Trin.*	1911
Law (*Downing*), C. S. Kenny, LL.D., *Down.*	1907
Mathematics (*Lucasian*), Sir J. Larmor, M.A., M.P., *St. John's*	1903
Mechanism and Applied Mechanics, B. Hopkinson, M.A., *Trin.*	1903
Medicine (*Downing*), J. B. Bradbury, M.A., *Down.*	1894
Mental Philosophy and Logic, J. Ward, Sc.D., *Trin.*	1897
Mineralogy, W. J. Lewis, M.A., *Trin.*	1881
Modern History (*Regius*), J. B. Bury, M.A. *King's*	1902
Moral Philosophy (*Knightbridge*), W. R. Sorley, Litt.D., *King's*	1900
Music, Sir C. V. Stanford, Mus.D., *Trin.*	1887
Natural Philosophy (*Jacksonian*), Sir James Dewar, M.A., *Pet.*	1875
Pathology, G. Sims Woodhead, M.A., *Trin. H.*	1899

The New HAZELL, 1917

Elect.

Physic (*Regius*), Sir T. Clifford Allbutt, K.C.B., M.D. (*Caius*) 1892
Physiology, J. N. Langley, Sc.D., *Trin.* . 1903
Political Economy, A. C. Pigou, M.A., *King's* 1908
Pure Mathematics (*Sadlerian*), E. W. Hobson, Sc.D., *Christ's* 1910
Sanskrit, E. J. Rapson, M.A., *St. John's* . 1906
Surgery (vacant) . . . . . .
Zoology and Comp. Anat., J. S. Gardiner, M.A., *Caius* 1909
Hulsean Lecturer, Rev. A. S. Duncan-Jones, M.A., *Caius* 1916
Lady Margaret's Preacher, Rev. H. B. Swete, D.D., *Caius* 1916
Emeritus Professor of Civil Law, E. C. Clark, LL.D., *St. John's* 1913
Emeritus Professor of Divinity, H. B. Swete, D.D., *Caius* 1915

READERS

Agriculture, K. J. J. Mackenzie, M.A., *Christ's* 1915
Botany, F. F. Blackman, M.A., *St. John's* . 1904

Zoology, A. E. Shipley, Sc.D., *Christ's* . 1908

LECTURERS

Advanced Human Anatomy, (vacant).
Advanced Morphology of Vertebrates, H. Gadow, M.A., *King's*.
Advanced Physiology, L. E. Shore, M.D., *St. John's*.
Agriculture (*Gilbey*), C. R. Fay, M.A., *Christ's*.
Agricultural Physiology, F. H. A. Marshall, Sc.D., *Christ's*.
Ancient History, T. R. Glover, M.A., *St. John's*.
Aramaic, N. McLean, M.A., *Christ's*.
Astrophysics, F. J. M. Stratton, M.A., *Caius*.
Botany, A. G. Tansley, M.A., *Trin.*; R. P. Gregory, M.A., *St. John's*.
Chemistry, J. Fenton, Sc.D., *Christ's*.
Chemistry and Physics in their application to Hygiene and Preventive Medicine, J. E. Purvis, M.A., *St. John's*.
Classics (*Epigraphy and Dialects*), S. G. Campbell, M.A., *Christ's*.
Economics, W. T. Layton, M.A., *Caius*.
,, (*Girdlers'*), J. M. Keynes, M.A., *King's*.
Education, Theory, History, and Practice, (vacant).
Electrical Engineering, C. G. Lamb, M.A., *Clare*.
English, (vacant).
Experimental Physics, G. F. C. Searle, Sc.D., *Pet.*; C. T. R. Wilson, M.A., *Sid*.
Experimental Psychology, C. S. Myers, Sc.D., *Caius*.
Forestry, (vacant).
Form and Analysis in Music, C. B. Rootham, Mus.D., *St. John's*.
Geography, Historical and Economic, H. Y. Oldham, M.A., *King's*.
Geography, Regional and Physical (*Royal Geographical Society Lecturer*), P. Lake, M.A., *St. John's*.
Geology, J. E. Marr, Sc.D., *St. John's*.
German, E. C. Quiggin, M.A., *Caius*.
Harmony and Counterpoint, C. Wood, Mus.D., *Caius*.
Hygiene, G. S. Graham-Smith, M.D., *Pemb*.
Leslie Stephen, (vacant).
Mathematics, H. W. Richmond, M.A., *King's*; R. A. Herman, M.A., *Trin.*; T. J. I'A. Bromwich, Sc.D., *St. John's*; J. H. Grace, M.A., *Pet.*; A. Berry, M.A., *King's*.
Mathematics (*Cayley Lecturer*), G. H. Hardy, M.A., *Trin.*
Mechanical Engineering, C. E. Inglis, M.A., *King's*.
Medical Jurisprudence, (vacant).
Moral Science, G. E. Moore, Litt.D., *Trin.*
Moral Science (*Sidgwick Lecturer*), W. E. Johnson, M.A., *King's*.
Norman Maccoll, H. Thomas, D.Litt. (*Birmingham*).
Organic Chemistry, (vacant).
Palæography, E. H. Minns, M.A., *Pemb*.
Palæozoology, H. Woods, M.A., *St. John's*.
Pastoral Theology, J. H. Greig, B.D., *Pemb*.
Pathology, L. Cobbett, M.D., *Trin*.
Persian, R. A. Nicholson, Litt.D., *Trin*.
Petrology, A. Harker, M.A., *St. John's*.
Pharmacology, W. E. Dixon, M.A., *Down*.
Philosophy of Religion, (vacant).
Physical Anthropology, W. L. H. Duckworth, M.D., Sc.D., *Jesus*.
Physical Chemistry (*Humphrey Owen Jones Lecturer*), A. V. Hill, M.A., *Trin*.
Physiology, W. B. Hardy, M.A., *Caius*.
Physiology of the Senses, (vacant).
Russian, A. P. Goudy, M.A.
Sir Robert Rede's, R. T. Glazebrook, C.B., M.A., *Trinity*.
Special Pathology (*Huddersfield Lecturer*), T. S. P. Strangeways, M.A., *St. John's*.
Statistics, G. U. Yule, M.A., *St. John's*.
Surveying and Cartography (*Royal Geographical Society Lecturer*), C. S. Wright, B.A., *Caius*.
Zoology, L. A. Borrodaile, M.A., *Selwyn*; L. Doncaster, Sc.D., *King's*.

UNIVERSITY SCHOLARSHIPS

Abbott, not awarded.
Allen, F. Kidd, M.A., *St. John's*.
Bell, not awarded.
Charles Oldham (*Classical*), J. C. Howe, B.A., *Pemb*.
,, ,, (*Shakespeare*), not awarded.
Craven, (1) R. A. L. Fell, *Trin.*; (2) not awarded.
Crosse, not awarded.
Harkness, H. Thomas, B.A., *Pet*.
Lightfoot, G. N. L. Hill, B.A., *St. John's*.
Porson, not awarded.
Squire in Law (*Rebecca Flower*), K. N. Hillson.
Stewart of Rannoch (*Greek and Latin*), (R) H. O. Lee, *Jesus*; (O) M. P. Charlesworth, *Jesus*.
,, ,, (*Sacred Music*), not awarded.
,, ,, (*Hebrew*), (O) C. E. Mott, *St. John's*.
Tiarks (*German*), F. W. Stokoe, B.A., *Caius*.
Tyrwhitt (*Hebrew*), not awarded.
Whewell International Law, *re-elected*, P. Quass, B.A., *St. John's*.

UNIVERSITY STUDENTSHIPS

Benn W. Levy, H. M. Spiers, B.A., *Caius*.
Craven, E. S. Carr, B.A., *Trinity*.
Frank Smart, G. E. Briggs, B.A., *St. John's*.
John Lucas Walker, W. H. Harvey, M.A., *Christ's*.
Prendergast, not awarded.
Isaac Newton, F. P. White, B.A., *St. John's*; *re-elected*, H. Jeffreys, B.A., *St. John's*.

UNIVERSITY PRIZES

Adam Smith, no exercise sent in.
Bhaonagar Medal, S. P. Shah, B.A., LL.B., *Jesus*.
Browne, Sir W.—Medals:
Greek Epigram, not awarded.
Latin Epigram, no exercise sent in.
Latin Ode, no exercise sent in.
Greek Ode, not awarded.
Burney, not awarded.
Carus, Undergraduate, C. N. Jolly, *Peterhouse*.
Chancellor's Medals: Classics, (1) not awarded; (2) J. C. Howe, B.A., *Pembroke*.
English, not awarded; *Law*, S. N. Grant-Bailey, *Caius*.
Evans, no candidate.
Frank Smart, C. P. Dutt, *Queens'* (Botany); M. A. Husain, *Christ's* (Zoology).
Gedge, F. Kidd, M.A., *St. John's*.
George Long, J. W. Jones, *Emmanuel*.
George Williams, no candidates.
Gladstone, not awarded.
Hebrew, not awarded.
Hebrew (Mason), not awarded.
Hulsean, not awarded.
Jeremie, not awarded.
Kaye, not awarded.
Le Bas, not awarded.
Maitland, A. J. S. Macdonald, M.A., *Trinity*.
Members (Latin), no candidates; (English), not awarded.
Montagu Butler, no candidate.
Porson, not awarded.
Prince Consort, W. F. W. Mortlock, B.A., *Trinity*.
Rayleigh, W. M. Smart, B.A., *Trinity*.
Raymond Horton Smith, E. Mellanby, M.A., M.D., *Emman*.
Scholefield, not awarded.
Seatonian, J. M. V. Hope, M.A., *Clare*.
Sedgwick, no essay received.
Smith: (1) H. M. Garner, B.A., *St. John's*; (2) G. P. Thomson, B.A., *Corpus*.
Tyson Medal, not awarded.
Wiltshire, not awarded.
Wimbolt, no essay sent in.
Winchester: (1) W. S. A. Robertson, *Queens'*; (2) C. C. R. Downing, *Pemb.*, F. P. N. Parsons, *Pemb., æq.*
York, not awarded.
Bendall Sanskrit Exhibition, no candidate.

THE UNIVERSITY OF LONDON

South Kensington, S.W.

1836 and 1900

Visitor, H. M. the King in Council.
Chancellor, Rt. Hon. Earl of Rosebery, K.G., K.T., D.C.L., LL.D., F.B.A., F.R.S.
Vice-Chancellor, Sir Alfred Pearce Gould, K.C.V.O., M.S., M.B., F.R.C.S.
Chairman of Convocation, Sir Edward Hy. Busk, M.A., LL.B.
Principal Officer, (vacant).
Academic Registrar, P. J. Hartog, M.A., B.Sc.
Registrar of Council for External Students, G. F. Goodchild, M.A., B.Sc.
Registrar, University Extension Board, John Lea, M.A.
Secretary to Senate, Percy M. Wallace, M.A.
Sec. to Finance Committee, Wm. Kirkpatrick Hill, B.A.
Supt. of Exams., Robin Roscoe, B.A.
Goldsmiths' Librarian, R. A. Rye.
Esquire Bedell, H. E. Vincent, M.D., B.S.
Clerk of Convocation, R. J. W. Hurd, LL.D.
Representative in Parliament, Sir Philip Magnus, B.A., B.Sc.
Public Orator, (vacant).

THE SENATE

The Chancellor, The Vice-Chancellor, The Chairman of Convocation. *By H.M. in Council*, Rt. Hon. F. D. Acland, Hon. W. P. Reeves, Prof. A. Schuster, Dr. W. C. Unwin. *By Convocation*—(*Divinity*), Rev. J. A. Douglas; (*Arts*) Miss E. C. Higgins, Prof. S. L. Loney, Lord Moulton, Sir A. K. Rollit, Rev. H. B. Workman; (*Laws*) Lord Cozens-Hardy; (*Music*) C. B. Edgar; (*Medicine*) Prof. Sir Thos. Barlow, Dr. E. G. G. Little; (*Science*) Dr. M. O. Forster, Dr. C. W. Kimmins, Sir Philip Magnus, Dr. G. T. Moody, Dr. R. M. Walmsley, Dr. S. R. Wells. *By Royal College of Physicians*, Sir Seymour J. Sharkey, Dr. F. Taylor. *By Royal College of Surgeons*, Prof. Sir Rickman Godlee, Sir Alfred Pearce Gould. *Co-opted to represent University College*, Dr. T. Gregory Foster, Lord Reay. *Co-opted to represent King's College*, Dr. R. M. Burrows. *By King's College (Theological Depart.)*, T. B. Saunders. *By Lincoln's Inn*, N. Micklem, K.C. *By Inner Temple*, Lord Justice Swinfen Eady, *By Middle Temple*, R. A. McCall, K.C. *By Gray's Inn*, Mr. Justice Atkin. *By Law Society*, J. W. Budd, Sir Henry J. Johnson. *By Corporation of London*, J. R. Pakeman. *By London County Council*, Sir W. J. Collins, Cyril Jackson. *By City and Guilds of London Institute*, R. C. Palmer. *By the Faculties:* (*Theology*) Rev. Prof. S. W. Green; (*Arts*) Rev. Prof. A. Caldecott, Prof. M. J. M. Hill, Prof. W. P. Ker, Miss M. J. Tuke; (*Laws*) G. H. J. Hurst; (*Music*) Prof. Sir Frederick Bridge; (*Medicine*) Prof. F. N. Andrewes, Sir E. C. Perry, H. J. Waring; (*Science*) J. L. S. Hatton, Prof. H. Jackson, Prof. A. D. Waller, Prof. W. W. Watts; (*Engineering*) Prof. W. E. Dalby; (*Economics*) Prof. Graham Wallas.

ORGANISATION OF TEACHING

The teaching of the University is organised under three categories:—(1) that conducted by the University itself; (2) that conducted by the several "Schools of the University"; (3) that conducted at the other Institutions at which there are "Recognised Teachers of the University." On Jan. 1, 1907, University College was transferred to the University, of which it now forms an integral part, having faculties of Arts, Laws, Medicine, Science, Engineering, and Economics. On Jan. 1, 1910, King's College was in respect of all its departments except that of Theology, transferred to the University, of which it now forms an integral part, but is divided into two separate institutions, viz.:—(*a*) "King's College" (in the Faculties of Arts, Laws, Medicine, Science, Engineering, and Economics) and (*b*) "King's College for Women" (in the Faculties of Arts and Science). The Theological Department of the College remains a "School of the University" in the Faculty of Theology. Other Institutions maintained by the University are the Brown Animal Sanatory Institution in Wandsworth Road, the Physiological Laboratory in the University buildings at South Kensington, Goldsmiths' College at New Cross, and the Francis Galton Laboratory for National Eugenics at University College.

TEACHING STAFF

Accounting and Business Organisation, L. R. Dicksee, M. Com., F.C.A.
Agricultural Zoology, F. V. Theobald, M.A.

Anatomy, E. Barclay-Smith, M.D.; J. E. S. Frazer, F.R.C.S.; F. W. Jones, D.Sc.; F. G. Parsons, F.R.C.S.; G. D. Thane, LL.D.; William Wright, D.Sc.
Applied Mathematics and Mechanics (*Goldsmid*), L. N. G. Filon, D.Sc., F.R.S.
Applied Physics, (vacant).
Archæology (*Yates*), E. A. Gardner, Litt.D.
Architecture, F. M. Simpson, F.R.I.B.A.
Babylonian and Assyrian Archæology, L. W. King, Litt.D.
Bacteriology, William Bulloch, M.D.; R. T. Hewlett, M.D.
Biochemistry, Arthur Harden, D.Sc., F.R.S.
Botany, Miss M. J. Benson, D.Sc.; W. B. Bottomley, Ph.D.
Botany (*Quain*), F. W. Oliver, D.Sc., F.R.S.
Chemistry, A. W. Crossley D.Sc., F.R.S.; J. T. Hewitt, D.Sc., F.R.S.; T. M. Lowry, D.Sc., F.R.S.; T. S. Moore, M.A.
Chemistry (*Daniel*), H. Jackson, F.I.C.
Chemistry (*General*), F. G. Donnan, Ph.D., F.R.S.
Chemistry (*Organic*), J. Norman Collie, LL.D., F.R.S.
Civil Engineering, A. H. Jameson, M.Sc., M.I.C.E.
Civil and Mechanical Engineering, E. G. Coker, D.Sc., F.R.S.; E. H. Lamb, M.Sc.
Classical Literature, W. C. Flamstead Walters, M.A.
Commerce, A. J. Sargent, M.A.
Comparative Law (*Quain*), Sir John Macdonell, K.C.B., LL.D., F.B.A.
Comparative Philology, (vacant).
Constitutional Law, J. H. Morgan, M.A.
Education, John Adams, LL.D.; J. W. Adamson, B.A.; T. P. Nunn, D.Sc.
Egyptology (*Edwards*), W. M. Flinders Petrie, D.C.L., F.B.A. F.R.S.
Electrical Engineering, J. A. Fleming, D.Sc., F.R.S.
ditto (*Williams Siemens*), Ernest Wilson, M.I.E.E.
Engineering, D. S. Capper, M.A.; W. E. Dalby, B.Sc., F.R.S.
English History, A. F. Pollard, Litt.D.
English Lang. and Lit., I. Gollancz, Litt.D.; Sir Sidney Lee, Litt.D., F.B.A.
ditto (*Quain*), W. P. Kerr, LL.D., F.B.A.
English Literature, Miss C. F. E. Spurgeon.
Ethnology, C. G. Seligman, M.D.
Eugenics (*Galton*), Karl Pearson, LL.D., F.R.S.
Experimental Pathology, C. J. Martin, D.Sc., F.R.S.; Sir Almroth E. Wright, M.D., F.R.S.
Fine Art (*Slade*), Frederick Brown.
French and Romance Philol. (*Fielden*), L. M. Brandin, Ph.D.
French Literature, G. Rudler, D.-ès-L.
Geology (*Yates-Goldsmid*), E. J. Garwood, Sc.D., F.R.S.
German, R. C. Priebsch, Ph.D.; J. G. Robertson, Ph.D.
Greek, J. A. Platt, M.A.
Hygiene (*Chadwick*), H. R. Kenwood, M.B.
Hygiene and Public Health, W. J. R. Simpson, C.M.G., M.D.
Latin, H. E. Butler, M.A.; D. A. Slater, M.A.
Mathematics, H. Hilton, D.Sc.; J. W. Nicholson, D.Sc.; S. A. F. White, M.A.
ditto (*Astor*), M. J. M. Hill, Sc.D., F.R.S.
Mediæval History, F. J. C. Hearnshaw, LL.D.
Metallurgy, A. K. Huntington, A.R.S.M.
Modern French History and Institutions, P. J. Mantoux, D.-ès-L.
Modern History, (vacant).
Morbid Anatomy, S. G. Shattock, F.R.C.S.
Municipal Engineering (*Chadwick*), E. R. Matthews, A.M.Inst.C.E.
Music (*King Edward*), Sir Frederick Bridge, C.V.O., Mus. Doc.
Pathology, F. W. Andrewes, M.D.
Pharmaceutics, H. G. Greenish, F.I.C.
Pharmacology, A. R. Cushny, LL.D., F.R.S.
Philosophy of Mind and Logic (*Grote*), C. E. Spearman, Ph.D.
Physics (*Quain*), W. H. Bragg, D.Sc., F.R.S.
ditto (*Wheatstone*), O. W. Richardson, D.Sc., F.R.S.
Physiology, F. A. Bainbridge, M.D., D.Sc.; E. P. Cathcart, M.D.; W. D. Halliburton, M.D., F.R.S.
ditto (*Jodrell*), E. H. Starling, M.D., F.R.S.
Physiology (*and Director of the Physiological Laboratory*), A. D. Waller, M.D., F.R.S.
Physiology, General, W. M. Bayliss, D.Sc., F.R.S.
Political Economy, E. Cannan, LL.D.; H. S. Foxwell, M.A., F.B.A.
Political Science, Graham Wallas, M.A.
Protozoology, (vacant).
Public Administration, S. J. Webb, LL.D.
Sculpture, J. H. Thomas, M.A.
Sociology (*Martin White*), L. T. Hobhouse, D.Litt.; E. A. Westermarck, Ph.D.
Spanish Language and Lit. (*Cervantes*), J. Fitzmaurice-Kelly, Litt.D., F.B.A.
Town Planning, S. D. Adshead, M.A., F.R.I.B.A.
Veterinary Pathology and Bacteriology, Sir John McFadyean, LL.D.
Zoology, Arthur Dendy, D.Sc., F.R.S.
Zoology and Comparative Anatomy (*Jodrell*), J. P. Hill, D.Sc., F.R.S.

READERS

Anatomy, (vacant).
Ancient History, M. O. B. Caspari, M.A.; J. K. Fotheringham, D.Litt.
Applied Physiology, G. A. Buckmaster, M.D.

Mycology, E. S. Salmon.
Palæography and Economic History, Hubert Hall, F.S.A.
Pathology, L. S. Dudgeon, F.R.C.P.; Wm. Hunter, M.D.
Pharmacology, Fred Ransom, M.D.
Phonetics, Daniel Jones, M.A.
Physical Chemistry, J. F. Spencer, D.Sc.
Physiological Chemistry, J. A. Gardner, M.A.; R. H. A. Plimmer, D.Sc.
Physiology, Miss W. C. Cullis, D.Sc.; J. S. Edkins, Sc.D.; F. S. Locke, M.D.; M. S. Pembrey, M.D.; H. E. Roaf, D.Sc.
Plant Physiology, T. G. Hill, A.R.C.S.
Psychology, Wm. Brown, D.Sc.; Miss Beatrice Edgell, Ph.D.
Surveying, M. T. M. Ormsby, A.R.C.S.

Theory and Practice of Heat Engines, W. J. Goudie, B.Sc.
Thermodynamics, A. W. Porter, B.Sc., F.R.S.
Tibetan Language, F. W. Thomas, Ph.D.
Veterinary Hygiene, G. H. Wooldridge, F.R.C.V.S.
Zoology, H. W. M. Tims, M.D.

RECOGNISED TEACHERS

The number of "Recognised Teachers" (recognised by the Senate as conducting work of University standard) in the several Faculties is as follows:—

Theology 24; *Arts* 161; *Laws* 14; *Music* 22; *Medicine* 314; *Science* 209; *Engineering* 71; *Economics* 12.

DEANS OF THE FACULTIES

Theology, Rev. P. T. Forsyth, D.D.
Arts, Prof. W. P. Ker, LL.D.
Laws, Prof. A. F. Murison, LL.D.
Music, Sir Walter Parratt, M.V.O., Mus.Doc.
Medicine, Sir Bertrand S. Dawson, K.C.V.O., M.D.
Science, Prof. Herbert Jackson, F.I.C., F.C.S.
Engineering, Dr. H. C. H. Carpenter.
Economics, Hon. W. Pember Reeves, Ph.D.

STUDENTS

During the year 1915–16 the number of persons who entered the University, either by the Matriculation Examination or otherwise, was 3,650. The Internal Students of the University number (1916) 3,617.

SCHOOLS OF THE UNIVERSITY

In the Faculty of Theology :—
New College, Hampstead (Congregational)—*Principal*, Rev. A. E. Garvie, D.D.
Hackney College, Hampstead (Congregational)—*Principal*, Rev. P. T. Forsyth, D.D.
Regent's Park College, N.W. (Baptist)—*Principal*, Rev. G. P. Gould, D.D.
King's College (Theological Department), Strand, W.C. (Church of England)—*Dean*, Rev. A. Caldecott, D.D.
Wesleyan College, Richmond (Wesleyan Methodist)—*Principal*, Rev. W. T. Davison, D.D.
St. John's College, Highbury (Church of England)—*Principal*, Rev. A. W. Greenup, D.D.

Arts, Science and Engineering :—
East London College, Mile End Road, E.—*Principal*, J. L. S. Hatton, M.A.

Arts and Science :—
Royal Holloway College, Englefield Green—*Principal*, Miss Ellen C. Higgins, B.A.
Bedford College for Women, Regent's Park, N.W.—*Principal*, Miss M. J. Tuke, M.A.

Arts :—
Westfield College, Hampstead, N.W.—*Principal*, Miss A. de Sélincourt.
London Day Training College, Southampton Row, W.C. (in Pedagogy only)—*Principal*, Prof. J. Adams, LL.D.

Medicine :—
The medical schools of various hospitals as given on p. 284.

Science and Engineering :—
Imperial College of Science and Technology (see p. 288).

Science :—
South-Eastern Agricultural College, Wye, Kent (in Agriculture only)—*Principal*, M. J. R. Dunstan, M.A., F.R.S.E.

Economics and Political Science :—
London School of Economics and Political Science, Clare Market, Kingsway, W.C.—*Director*, Hon. W. P. Reeves, Ph.D.

University College, London, was founded 1826, incorporated as "University College, London," by Royal Charter 1836, and reincorporated with additional powers in 1869. The College was incorporated in the University of London by the University College (London) Transfer Act, 1905, and from Jan. 1, 1907, transferred to the University of which it now forms an integral part. To enable the College to carry out its University functions with adequate buildings and endowments, a sum estimated at about £800,000 is required. The Hon. Rupert Guinness is Treasurer of the Appeal Committee. The College provides instruction in the faculties of Arts (including Fine Art), Laws, Science, Engineering, Economics, and Medical Sciences. The classes in Arts, Fine Art, Law, Science, and Economics are open to men and women. The College possesses seven museums, including the *Edwards Museum of Egyptology*; the hall under the dome contains the Flaxman sculptures. *Chairman*, Right Hon. Lord Reay, K.T., G.C.S.I. *Provost*, T. Gregory Foster, Ph.D.; *Secretary*, Walter W. Seton, M.A., D.Litt., Gower Street, W.C. *King's College, London* (Strand, W.C.). Established by Royal Charter Aug. 14, 1829, opened 1831; charter annulled by Act of Parliament May 19, 1882, and College re-incorporated for the purpose of "giving instruction in literature, science, and the doctrines and duties of Christianity, as the same are inculcated by the Church of England." By the Amending Act 1903 *all religious tests* as qualification for office in the College or on the Council were *removed*, except in the case of Professors and Lecturers in the faculty of Theology. By the King's College London (Transfer) Act, 1908, important changes were made. The College (apart from the Theological Faculty, which remains under the Council) was incorporated in the University. This took place on Jan. 1, 1910. The Hospital and Advanced Medical School were entirely separated from the College on Sept. 1, 1909. King's College School was removed to Wimbledon Common in 1897, but remained under the Council of King's College as its governing body until June 1911, when it became a separate corporation under its own governing body. The Strand School has been taken over by the London County Council and removed to Brixton. The work of the College is carried on in six faculties—theology, arts, law, science, science (medical), and engineering. There are evening classes in most subjects. The College prepares for the degrees of the University of London. *Principal of King's College*, Ronald M. Burrows, D.Litt.; *Dean*, Rev. A. Caldecott, D.D.; *Secretary*, Walter Smith; *Warden of King's College for Women* (vacant).

THE UNIVERSITY OF DURHAM. 1832

Comprises University College (1837), Bishop Hatfield's Hall (1846), St. Chad's Hall (1809), St. John's Hall (1809), and the Women's Hostel (1899) at Durham, the Durham College of Medicine (1851) and Armstrong College (1871) at Newcastle-upon-Tyne. Unattached students first admitted 1871. Affiliated are Codrington College, Barbados, and Fourah Bay College, Sierra Leone.

Chancellor, the Duke of Northumberland, K.G.
Vice-Chancellor, W. H. Hadow, M.A., Mus.D.
President of the Council of the Durham Colleges, J. S. G. Pemberton, D.C.L.

President of the College of Medicine, Sir G. H. Philipson, M.A., M.D., D.C.L., LL.D.
Principal of Armstrong College, W. H. Hadow, M.A., Mus.D.
Proctors, P. P. Bedson, D.Sc.; A. Robinson, D.C.L.
Registrar, H. G. Theodosius, M.A.
Librarian, E. V. Stocks, M.A.
Hon. Director of the Observatory, Col. E. H. Hills, D.Sc., F.R.S.
Observer, F. C. H. Carpenter, M.A., F.R.A.S.

DURHAM COLLEGES

Divinity, R. J. Knowling, D.D.
Greek, A. H. Cruickshank, M.A.
Mathematics, P. J. Heawood, M.A.
Hebrew, Ven. H. W. Watkins, D.D.
Music, J. C. Bridge, D.Mus.
Modern History (Hon.), Very Rev. H. H. Henson, D.D.
Church History, H. Gee, D.D.
Philosophy, F. B. Jevons, D.Litt.
Biblical Exegesis, D. Walker, D.D.
English, H. Ellershaw, M.A.
Latin, J. H. How, M.A.
Logic, A. Robinson, D.C.L.
Modern Languages, C. F. Herdener, M.A.

COLLEGE OF MEDICINE, NEWCASTLE

Principles and Practice of Medicine, Sir G. H. Philipson, M.D., D.C.L.; D. Drummond, M.D., D.C.L.; Sir T. Oliver, M.D., LL.D.
Psychological Medicine, T. W. McDowall, M.D.
Surgery, J. R. Morison, M.D.; H. B. Angus, M.B., M.S.

Education, M. R. Wright, M.A.

THE VICTORIA UNIVERSITY OF MANCHESTER

Founded and incorporated by royal charter 1880 and reconstituted 1903, grew out of Owens College, Manchester, which was established 1851. John Owens, a Manchester manufacturer, vexed with the tests at the Universities, bequeathed, on his death in 1846, £96,654 for the purpose of founding this college. In 1880 the College became the first college of Victoria University. There are five halls of residence—the Hulme Hall, the Dalton Hall, and Lister House for men only, and two for women. Grants techinical, commercial, and other certificates, teaching diplomas and diplomas in Psychological Medicine, Public Health, Veterinary State Medicine, Dentistry, and Education to properly qualified candidates.

Chancellor, The Right. Hon. the Viscount Morley of Blackburn, O.M.
Vice-Chancellor, Sir Henry Alex. Miers, D.Sc., F.R.S.
Registrar, Edward Fiddes, M.A.
Bursar, Sydney Chaffers, M.A.

DEANS OF FACULTIES

Arts, Prof. A. Johannson.
Science, Prof. J. E. Petavel.
Law, Prof. J. S. Seaton.
Music, Dr. J. Kendrick Pyne.
Commerce, Prof. S. J. Chapman.
Theology, Rev. J. T. Marshall.
Technology, J. C. M. Garnett.
Medicine, Prof. Elliot Smith.
Education, Prof. Findlay.

PROFESSORS

Mathematics, H. Lamb, Sc.D., F.R.S.
Physiology, Wm. Stirling, M.D.
Chemistry, H. B. Dixon, Ph.D., F.R.S.
Med. and Ecclesiastical History, T. F. Tout, M.A.
Public Health and Bacteriology, A. S. Delépine, M.B.
Botany, F. E. Weiss, D.Sc.

THE UNIVERSITY OF LEEDS

Leeds (1904)

Constituted by royal charter April 25, 1904. It grew out of the Yorkshire College, Leeds, which was merged in the university by the University of Leeds Act of the same year. The Leeds School of Medicine, which became the Medical Department of the Yorkshire College, was established in 1831. The Yorkshire College was founded in 1874, and formed part of the Victoria University from 1887 to 1903. The University gives teaching and degrees in arts, science, medicine, surgery, dental surgery, laws, and commerce. Special instruction

is given in civil, mechanical, electrical, mining and gas engineering, metallurgy, fuel, analytical chemistry, cloth manufacture, dyeing, leather manufacture, and agriculture. Last session there were 699 registered students, including 97 students in the school of medicine, but excluding 103 evening students.

Chancellor, The Duke of Devonshire, K.G., G.C.M.G., G.C.V.O., LL.D.
Pro-Chancellor, A. G. Lupton, LL.D.
Vice-Chancellor, M. E. Sadler, C.B., Litt.D., LL.D.
Pro-Vice-Chancellor, (vacant).
Treasurer, The Rt. Hon. Lord Allerton, LL.D., F.R.S.
Dean of the Faculty of Arts, Prof. C. M. Gillespie, M.A.
Dean of the Faculty of Science, Prof. J. B. Cohen, B.Sc., Ph.D., F.R.S.
Dean of the Faculty of Technology, Emeritus Prof. H. R. Procter, D.Sc., F.I.C.
Dean of the Faculty of Medicine, Prof. de Burgh Birch, M.D.
Accountant, G. R. Brench.
Clerk to the Senate, F. T. Baines, B.A.
Secretary, A. E. Wheeler.

UNIVERSITY OF SHEFFIELD. 1905

A University Charter was granted to University College, Sheffield, on May 31, 1905. The University College of Sheffield was incorporated by Royal Charter in 1897, and was formed by the amalgamation of Firth College, founded by Mark Firth, Esq., in 1879; the Sheffield School of Medicine, founded 1828; and the Sheffield Technical School. The University includes Faculties of Arts, Pure Science, Medicine, Applied Science, and Law, and has power to constitute other Faculties. It is a teaching and examining university. Diplomas in Modern Language Teaching, Education, Public Health, Coal Mining, Architecture, Domestic Science, and in Glass Technology are also awarded, as well as Associateships in Engineering and in Iron and Steel Metallurgy, and Non-ferrous Metallurgy, and a certificate in Architecture. The University, situate in the midst of the steel industry, specialises in Metallurgy and Engineering.

Chancellor, His Grace the Duke of Norfolk, E.M., K.G., Litt.D.
Pro-Chancellors, Sir George Franklin, Litt.D., J.P.; H. K. Stephenson, J.P.
Vice-Chancellor, H. A. L. Fisher, LL.D., F.B.A.
Treasurer, A. J. Hobson, J.P.
Deans, (*Arts*) J. A. Green; (*Pure Science*) Prof. W. P. Wynne; (*Medicine*) J. B. Leathes; (*Applied Science*) Prof. W. Ripper; (*Law*) W. F. Trotter.
Registrar, W. M. Gibbons, M.A.
Librarian, A. P. Hunt, B.A.
Auditors, Joshua Wortley & Sons.
Tutor for Women Students, Mary J. Sorby.

PROFESSORS

Law, W. F. Trotter, M.A., LL.M.

UNIVERSITY OF BRISTOL. 1909

Constituted by Royal Charter May 24, 1909. It took over the former University College, Bristol, and the Society of Merchant Venturers undertook the provision and maintenance of the Faculty of Engineering. The Bristol Medical School, established in 1828, had been previously merged in the University College.

Chancellor, The Rt. Hon. Viscount Haldane of Cloan, LL.D.
Pro-Chancellors, The Rt. Rev. The Lord Bishop of Hereford, D.D., LL.D.; The Rt. Hon. Lewis Fry, LL.D.; The Right Hon. Henry Hobhouse, LL.D.; George A. Wills, LL.D.

Vice-Chancellor, Sir Isambard Owen, D.C.L., M.D.

Normal Mistress, Miss Bird, L.L.A.

READING—UNIVERSITY COLLEGE

Principal, W. M. Childs, M.A.
Registrar, F. H. Wright, M.A.

SOUTHAMPTON—UNIVERSITY COLLEGE

Principal, Alex. Hill, M.A., M.D., F.R.C.S.
Registrar, D. Kiddle.

WALES

The University of Wales. 1893

A federal teaching University. The charter passed under the Great Seal on Nov. 30, 1893. A supplemental charter was granted in 1906. An annual grant of £4,000 is allowed by the Treasury and an additional grant of £1,500 for Fellowships.
Chancellor, H.M. the King.
Senior Deputy Chancellor, The Rt. Hon. Lord Kenyon, K.C.V.O.
Vice-Chancellor, Principal E. H. Griffiths, D.Sc., F.R.S. (University College, Cardiff).
Treasurer, Lieut.-Gen. Sir J. Hills-Johnes, G.C.B., V.C.
Warden of the Guild of Graduates, Prof. A. H. Trow, Sc.D.
Clerk of the Guild, Prof. W. Jenkyn Jones, M.A.
Registrar, J. Mortimer Angus, M.A. (University Registry, Cathays Park, Cardiff.)

I. UNIVERSITY COLLEGE OF WALES—Aberystwyth (1872)

Principal, Thomas Francis Roberts, LL.D.
Registrar, J. H. Davies, M.A.
Librarian, J. D. Williams, B.A.
Warden: Hostel for Men Students, H. H. Paine, M.A., B.Sc.
Warden: Hall of Residence for Women Students, Miss C. P. Tremain, B.A.

PROFESSORS

Greek, J. W. Marshall, M.A.
Latin, E. Bensly, M.A.
English, J. W. H. Atkins, M.A.
French Lang., and Lit. and Romance Philol., J. L. André Barbier, L.-ès-L.
History, E. Edwards, M.A.
Colonial History, T. Stanley Roberts, M.A.
Philosophy, W. Jenkyn Jones, M.A.
Education, Foster Watson, M.A., D.Litt.; C. R. Chapple, M.A.
Political Science, E. A. Lewis, M.A., D.Litt., D.Sc.
Mathematics (Pure) R. W. Genese, M.A.
Mathematics (Applied), G. A. Schott, D.Sc.
English Law, T. Arthur Levi, M.A., B.C.L., LL.B.
Physics, D. Morgan Lewis, M.A.
Chemistry, Alexander Findlay, M.A., D.Sc., Ph.D.
Zoology, H. J. Fleure, D.Sc.
Botany, J. Lloyd Williams, D.Sc.
Geology, O. T. Jones, M.A., D.Sc.
Agriculture, C. Bryner Jones, M.Sc.
Agric. Botany, R. G. Stapledon, M.A. (Advisory Botanist).
Agricultural Surveying, Drawing and Building Construction, G. T. Bassett, A.R.I.B.A.
Music, (vacant).

II. UNIVERSITY COLLEGE OF NORTH WALES—Bangor (1884)

Principal, Sir Harry R. Reichel, M.A., LL.D.
Registrar, J. E. Lloyd, M.A.
Warden of Women Students and Head Hostel, Miss Muriel O. Davis.

PROFESSORS

Greek, T. Hudson Williams, M.A., D.Litt.
Latin, Edward V. Arnold, Litt.D.
English, W. Lewis Jones, M.A.
Welsh, J. Morris Jones, M.A.
French, O. H. Fynes-Clinton, M.A.
German, E. L. Milner-Barry, M.A.
Semitic Languages, T. Witton Davies, Ph.D., D.D.
History, John Edward Lloyd, M.A.
Constitutional History, Sir H. R. Reichel, M.A., LL.D.

Logic, Philos. and Pol. Econ., James Gibson, M.A.
Mathematics, G. H. Bryan, Sc.D., F.R.S.
Physics, E. Taylor Jones, D.Sc.
Chemistry, Kennedy J. P. Orton, M.A., Ph.D., F.I.C.
Botany, Reginald W. Phillips, M.A., D.Sc.
Zoology, Philip J. White, M.B., F.R.S.E.
Agriculture, R. G. White, M.Sc.
Forestry, Fraser Story, F.R.S.E.
Education, R. L. Archer, M.A.

III. UNIVERSITY COLLEGE OF SOUTH WALES AND MONMOUTHSHIRE

Cardiff (1883)

Principal, E. H. Griffiths, M.A., Sc.D.
Registrar, D. J. A. Brown.

PROFESSORS

Greek, Gilbert Norwood, M.A.
Latin, O. L. Richmond, M.A.
Logic and Philos., H. J. W. Hetherington, M.A.
Political Science, W. J. Roberts, M.A.
English, Harold Littledale, M.A., D.Litt.
History, Herbert Bruce, M.A.
Pure and Applied Maths., R. H. Pinkerton, M.A.
Pure Mathematics, D. G. Taylor, M.A.
Welsh, Thomas Powel, M.A.
French, Paul Barbier.
Physics, A. L. Selby, M.A.
Chemistry, C. M. Thompson, M.A., D.Sc., F.C.S.; E. P. Perman, D.Sc., F.C.S.
Zoology, W. N. Parker, Ph.D., F.Z.S.
Botany, A. H. Trow, D.Sc., F.L.S.
Geology, T. Franklin Sibly, D.Sc., F.G.S.
Human Anatomy, David Hepburn, V.D., M.D., C.M., F.R.S.E.
Physiology, J. B. Haycraft, M.D., D.Sc., F.R.S.E.
Pathology and Bacteriology, E. Emrys-Roberts, M.D.
Engineering, Frederic Bacon, M.A., A.M.I.E.E.
Metallurgy, A. A. Read, D.MET., F.I.C., F.C.S.
Education, Wm. Phillips, M.A.; Barbara Foxley, M.A.
Music, David Evans, Mus.Doc.

Lampeter

ST. DAVID'S COLLEGE

Principal, G. C. Joyce, D.D.

PROFESSORS

Theology and Greek, The Principal.
Mathematics and Physical Science, A. W. Scott, M.A., *Bursar*.
Latin, G. W. Wade, D.D., *Librarian*.
English and Philosophy, H. Walker, LL.D.
Theology and Hebrew, E. T. Green, M.A.
Welsh, R. H. Richards, M.A.

[Lampeter possesses by Charter the privilege of conferring degrees of B.A. and B.D., and is affiliated to Oxford and Cambridge.]

UNIVERSITY OF ST. ANDREWS. 1411

The most ancient of the universities of Scotland. It included three separate colleges and corporations: (1) *St. Salvator's* (1450), (2) *St. Leonard's* (1512), and (3) *St. Mary's* (1537). In 1747 the two first-named were united and took the faculties of arts, science, and medicine, forming thereafter the United College of St. Salvator and St. Leonard; *St. Mary's* was, and is, devoted to theology. *University College, Dundee* (founded in 1880), was affiliated to and made to form part of the University of St. Andrews by an ordinance which received the approbation of Her Majesty Jan 15, 1897. The diploma and title of *L.L.A.* is granted to women. In Oct. 1892 the classes of the University and also the degrees of the University were thrown open to women.

Chancellor, Lord Balfour of Burleigh
Vice-Chancellor and Principal, Rev. John Herkless, D.D. £1,875
Rector, Marquess of Aberdeen
Sec. and Registrar, Andrew Bennett

UNITED COLLEGE OF ST. SALVATOR AND ST. LEONARD

PROFESSORS

Humanity, W. M. Lindsay, M.A. . . £750
Logic and Metaphysics, G. F. Stout, LL.D. . £750
Greek, J. Burnet, M.A. £750
Mathematics, P. R. Scott Lang . . . £750
Moral Philosophy, A. E. Taylor, M.A. . £750
Nat. Philos., A. S. Butler, M.A. . . £753
Nat. History, W. C. M'Intosh, M.D. . £750
Chemistry, J. C. Irvine, Ph.D. . . £750
Education, J. Edgar, M.A. . . . £750
Eng. Literature, A. Lawson, M.A. . . £750
Anatomy, D. Waterston, M.D. . . £610
Physiology, P. T. Herring, M.D. . . £750

COLLEGE OF ST. MARY'S

Principal, Rev. George Galloway, D.D.
Primarius Prof. of Divinity, the Principal £650
Bib. Criticism (vacant) . . . .
Church Hist., Rev. Archibald Main, D.Litt. £600
Hebrew, Rev. D. M. Kay, B.D. . . . £750

UNIVERSITY COLLEGE, DUNDEE

Principal, J. Y. Mackay, LL.D. . . . £850
Secretary, W. Arnot Watterson

PROFESSORS

Mathematics, J. E. A. Steggall, M.A. . . £600
Nat. Philosophy, Wm. Peddie, D.Sc. . . £600
Chemistry, A. Mackenzie, B.Sc. . . . £600
Nat. History, D'Arcy W. Thompson, B.A. . £600
Botany (*White's*), P. Geddes . . . £249
Anatomy (*Cox's*), J. Yule Mackay, LL.D.
Physiology, E. W. Reid, B.A. . . . £600
Engin. and Drawing, A. H. Gibson, D.Sc. . £600

CONJOINT MEDICAL SCHOOL, DUNDEE

Pathology, L. R. Sutherland . . . £600
Surgery, D. MacEwan, M.D. . . . £300
Medicine, A. M. Stalker . . . £300
Midwifery, J. A. C. Kynoch . . . £300
Materia Medica, C. R. Marshall . . £600

UNIVERSITY OF GLASGOW. 1450

Founded by a bull of Pope Nicholas V. in 1451; received a new charter from James VI. of Scotland in 1577; remodelled by the Universities (Scotland) Acts, 1858 and 1889. Parly. grant, £20,880. There were last session 1,822 students (658 women), and of the total 655 were students in Arts (404 women) and 799 students of Medicine (208 women), Women students are taught separately at Queen Margaret College.

Chancellor, the Earl of Rosebery.
Rector, M. Raymond Poincaré.
**Principal and Vice-Chancellor*, Sir Donald MacAlister, K.C.B., M.D., D.C.L. . . £2,000
Registrar, Albert Morrison.

PROFESSORS

**Divinity*, Rev. H. M. B. Reid, D.D. . . £580
Chemistry, (vacant) £1,300

* And residence.

Botany, F. O. Bower, D.Sc., F.R.S. . . £830
Civil Eng. and Mechanics, J. D. Cormack, D.Sc. £900
Conveyancing, W. S. McKechnie, D.Phil. . £600
Naval Architecture (including Marine Engin.), Sir. J. H. Biles, LL.D. . . £800
Surgery, Sir Wm. Macewen, D.Sc., F.R.S. . £800
Astronomy, I. Becker, Ph.D. . . . £600
Midwifery, M. Cameron, M.D. . . . £700
**Moral Philos.* Sir Hy. Jones, LL.D. . £800
Political Economy, W. R. Scott, Litt.D. . £612
Materia Medica, R. Stockman, M.D. . . £700
Forensic Medicine, J. Glaister, M.D. . . £600
**Church History*, J. Cooper, D.D. . . £480
Pathology, R. Muir, M.D., F.R.S. . . £1,100
**Humanity*, J. S. Phillimore, M.A. . . £1,000
Nat. Philos., A. Gray, LL.D., F.R.S. . . £1,000
History, D. J. Medley, M.A. . . . £900
Practice of Medicine, T. K. Monro, M.D. . £800
**Logic and Rhetoric*, R. Latta, D.Phil. . £800
Zoology, J. G. Kerr, M.A., F.R.S. . . £800
Eng. Lang. and Lit., W. M. Dixon, Litt.D. . £900
Geology, J. W. Gregory, D.Sc., F.R.S. . . £668
**Law*, W. M. Gloag, K.C., B.A. . . . £800
**Greek*, G. A. Davies, M.A. . . . £1,000
Physiology, D. Noel Paton, M.D. . . £1,100
Mining, C. Latham £600
**Hebrew and Semitic Lang.*, W. B. Stevenson, B.D. £700
**Anatomy*, T. H. Bryce, M.D. . . . £1,200
**Mathematics*, G. A. Gibson, LL.D. . . £1,000
Biblical Criticism, G. Milligan, D.D. . . £540
Midwifery (Muirhead), J. M. Munro Kerr, M.D. £500
Surgery (St. Mungo,) R. Kennedy, M.D. . £500
Pathology (St. Mungo-Notman), J. H. Teacher, M.D. £600
Medicine (Muirhead), W. K. Hunter, M.D. . £500
Scot. Hist. and Lit., R. S. Rait, M.A. . . £700

UNIVERSITY OF ABERDEEN. 1494

Founded by Bishop Elphinstone as a *Studium Generale*, in which he constituted a college in 1505 known as King's College. In 1593 George Keith, 5th Earl Marischal, founded **Marischal College**, which came to be also a university distinct from the former foundation. In 1860 these two universities were **united** in one institution, and now form the University of Aberdeen. (Parl., etc., grants, £23,400). It grants degrees in Arts, Science, Divinity, Law, and Medicine, and is empowered to admit women as well as men to those degrees. It also grants a Diploma in Public Health, and a Diploma in Agriculture.

Chancellor, Rt. Hon. Earl of Elgin and Kincardine.
Rector, Rt. Hon. Winston S. Churchill, M.P.
Vice-Chancellor and *Principal*, Very Rev. Sir G. Adam Smith, D.D., LL.D., Litt.D. £1,500 and residence
Secretary, D. R. Thom, M.A.
Librarian, P. J. Anderson, LL.B.
Registrar, R. Walker, LL.D.

PROFESSORS

Botany, J. W. H. Trail, M.D., F.R.S. . . £750
Natural Philosophy, Charles Niven, D.Sc., F.R.S. £1,000
Forensic Medicine, Matthew Hay, M.D., LL.D. £600
Greek, John Harrower, LL.D. . . . £900
Physiology, J. A. MacWilliam, M.D. . . £900
Materia Medica, J. T. Cash, M.D., F.R.S. . £700

* And residence.

Church History, H. Cowan, D.D. . . £509
Anatomy, R. W. Reid, M.D. . . . £1,300
Chemistry, F. Soddy, M.A., F.R.S. . . £900
English, A. A. Jack, M.A. . . . £700
Hebrew and Semitic Languages, J. Gilroy, D.D. £600
Logic, W. L. Davidson, LL.D. . . . £700
Natural History, J. A. Thomson, M.A., LL.D. £700
Biblical Criticism, (vacant) . . . £459
Moral Philosophy, J. B. Baillie, M.A. . £700
History, C. S. Terry, M.A. . . . £724
Systematic Theology, Rev. Wm. Fulton, B.D., B.Sc. £447
Mathematics, H. M. Macdonald, M.A., F.R.S. £800
Law, J. M. Irvine, K.C., LL.B. . . . £700
Pathology, T. Shennan, M.D. . . . £900
Surgery, J. Marnoch, C.V.O., M.A., M.B. . £600
Humanity, A. Souter, D.Litt. . . . £800
Agriculture, J. Hendrick, B.Sc. . . £790
Medicine, A. W. Mackintosh, M.D. . . £600
Midwifery, R. G. McKerron, M.D. . . £600

EDINBURGH UNIVERSITY. 1582

Women are admitted to classes and to Graduation in Arts, Science, Law, Medicine, and Music on the same terms as men.

Chancellor, Rt. Hon. A. J. Balfour.
Lord Rector, (vacant).
Principal and Vice-Chancellor, Sir J. Alfred Ewing, K.C.B., M.A., LL.D. . . £1,610
Secretary of Senatus, Prof. Sir L. J. Grant, Bt., B.A., LL.D. . . . .
Clerk of Senatus, James Dowie . .
Secretary and Registrar of General Council, T. F. Harley . . . . .

PROFESSORS

Rhetoric and English Literature, H. J. C. Grierson, M.A., LL.D. £900

IRELAND

University of Dublin (and Trinity College). 1591

Founded in 1591 by Queen Elizabeth, under the style of the College of the Holy and Undivided Trinity, near Dublin, mother of the University (Mater Universitatis). Its constitution has been altered by the charter of Charles I., and by numerous royal statutes. In the Act of Union between Great Britain and Ireland (1800) it is spoken of as the University of Trinity College. The undergraduates exceed 1,100, and there are some 200 graduates attending lectures in the professional schools. Degrees are granted to women. There are 26 Junior Fellows, 7 Senior Fellows, who with the Provost and with 2 elected Junior Fellows, and 2 elected Professors, constitute the Board.

Chancellor of the University, Lord Iveagh.
Vice-Chancellor, the Right Hon. D. H. Madden, LL.D.
Parliamentary representatives: the Right Hon. Sir Edward Carson, K.C., LL.D., and Right Hon. James Campbell, K.C., LL.D.
The following constitute the Board:
Provost, Rev. J. P. Mahaffy.
Vice-Provost, F. A. Tarleton, Sc.D.
Bursar, G. L. Cathcart, M.A.
Auditor, L. C. Purser, Litt.D.
Senior Proctor, J. I. Beare, M.A.
Librarian, G. J. Smyly, M.A.
Senior Lecturer, W. R. W. Roberts, B.D.
Registrar, Rev. T. T. Gray, M.A.
Assist. Reg., C. H. Miller, M.A.
Senior Dean and Catechist, E. P. Culverwell, M.A.
Representatives of Junior Fellows, John Isaac Beare, M.A., and Matthew W. J. Fry, M.A.
Representatives of the Professors, John Joly, Sc.D., and Andrew F. Dixon, M.D., Sc.D.

PROFESSORS

Divinity (*Regius*), Rev. J. Carleton D.D. 1916
Divinity (*Archbp. King's*), Rev. N. White, D.D. 1916
Pastoral Theology, Rev. J. A. Jennings, M.A. 1908
Law, Civil (*Regius*), C. F. Bastable, LL.D. 1908
Law, Civil and Gen. Jurisprud.
Law, Feudal and Eng. (*Regius*), J. S. Baxter, LL.B. 1909
Law, Crim. and Constit. W. Lowry, LL.B. . 1916
History, Modern, E. Curtis, M.A. . . 1914
History, Eccles., Rev. H. J. Lawlor, D.D. . 1898
History, Ancient, W. A. Goligher, M.A. . 1904
History, Modern (*Lecky*), W. A. Phillips, M.A. 1914
Arabic, L. W. King, LL.D. . . . 1905

Midwifery, Sir J. Byers, M.A., M.D.
Materia Medica, Sir W. Whitla, M.A., M.D.

SCHEME FOR THE ORGANISATION AND DEVELOPMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH

In August 1915 a scheme was published by the Board of Education for the establishment of a permanent organisation for the promotion of Industrial and Scientific Research. The scheme provided for the establishment of (*a*) a Committee of the Privy Council responsible for the expenditure of any new monies provided by Parliament for the purpose ; (*b*) a small Advisory Council responsible to the Committee of Council and composed mainly of eminent scientific men and men actually engaged in industries dependent upon scientific research The primary functions of the Advisory Council are : (1) proposals for instituting specific researches ; (2) proposals for establishing or developing special institutions or departments of existing institutions for the scientific study of problems affecting particular industries and trades ; (3) the establishment and award of Research Studentships and Fellowships. It was proposed to ask the Royal Society and the principal scientific and professional associations, societies, and institutes to undertake the function of initiating proposals for the consideration of the Advisory Council, and a regular procedure for inviting and collecting proposals was established. Proposals are also received from individuals. As regards the use of profits of discoveries, the general principle on which grants are made by the Committee of Council is that discoveries made by institutions, associations, bodies or individuals in the course of researches aided by public money, shall be made available under proper conditions for the public advantage. The members of the Advisory Council are : Rt. Hon. Lord Rayleigh, O.M., F.R.S., Sir G. T. Beilby, F.R.S., W. Duddell, F.R.S., Hon. Sir Chas. A. Parsons, K.C.B., F.R.S., Prof. J. A. M'Clelland, F.R.S., R. Trelfall, F.R.S., Prof. J. F. Thorpe, F.R.S., with Sir William S. M'Cormick as administrative Chairman.

The First Report of the Council, published in 1916 [Cd. 8336, 3*d.*], explains the principles guiding the Council in their work, and calls attention to some of the difficulties which will have to be overcome and records the spirit of goodwill and co-operation with which they have been met. It also contains a full list of the researches aided up to the present, with the names of the bodies responsible for them, and the places at which they are being conducted.

PROFESSIONAL EDUCATION

AGRICULTURE

The following institutions in **England and Wales** provide full courses of instruction in agriculture and the allied sciences. They are of university rank, and the highest courses can lead up to a degree. Courses of a less advanced character are also provided at them :

OXFORD UNIVERSITY.
CAMBRIDGE UNIVERSITY.
SOUTH-EASTERN AGRICULTURAL COLLEGE, Wye, Kent (University of London).—*Principal*, M. J. R. Dunstan, M.A., F.R.S.E.
COLLEGE OF AGRICULTURE, Holmes Chapel, Cheshire (University of Manchester).—*Principal*, T. J. Young, M.Sc., F.S.I.
LEEDS UNIVERSITY.
UNIVERSITY COLLEGE OF NORTH WALES, Bangor.
ARMSTRONG COLLEGE, Newcastle-upon-Tyne.
UNIVERSITY COLLEGE OF WALES, Aberystwyth.
UNIVERSITY COLLEGE, Reading.

Courses more or less complete, but not leading up to a degree, are held at the following agricultural colleges :

AGRICULTURAL AND HORTICULTURAL COLLEGE, Uckfield.—*Principal*, S. A. Woodhead, M.Sc.
EAST ANGLIAN INSTITUTE OF AGRICULTURE, Chelmsford.—*Principal*, R. M. Wilson, B.Sc.
HARPER ADAMS AGRICULTURAL COLLEGE, Newport, Salop.—*Principal*, P. H. Foulkes, B.Sc.
HORTICULTURAL COLLEGE FOR WOMEN, Swanley, Kent.—*Principal*, Miss Georgiana J. Sanders.
MIDLAND AGRICULTURAL AND DAIRY COLLEGE, Kingston, Derby.—*Principal*, W. Goodwin, M.Sc.
ROYAL AGRICULTURAL COLLEGE, Cirencester (closed for the period of the war).—*Principal*, Maj. J. R. Ainsworth Davis, M.A.

In addition, there are many institutions which either give general agricultural instruction of a less advanced character, or confine themselves to some particular branch :

BRITISH DAIRY INSTITUTE, Reading.—*Manager and Chief Instructor*, A. Todd ; *Secretary*, Francis H. Wright, M.A.
CUMBERLAND AND WESTMORLAND FARM SCHOOL, Newton Rigg, Penrith.—*Principal*, Wm. T. Lawrence.
DAIRY INSTITUTE, Worleston, Nantwich.—*Principal*, Miss Jane Forster.
DAUNTSEY AGRICULTURAL SCHOOL, West Lavington, Wilts.—*Head Master*, F. O. Solomon, F..H.AS.
EASTERN COUNTIES DAIRY INSTITUTE, Ipswich.—*Principal*, J. A. Smith.
HAMPSHIRE FARM INSTITUTE, Sparsholt, Winchester.—*Principal*, J. D. Davidson, A.R.C.Sc. (Dub.).
HARRIS INSTITUTE, Preston.—*Principal*, Lt.-Col. Jolly, V.D., J.P.
THE JOHN INNES HORTICULTURAL INSTITUTION, Merton, Surrey.—*Director*, William Bateson, M.A., F.R.S.
MONMOUTH AGRICULTURAL INSTITUTE, Usk.—*Principal*, J. C. Newsham, F.L.S.
NATIONAL FRUIT AND CIDER INSTITUTE, Long Ashton, near Bristol.—*Principal*, Prof. B. T. P. Barker, M.A.
ROYAL HORTICULTURAL SOCIETY'S SCHOOL OF HORTICULTURE, Wisley, Surrey.—*Principal*, F. J. Chittenden, F.L.S.
SEALE-HAYNE COLLEGE, Newton Abbot, Devon.—*Principal*, Bernard N. Wale, B.Sc.
TAMWORTH AGRICULTURAL COLLEGE, Tamworth.—*Secretary*, Wm. Sillito.

The following are institutions in **Scotland** at which a complete course of instruction is given :

EDINBURGH AND EAST OF SCOTLAND COLLEGE OF AGRICULTURE, 13 George Square, Edinburgh.—*Director*, Alex. McCallum, LL.B.
NORTH OF SCOTLAND COLLEGE OF AGRICULTURE, 41½ Union Street, Aberdeen.—*Director of Studies*, Prof. James Hendrick, B.Sc., F.I.C. ; *General County Organiser*, G. G. Esslemont, B.Sc.
WEST OF SCOTLAND COLLEGE OF AGRICULTURE, Glasgow.—*Secretary*, J. Cuthbertson, F.R.S.E.

And in **Ireland** :

ALBERT AGRICULTURAL COLLEGE, Glasnevin, Dublin.—*Principal*, G. Stephenson.

Rothamsted Experimental Station

The Rothamsted Experimental Station owes its existence to the late Sir John Bennet Lawes, who, in collaboration with the late Sir J. H. Gilbert, carried out field experiments on a large scale to ascertain the manurial requirements of the various farm crops, and the yield under various conditions. These are still going on. Feeding experiments were also conducted with cattle, sheep and pigs, and analyses made of the whole bodies of these animals in various stages of fatness.

The **Lawes Testimonial Laboratory** was erected in 1855, but extension of the work required the construction of a new Laboratory and farm buildings now completed at a cost of £19,000, part of which was collected by public subscription, and part obtained from the Development Fund. In 1906 the **"James Mason" Laboratory** for agricultural bacteriology was added, being the gift of Mr. J. F. Mason, M.P. An agricultural Library is in course of formation.

In '99 Sir John Lawes created the **Lawes Agricultural Trust,** endowing it with stock to the value of £100,000, the Laboratory, and the lease of the land on which the experimental plots are situated. In 1907 the Goldsmiths' Company made a grant of £10,000, the income of which is devoted exclusively to the investigation of the soil. The Society for Extending the Rothamsted Experiments also collects other donations and annual subscriptions, and the sums thus obtained provide a valuable contingency fund. Under the scheme of the Board of Agriculture for the promotion of agricultural research the Rothamsted Experimental Station is recognised as the Institute for dealing with soil and plant nutrition problems. It has an annual grant from the Development Fund of £2,850.

Director, E. J. Russell, D.Sc.
Chemist, N. H. J. Miller, Ph.D.
Soil Investigations (Goldsmiths' Co. Foundation): E. Horton, B.Sc., and A. Appleyard, M.Sc. (chemists); B. A. Keen, B.Sc. (physicist).
Bacteriologist, H. B. Hutchinson, Ph.D.
Soil Protozoologist, Miss L. M. Crump, B.Sc.
Plant Physiologist and Botanist, Miss W. E. Brenchley, D.Sc., and Miss H. Adam, B.Sc.
Plant Chemistry, W. A. Davis, B.Sc., A. J. Daish, B.Sc., and G. C. Sawyer.
Hon. R. Guinness Chemist, E. H. Richards, B.Sc., F.I.C.

ART

The professional examinations for architects are conducted by the Royal Institute of British Architects, and the Royal Institute of the Architects of Ireland (*qq.v.*).

BIRMINGHAM, Municipal School of Architecture.—Closed during the war.

BRADFORD (CITY OF), School of Art.—*Principal*, C. Stephenson, A.R.C.A.

BRIGHTON, Municipal School of Art.—*Head Master*, W. H. Bond.

BUSHEY, School of Painting.—*Principal*, Miss Lucy Kemp-Welch.

DERBY, Technical College.—*Principal*, F. W. Shurlock, B.Sc.

DOVER, School of Art.—*Art Director*, W. H. East, A.R.C.A.

DUBLIN, Metropolitan School of Art, Kildare Street.—*Head Master*, James Ward, A.R.C.A. (£600–700); *Second Master*, G. Atkinson, A.R.H.A., A.R.C.A. (£300–400); *Registrar*, B. I. Tilly.

EDINBURGH, College of Art.—*Director*, F. Morley Fletcher; *Secretary*, Allan Sutherland; *Professors*, R. Burns, A.R.S.A.; P. Portsmouth, A.R.S.A.; G. W. Browne, R.S.A.; W. S. Black; *Supt. of Evening Classes*, J. C. Mitchell, A.R.S.A.

GLASGOW, School of Art.—*Pres.* Patrick S. Dunn; *Director*, F. H. Newbery; *Professors*, Maurice Greiffenhagen, R. Anning Bell, A.R.A., F. Caley Robinson, R.W.S., A. McGibbon, F.R.I.B.A., Paul Wayland Bartlett.

LEEDS, Institute of Science, Art, and Literature.—*Secretary*, Arthur Tait.

LIVERPOOL, City School of Art.—*Principal*, G. Marples, A.R.C.A.

LONDON.—See Royal Academy and list of Technical Institutes supported by the L.C.C. (*infra*).

MANCHESTER, Municipal School of Art.—*Head Master*, R. Glazier, A.R.I.B.A., A.R.C.A.

NEWCASTLE, Armstrong College.—*Director of King Edward VII School of Art*, R. G. Hatton, A.R.C.A.

NEWLYN, School of Painting.—*Director*, Stanhope Forbes.

WILLESDEN POLYTECHNIC.—*Head Master*, R. T. Mumford.

DENTAL

LONDON SCHOOL OF DENTAL SURGERY, attached to the Royal Dental Hospital, 32 Leicester Square, London, W.C.—Fees: 1st year, £52.10.0; 2nd year, £52.10.0; 3rd year, £61.19.0; 4th year, £57.15.0, including attendance at a general and a dental hospital; plus £21 examination fees, £28 for instruments, and £10 for books. The school is open to women students as well as men. *Dean*, W. H. Dolamore, L.R.C.P., L.D.S.

DRAMA

ACADEMY OF DRAMATIC ART (founded by H. B. Tree, 1904), 62–64 Gower Street, London, W.C.—*Pres.* Sir Squire Bancroft; *Administrator*, Kenneth R. Barnes, M.A. (C. M. Lowne, *actg.*).

LEGAL

GENERAL COUNCIL OF THE BAR, 2 Hare Court, Temple, E.C.—Deals with all matters affecting the profession, and takes such action thereon as may be deemed expedient.
Chairman, P. Ogden Lawrence, K.C.
Vice-Chairman, J. Alderson Foote, K.C.
Hon. Treasurer, T. T. Methold.
Secretary, Henry C. A. Bingley.
Clerk, C. Worthy.

THE LAW SOCIETY (established 1825, Royal Charter Dec. 1831).—The Society instituted lectures on law in 1833, and in 1836 obtained from the judges authority to examine students on the completion of their articles. Since then **Preliminary, Intermediate, Final and Honours Examinations** have been added, and the entire control of all the examinations has been transferred to the Society. Under statute, all cases of alleged malpractice by solicitors are heard before a specially appointed committee, which, when necessary, makes a report to the High Court, which has the power of striking the names of the offenders off the Roll or suspending them from practice. Membership, 8,729 (3,965 town, 4,764 country). *Pres.* Thomas Eggar; *Vice-Pres.* Samuel Garrett; *Sec.* E. R. Cook; *Librarian*, W. M. Sinclair; *Offices*, Bell Yard, W.C.

LEGAL EDUCATION COMMITTEE.—*Chairman*, J. W. Budd. *Principal and Director of Legal Studies*, Edward Jenks, M.A., B.C.L. *Reader*, Arthur Langridge, B.A. *Tutors*, Norman H. Baynes, M.A., E. Leslie Burgin, LL.D., W. C. Cleveland-Stevens, M.A., B.C.L., F. D. Livingstone, B.A. *Lecturer Commercial Law*, Arnold D. McNair, B.A., LL.M. *Tutor Accounts and Book-keeping*, L. R. Dicksee, F.C.A. *Correspondence Tutor*, H. O. Danckwerts, M.A.

THE COUNCIL OF LEGAL EDUCATION was established by the four Inns of Court in 1852 to superintend the education and examination of students for call to the Bar.—*Office*, 15 Old Square, Lincoln's Inn, London, W.C.

Chairman, Rt. Hon. the Master of the Rolls.

Vice-Chairman, Hon. Lord Justice Swinfen Eady.

Chairman of the Board of Studies, J. G. Lewis Coward, K.C.

Director of Legal Studies, W. Blake Odgers, LL.D., K.C.

Clerk of the Council, J. Felix Waley.

Readers

Constitutional Law, A. E. W. Hazel, B.C.L.

Roman Law, Jurisprudence, etc., J. Pawley Bate, LL.D.

Assist. S. H. Leonard, B.C.L.

Evidence and Procedure, W. Blake Odgers, K.C.

Real Property and Conveyancing, A. F. Topham, LL.M.

Assist. W. J. Whittaker, LL.B.

Common Law, Hugh Fraser, LL.D.

Assist. J. Gerald Pease, B.A.

Equity, J. Andrew Strahan, LL.B.

Assist. G. M. T. Hildyard.

Hindu and Mahommedan Law, Sir F. A. Robertson (*Reader*).

MEDICAL

The profession of medicine, from the education of the student to the conduct of the qualified practitioner, is controlled by the General Medical Council, a body which at present consists of 34 members, of whom 24 are representatives of the Universities and corporations empowered to grant qualifying diplomas, 5 are elected by members of the profession in the United Kingdom, and 5 are nominated by the Crown (*see under* Societies and Institutions). A qualification for registration as a medical practitioner cannot be obtained in a shorter period than five years from the date of passing the commencement of the authorised course of study. The average period is nearly seven years. In counting the cost of entering the profession, the expenses of living for six or seven years must therefore be added to the amount of the fees for teaching and hospital privileges. These fees vary from less than £100 to £150.

MEDICAL SCHOOLS OF THE UNIVERSITY OF LONDON

CHARING CROSS, Chandos Street, W.C.—Beds 300, in-patients over 3,000, out-patients over 23,000. Fees: Entrance fee, 10 guineas. Annual fees for all students, 26 guineas per annum. *Dean*, W. J. Fenton, M.D., F.R.C.P. ; *Sec.* Frank Noakes.

GUY'S, London Bridge, S.E.—Beds 617, in-patients admitted 9,870, out-patients 110,081. Fee, 35 guineas per annum ; entrance fee of 20 guineas to first-year students, 10 guineas to third-year students ; term, 5 years. *School Secretary*, S. H. Croucher.

KING'S COLLEGE HOSPITAL, Denmark Hill, S.E. —Beds, 350. Fees, 80 guineas or 150 guineas. *Dean*, H. Willoughby Lyle, M.D., B.S., F.R.C.S. *Sec.* S. C. Ranner, M.A., at the School.

LISTER INSTITUTE OF PREVENTIVE MEDICINE, Chelsea Gardens, Chelsea Bridge Road, S.W.—*Sec.* M. Greenwood, Junr., M.R.C.S.

LONDON HOSPITAL, Mile End, E.—922 beds. In-patients, 18,933 ; out-patients, 149,507 ; accidents, 8,578 ; operations under anæsthesia, 19,285. Fees (full course), 30 guineas per annum. *Dean*, Prof. William Wright, M.B., D.Sc., F.R.C.S. *Sec.* E. J. Burdon.

LONDON SCHOOL OF CLINICAL MEDICINE, Dreadnought Hospital, Greenwich.—*Secretary*, P. J. Michelli, C.M.G.

LONDON SCHOOL OF DENTAL SURGERY, attached to the Royal Dental Hospital, 32 Leicester Square, W.C. (See *Ante.*)

LONDON (ROYAL FREE HOSPITAL) SCHOOL OF MEDICINE FOR WOMEN, 8 Hunter Street, Brunswick Square, W.C.—Fees for University of London and Conjoint Colleges (England) students : £169 for the full course, or £179 in five instalments. The fees include the clinical course at the Royal Free Hospital or St. Mary's Hospital. *Dean*, Miss Aldrich-Blake, M.D., M.S. ; *Secretary* and *Warden*, Miss L. M. Brooks.

LONDON SCHOOL OF TROPICAL MEDICINE (University of London). Seamen's Hospital, Albert Dock, E.—Fees, £16.16.0. *Sec.* P. J. Michelli, C.M.G.

MIDDLESEX HOSPITAL, Mortimer Street, Berners Street.—442 beds, including special wards for cancer cases, maternity and gynæcological cases, and for diseases of the skin and eye. The cancer wing has 92 beds. The composition fee for general students is 135 guineas ; for London University students, 145 guineas ; for those who have passed the first examination for medical degrees of the London University, 120 guineas ; and for those who have completed their anatomical and physiological studies, 70 guineas. The fee for dental students is 54 guineas. The fees may be paid by instalments. *Dean*, H. Campbell Thomson, M.D. *Sub-Dean*, J. Strickland Goodall, M.B.

NAVAL MEDICAL SCHOOL of the Royal Naval College, Greenwich.

ROYAL ARMY MEDICAL COLLEGE, Grosvenor Road, S.W.—*Commdt. Surg.-Gen.* Sir David Bruce, C.B., F.R.S., A.M.S.

ST. BARTHOLOMEW'S, Smithfield, E.C.—Beds 757, in-patients 8,756, out-patients nearly 130,000. Fees : For students commencing their medical studies, 165 guineas in one sum or four annual instalments of 45 guineas each ; for students who have completed one or two years of medical study proportionately lower composition fees are payable ; for University students, 80 guineas in one sum or 85 guineas by instalments. *Dean*, T. W. Shore, M.D. ; *Warden*, W. Girling Ball, F.R.C.S.

ST. GEORGE'S HOSPITAL, Hyde Park Corner, S.W. —Beds 436, including 100 convalescent beds at Wimbledon. Fees, first year £26.5.0 London degree, £21 Conjoint Board diploma ; £31.10.0 subsequent years ; entrance fee 10 guineas (for clinical work only). *Dean*, R. Salusbury Trevor, M.B.

ST. MARY'S, Paddington, W.—Beds 305, in-patients, 3,703, out-patients 17,569, casualty cases 20,715. Fees : Complete course, £140 ; clinical course, £63. *Dean*, Sir John Broadbent, Bt., M.D. *Secretary*, B. E. Matthews, B.A.

ST. THOMAS', Albert Embankment, S.E.—Beds 592, in-patients 8,772, out-patients 87,560 ; attendances 275,605. Annual composition fee,

30 guineas; term 5 years. The hospital, the first to be built in accordance with modern ideas, consists of a series of blocks separate from each other, but connected by corridors open to the air on all sides. Between the blocks are grassy quadrangles, and along the whole front is a broad terrace overlooking the river and overshadowed by trees, to which both patients and students have free access. Six of the blocks are devoted to the use of patients; one other includes the treasurer's residence and the St. Thomas's Home for paying patients; one constitutes the medical school. The school buildings, isolated by a large quadrangle from the hospital, stand at its southern extremity, between the river and the gardens of Lambeth Palace. They are very commodious, and every effort has been made to provide accommodation completely fulfilling modern requirements. A number of scholarships, prizes, and salaried appointments are open to students. *Secretary*, G. Q. Roberts.

UNIVERSITY COLLEGE HOSPITAL, Gower Street, W.C.—Beds 305, in-patients 4,578, out-patients 37,967; attendances 123,078; fees, 80 guineas; term, 3 years. *Dean*, J. Herbert Parsons, B.S., D.Sc., F.R.C.S.; *Secretary*, L. R. Thomas.

WESTMINSTER HOSPITAL, Caxton Street, S.W.—Over 213 beds. Fees for the full medical curriculum, 25 guineas per annum; dental students, in one payment on entrance, 50 guineas, or two annual payments of £27.10.0 each; term, 5 to 7 years. *Dean*, S. A. Kinnier Wilson, M.A., B.Sc., M.D., F.R.C.P.; *Secretary*, Dr. E. B. Hulbert. For Medical Schools outside London, see under the various universities.

MILITARY

STAFF COLLEGE, CAMBERLEY.—Officers who pass through the College have the letters *p.s.c.* after their names in Service lists. Closed on mobilisation. *Librarian*, Lt.-Col. E. A. Dickinson.

STAFF COLLEGE, QUETTA.—Closed on mobilisation.

CAVALRY SCHOOL, NETHERAVON.—Closed on mobilisation.

CAVALRY SCHOOL, SANGOR.—Closed on mobilisation.

SCHOOLS OF INSTRUCTION FOR ROYAL HORSE AND ROYAL FIELD ARTILLERY, Shoeburyness.
Commandant, Lt.-Col. Hon. W. D. Sclater-Booth, D.S.O., R.A.
Lark Hill:
Commandant, Lt.-Col. F. G. T. Deshon, R.A.

ORDNANCE COLLEGE, Red Barracks, Woolwich.—Officers who have passed the advanced class of the College have the letters *p.a.c.*, and those passing the ordnance course the letter *o.* after their names in Service lists.
Commandant, Lt.-Col. R. E. Home, D.S.O., R.A.
Executive Officers, Capt. W. H. R. Prewer, R.A.; Lt. W. E. Aggett, R.A.

SCHOOL OF MILITARY ENGINEERING, Chatham.
Commandant, Br.-Gen. F. Rainsford-Hannay, C.B.
Brigade Major and Sec. Maj. H. G. Gandy, D.S.O., R.E.

SCHOOL OF MUSKETRY, Hythe.
Acting Commandant, Col. B. W. L. McMahon.

SCHOOLS OF MUSKETRY, India.
Commandants, Lt.-Col. P. L. Grove (*Central School, Pachmarhi*); Capt. B. H. Matheson (*Satara*); Maj. A. C. Wall (*Changla Gali*).

N.R.A. SCHOOL OF MUSKETRY, Bisley Camp.
Commandant, Maj.-Gen. Lord Cheylesmore, K.C.V.O.

ROYAL MILITARY COLLEGE, SANDHURST (1799).
Commandant, B.-Gen. L. A. M. Stopford, C.B.
Assist. do. Lt.-Col. F. W. Radcliffe, C.I.E.
Adjutant, Capt. N. V. C. Dalrymple-Hamilton.
Quarter-Master, Maj. J. C. Duff.
Riding-Master, Maj. W. Sykes.
Surgeon, Lt.-Col. C. R. Kilkelly, C.M.G., M.V.O.
Assist. do. Capt. G. P. Humphery.
Chaplain, Rev. E. S. Woods, M.A.

ROYAL MILITARY ACADEMY, WOOLWICH (1741).
Commandant, Br.-Gen. W. F. Cleave, C.B.
Adjutant, Capt. H. D. Simpson, R.A.
Asst. Adj. Maj. D. Smith, R.A.

HEADQUARTERS GYMNASIUM, Aldershot.
Inspector of Gymnasia, Col. W. C. Wright.
Assist. do., Maj. J. S. N. de Joux, Maj. R. B. Campbell, Maj. D'A. D. Alexander.
Instructor, Lt. H. Olsson.

ARMY SIGNAL SCHOOLS.—Closed on mobilisation.

SIGNAL SERVICE TRAINING CENTRE.
Instructor, Capt. G. E. Mansergh, M.C., R.E.

ARMY SERVICE CORPS TRAINING ESTABLISHMENT, Aldershot.
Commandant, Lt.-Col. D. C. Cameron.
Adjutant, Capt. R. H. Smith.

ROYAL ARMY MEDICAL COLLEGE (*see* p. 284).

ROYAL ARMY MEDICAL CORPS TRAINING ESTABLISHMENT, Aldershot.
Commandant, Lt.-Col. F. S. Irvine, D.S.O., M.B.

SCHOOL OF ARMY SANITATION, Aldershot.—Closed on mobilisation.

ARMY VETERINARY SCHOOL, Aldershot.—Closed on mobilisation.

DUKE OF YORK'S ROYAL MILITARY SCHOOL, Hutton, near Brentwood (temp.).
Commandant, Lt.-Col. J. S. Dyke, M.V.O.
Head Master, Lt. B. Dryer.

ROYAL HIBERNIAN MILITARY SCHOOL, Phœnix Park, Dublin.
Commandant, Col. J. McDonnell, C.B.
Quarter-Master and Adj. Capt. R. W. Smyth.
Head Master, Lt. A. J. H. McCleesh.

QUEEN VICTORIA SCHOOL, Dunblane, Scotland.
Commandant, Maj. H. F. Churchill.
Quarter-Mr. and Adj. Maj. J. J. Scott.
Head Master, Lt. H. G. R. Stevens.

MISCELLANEOUS

COLLEGE OF PRECEPTORS, Bloomsbury Square, W.C.—Persons are eligible for membership who are engaged in teaching and have passed any examination approved by the College. Diplomas of F.C.P., L.C.P., and A.C.P. are granted.
President, Sir Philip Magnus, M.P.
Dean, W. G. Rushbrooke, LL.M.
Treasurer, G. Armitage Smith, D.Litt.
Secretary, G. Chalmers.

GILCHRIST EDUCATIONAL TRUST, 1 Plowden Buildings, Temple, E.C.—A fund left by the late Dr. John Borthwick Gilchrist (1759-1841) to trustees, "for the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the support of scholarships and studentships for young men and women, in connection with various universities and colleges; in **occasional grants to Educational Institutions** under special circumstances; and to the delivery of high-class lectures for the people, at a nominal charge for admission.
Trustees, Rt. Hon. Lord Shuttleworth, LL.D. (*Chairman*); Walter Leaf, Litt.D.; M. E. Sadler, C.B.; Mrs. Sophie Bryant, D.Sc.; Rt. Hon. Lord Richard Cavendish.

LONDON PAROCHIAL CHARITIES, 3 Temple Gardens, E.C.—The parochial charities of the City of London are now administered by a number of trustees, nominated by various bodies. Large sums out of the funds of the trust have been devoted to the securing of open spaces, and about £40,500 a year is given in support of the various Polytechnics in the Metropolis. The foundation is the largest for charitable purposes in the Kingdom. The **annual income** now is £105,485.
Clerk, Ernald R. Warre.

MUSIC

ASSOCIATED BOARD OF THE ROYAL ACADEMY OF MUSIC AND THE ROYAL COLLEGE OF MUSIC, 15 Bedford Square, W.C.—For Local Examinations in Music.
Patron, H.M. The King.
Chairman, Sir Wm. E. Bigge, D.C.L., M.A.
Sec. James Muir.

GUILDHALL SCHOOL OF MUSIC, Victoria Embankment, E.C.—Established by the Corporation of London in 1880.
Principal, Landon Ronald.
Secretary, H. Saxe Wyndham.

LONDON COLLEGE OF MUSIC, Great Marlborough Street, W.
Principal, F. J. Karn, MUS.B.
Director of Exams. G. Augustus Holmes.
Secretary, A. Gambier Holmes.

INCORPORATED SOCIETY OF MUSICIANS, 19 Berners Street, W.
General Secretary, Hugo Chadfield.

NAVAL AND MILITARY MUSICAL UNION, 37 Russell Square, W.C.
Patron, H.M. The King.
Pres. Gen. Sir H. L. Smith-Dorrien, G.C.M.G.
Hon. Sec.-General, Maj. A. Corbett-Smith, R.F.A., M.A.

NATIONAL ORCHESTRAL ASSOCIATION, 13-14 Archer Street, Soho, W.
Secretary, Stanley Grainger.

ROYAL ACADEMY OF MUSIC (1822), York Gate, Marylebone Road, N.W.
Chairman of Committee, Sir Edward E. Cooper.
Principal, Sir A. C. Mackenzie, MUS.D., LL.D.
Hon. Acting Secretary, P. Quarry.

ROYAL COLLEGE OF MUSIC (1883), Prince Consort Road, South Kensington, S.W.
Patron, H.M. The King.
President, H.R.H. Prince Christian, K.G.
Director, Sir Hubert Parry, Bt., C.V.O., MUS.DOC.
Hon. Secretary, Charles Morley.
Registrar, Claude Aveling.

ROYAL COLLEGE OF ORGANISTS, Kensington Gore, S.W.
President, Sir Alex. C. Mackenzie, D.C.L., MUS.D.
Hon. Secretary, Dr. H. A. Harding.
Registrar, T. Shindler, M.A., LL.B.

ROYAL IRISH ACADEMY OF MUSIC, Westland Row, Dublin.
Secretary, C. E. Grahame-Harvey.

ROYAL MANCHESTER COLLEGE OF MUSIC (1893), Ducie Street, Oxford Road, Manchester.
Principal, Dr. Adolph Brodsky.
Registrar, Stanley Withers.

ROYAL MILITARY SCHOOL OF MUSIC, Kneller Hall, Twickenham.
Commandant, Col. T. C. F. Somerville, M.V.O.
Adjutant and Qr.-Mr. Maj. J. M. Bett.
Director of Music, Maj. A. J. Stretton, M.V.O.

ROYAL NAVAL SCHOOL OF MUSIC, Eastney Barracks, Portsmouth.
Superintendent, Lt.-Col. Herbert Slessor.
Musical Director, Capt. C. Franklin, R.M.L.I.
Quarter-Master, Lt.- H. E. Lidiard, R.M.L.I.
Supt. Clerk, T. P. Hanton.

ROYAL SOCIETY OF MUSICIANS OF GREAT BRITAIN (founded by Handel, 1738), 4 Bishopsgate, E.C.
Secretary, J. F. C. Bennett.

TONIC SOL-FA COLLEGE, 26 Bloomsbury Square, W.C.
President, Sir Walter Parrett, M.V.O., MUS.D.
Secretary, Walter Harrison, MUS.D.

TRINITY COLLEGE OF MUSIC, Mandeville Place, Manchester Square, W.
Chairman of Board, Sir Fredk. Bridge, C.V.O., MUS.D.
Secretary, Shelley Fisher.

VICTORIA COLLEGE OF MUSIC, 18 Berners Street, W.
President, Rt. Hon. Marquess of Anglesey.
Principal, J. H. Lewis, MUS.D.
Secretary, H. Portman Lewis.

INCORPORATED GUILD OF CHURCH MUSICIANS, 18 Berners Street, W.
President, Rt. Rev. Bishop J. E. C. Welldon, D.D.
Warden, J. H. Lewis, D.C.L., MUS.D.
Registrar, J. M. Bentley, MUS.DOC., F.R.A.M.

NAVAL

ROYAL NAVAL COLLEGE, Greenwich.
President, Adm. Sir Henry B. Jackson, K.C.B., K.C.V.O.
Rear Admiral, Edmund P. E. Jervoise (ret.).
Commander, (vacant).
Director of Naval Education, Sir J. Alfred Ewing, K.C.B., LL.D., F.R.S.
Medical Officers, Fleet-Surg. W. A. Whitelegge, M.D., R.N.; C. H. Fernie, M.R.C.S.
Store Officer, Cashier, etc., Staff-Paymaster George Whitcroft, R.N. (ret.).
Secretary, Henry F. V. Negus.
Clerk, A. Wotton.
Civil Engineer, A. L. Perfect.
Curator of Museum, Lieut. J. T. Berry, R.N. (ret.).

ROYAL NAVAL COLLEGE, Dartmouth.
Captain, W. Ruck Keene, M.V.O., R.N.
Commander, Bernard Long, R.N.
Head Master, C. E. Ashford, M.V.O., M.A.

ROYAL NAVAL COLLEGE, Osborne.
Captain, Hon. A. E. Holmes à Court, R.N. (ret.).
Commander, Capt. Hon. E. S. H. Boyle, R.N. (ret.).
Head Master, C. Godfrey, M.V.O., M.A.

ROYAL HOSPITAL SCHOOL, Greenwich.
Superintendent, Captain E. M. C. Cooper Key, M.V.O., R.N.
Head Master, J. E. Evans, B.A.

MECHANICAL TRAINING ESTABLISHMENT, R.N., Chatham.
Engineer Captain, F. T. George, R.N.
Commander, R. R. Harrison, R.N.R.
Schoolmaster (for M.T.E.), Ernest Nodder.

TRAINING SHIPS FOR ROYAL NAVY

FOR MEN.—*H.M.S. Albemarle* (gunnery), *Duncan* (gunnery), *Argonaut*, *Dryad* (Navigation School Ship), *Harrier* (tender to *Dryad*).

FOR BOYS.—*H.M.S. Fisgard (I, II, III, IV, Depôts for training for Boy Artificers)*, *Ganges*, *Impregnable* (1, 2, and 3, *Training Establishments for Boys*), *Indus* (5 ships, for supernumerary artificers and boy artificers), and Marine Society's Ship *Warspite* and National Refuges Ship *Arethusa* and *Chichester* (*see* Societies).

Exmouth, moored off Grays, Essex (and sea-going tender *Exmouth II*). Boys trained for Navy and Mercantile Marine, and for employment in naval and military bands. *Capt. Superintendent*, Capt. R. B. Colmore, R.N.

THAMES NAUTICAL TRAINING COLLEGE (Incorporated), *H.M.S. Worcester*, off Greenhithe.—*Capt.-Superintendent*, Captain D. Wilson-Barker, R.N.R., F.R.S.E.

TRAINING SHIP *Cornwall*, off Purfleet (Reformatory Ship).

Superintendent, Admiral C. G. Robinson, C.V.O.

Secretary, W. Millachip, 66 Coleman Street, E.C.

TRAINING SHIP *Clio*, Bangor (North Wales, Chester, and Border Counties Training Ship Society).—*Capt.-Superintendent*, Capt. F. G. Langdon, R.N.

TRAINING SHIP *Indefatigable*, New Ferry, Birkenhead.—For boys of good character only, 13 to 14½. *Capt.-Superintendent*, Commandr. H. Butterworth, R.N.

TRAINING SHIP *Mercury*, Hamble, Southampton, Hants.—For boys of good character and educational qualifications only. *Capt.-Superintendent*, C. B. Fry, Commandr. R.N.R.

ORIENTAL STUDIES

SCHOOL OF ORIENTAL STUDIES, London Institution, Finsbury Circus, London, E.C. Incorp. June 1916, to give instruction in the languages of Eastern and African peoples, ancient and modern, and in the literature, history, religion, and customs of these peoples, especially with a view to the needs of persons about to proceed to the East or to Africa for the pursuit of study and research, commerce, or a profession. *Chairman of Governing Body*, Sir John P. Hewett, G.C.S.I., C.I.E.; *Hon. Sec.* P. J. Hartog, M.A., B.Sc.

TECHNICAL EDUCATION

[Places marked with an asterisk denote training centres for women munition workers.]

In addition to the institutions mentioned below, the following universities have faculties of engineering: Birmingham, Bristol, Cambridge, Durham, Leeds, Liverpool, London, Manchester, Sheffield, Wales, St. Andrews, Glasgow, Edinburgh, Dublin, National University of Ireland, Queen's University of Belfast.

I.—Under the London County Council

The London County Council controls and maintains seventeen technical institutes and schools of art of its own, and aids by money grants many other educational centres offering technical, scientific, or art instruction. The grants are made subject to certain conditions, *inter alia*, inspection, and the nomination of representatives upon the governing body or committee of management. The following is a list of the more important:—

Entirely maintained by the L.C.C.

BEAUFOY INSTITUTE, Prince's Road, Vauxhall Street, E.C.—*Principal*, A. Ritchie-Scott, B.Sc.

CAMBERWELL SCHOOL OF ARTS AND CRAFTS, Peckham Road, S.E.—*Principal*, W. B. Dalton.

CENTRAL SCHOOL OF ARTS AND CRAFTS, Southampton Row, W.C.—*Principal*, F. V. Burridge.

CLAPHAM SCHOOL OF ART, Edgeley Road, High Street, Clapham, S.W.—*Principal*, (vacant).

HACKNEY INSTITUTE:

(*a*) Hackney Institute, Dalston Lane, N.E.

(*b*) Hackney Institute, Sir John Cass's Branch, Cassland Road, N.E.

Principal, Percy R. Kirk, M.A., A.M.I.C.E. *Sec.* A. F. Watts.

HAMMERSMITH SCHOOL OF ARTS AND CRAFTS, Lime Grove, Shepherd's Bush, W.—*Principal*, John Williams.

NORWOOD TECHNICAL INSTITUTE, Knight's Hill, West Norwood, S.E.—*Principal*, W. Huntington, B.Sc.

PADDINGTON TECHNICAL INSTITUTE, Saltram Crescent, W.—*Principal*, A. G. Cooke, M.A.

PUTNEY SCHOOL OF ART, Oxford Road, Putney.—*Principal*, J. Bowyer.

*SCHOOL OF BUILDING, Ferndale Road, Brixton, S.W.—*Principal*, H. W. Richards; *Vice-Principal*, A. R. Sage; *Director of Architecture*, Prof. Beresford Pite, F.R.I.B.A.; *Sec.* W. A. Andrews.

SCHOOL OF ENGINEERING AND NAVIGATION, High Street, Poplar, E.—*Principal*, H. A. Garratt, M.I.N.A., A.M.I.C.E.

SCHOOL OF PHOTO-ENGRAVING AND LITHOGRAPHY, 6 Bolt Court, Fleet Street, E.C.—*Principal*, A. J. Bull.

*SHOREDITCH TECHNICAL INSTITUTE, Pitfield Street, Hoxton, N.—*Principal*, Shadrach Hicks.

TRADE SCHOOL FOR GIRLS, Lime Grove, Shepherd's Bush, W.—*Lady Superintendent*, Miss M. A. J. Boon.

TRADE SCHOOL FOR GIRLS, Queen Square, Bloomsbury, W.C.— *Head Mistress*, Miss F. E. I. Smythe.

WESTMINSTER TECHNICAL INSTITUTE, Vincent Square, W. (with which is incorporated the Westminster School of Art).—*Principal*, J. Stuart Ker, B.Sc. *Head Master, School of Art*, A. H. Christie (*actg.*); Drawing and Painting under the direction of Walter Sickert.

Polytechnics aided by the L.C.C.

*BATTERSEA POLYTECHNIC, Battersea Park Road, Battersea, S.W.—*Principal*, F. H. Newman, M.A., Ph.D.

BOROUGH POLYTECHNIC, Borough Road, S.E.—*Principal*, C. T. Millis, M.I.M.E.

CITY OF LONDON COLLEGE, White Street, Moorfields.—*Principal*, Sidney Humphries, B.A., LL.B.

NORTHAMPTON POLYTECHNIC INSTITUTE, Clerkenwell, E.C.—*Principal*, R. M. Walmsley, D.Sc., F.R.S.E.

NORTHERN POLYTECHNIC, Holloway Road, N.—*Principal*, R. S. Clay, D.Sc.

SIR JOHN CASS TECHNICAL INSTITUTE, Aldgate, E.C.—*Principal*, C. A. Keane, D.Sc.

SOUTH-WESTERN POLYTECHNIC INSTITUTE, Manresa Road, Chelsea, S.W.—*Principal*, S. Skinner, M.A.

THE POLYTECHNIC, 307-311 Regent Street, W.—*Director of Education*, Robert Mitchell.

WOOLWICH POLYTECHNIC, William Street, Woolwich.—*Principal*, A. F. Hogg, M.A., F.C.S.

BIRKBECK COLLEGE, Bream's Buildings, Chancery Lane, E.C.—*Principal*, G. Armitage-Smith, M.A., D.Litt. Receives an annual grant from the L.C.C. under this head; the work in Arts, Science, Economics, and Law consists of courses for the degrees of the University of London.

Technical and other Institutes aided by the L.C.C.

ALBANY INSTITUTE DOMESTIC ECONOMY SCHOOL FOR GIRLS, Albury Street, Deptford, S.E.—*Lady Superintendent*, Miss R. Mason.

ALDENHAM INSTITUTE, Goldington Crescent, N.W.—*Hon. Secretary*, H. S. Mingard, F.C.I.S.

BERMONDSEY SETTLEMENT, Farncombe Street, Jamaica Road, S.E.—*Warden*, Rev. J. Scott Lidgett, D.D.

CHURCH INSTITUTE, Wiscton Road, Upper Tooting.—*Hon. Secretary*, C. H. Baker.

COLLEGE FOR WORKING WOMEN, 7 Fitzroy Street, W.—*Hon. Secretary*, Miss F. Martin.

DEVAS INSTITUTE, New Road, Battersea, S.W.—*Sec.* W. F. Holmes.

GOLDSMITHS' COLLEGE, New Cross, S.E.—*Warden*, T. Raymont, M.A. (*actg.*).

HEROLD'S INSTITUTE, Drummond Road, Bermondsey (in connection with the Borough Polytechnic).

LEATHERSELLERS' COMPANY'S TECHNICAL COLLEGE, 176 Tower Bridge Road, S.E.—*Principal*, Dr. J. Gordon Parker.

MORLEY COLLEGE, Waterloo Road, S.E.—*Vice-Principal*, Miss Clare Brennand.

ROYAL SCHOOL OF ART NEEDLEWORK, Exhibition Road, S.W.—*Principal*, Miss Evelyn Bradshaw; *Secretary*, Miss M. ffennell.

SAILORS' HOME, Dock Street, E. (School of Nautical Cookery).—*Secretary*, A. E. Loder, R.N.R.

ST. BRIDE FOUNDATION INSTITUTE, Bride Lane, Fleet Street, E.C. (for Printing Trades).—*Principal*, J. R. Riddell.

SCHOOL OF ART WOOD-CARVING, South Kensington, 39 Thurloe Place, S.W.—*Secretary*, J. Bailey; *Registrar*, Miss A. C. Burton.

WANDSWORTH TECHNICAL INSTITUTE, High Street, Wandsworth, S.W.—*Principal*, A. R. Gridley, M.A. (*actg.*).

WORKING MEN'S COLLEGE, Crowndale Road, N.W.—*Superintendent*, E. C. Duchesne.

BLACKHEATH SCHOOL OF ART AND CRAFTS, Lee Road, Blackheath, S.E.—*Head Master*, J. H. Hale, F.S.A.M.

LAMBETH SCHOOL OF ART, St. Oswald's Place, Upper Kennington Lane.—*Principal*, T. McKeggie.

ST. MARTIN'S SCHOOL OF ART, 107 Charing Cross Road, W.C.—*Head Master*, J. E. Allen, A.R.C.A.

II.—Other London Institutions

IMPERIAL COLLEGE OF SCIENCE AND TECHNOLOGY (comprising the Royal College of Science, the Royal School of Mines, and the City and Guilds [Engineering] College). Established by Royal Charter July 8, 1907. The Imperial College is administered by a governing body of forty-one. *Rector*, Sir Alfred Keogh, K.C.B., LL.D. *Sec.* Alexander Gow, M.A., B.Sc.; *Registrar*, John Jones. **The City and Guilds (Engineering) College** is administered by a Delegacy of nineteen members (*Chairman*, Sir John Wolfe Barry, K.C.B., F.R.S.; *Dean*, Prof. W. E. Dalby, F.R.S.). While continuing the **Associateship** courses previously given in the three institutions now forming integral parts of the Imperial College, arrangements have been made for the award of an **Imperial College Diploma** with the abbreviated title D.I.C. Special advanced courses include Railway Engineering, Structural and Hydraulic Engineering, Surveying and Geology, Electrical Machinery and Transformers, the design and erection of Chemical Plant, Fuel and Refractory Materials, the Technology of Woods and Fibres, Economic Botany, Plant Physiology and Pathology, Bio-Chemistry, Economic Entomology, Comparative Pathology, Engineering Geology, etc. Students satisfactorily completing the approved courses of study may obtain the following **additional Diplomas**: (*a*) the Associateship of the Royal College of Science in Mathematics, Mechanics, Physics, Chemistry, Botany, Zoology, or Geology (three years' course); (*b*) the Associateship of the Royal School of Mines in Mining, Metallurgy, and the Technology of Oil (four years' course); (*c*) the Associateship of the City and Guilds of London Institute in Engineering (three years' course). The **fees** of students entering for the Associateship Courses are per year £36.10.0 in the Royal College of Science, £38.10.0 in the City and Guilds College, £45.10.0 in the Royal School of Mines. Entrance Scholarships are offered for the R.C.S. and C. & G.(Eng.)C. A certain number of Royal Exhibitions and Free Studentships tenable at the College are awarded by competition at the Science Examinations of the Board of Education. All communications respecting admission to or the work of the Imperial College should be addressed to the Registrar. *Offices*, Imperial Institute Road, South Kensington. For further particulars concerning the work of the City and Guilds Engineering College, which forms a department of the Imperial College, see below.

Departments and Professors.—*Mathematics*, A. R. Forsyth, F.R.S., A. N. Whitehead, F.R.S. (*Applied*; *Physics*, H. L. Callender, F.R.S., R. J. Strutt, F.R.S., W. Watson, F.R.S., A. Fowler, F.R.S. (*Astro-Physics*); *Chemistry*, H. B. Baker, F.R.S., J. F. Thorpe, F.R.S. (*Organic*), J. C. Philip (*Physical*); *Fuel and Refractory Materials*, W. A. Bone, F.R.S.; *Biology*, J. B. Farmer, F.R.S. (*Botany*), E. W. McBride, F.R.S. (*Zoology*). V. H. Blackman, F.R.S. (*Plant Physiology*). H. G. Plimmer, F.R.S. (*Comparative Pathology*), P. Groom (*Woods and Fibres Technology*), H. M. Lefroy (*Entomology*); *Geology*, W. W. Watts, F.R.S., C. G. Cullis (*Economic Mineralogy*); *Mining*, W. Frecheville; *Metallurgy*, H. C. H. Carpenter; *Oil Technology*, W. W. Watts, F.R.S., *Mechanical Engineering and Motive Power*, W. E. Dalby, F.R.S.; *Civil Engineering*, S. M. Dixon; *Electrical Engineering*, T. Mathew, F.R.S.

MINES, THE ROYAL SCHOOL OF, forms an integral part of the Imperial College of Science and Technology, and is administered and financed by the Governing Body of that College, with the assistance of an Advisory Board. (*See* IMPERIAL COLLEGE OF SCIENCE.)

SCIENCE, THE ROYAL COLLEGE OF, forms an integral part of the Imperial College of Science and Technology, and is administered and financed by the Governing Body of that College. (*See* IMPERIAL COLLEGE OF SCIENCE.)

THE CITY AND GUILDS OF LONDON INSTITUTE was established in 1878 by the Corporation and Livery Companies of the City of London to promote the applications of science and art to productive industry. *Visitor*, H.M. the King; *Chairman of Council*, Lord Halsbury; *Chairman of the Executive Committee*, Sir John Wolfe Barry, K.C.B.; *Treasurer*, Sir Edwd. H. Burk; *Hon. Secs.* Sir John Watney, S. W. Luard, and W. T. Prideaux. *Secretary*, A. L. Soper. *Offices*, Gresham College, Basinghall Street, E.C. The total income amounts to about £30,000 a year. The operations of the Institute are divided under the following heads:

(1) THE CITY AND GUILDS' (ENGINEERING) COLLEGE, which forms the Engineering section of the Imperial College of Science and Technology, and is conducted by a Delegacy representing the Imperial College, the City and Guilds' Institute, and the Goldsmiths' Company. (*See* IMPERIAL COLLEGE OF SCIENCE.)

(2) THE CITY AND GUILDS' TECHNICAL COLLEGE, Finsbury, provides courses of instruction in civil, mechanical, and electrical engineering and chemistry. It was opened in 1883.

(3) THE SOUTH LONDON SCHOOL OF TECHNICAL ART, Kennington Park Road, provides instruction in modelling, drawing, and painting from the life.

(4) THE DEPARTMENT OF TECHNOLOGY, the

object of which is to encourage the teaching of technology, domestic subjects, and manual training throughout the British Empire.

CRYSTAL PALACE (School of Practical Engineering).—*Principal*, J. W. Wilson, M.Inst.C.E., M.I.Mech.E. *Vice-Principal*, Maurice Wilson, A.M.Inst.C.E.

EAST LONDON COLLEGE (*see* University of London).

FARADAY HOUSE ELECTRICAL ENGINEERING COLLEGE, Southampton Row, W.C.—*Principal*, A. Russell, D.Sc.

POLYTECHNIC SCHOOL OF ENGINEERING (Electrical, Civil, Motor, Aero, and Mechanical), 307-311 Regent Street, W.—*Director*, Prof. Henry J. Spooner, C.E., M.I.M.E., A.M.I.C.E.

SCHOOL OF CARRIAGE AND MOTOR BODY BUILDING, Balderton Street, W.—*Head Master*, Ernest Bailey.

TRADES' TRAINING SCHOOLS, 153 Great Titchfield Street, W.—*Director*, Banister Fletcher, F.R.I.B.A., F.S.I. (*actg.*).

WILLESDEN POLYTECHNIC, Priory Park Road, Kilburn, N.W.—*Principal*, A. J. Bird.

Registrar, G. E. Haines.

SECONDARY EDUCATION

We shall be pleased to give to the users of HAZELL *all information regarding suitable schools and colleges, though of course no responsibility is incurred by the same. Inquiries should be addressed to : Educational Bureau, 52 Long Acre, London, W.C.*

THE LARGER PUBLIC SCHOOLS

* Denotes member of the Head Masters' Conference (*q.v.*); † denotes member of the Incorporated Association of Head Masters (*q.v.*).

*BEAUMONT COLLEGE, Old Windsor. Roman Catholic. Founded 1861. Pupils, 200. *Fees*, 90 guineas p.a. *Rector*, Rev. George Jinks, S.J.

*†BEDFORD GRAMMAR SCHOOL, Bedford. Founded 1566; reorganised 1873. There are two or more each year leaving *exhibitions* of the total value of £160 per annum, tenable for four years. Exhibitions tenable in the school from £60 to £10. *Pupils*, 700. Boys are prepared for the Universities, Civil Service, for Woolwich and Sandhurst, Royal Navy, and other public examinations. There is an Engineering side with full provision of workshops. There are seven boarding-houses. There is an Engineer Corps. *Fees*, over 16, £5.12.0; 10 to 16, £4.11.0; under 10, £3.10.0 per term. *Head Master*, Reginald Carter, M.A.

*†BERKHAMSTED SCHOOL, Herts. Pupils, 500. Seven boarding-houses. *Fees*, tuition, £15; boarding, £55. *Head Master*, C. H. Greene, M.A.

*†BIRMINGHAM, KING EDWARD'S SCHOOL, comprises a high school for boys, a high school for girls, three grammar schools for boys and three grammar schools for girls. *Founded* 1552, reorganised 1878 and 1900. Numerous *scholarships and exhibitions* both for boys and girls. The pupils number about 2,800; 500 in high school for boys. *Fees*, £18 per annum. *Head Master*, R. Cary Gilson, M.A. *Motto*, "Domine, Salvum fac Regem."

*BLUNDELL'S SCHOOL, Tiverton, Devon. Founded 1604. *Fees*, £75–£90 per annum. *Head Master*, A. L. Francis, M.A.

*BRADFIELD COLLEGE, Berks. *Fees*, 90 guineas p.a. *Head Master*, Rev. R. D. Beloe, M.A.

*†BRIGHTON COLLEGE, Brighton. Founded 1847. Governed by a Council of twelve. There are at least three leaving *scholarships* of the annual value of £35, and three of £30, tenable at Oxford or Cambridge. Entrance scholarships are awarded every year, at least five of the annual value of £70 or £50, and smaller exhibitions. Pupils, 340. *Fees*, £99.6.0 p.a. *Head Master*, Rev. W. R. Dawson, M.A.

*†CHARTERHOUSE SCHOOL, Godalming. Founded 1611, and until 1872 situated near Smithfield, London, on ground that belonged to the Carthusians. Sixty scholarships are tenable in the school, of which ten are competed for annually at entrance. Twenty or more *exhibitions* to the Universities, each of the annual value of £80, tenable for four years. Pupils, 600. *Fees*, entrance, £10.10.0; tuition, £31.10.0 p.a.; boarding fee, £84 p.a. *Head Master*, Frank Fletcher, M.A. *Motto*, "Deo dante dedi."

*CHELTENHAM COLLEGE, Gloucestershire. Founded 1841. Incorporated '94; governed by a President and twenty members of Council. There are three sides in the Senior School—the Classical, the Military and Engineering, and the Modern. There is a Junior School. Numerous *scholarships* are attached to the College; also nominations for sons of the Clergy. Pupils, 580. *Fees*, under 10—day-boys £7 per term, boarders £32; between 10 and 13—day-boys £10 per term, boarders £36; over 13—day-boys, £13 per term, boarders £40. *Principal*, the Rev. Canon R. Waterfield, M.A. *Bursar*, A. A. Hunter.

*CHRIST'S HOSPITAL. Founded 1552. The Hospital schools are: (1) the *Boys' School, West Horsham*, with accommodation for 820 boys, including Preparatory School. *Head Master*, Rev. A. W. Upcott, D.D., Exeter College, Oxford; (2) the Girls' School, Hertford, with accommodation for 280 girls. *Head Mistress*, Miss M. E. Robertson, Newnham College, Cambridge. With relation to two-thirds of the scholars at the Hospital schools, fees ranging from £10 to £20 may be charged if the Council of Almoners consider "that the parents or next friends are in a position to contribute substantially towards the child's education and maintenance." *Entrance* to the Hospital schools is gained by presentation (425 places) or by competition (100 scholars). Metropolitan public elementary schools supply 179 scholars, various parishes 108, and various endowed schools the residue; 85 others are nominated by the Council of Almoners. Hospital exhibition funds for both boys and girls provide *exhibitions* to universities, including *The Times* scholarship, and the "Pitt Club" exhibition. Pupils, 820 boys' school, 260 girls' school. *Clerk*, R. L. Franks. *Office*, 26 and 27 Great Tower Street, London, E.C.

*†CITY OF LONDON SCHOOL, Victoria Embank-

ment, E.C. Established by the Corporation of London in 1834. Tenable at the Universities or other places of higher education are 26 *scholarships* varying from £100 to £20; and about 50 others tenable at the school. Pupils admitted between the ages of 7 and 15. *Fees*, 15 guineas p.a. *Head Master*, Rev. Arthur Chilton, D.D. *Sec.*, A. J. Austin.

*†CLIFTON COLLEGE, Bristol. Opened 1862, received charter '77. There are Classical, Modern, and Military sides, and Junior and Preparatory Schools. Three *exhibitions*, of £25, which may be increased to £50 a year, tenable at the Universities, and at least eleven scholarships, varying in value from £25 to £100 a year, tenable at the College, offered annually. Pupils, 600. *Fees*, tuition, Preparatory, £24; Junior, £30; Classical, £33; Modern, £37.10.0; Military, £46.10.0; boarding, £60–£72. *Head Master*, J. E. King, Litt.D. *Sec.*, W. J. Lewis. *Motto*, "Spiritus intus alit."

*†DULWICH COLLEGE (part of the foundation of Alleyn's "College of God's Gift" at Dulwich) was founded A.D. 1619, by *Edward Alleyn, the Actor*, under Letters Patent of King James I. Reconstituted '58, and removed to new site and new building '70. Pupils, 660. Age of admission, not under 10; leaving, 19. Endowment about £5,000 p.a. £500 may be paid annually in scholarships to boys either already in the school or about to enter it, and £1,000 in leaving scholarships. Such scholarships are awarded as the result of open examination. *Fees*, entrance, £1; tuition, £24 p.a. under 13; £27 p.a. over 13. *Master*, George Smith, M.A.; *School Secretary*, Rev. J. R. Cocq, M.A. *Motto*, "Detur Gloria soli Deo."

*EPSOM COLLEGE, Epsom. Established 1855 with a Royal Medical Foundation. Accommodation for 250, and Preparatory for 100 boys under fifteen. Five medical scholarships at the Hospital Schools in London, and 19 other scholarships to the Universities, etc. The foundation provides for 50 foundation scholars and 50 pensioners. *Fees* sons of medical men, 70 guineas; others, 80 guineas; day-boys, 25 guineas. *Head Master*, Rev. W. J. Barton, M.A.; *Secretary*, J. Bernard Lamb, 37, Soho Square, W. *Bursar*, W. D. Crossley; 20 assistant masters.

*ETON COLLEGE, Eton. Founded 1440. Endowment exceeds £20,000 p.a. *Pupils* consist of *King's scholars* or "Collegers" (of whom there are 70, and who enter college after competitive examination between twelve and fourteen years of age), and of *Oppidans*, who enter between twelve and fourteen years of age. *Exhibitions and scholarships* to both Universities, ranging from £60 for four years downwards. *Motto*, "Floreat Etona." *Head Master*, Rev. Cyril A. Alington, M.A. A *mission* is supported by past and present Etonians at Hackney Wick.

*†FELSTED SCHOOL, Essex. Founded in 1564. Classical, Modern, Engineering, and Army sides. Scholarships £70, £50, £30, and £20; leaving Exhibitions £60 and £50. Pupils, 270. *Fees*, tuition, £20 p.a.; boarding, £50–£58 p.a. *Head Master*, Rev. Frank Stephenson, M.A. *Bursar*, E. B. Trow, LL.D., M.A., B.C.L.

*FETTES COLLEGE, Edinburgh. Founded in 1870. Has about 230 scholars. *Fees*, £109 p.a. *Head Master*, Rev. W. A. Heard, LL.D, F.R.S.L.

*GLENALMOND. Founded with the name Trinity College, Glenalmond, in 1841, "to embrace objects not attainable in any public foundation hitherto established in Scotland." It stands on the river Almond, in the Grampians, near Perth. Pupils about 140. *Fees*, 90–100 guineas p.a. *Warden*, Rev. S. E. Longland, M.A.

*†HAILEYBURY COLLEGE, Hertford. Founded 1862, received Royal Charter '64. Entrance scholarships, about twenty in number, competed for annually in November. Special fees for sons of clergy. *Exhibitions* to Oxford and Cambridge five annually (£60, £50, £50, £40, and £20). *Pupils*, 500. *Head Master*, F. B. Malim, M.A.

*HARROW SCHOOL, Harrow. Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Age of admission, under 14. Entrance scholarships and exhibitions are offered every Easter to boys (not members of the school) over 12 and under 14 years of age. There are numerous scholarships from £100 downwards, to the Universities. Pupils, nearly 500. *Fees*, £150 p.a. *Head Master*, Rev. Lionel Ford, M.A. *Motto*, "Donorum Dei Dispensatio Fidelis."

*LANCING COLLEGE, Shoreham, Sussex. Founded 1848. Pupils, 300. *Fees*, 90 guineas p.a. *Head Master*, Rev. H. T. Bowlby.

*†THE LEYS SCHOOL, Cambridge. Founded 1875, incorporated '78. Its founders were chiefly members of the Methodist Church, but it draws pupils and masters from the Anglican and other Protestant Churches. It has four houses ("hostels") containing about 40 boys each, and excellent general accommodation for 200. The latest addition, the King's Building, was inaugurated by H.M. the King in 1914. Boys may be received from 12 (more usually 13) years of age upwards. *Fees*, 111 guineas, reduced in certain cases to 91 guineas. Entrance exhibitions or scholarships, varying in value from £15 to £60 (occasionally more) p.a., are offered for competition at the end of each term. Leaving scholarships yearly. *Motto*, "In fide fiducia." *Head Master*, Rev. W. T. A. Barber, D.D. *Bursar*, J. C. Isard, M.A.

*LORETTO SCHOOL, Musselburgh. Pupils, 134. *Fees*, £105 p.a., everything inclusive. *Head Master*, A. R. Smith, M.A.

*MALVERN COLLEGE, Worcestershire. Founded 1865. Exhibitions at the Universities, one of £40 for three years, offered annually, and one of £27 for one year; also two of £40 for three years, tenable at B.N.C., Oxford. Entrance scholarships annually filled, one or more of £87, four or more of £50, six or more of £30; exhibition, £12–£25. Pupils, 450. *Fees*, £105; entrance, £3.3.0; nomination fee, £6 p.a. *Head Master*, F. S. Preston, M.A. *Bursar*, R. A. Ker, M.A.

†MANCHESTER GRAMMAR SCHOOL. Founded 1515. The school consists of 300 foundationers (free) and about 760 capitation scholars. Close scholarships at Wadham and Brasenose College, Oxford, and St. John's College, Cambridge, range in annual value from £50 to £80. There are 24 scholarships for classics, mathematics, or physical science, tenable at the Universities, ranging in value from £20 to £50 each p.a.; also 32 scholarships, tenable at the school, ranging in value from £14 to £25 each p.a., together with numerous prizes, also 270 foundation scholarships giving free tuition. *Fees*, £14 p.a. under 14; £17.3.0 p.a. entering over 14. There are three preparatory schools, in South Manchester, North Manchester, and Sale. *High Master*, J. L. Paton, M.A. *Receiver*, Owen W. Cox. *Motto*, "Sapere aude."

*MARLBOROUGH COLLEGE, Wiltshire. Founded 1843; charters '45, '53. Leaving exhibitions to Universities—three annual, £30–£50; three triennial, £22.10.0–£50. Also 2 Modern School Exhibitions to Woolwich or elsewhere of £25 and £20 each, offered annually. There are 15 open school scholarships, varying in value from £15 to £80; also 16 foundation scholarships of £30 for sons of clergy. Pupils, 630. *Fees*, clergy, £90 p.a.; laity, £100

p.a.; boarding-houses, £130 p.a. *Master*, Cyril Norwood, D.Litt.

*†MERCHANT TAYLORS' SCHOOL, Charterhouse Square, London. Founded (1561) by Sir Thomas White (founder of St. John's College, Oxford), and the court of the Merchant Taylors' Company. The Company is the governing body of the school, which has always continued a day school. Forty-two scholarships at the school, and scholarships of £86 and £100 for five and seven years, to St. John's College, Oxford; others, ranging from £90, to Cambridge. Pupils 450; on entrance must be over 9 and under 14. *Fees*, 18 guineas p.a. *Head Master*, Rev. J. Arbuthnot Nairn, Litt.D., B.D. *Sec.*, E. P. Hart, M.A., A.C.A. *Motto*, "Homo plantat, homo irrigat, sed Deus dat incrementum."

*†MILL HILL SCHOOL (London, N.W.). Founded 1807 as Protestant Dissenters' Grammar School, reconstituted '69 on a broader basis. Awards the three "Wills" Scholarships of £70 each, the "Bousfield" of £60, the "Hislop" of £50, the "Scrutton" of about £30, and four other leaving scholarships each tenable for three years. Also several Ministerial Exhibitions (about £60 a year) and Entrance Scholarships (£30 to £60). Number of boys, 290. *Fees*, under 14, 94 guineas; over 14, 100 guineas. *Motto*, "Et virtutem, et musas." The "*Old Mill-Hillians Club*" numbers over 1,100 members. *Head Master*, Sir J. D. McClure, M.A., LL.D., D.Mus.

*RADLEY COLLEGE, Abingdon, Berks. Founded 1847. Has 200 scholars. *Warden*, Rev. E. G. Selwyn, M.A.

*†REPTON SCHOOL, Derbyshire. Founded 1557; reorganised 1874. Pupils, 360; 30 assistant masters. *Fees*, £115 p.a. *Head Master*, Rev. G. F. Fisher, M.A.

*ROSSALL SCHOOL, Fleetwood. Lancashire. Founded 1844. Royal Charter granted Nov. '90. Two *exhibitions*, one of £50 and one of £30 at Oxford or Cambridge, each for three years, offered every year; and the *Phillips memorial exhibition* for mathematics, of £40 for one year at Oxford or Cambridge. Besides this there are about 12 *Scholarships and Exhibitions* tenable at the school, offered each year by examination. *Fees*, £90–£99 p.a. (inclusive of all extras); sons of clergy, £75–£84. *Head Master*, Rev. E. J. W. Houghton, D.D.

*†RUGBY SCHOOL, Rugby. Founded by Lawrence Sheriff, a native of Rugby (1567), and originally entrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1602. The boys are divided into *foundationers* and *non-foundationers*. Has, every June, 10 or 12 entrance and other scholarships of £100 to £40, and 8 *leaving exhibitions* tenable at the Universities for 4 years, 3 of £60 and 5 of £30 annual value. Pupils, 590; admission at the age of 13. *Fees* boarding and tuition), £44.2.0 per term. *Head Master*, Rev. A. A. David, D.D. *Motto*, "Orando aborando."

*ST. PAUL'S SCHOOL, Hammersmith Rd., London, W. Founded 1509 by *John Colet*, D.D., Dean of St. Paul's. The school consists of 153 *foundation scholars*, elected by competitive examination, and of so many *capitation scholars* as the governors may from time to time decide. The capitation scholars pay a tuition fee of £24.9.0 a year. The foundation scholars are exempt from fees. Pupils 635. Nine *exhibitions* for 4 years, varying in value from £70 to £30, to Oxford and Cambridge, and one exhibition of £50 for two years to the Royal Academy, Woolwich. *Motto*, "Fide et literis." *High Master*, Rev. A. E. Hillard, D.D.

*†SHERBORNE SCHOOL, Dorsetshire. Refounded by Edward VI (the earliest school founded by that monarch), 1550, *reorganised* 1870. Accommodation for 300 pupils. An *exhibition* to either Univ. of £40 for four years falls vacant every year; another of £30 is vacant every four years; pupils may also compete for *Huish Exhibitions* of £50 for four years; this privilege is allowed to three other public schools only. There are also numerous Foundation, House, and other Scholarships and Prizes. *Fees*, £100 p.a. (inclusive). *Head Master*, Nowell Charles Smith. *Clerk to Governors*, S. Bennett. *Motto* (royal arms of Ed. VI), "Honi soit qui mal y pense."

*SHREWSBURY SCHOOL, Shrewsbury. Founded by *King Edward VI* in 1551, augmented by *Queen Elizabeth* in 1571. The school was moved to a new site (of 60 acres) in '82. Since then its numbers have increased from 170 to 413. *Fees*, 100 guineas; day-boys, £29. *Head Master*, Rev. Canon H. A. P. Sawyer, M.A.

*STONYHURST COLLEGE, near Blackburn. Directed by the Jesuit Fathers. Founded 1592 at St. Omers in Flanders; transferred to Stonyhurst 1794. *Rector*, the Rev. W. Bodkin, S.J. *The Observatory* attached to the College turns out excellent solar and other work. *Fees*, Higher course, 120 guineas p.a.; school course, £65 p.a.; preparatory school, 50 guineas p.a.

*†TONBRIDGE SCHOOL, Tonbridge, Kent, founded 1553, reorganised 1880. *Governors:* Master, Warden, and Court of the Company of Skinners. Entrance Scholarships in June—£100, £80, £40, £30. Sixteen leaving *exhibitions* of £75 for four years, of which 4 fall vacant annually, are tenable at any place of higher education that the Governors approve of; four others of £30 a year for four years, one vacant each year, are tenable only at Oxford or Cambridge. Pupils, 400. *Fees*, tuition, £33 p.a.; boarding, £69 p.a. *Head Master*, C. Lowry.

*†UNIVERSITY COLLEGE SCHOOL, Frognal, Hampstead, established 1830. Pupils, 500. *Fees*, 30 guineas p.a. *Motto*, "Paulatim." *Head Master*, Guy Kendall, M.A.

*†UPPINGHAM SCHOOL, Uppingham, Rutland. *Archdeacon Johnson's School*, founded 1584; reorganised 1875. Three leaving *exhibitions* of £60, £50, and £40 offered every year, and 14 of about £22 each at Cambridge. Entrance scholarships from £85 to £30. Pupils, 450; masters, 32, with 6 music masters. *Fees*, tuition, £42; boarding, £73. There is also a Preparatory School. *Head Master*, R. H. Owen, M.A.

*†WELLINGTON COLLEGE (Berks) was incorporated by Royal Charter, Dec. 13, 1853. The foundation consists of ninety nominations for the sons of deceased army officers, who are boarded and educated at an annual charge of £10. There are, as a rule, seven open scholarships annually (£80 and £50 under conditions). Classical and Modern sides. Average number of pupils, 500. A limited number of army officers' sons are educated at £99 a year; for others the fees are £114 in college; £132 in a boarding-house. *Motto*, "Heroum filii." *Chairman of Governors*, H.R.H. the Duke of Connaught, K.G. *Master*, W. W. Vaughan, M.A. *Bursar*, P. Sherston.

*†WESTMINSTER SCHOOL, or the Royal College of St. Peter's, Westminster. Refounded 1560, reorganised 1868. Foundationers, 60; about 12 annual vacancies. The *Westminster Play*, an annual representation of a Latin comedy by the scholars, is of some celebrity. There are a number of close scholarships and exhibitions to *Christ Church, Oxford*, and of exhibitions to *Trinity College, Cambridge*. *Fees*, entrance, £5.5.0; tuition, £31.10.0; boarding, £68.5.0. *Head Master*, Rev.

James Gow, M.A., Litt.D. *Motto*, "Dat Deus incrementum." *Bursar*, J. Tyson, B.A.

*WINCHESTER COLLEGE, Winchester, the oldest of the public schools, was *founded* (1387) by William of Wykeham, and opened March 26, 1393. About a dozen vacancies yearly occur for *foundationers*, who are elected by the Warden and Fellows after open competition. There are also at least 3 exhibitioners of £50 each for commoners. His Majesty gives two gold and two silver medals to be competed for. Tenable at the Universities are four *exhibitions* of £50 for four years, and at New College, Oxford, six *scholarships*. *Fees*, £137 p.a. (being £9 temporary extra charge during the War); entrance fee, £12. *Head Master*, M. J. Rendall. *Motto*, "Manners makyth man."

HIGHER EDUCATION OF WOMEN

The Higher Education of Women has made great advances since the Report of the Royal Commission on Secondary Schools was issued in 1868. The **National Union for Improving the Education of Women,** formed under the presidency of the Princess Louise, in consequence of that report, founded in 1872 the **Girls' Public Day School Company** (since Jan. 1906 called "The Girls' Public Day School Trust"), which, with the **Church Day Schools Company,** has raised the standard of girls' education throughout the land, and prepared the way for the Higher—that is, University and College—Education of Women.

TRAINING COLLEGES

The **Maria Grey Training College,** Salusbury Road, London, N.W., founded 1878. Tuition fees, £24 per session. Students are not admitted under 19 years of age, and must have sufficient academic qualification for admission. *Principal,* Miss Katherine L. Johnston, M.A.

The **Cambridge Training College for Women.** Fee for the year's course of thirty-three weeks, 65 to 75 guineas. *Principal,* Miss Mary Hay Wood, M.A., Litt.D.

The **St. George's Training College,** 5 Melville Street, Edinburgh. Fees, 26 guineas per annum. *Principal,* Miss E. Stevenson, B.A., Classical Tripos.

The **London Day Training College** (L.C.C.) is attached to the University of London. Accommodation for 350 students. *Principal,* Prof. Adams, M.A., B.Sc. Glasgow, LL.D. St. Andrews, Professor of Education in the University of London; *Vice-Principals,* Prof. T. P. Nunn, M.A., D.Sc. Lond., Miss M. Punnett, B.A. Lond. Southampton Row, W.C.

The following colleges for women "Two-Year Students" are also maintained by the L.C.C.: The **Avery Hill Training College,** Eltham. Accommodation, 320. *Principal,* Miss E. M. Julian, M.A. (Dublin), Mental and Moral Sciences Tripos (Cantab.).—The **Graystoke Place Day Training College,** Breams Bldgs., E.C. Accommodation, 144. *Principal,* W. T. Goode, M.A.—The **Fulham Training College** (London County Council), Finlay Street, Fulham, S.W. Accommodation, 200. *Principal,* Miss A. Lloyd Evans, M.A. (St. Andrews).

The Training Department of **Goldsmiths' College,** New Cross, S.E. Accommodation, 515. Students nominated by the Kent, Middlesex, Surrey, and Croydon Education Committees are admitted free. Other students pay £20 per annum. *Warden,* T. Raymont, M.A. *(acting).*

Cherwell Hall, Oxford. Accommodation, 50. Fees, 65 to 80 guineas per annum. *Principal,* Miss Catharine Dodd, M.A.

COLLEGES AT CAMBRIDGE

Oxford and Cambridge now offer many facilities to women desiring advanced education. At **Cambridge** the triposes, or honour examinations for the B.A. degree in mathematics, classics, natural science, moral science, history, mediæval and modern languages, law, mechanical science, Semitic languages, Indian languages and theology, have, since 1881, been open to such women as have passed a specified preliminary examination.

Girton College was founded at Hitchin in 1869, removed to Cambridge in 1873, and incorporated in 1872. Inclusive fees, £105 per annum. *Mistress,* Miss K. Jex-Blake; *Vice-Mistress and Bursar,* Miss E. M. Allen.

Newnham College, Cambridge, was incorporated in 1880. The college accommodates 220 students, a Principal, 4 vice-principals, and 17 resident lecturers and fellows. Fees (inclusive), £30 to £35 per term. Out-students' fees, about £12 per term. Application for admission and all inquiries should be made to the Principal, Newnham College, Cambridge. *Principal,* Miss Stephen.

RECOGNISED SOCIETIES OF WOMEN STUDENTS AT OXFORD

At Oxford all the examinations for degrees in Arts and Music are open to women, but no degrees are conferred. Women are not admitted to membership of the University, but the students of five recognised societies are entered on the register kept by the Delegacy for Women Students, and are styled "registered women students." It is charged with the duty of arranging for the admission of women to University examinations, of approving lodgings and hostels, and of making regulations as to the examinations which shall qualify women for admission to University examinations in Arts and Music. It is also responsible for the government of the Society of Oxford Home-Students (*see below*). The names of successful candidates appear in the *University Gazette,* and the class-lists also in the Calendar. Address of the Secretary to the Delegacy, Clarendon Building, Oxford.

The University Diplomas in geography, education, economic and political science, anthropology, classical archæology, rural economy, ophthalmology, and public health are open to women. For information as to the course of practical training for the diploma in education, apply to the Secretary, Delegacy for the Training of Secondary Teachers, Clarendon Building, Broad Street, Oxford.

Lady Margaret Hall was founded in 1879, and recognised by the University in 1910. Candidates for entrance must have passed "Responsions" or an equivalent examination. Inclusive charges, £102 per annum. *Principal*, Miss H. Jex-Blake; *Vice-Principal*, Miss Lodge.

Somerville College, founded in 1879, incorporated in 1881, the name changed from "Hall" to "College" in 1894, recognised by the University 1910, has 101 students, 6 resident tutors, a librarian, and a domestic bursar. Fees, inclusive of board, lodging, and teaching, vary from £84 to £105 per annum, according to the rooms allotted. *Principal*, Miss Penrose, M.A.; *Vice-Principal*, Hon. A. M. Bruce, M.A.

St. Hugh's College, founded as St. Hugh's Hall in 1886, recognised by the University in 1910, and name changed to "College" in 1911. Fees for board, lodging, and tuition, £84 and £96 a year. *Principal*, Miss E. F. Jourdain; *Vice-Principal*, Miss Ady.

St. Hilda's Hall, recognised by the University in 1910. The Hall fees are £75, and tuition £26 5*s*. a year. *Principal*, Miss Burrows.

Society of Oxford Home-Students. Founded 1879, recognised by the University 1910. Regulations as to residence, etc., can be obtained from the Principal. *Principal*, Mrs. A. H. Johnson, 5 South Parks Road, Oxford; *Chairman of Committee*, W. M. Geldart, M.A., B.C.L., Professor of English Law.

Arrangements for the admission of women to lectures in Oxford are under the management of the Council of the Association for the Education of Women in Oxford, consisting of representatives of the Recognised Societies of Women Students and others interested in education. *Secretary*, Miss A. M. A. H. Rogers, Clarendon Building, Oxford.

COLLEGES IN AND NEAR LONDON

The Royal Holloway College, Englefield Green, Surrey (University of London). Prepares for London degrees in science and arts. Inclusive fee, £100 per annum. *Principal*, Miss Ellen C. Higgins, B.A. *Secretary*, Miss A. Martin Leake.

Bedford College for Women, Regent's Park, London, N.W., founded 1849. It is a "school" of the University. Fees for board and residence from 58 to 68 guineas per annum. Tuition fees for the London examinations from 27 guineas to 46½ guineas a session. Students are not received into residence under eighteen. *Principal*, Miss Tuke, M.A.

King's College for Women, Kensington Square, W. Household and Social Science Department, Campden Hill Road, W. *Warden*, Miss F. R. Shields, M.A.

Westfield College (University of London), Hampstead. Fees, £105 per annum. *Principal*, Miss A. de Sélincourt. *Secretary*, Miss S. M. Smee.

Students of **University College, London,** of the **Slade School of Art,** of the **London School of Economics,** and of the **London School of Medicine for Women,** can reside, under collegiate regulations, at **College Hall,** Byng Place, Gordon Square. Founded 1882; incorporated 1886. *Principal*, Miss Thyra B. Alleyne.

PROVINCIAL UNIVERSITY FACILITIES

The following universities grant degrees to women:—

The **Victoria University of Manchester:** Ashburne Hall. Fees, 45 to 55 guineas per annum. *Warden and Tutor*, Miss Phœbe Sheavyn, M.A., D.Litt.—Langdale Hall Church Hostel for women students. *Warden*, Miss R. Berwick.

The **University of Liverpool:** University Hall, Fairfield, Liverpool. Fees, from 40 guineas per annum. *Warden*, Miss Dorothy Chapman.

The **University of Leeds.** Apply to the Secretary.

The **University of Birmingham:** University House, Wyddrington, Church Road, Edgbaston. *Warden*, Miss B. Orange.

The **University of Durham:** the Women's Hostel, Abbey House, Palace Green. Fees, Tuition, £7; Residence, £12–16 a term. *Principal*, Miss R. E. D. Donaldson.

The **University of Sheffield.** *Tutor for Women*, Miss M. J. Sorby.

IRELAND AND SCOTLAND

Trinity College, Dublin University: *Lady Registrar of the Women Students*, Miss Lucy Gwynn. Hall of Residence, Trinity Hall. *Warden*, Miss E. M. Cunningham, M.A.

In **Scotland, St. Andrews** confers all degrees upon women students. The diploma of L.L.A. is also granted to them. **University Hall:** Fees, £45 to £66. *Warden*, Miss M. E. Dobson, M.A., B.Sc.—The Faculties in Arts, Science, and Medicine of the **University of Aberdeen** are open to women, but no hostel is provided.

At **Edinburgh University** degrees are given to women in all the faculties, including medicine. **Masson Hall,** 31 George Sq., Edinburgh. *Warden*, Miss F. H. Simson, M.A. The **Muir Hall** of Residence, 12 George Sq., Edinburgh. *Lady Superintendent*, Miss Robertson.

Queen Margaret College, Glasgow, by incorporation in 1893 is now the Women's Department of the University of Glasgow as a non-residential College for Women governed by the University Court and Senate. *Mistress*, Miss Frances H. Melville, M.A. B.D.

Queen Margaret Hall provides a residence for students attending Queen Margaret College. Fees, from £28 to £40 per College year. *Lady Superintendent*, Miss McGregor.

WALES

In **South Wales** the classes of University College, Cardiff, are open to women students, and degrees conferred upon them. The **Aberdare Hall of Residence** for women students accommodates 60 students. Terms for board and residence, £34 to £43 10*s*. per annum. *Principal*, Miss Kate Hurlbatt.

The **University College of North Wales** (Bangor) has a University Hostel for Women Students. Fees, 25–40 guineas the session. *Warden*, Miss Mary O. Davis.

University College of Wales, Aberystwyth, has a Women's Hostel with rooms for 200 students. Alexandra Hall, *Warden*, Miss C. P. Tremain, B.A.

The New HAZELL, 1917

SOCIETIES AND INSTITUTIONS

Societies not included below are classified elsewhere, and will be found by reference to the Index. The figures in brackets after the names of certain charitable, etc., institutions indicate the last reported annual receipts; further particulars will be found in the Advertisement-pages.

Academies, The International Association of. Established in 1899 on the initiative of the Royal Society "for the preparation and promotion of scientific undertakings of general interest which may be proposed by one of the associated academies, and in general to facilitate scientific relations between different countries," and now represents 20 academies and learned Societies of Europe and America. It was intended that the delegates of the Constituent bodies should meet once in every 3 years, and the direction of the affairs of the Association transferred from one Academy to another according to the place of the next general assembly. Meetings were held in Paris 1901, London 1904, Vienna 1907, Rome 1910, and Petrograd 1913.

Academy of Arts and Letters, American. Chartered by Congress, April 17, 1916. Number of members limited to 50. *Pres.* Wm. Dean Howells; *Chancellor*, Wm. M. Sloane; *Sec.* Robert Underwood Johnson. *Offices*, 70 Fifth Avenue, New York City, U.S.

Academy, The British, for the promotion of historical, philosophical, and philological studies. Incorp. Aug. 8, 1902. Maximum number of Fellows, 100, distributed under four main sectional committees: (1) History and Archæology—*Chairman*, Dr. G. W. Prothero; (2) Philology—*Chairman*, Sir F. G. Kenyon; (3) Philosophy—*Chairman*, Prof. B. Bosanquet; (4) Jurisprudence and Economics—*Chairman*, Sir Courtenay Ilbert. *Pres.* Rt. Hon. Viscount Bryce, O.M.; *Sec.* Prof. I. Gollancz, Litt.D. *Office*, Burlington House, W. **F.B.A.**

Academy, The French (Académie Française). Founded in 1635 by Cardinal Richelieu. It is the first of the five academies constituting the "Institut de France," the other four being l'Académie des Inscriptions et Belles-Lettres, l'Académie des Sciences, l'Académie des Beaux-Arts, and l'Académie des Sciences Morales et Politiques. The Academy consists of forty members, and meets at the Palais de l'Institut every Thursday from 3 to 5 p.m. An annual meeting is held in November. Thirty-two of the members receive 1,000 fr. a year, and eight members receive 2,000 fr. a year. Six members who are appointed as a Dictionary Commission also receive 1,000 fr. a year each. Forty-five "prix littéraires" and forty-nine "prix de vertu" are awarded by the Academy.

Academy, The Royal, Burlington House, W., was founded in 1768 by George III, who gave it rooms in Somerset House. Thence it was removed to Trafalgar Square (1834), and to its present abode, the site of which it occupies rent-free (1869). The principal objects of the Royal Academy are (1) the establishment of a well-regulated school or academy of design for the gratuitous instruction of students, and (2) the holding of an annual exhibition open to artists of distinguished merit, where they may offer their performances to public inspection, and acquire that degree of reputation and encouragement which they may be deemed to deserve. The Royal Academy is "a private society," supporting a school from its own resources without any grant of public money. The members are under the superintendence and control of the Sovereign, who confirms all appointments and by-laws; and the Society itself consists of 40 Royal Academicians, and at least 30 Associates; there may also be not more than four engravers, of whom not more than two may be Academicians. The first president was Sir Joshua Reynolds, and the present occupant of the office is Sir E. J. Poynter, elected Nov. 4, 1896. There is a council of 10 members, who succeed by rotation, five retiring every year, the President, the Keeper, and the Treasurer being *ex-officio* members. The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art for male and female students. The total cost of the buildings was over £150,000, the whole of which was defrayed out of the funds of the Academy. The Royal Academy derives the whole of its funds from the holding of its annual exhibition of the pictures of living artists, which opens on the first Monday in May and continues until the middle of August. No works which have previously been exhibited in London are accepted, and the Council has the right to reject any picture it may please. The Winter Exhibition of art treasures in connection with the Royal Academy was established in 1869, paintings being liberally lent by private individuals. The exhibition remains open from the first Monday in January for a period of ten weeks.

Royal Academicians

1914 Blomfield, R.T.
1891 Brock, Sir T., K.C.B.
1915 Brown, J. A. Arnesby.
1908 Clausen, G.
1910 Cope, A. S.
1891 Dicksee, F.
1913 Drury, E. A.
1915 Farquharson, J.
1887 Fildes, Sir Luke.
1910 Forbes, S. A.
1902 Frampton, Sir G. J.
1891 Gow, A. C. (Keeper and Librarian).
1881 Graham, P.
1910 Hacker, A.
1910 Hemy, C. N.
1897 Jackson, Sir T. G., Bt.
1909 John, Sir W. Goscombe.
1912 La Thangue, H. H.
1898 Leader, B. W.
1876 Leslie, G. D.
1898 Lucas, J. S.
1905 Murray, David.
1881 Ouless, W. W.
1911 Parsons, A.
1876 Poynter, Sir E. J., Bt. (President).
1895 Richmond, Sir W. B.
1881 Riviere, B.
1897 Sargent, J. S.
1909 Shannon, J. J.
1911 Short, Sir F.
1915 Sims, Charles.
1896 Solomon, S. J.
1887 Stone, M.
1914 Storey, G. A.
1888 Thornycroft, H.
1914 Tuke, H. S.
1895 Waterhouse, J. W.
1903 Waterlow, Sir E. A.

(during the war), 1*s.* the rest of the week, children 6*d.* all days, half-price to soldiers and sailors in uniform and to the wounded. Visitors to the Gardens in 1915, 1,058,728; gate-money £23,382; number of Fellows, 4,701. On Sundays the Gardens are only open to Fellows and their friends.

MISSIONARY SOCIETIES

The earliest missionary operations in modern times were carried on by the Jesuits in Japan, where great progress was made; but their work was overthrown, and the missionaries expelled before the sixteenth century. They also carried on operations in China and India. The Society for the Propagation of the Gospel in Foreign Parts was established by Act of Parliament in 1647, and work commenced amongst the North American Indians. Frederick IV of Denmark founded a mission on the coast of Coromandel in the beginning of the eighteenth century. The Moravian Church was the first to begin missionary operations in its corporate character by establishing mission stations at the Cape of Good Hope, in the West Indies, Labrador, Greenland, and in many other parts of the world.

Baptist Missionary Society (1792) (£117,198). *Secs.* Rev. C. E. Wilson, B.A., Rev. W. Y. Fullerton. *Offices*, 19 Furnival Street, Holborn, London, E.C.

TRAINING FOR THE YOUNG

Boy Scouts.—A movement, now incorporated by Royal Charter, initiated and organised by Lieut.-Gen. Sir Robert Baden-Powell, Chief Scout. The aim of the Association is to develop good citizenship amongst boys by forming their character, training them in habits of observation, obedience, and self-reliance, inculcating loyalty and thoughtfulness for others, teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene. During the war the utility of the movement has been demonstrated by the employment of 50,000 of the Boy Scouts on war work, 15,000 of whom have joined the colours, and 1,900 of whom have been continuously employed on coastguard work under the Admiralty. The movement has taken root in all parts of the British Empire, whilst all the Allies, together with Spain, Holland, and the U.S. have adopted it. *Headquarters*, 116 Victoria Street, S.W.

The Boys' Brigade.—Founded 1883. Companies are formed in connection with the Church or other Christian organisation, and the boys are trained largely by means of military drill and discipline. The total number of boys enrolled in the United Kingdom is 70,000, and their ages vary from 12 to 17. The officers number 6,500 and 2,500 staff-sergeants. The strength of the Brigade throughout the world is 120,000. *Sec.* Roger S. Peacock. *Offices*, 34 Paternoster Row, E.C.

The Boys' Life Brigade.—Founded 1898. 1,045 companies. Military drill (excluding rifle and bayonet practice), first aid, swimming and life-saving are the main subjects of instruction. *Sec.* H. E. Norton. *Offices*, 56 Old Bailey, E.C.

The Church Lads' Brigade.—Founded 1891 in order to promote a spirit of discipline and respect among the elder lads of a parish. It combines strict discipline with systematic religious education. *Sec.* W. M. Gee, Aldwych House, Catherine Street, Aldwych, W.C.

FINANCES OF THE UNITED KINGDOM

BALANCE SHEETS OF 1915–16 AND 1916–17 COMPARED.—REVENUE 1915–16.—GRANTS IN AID OF LOCAL TAXATION.—PUBLIC EXPENDITURE.—THE NATIONAL DEBT.

The War Budget of 1916 did not contain any very drastic recommendations in the way of new taxation. The duties imposed by the Budgets of 1915 were retained (see 1915 ANNUAL). Of the new duties those on matches and entertainments were the most novel; others, such as the proposed railway fare duty, were subsequently dropped. The Income Tax (see separate article) was again increased, but with relief where most needed.

ESTIMATED REVENUE (ON BASIS OF EXISTING TAXATION) AND EXPENDITURE 1916–17, COMPARED WITH RECEIPTS AND ISSUES, 1915–16

REVENUE.	1915–16.	1916–17.
	£	£
Customs	59,606,000	61,250,000

	1914–15.	1915–16.
Increment Value Duty	£48,316	£46,070
Reversion Duty	19,313	11,796
Undeveloped Land Duty	8,651	638*
Mineral Rights Duty	337,680	308,510
Excess Mineral Rights Duty	—	3,078
Total	£413,961	£368,817

The payments into the Exchequer were £915,000 in 1913–14 and £412,000 in 1914–15.

* Repayments in excess of receipts.

Excess Profits Duty

Excess Profits Duty	£187,846

Paid into Exchequer £148,000.

The Post Office

The **gross receipts** for 1915–16 were as follows:

Postage Stamps sold	£25,277,846
,, collected in Cash	359,980
,, Colonial and Foreign Offices	116,248
Poundage on Money Orders	154,572
,, ,, Postal ,,	540,545
Miscellaneous Receipts	56,334
Total	£26,505,525

Payments out of Receipts:

Postage Refunded	£33,201
To Inland Revenue Department	625,000
,, Customs and Excise, Railway Companies, etc., on account of Parcel Post	1,639,947
Postage collected for Colonial Offices	186,738
,, ,, ,, Foreign ,,	258,828
Total	£2,743,715

The **net receipts** were, therefore, £23,761,810.

The payments into the Exchequer were £24,100,000.

The Telegraphs

The **gross receipts** in 1915–16 were as follows:

Transmission of Telegrams in Cash	£1,972,602
,, ,, ,, ,, Stamps	2,636,480
Total Receipts	4,609,082

Payments out of Receipts:

To Cable Companies, etc.	£1,133,222
,, Telegram Money refunded, etc.	4,426
Total Payments	£1,137,648

The **net receipts** were, therefore, £3,417,434.

The payments into the Exchequer were £3,350,000.

The Telephones

The **gross receipts** for 1915–16 were as follows:

Telephone Trunk and Exchange Receipts	£6,415,668

Payments out of Receipts:

To Foreign Administrations, Refundments, etc.	—
Net Receipts from Telephones	£6,415,668
Royalties from Licences	18,028
Total **Net Receipts**	£6,433,696

The payments into the Exchequer were £6,450,000.

The **Crown Lands,** or the produce of the Woods, Forests, and Land Revenues of the Crown for 1915-16, showed **Gross Receipts** of £782,544, from which £550,000 were paid into the Exchequer.

The receipts in 1915–16 from **Suez Canal Shares** showed interest and dividend on 166,037 ordinary shares amounting to £810,773 and on 10,565 **"Actions de Jouissance"** £42,005—a total of £852,778. By March 31, 1915, there were drawn off from ordinary shares some 10,565, and by the same date in 1916 there were 621 more—a total of 11,186. Receipts from the Mint were £5,372,390.

Contribution to Imperial Services by the three divisions of the U.K., 1915–16

The following table shows the Net Balance of Revenue contributed by England, Scotland, and Ireland, which is available for Imperial Expenditure after the local expenditure of the three divisions of the U.K. has been met:

Year 1915–16.	England.	Per Cent.	Scotland.	Per Cent.	Ireland.	Per Cent.	Total.	Per Cent.

	£	
1912–13	2,995,000	13,000
1913–14	3,210,000	13,850
1914–15	10,900,000	28,800

Reduction of abatement owing to the 2nd Budget of 1915.—During the quarter ending July 5, 1916, there were 1,150,000 wage-earners paying income tax. They were in receipt of £48,000,000 for the quarter, or an average of 3 guineas per head.

The yield of a uniform rate of income tax of 1s. in the £ is estimated by the Chancellor of the Exchequer to give £41,000,000.

GRANTS IN AID OF LOCAL TAXATION

A total of £9,756,850.14.1 was issued from the Treasury on account of grants in aid. For the most part the Grants are payable out of the Consolidated Fund on behalf of the general purposes of local authorities, though some of them, such as the Agricultural Grant to Scotland and to Ireland, and the Exchequer Contribution to Ireland under the Land Purchase Act of 1891, are payments for specific purposes. Of the amount just given, it will be found that £7,118,196.10.4 was distributed in England and Wales, £1,167,231.14.1 in Scotland, and £1,417,422.9.8 in Ireland.

PUBLIC EXPENDITURE

The AGGREGATE GROSS LIABILITIES of the State for the past five years are shown in the following Table:

Year.	Nominal amount of Funded Debt.	Estimated Capital Liability in respect of Terminable Annuities.	Unfunded Debt.	Other Capital Liabilities.	Aggregate Gross Liabilities.	Assets.		Exchequer Balances.
						Estimated Market Value of Suez Canal Shares.	Other Assets.	
	£	£	£	£	£	£	£	£

There was a NET INCREASE OF LIABILITIES during the year 1915–16 as follows:

Reduction under:	
Funded Debt	£264,829,820
Terminable Annuities . . .	1,881,850
	266,711,670
Increase under:	
Unfunded Debt	1,754,131,996
Net increase of gross liabilities, 1915–16	£1,487,420,326

* Treasury Bills to these amounts, having been paid temporarily out of Exchequer Balances in the respective years are not included in the outstanding debt. These Bills, however, were renewable not later than June 30 following the close of the financial year. They must, therefore, for purposes of comparison, be treated as liabilities still existing, and must be added to the outstanding debt at the close of the respective year.

† The Exchequer Balance was temporarily depleted in these years by the paying off of Treasury Bills.

The National Debt

The National Debt may be classed as (1) Funded Debt, (2) Terminable Annuities, and (3) the Unfunded Debt. The **Funded Debt** comprises the bulk of the national indebtedness, and is made up of certain stocks, which chiefly yield 2½%, but of which a small portion are still subject to 2¾%, and of sums due to the Banks of England and of Ireland. The **Terminable Annuities** are for lives and for terms of years, at the expiration of which the payments will cease. The **Unfunded Debt** for 1915–16 consisted of 3½% and 4½% War Stock and War Bonds, and 4½% War Loan Scrip Certificates and Vouchers created under the War Loan Act, 1914, of Exchequer Bonds, of Treasury Bills for supply, of War Savings Certificates, of the American Loan created under the American Loan Act, 1915, and of other debt created under the War Loan Act, 1915. Parliament from time to time fixes a total sum which shall be devoted to the service of the Debt during the year, from which interest on the various portions of the Debt and instalments of the annuities shall be met, and the remainder form what is known as the **New Sinking Fund** for the reduction of the Debt. The **Old Sinking Fund** is the surplus (if any) remaining after the expenditure of the year has been met from the revenue of various kinds, and is of course also devoted to the extinction of debt, unless Parliament directs otherwise. By **the dead weight of the Debt** is meant liabilities which must be met, as distinguished from certain others which are contingent only.

Growth of National Debt

	Capital.	Annual Charge.
	£	£
At the Revolution, 1689	664,263	39,855
At Accession of Queen Anne, 1702	16,394,702	1,310,942
At Accession of George I, 1714	54,145,363	3,351,358
At Accession of George II, 1727	52,092,238	2,217,551
At Accession of George III, 1760	131,865,430	4,852,051
At commencement of American War, 1775	128,583,635	4,471,571
At conclusion of American War, 1784	249,851,628	9,451,772
At commencement of French War, 1793	239,350,148	9,208,495
Debt contracted during French War	601,500,343	22,829,696
Total Debt, Feb. 1, 1817 (Amalgamation of English and Irish Exchequers.)	840,850,491	32,038,191

National Debt Services

The interest on the **funded debt** for 1915–16 amounted to £12,934,406, the cost of terminable annuities £2,897,758, and the interest on the unfunded debt £4,330,772; the total management of the National Debt cost for the year £175,321.

The following table gives particulars of the DEAD WEIGHT DEBT of the United Kingdom for a period of years:

NATIONAL DEBT

The amount applicable in any year to the reduction of debt is not always fully applied within the year, as the National Debt Commissioners may not be able to effect purchases of Stock, etc., immediately on receipt of the money. The balance of cash in their hands at the end of the year is applied in the following year.

Year.	Dead Weight Debt.	Old Sinking Fund and Exchequer Balances.	Gross Amount Redeemed.	Debt Created in the Year.	Net Increase (+) or Decrease (−).	Year.

Civil List, Annuities, and Pensions

These are said to be placed on the Consolidated Fund, because they are payable under permanent laws, and are not voted annually by the House of Commons. The Civil List, providing for the dignity and comfort of the Crown, is the first charge, and now amounts to £470,000 a year; and under Annuities and Pensions members of the Royal Family receive in total £146,000 a year.

The **Pensions for Naval and Military Services** were: To the heirs of the Duke of Schomberg, £679; Lord Rodney, £2,000; Earl Nelson, £5,000; Lord Seaton, £2,000 for life of the present baron; Viscount Hardinge, £3,000 to the present Viscount alone; Viscount Gough, £2,000 for his life (and he also receives £700 from the superannuation vote); Lord Raglan, £2,000 for the present Baron's life; and Lord Napier of Magdala, £2,000 for the life of present Baron; a total of £18,679 a year.

The **Pensions for Political † and Civil Services** are but few now. Of the political class are Lord George Hamilton at £2,000 a year, Lord Balfour of Burleigh at £1,200 a year, and Mr. Chaplin at £900. Mr. J. A. Pease was awarded a pension of £1,200 a year in 1915. Lord Balfour of Burleigh's pension was in abeyance for a short time in 1911 while he was Chairman of Committees in the House of Lords, at a salary, but he resumed it from May 15, 1911, on relinquishing that office. Other pensions from Civil sources are the Dowager Countess of Mayo, £1,000 a year for life; and Sir C. L. Ryan, late Comptroller and Auditor-General, £1,333.6.8 a year for life. The total of this class was £6.986.

Pensions for Judicial Services amounted to £99,445.0.2, of which £70,744.8.3 was for England and Wales; £14,755.2.11 for Scotland; and £13,945.9.0 for Ireland. There were also certain **Miscellaneous Pensions,** chiefly for servants and other allowances made by former Sovereigns, which amounted to £52,295.9.3, of which total the allowances to the Household of his late Majesty King Edward VII amount to £16,203.17.10 a year.

Certain **Salaries and Allowances** were also charged on the Consolidated Fund. They included the Speaker (Mr. Lowther), £5,000; Sir H. J. Gibson, Comptroller and Auditor-General, and his assistant, Mr. J. W. Cawston, £3,500 in all; Augmentations of Stipends to Scottish Clergy, £17,040; Highland Schools, £899; Clergy in the West Indies (salaries), £200; Inspectors (5) of Anatomy in England and Scotland (and incidental expenses), £950; Compensation under Copyright Act to King's Inn Library, Dublin (£433.6.8, and Sion College (£363.15.2); Miscellaneous Charges formerly on the Hereditary Revenues of Scotland, £5,653.1.8; Charges transferred from the Land Revenues of the Crown, £1,134.13.8; the Lord Lieutenant of Ireland, £20,000; Inspector of Anatomy, Ireland, and expenses, £290; and miscellaneous allowances to certain Irish persons, £754.12.8. The total under these Salaries and Allowances was £56,218.19.10.

Salaries in the Courts of Justice reached a total of £531,223.14.3. Of that sum £317,302.5.0 was for England and Wales; £114,584.16.1 for Scotland; and for Ireland £99,336.13.2.

Miscellaneous Services included the interest on Exchequer bonds issued under the Cunard Agreement (Money) Act, 1904, £49,725; for the support of Greenwich Hospital, £4,000; the Duchy of Lancaster, in lieu of prisage and butlerage on wines imported into the county, £803; the Duchy of Cornwall, for compensation for loss of duties on the coinage of tin, £16,216.15.0; annuity to the Commissioners of Woods (Public Offices Site Act, 1882), £16,243.18.0; Indian Army Pension Deficiency Fund, £215,000; annuity under the Treaty of Union, payable to the National Galleries of Scotland, £2,000; a commutation annuity payable to the National Debt Commissioners to redeem perpetual rent charges in respect of part of the Old Custom House, £5,936.11.0; and £1,000,000 grant in aid of expenses of Statutory Committee under the Naval and Military War Pension Act, 1915. These charges reached a total of £1,409,925.4.0.

The Supply Services

These are so called because the House of Commons goes into Committee of Supply every year to vote the sums required to meet this expenditure. The total Exchequer issues for the year 1915–16 on account of the **Army**, the **Navy**, the **Ordnance Factories,** and the **Ministry of Munitions** were mere token numbers, the substantive provision being made out of Votes of Credit.

The **Civil Services** (including the **Revenue Departments**)

The "Civil Services" were granted net votes in 1915–16 amounting to £59,234,156, and the estimates for 1916–17 are £55,515,944. For the **Revenue Departments** the grants were in the Appropriation Act, 1915, £31,624,779, and the estimates for 1916–17 are £31.378,000; there were in addition grants of £1,420,000.000 on Votes of Credit, naval and military operations, etc. Below we give tables of the seven classes of Civil Service votes, in a form affording a comparison of the grants in the session of 1915–16, with the estimates (now the grants) for 1916–17. Expenditure directly due to the war, including both that incurred for the purpose of naval and military operations and that incurred by civil departments, was met from Votes of Credit. Nevertheless, the Civil Service Estimates include a certain amount of expenditure which would not have been necessary but for the war.

* Average for seven months. Minimum price declared on outbreak of war.

† Political pensions were instituted by the Political Offices Pension Act, 1869. The pensions, 12 in number, are divided into three classes: Class 1, maximum pension £2,000 for not less than four years' service or its equivalent in a political office having a salary of not less than £5,000; Class 2, maximum pension of £1,200 for not less than six years' service in an office having a salary of not less than £2,000; and Class 3, maximum pension of £800 for not less than ten years' service in an office having a salary of not less than £1,000. The service need not be continuous, and service in a lower class counts for pension in a higher class. Applicants must file a declaration stating grounds of claim, and that their income from other sources is not sufficient to maintain their station in life. 16 pensions in all have been granted under the Act (see H.C. 221, 1914).

Civil Service Estimates

Service.	1915–16. Grants.	1916–17. Estimates.
Class I.	Net.	Net.
(Public Works & Buildings)	£	£
Royal Palaces	65,250	55,700
Osborne	10,650	10,100
Royal Parks and Gardens	121,400	99,000
Houses of Parliament	74,000	49,600
Legal Buildings, Gt. Britain	58,200	48,000
Art and Science Buildings, Great Britain	105,890	70,200
Diplomatic and Consular Buildings, Great Britain	49,440	29,900
Revenue Department Buildings, Great Britain	788,000	580,600
Labour Exchange Buildings, Great Britain	226,800	147,900
Public Buildings, Great Britain	843,600	624,400
Surveys of U. Kingdom	174,920	56,030
Harbours, etc., under the Board of Trade	23,087	6,431
Peterhead Harbour	32,000	22,000
Rates on Govt. Property	883,000	908,500
Public Works and Buildings, Ireland	280,585	191,354
Railways, Ireland	50,008	48,867
Mall Approach Improvement	32,000	—
Total	3,818,830	2,948,582

There is a net increase of £870,248. Every vote in this Class, except that for rates of Government property, shows a reduction, in most cases of a substantial nature. Practically no provision is made for new works, and expenditure on maintenance and supplies has been rigorously restricted. Increased prices cause unavoidable increases in the provision for fuel and lighting.

Service.	1915–16. Grants.	1916–17. Estimates.
Class II. (Salaries and Expenses of Civil Departments.)	Net.	Net.

Public Works Office	46,732	42,871
Registrar-General's Office	13,362	13,360
Valuation and Boundary Survey	37,733	26,672
Total	4,625,684	4,547,929

* The Vote for Secret Service was subsequently increased by a Supplementary Estimate to £500,000.

There is a net decrease of £77,755. The decrease would have been considerably greater but for certain additional changes which are due directly or indirectly to the war, such as that for Secret Service. The cost of civil establishments cannot, of course, be appreciably reduced to effect a temporary economy, but there are certain items of expenditure which it has been possible to suspend or greatly to reduce during the war.

Service.	1915–16. Grants.	1916–17. Estimates.
Class III. (Law and Justice.)		
United Kingdom & England:	£	£

County Court Officers, etc.	108,685	101,284
Dublin Metropolitan Police	105,914	94,193
Royal Irish Constabulary	1,454,267	1,379,375
Prisons	113,974	110,190
Reformatory and Industrial Schools	110,516	109,788
Dundrum Crim. Lun. Asyl.	8,452	8,740
Total	5,028,420	4,740,461

There is a decrease on 1915–16 of £287,959, every vote but two showing a decrease. The decreases on Prisons votes are due to the anticipated decrease in the prison population, modified by increased cost of victuals, clothing, fuel, etc. The decreases on the Irish Police are due to the absence of officers and men on military service and to reduced recruiting.

Service.	1915–16. Grants.	1916–17. Estimates.
Class IV. (Education, Science & Art.)		
United Kingdom & England:	£	£
Board of Education	15,481,378	15,186,732
British Museum	148,645	128,599
National Gallery	15,670	11,489
National Portrait Gallery	4,993	3,485
Wallace Collection	7,962	4,591
London Museum	5,465	2,570
Scientific Investigation, etc.	115,582	121,671

Universities, etc., Special Grants	145,000	—
Scotland:		
Public Education	2,609,905	2,544,742
National Galleries, etc.	4,878	4,522
Ireland:		
Public Education	1,805,919	1,812,704
Intermediate Education	40,000	40,000
Endowed Schools Commrs.	900	905
National Gallery	2,165	1,845
Science and Art	146,287	149,453
Universities and Colleges	124,000	114,000
Total	20,974,949	20,448,508

There is a decrease of £526,441. On the whole, the decrease is due to the non-repetition of the special grant to universities, etc., owing to arrangements made in regard to grants for the scholastic year 1916; to a reduction on grants for the training of teachers owing to absence of men students on military service; to a decrease in the grants for technical education, due to the anticipated falling-off in attendance at evening classes, and to the closing of museums, etc., and the consequent saving on police, staff, cleaning, etc. There is an increase of £56,750 in the subhead for Secondary Schools, due partly to an anticipated increase in the number of pupils, and partly to a new system set on foot in 1913 for encouraging the training of pupil teachers and bursars.

Service.	1915–16. Grants.	1916–17. Estimates.
Class V. (Foreign and Colonial Services.)		
Diplomatic and Consular Services	£ 754,917	£ 682,290
Colonial Services	641,765	626,197
Telegraph Subsidies and Pacific Cable	40,129	28,875
Cyprus, Grant in Aid	50,000	50,000
Total	1,486,811	1,387,362

The decrease of £99,449, following on a decrease of £380,106 in 1915–16, is mainly due to the reduction on diplomatic and consular services. It has been found necessary to reintroduce the grant in aid of the Nyasaland Protectorate, and to provide slightly increased grants for Somaliland and St. Helena. There are savings, also, owing to the cessation of the West Indian Steamer subsidies; to its not being necessary to provide a grant in aid for Wei-hai-Wei, and to a decrease in the grant for cotton cultivation.

Service.	1915–16. Grants.	1916–17. Estimates.
Class VI. (Non-effective and Miscellaneous.		
Superannuation and Retired Allowances	£ 814,615	£ 835,694
Miscellaneous Expenses	22,154	20,609
Hospitals and Charities, Ireland	16,853	16,778

Repayment to the Local Loans Fund	3,387	3,219
Ireland Development Grant	185,000	185,000
International Exhibitions	2.500	+—
Repayments to the Civil Contingencies Fund	11,776	—
Statutory Committee	—	1,750
Total	1,091,285	1,080,050

The decrease in Class VI as a whole is due to the omission of the vote for repayment to the Civil Contingencies Fund, which is always presented, if necessary at a later date. A saving is made on temporary commissions, owing to the completion

of the work of certain Royal Commissions, and to the suspension during the war of others.

Class VII shows the large decrease of £1,450,206. On the vote for Old Age Pensions there is a reduction owing to the anticipated decrease in the number of persons claiming old age pensions consequent on the increased earnings of men of advanced years. The votes for National Health Insurance show a decrease of £875,313, mainly effected by the vote for the Joint Committee.

Service	1915–16. Grants.	1916–17. Estimates.

Total	21,812,158	20,361,952

Ministry of Munitions

(Ordnance Factories)

Token votes of £1,000 and £100 were presented for the Ministry of Munitions and the Ministry of Munitions (Ordnance Factories) respectively in order to obtain Parliamentary sanction for the subheads under which the appropriation accounts of these votes will be rendered, a practice likewise adopted in the case of the Army and the Navy.

Revenue Departments

There is a decrease of £246,771, but in the Department of Customs and Excise there will really be an increase due to more expenditure; this will be met from votes of credit. Similarly, with regard to the Post Office, it may be anticipated that in addition to the sums provided in the estimates considerable expenditure will be incurred on war services chargeable to votes of credit. On the other hand, the estimates include provision for the civil pay of Post Office servants serving in H.M. Forces, and for the salaries of permanent officers of the Department now engaged on war work. It is estimated that at least £1,500,000 is thus included in excess of the present cost of ordinary postal services.

—	1915–16. Grants.	1916–17. Estimates
	£	£
Customs and Excise	2,514,607	2,474,513
Inland Revenue	2,273,792	2,366,350
Post Office, Telegraph, and Telephone Services	26,836,380	26,537,145
Total	31,624,779	31,378,008

Gross National Expenditure

The total income for the year 1915–16 was £336,766,825, and the total expenditure was £1,559,158,377, thus showing an **excess of expenditure** over income for the year of £1,222,391,552. The total income for the year 1916–17 is estimated at £502,275,000, and the total expenditure at £1,825,380,000, thus showing a **deficit** of £1,323,105,000. In addition, there must be included a sum of £1,390,000 borrowings to meet expenditure chargeable against capital.

INCOME TAX

Previous to the **Budget** of 1914 the rate of **Income Tax** was as follows:

Schedule A. In respect of the profits arising from the ownership of lands, tenements, etc., 1*s.* 2*d.* in the £. (Deductions of one-eighth in respect of lands and one-sixth in respect of houses allowed for repairs. *Vide* Finance Act, 1894.) Further relief for maintenance, repairs, insurance, and management not exceeding one-eighth in the case of land and one-twelfth in the case of houses not exceeding £8 annual value. *Vide* Finance (1909-10) Act, 1910.

Schedule B. In respect of the profits derived from the occupation of lands, etc., 1*s.* 2*d.** in the £.

Schedule C. In respect of the profits derived from interest, annuities, and dividends payable out of any public revenue, etc., 1*s.* 2*d.* in the £.

Schedule D. In respect of the profits derived from professions, trades, employments, etc., 1*s.* 2*d.* in the £.

Super-Tax. On the income of any individual whose total income exceeds £5,000 an additional income tax of 6*d.* for every £1 by which the total income exceeds £3,000.

The Budget of 1914 made the following changes: General rate increased from 1*s.* 2*d.* to 1*s.* 3*d.* in the £. Rate on earned income where total earned

* The profits are deemed to be one-third of the annual value of the lands, but the profits of nurseries and market gardens are estimated according to the rules of Schedule D.

Abatements allowed:

£160 on incomes exceeding £160 and not exceeding £400
150 ,, ,, ,, 400 ,, ,, 500
120 ,, ,, ,, 500 ,, ,, 600
70 ,, ,, ,, 600 ,, ,, 700

Any individual whose total income did not exceed £2,000 was entitled to such relief as would reduce the rate on his earned income to 9*d.* in the £, and any individual whose total income exceeded £2,000, but did not exceed £3,000, to such relief as would reduce the rate on his earned income to 1*s.* in the £.

Any individual whose total income exceeded £160 but did not exceed £500 was entitled to relief from the tax on £10 for each of his children living and under sixteen years of age.

Allowance authorised for premiums not exceeding one-sixth of the net personal income paid by the taxpayer on insurance policies on his life or on his wife's life.

The New HAZELL, 1917

and unearned income: exceeded £1,000 and did not exceed £1,500, increased from 9*d.* to 10½*d.* in the £; exceeded £1,500 and did not exceed £2,000, increased from 9*d.* to 1*s.* in the £; exceeded £2,000 and did not exceed £2,500, increased from 1*s.* to 1*s.* 2*d.* in the £; exceeded £2,500 and did not exceed £3,000, increased from 1*s.* to 1*s.* 3*d.* in the £. Rate on unearned income where total earned and unearned income: exceeded £160 and did not exceed £300, reduced from 1*s.* 2*d.* to 1*s.* in the £; exceeded £300 and did not exceed £500, rate remained at 1*s.* 2*d.* in the £. Subject to certain exceptions, deductions, and allowances, tax in respect of income from securities, stocks, shares or rents from abroad was to be paid on the full amount of the income, whether received in the United Kingdom or not. The relief to individuals whose income did not exceed £500 in respect of every child under 16 years of age was raised from £10 to £20. The limitation to the relief in respect of the expenditure on maintenance, repairs, insurance, and management of land or small houses was abolished, and the annual value of the houses in respect of which it could be claimed was raised from £8 to £12.

Super-Tax.—On the income of any individual the total of which from all sources exceeded £3,000, super tax was at the following rates:

	s.	d.
In respect of first £2,500 of income	Nil	
In respect of the excess over £2,500:		
For every pound of first £500 of excess	0	5
" " " next £1,000 "	0	7
" " " " £1,000 "	0	9
" " " " £1,000 "	0	11
" " " " £1,000 "	1	1
" " " " £1,000 "	1	3
" " " remainder "	1	4

To cover the vast expenditure rendered necessary by the war, the Chancellor of the Exchequer introduced **fresh proposals** on Nov. 17, 1914. Briefly, the income tax was doubled, although the new amount was to be collected in 1914 only in respect of one-third of the income.

On Sept. 21, 1915, the second Budget of that year made further considerable changes in the Income Tax. The existing income tax rates, as set out above, were increased by 40% for the full year, or 20% for the coming six months. Special relief was given by the repayment of any additional tax in cases where incomes had fallen by more than 10%. The **abatement** allowed to persons whose incomes do not exceed £600 was reduced so as to be: (1) in the case of incomes not exceeding £400, an abatement of £120; (2) in the case of incomes between £400 and £500, an abatement of £100, and (3) a similar abatement of £100 in the case of incomes between £500 and £600. As to assessments under Schedule B the profits are to be deemed the annual value instead of one-third of the annual value. The relief from income tax in respect of **children** was increased from £20 to £25 for every child under 16. In the case of **weekly wage-earners** (*i.e.* persons who receive wages which are calculated by reference to the hour, day, week, or any period less than a month) **employed by way of manual labour** (excluding persons employed as clerks, typists, draftsmen, or in any other similar capacity), **quarterly assessment** was introduced; the amount of income tax so assessed and charged quarterly is, without prejudice to any other method of recovery under the Income Tax Acts, recoverable summarily as a civil debt. **Soldiers and sailors** serving abroad were empowered to claim pre-war rates, provided the total income from all sources did not exceed £300. The scales of **Super-tax** for incomes over £8,000 were revised as follows: incomes between £8,000 and £9,000, 2*s.* 10*d.* tax; between £9,000 and £10,000, 3*s.* 2*d.* tax; over £10,000, 3*s.* 6*d.* tax. **Non-residents** were made chargeable to income tax for any profits or gains, arising whether directly or indirectly. Finally, an **excess profits** duty was imposed, of 50% of all profits over £200 arising from any trade or business except (*a*) husbandry; (*b*) offices or employments; and (*c*) any profession the profits of which are dependent mainly on the personal qualifications of the person by whom the profession is carried on and in which no capital expenditure is required.

Again, in the Budget of 1916 further changes were made. As the income tax now stands, it is at the rate of 5*s.* in the £, the super-tax remaining as set out above. For incomes below certain limits relief is given:

Where the total income from all sources does not exceed £2,500, and any part is earned income relief is given on such earned income at the rate of:

2*s.* 3*d.* where total income does not exceed	£500
2*s.* 6*d.* " " " " "	1 000
3*s.* 0*d.* " " " " "	1,500
3*s.* 8*d.* " " " " "	2,000
4*s.* 4*d.* " " " " "	2,500

Unearned income not exceeding £2,000 has the tax graduated:

3*s.* 0*d.* not exceeding	£500
3*s.* 6*d.* " "	1,000
4*s.* 0*d.* " "	1,500
4*s.* 6*d.* " "	2,000

Soldiers and sailors were given the right to pay reduced rates of income tax in respect of their pay:

0*s.* 9*d.* where total income from all sources does not exceed	£300					
1*s.* 3*d.* where income exc.	£300	but not exc.				500
1*s.* 9*d.* " " "	500	" "				1,000
2*s.* 3*d.* " " "	1,000	" "				1,500

The relief in case of children was extended to those whose incomes do not exceed £700; provision was made for the collection of income tax by means of stamps in certain cases; interest under war savings certificates was exempted, and relief given in respect of colonial income tax. The excess-profits tax was increased from 50 to 60% of the excess profits.

It was also enacted that it shall be the duty of every person chargeable to excess profits duty, if he has not previously given notice of his liability to be charged with excess profits duty in respect of any accounting period, to give notice to the Commissioners of Inland Revenue before the expiration of two months after the termination of any accounting period in respect of which he is chargeable, or if the accounting period terminated before the passing of the 1916 Act, within one month after its passing. If any person fails to give the notice required by the Act he is liable on summary conviction to a fine not exceeding £100, and to a further fine not exceeding £10 a day for every day during which the offence continues after conviction therefor.

The excess **mineral rights** duty was also increased from 50 to 60%. In the case of the sale of **ships** it was enacted that where any ship has been sold since Aug. 4, 1914, in such circumstances that the profits of the sale are not the profits of a trade or business, special provisions shall be applied for the computation of excess profits duty.

The following statements show the amounts of tax payable on certain incomes.

Statements showing the Amount of Tax payable on Certain Incomes, and the Virtual Rate charged in the £ under the Existing Law and under the Proposals made by the Chancellor of the Exchequer on April 4, 1916

A.—INCOME TAX

Income.	(i) For 1915–16.						(ii) For 1916–17 under Section 20 Finance (No. 2) Act, 1915.						(iii) As now proposed for 1916–17.

NOTE.—The figures in the foregoing statements (A. and B.) take no account of the allowances in respect of Life Insurance premiums and children, which, in many cases would substantially reduce the tax payable and the virtual rate.

PATENTS AND THE PATENT OFFICE

Patents for the United Kingdom are issued by the Comptroller-General of Patents at the **Patent Office**, 25 Southampton Buildings, London, W.C.

The law relating to patents is embodied in the Patents Acts of 1907 and 1908, subject to temporary rules made by the Board of Trade during the continuance of hostilities. The procedure to be observed in applying for a patent is regulated by the Patents Rules. The Acts, Rules, and other official publications are on sale at the Patent Office, and can be obtained through the post. A circular containing a large amount of useful information can also be obtained free on application at the Patent Office. The **Library of the Patent Office**, which is free to all comers, contains all the official publications, the specifications of all patents granted in the United Kingdom, and in the United States, France, Germany, and other foreign states, and an extensive collection of technological journals and textbooks, both British and foreign (number of readers, 1915, 87,625).

Patents are usually, though not necessarily, taken out through professional patent agents. A list of Registered Patent Agents may be obtained from Messrs. Wyman & Sons, or through any bookseller.

The official **fees** to be paid, before a patent is sealed (which must be as soon as possible, and not after 15 months from the date of application), amount to £5, of which £1 is paid on application and £3 on the filing of a complete specification (or £4 on filing complete specification with first application), and £1 on sealing. **A patent is granted for a term of fourteen years** from the date of application, subject to the payment of the prescribed fees. Further fees of £50, on certificate of renewal before end of 4 years from date of patent, and £100 before end of 8 years, are payable; or, in lieu of these further fees, annual payments of £10 may be made from the fourth to the seventh year, £15 eighth and ninth years, and £20 tenth to thirteenth years. Under exceptional circumstances the patent may be prolonged for a further period not exceeding fourteen years.

The total number of **specifications received during 1915** was 23,703, as compared with 33,033 in 1914—a decrease of 9,330. The number of **patents granted in 1914** was 11,457, as compared with 15,036 in 1914. The applications received from women inventors numbered 268, as ocmpared with 347 in 1914. The followiugt able gives the figures for the chief countries from which **applications for patents** were received previous to the war:

	1912	1913	1914
United Kingdom .	20,174	20,426	17,172
British Dominions and Possessions . .	868	745	633
United States . .	2,986	2,646	2,511
Germany . . .	3,169	3,167	2,183
France	1,097	1,143	843

The receipts from patents fees in 1915 amounted to £256,723, from designs fees to £5,441, and from trade mark fees to £12,867.

General Business of the Patent Office, 1913–15

Year.	Patents Sealed.	Designs Registered.	Trade-marks Registered.
1913 .	16,599	39,275	5,071
1914 .	15,036	33,362	4,408
1915 .	11,457	17,390	3,241

For Staff of Patent Office, see under BOARD OF TRADE, p. 232.

THE UNITED KINGDOM

The area of the United Kingdom, exclusive of the Isle of Man and the Channel Islands, is 121,090 square miles—about an eightieth part of the Empire exclusive of India. The area of England and Wales is 58,315 square miles. The population of the United Kingdom at the 1911 census was 45,221,615, the population of the rest of the Empire, exclusive of India, being about 56,000,000.

The total number of persons returned as living in the United Kingdom at midnight on Sunday, April 2, 1911, was 45,221,615. This total showed an increase of 3,757,944, or 9·1%, upon the number returned at the previous enumeration of April 1901. The rate of increase of population in the United Kingdom in 1910–11 was 0·8% below that in the previous decennium, due to the fact that neither in England nor in Scotland was the rate of increase so high as in 1891–1901. On the other hand, the growth of population in Wales was greater, and in Ireland the decrease of population was less, than in any of the previous six decennia.

The following table shows the proportion per cent. of the population of the United Kingdom in its different divisions at the dates given:—

	1821	1871	1901	1911
England .	54·0	68·2	74·3	75·3
Wales .	3·4	3·9	4·1	4·5
Scotland .	10·0	10·7	10·8	10·5
Ireland .	32·6	17·2	10·8	9·7

TOWN AND COUNTRY

In England and Wales the rate of increase in the urban districts has declined from 15·2 to 11·1, that of the rural districts has increased from 2·9 to 10·2%. It should be pointed out, however, that the rates in the last decennium represent an actual increase of 2,818,072 persons in the urban, and of only 729,354 persons in the rural districts. The total population of the urban districts of England and Wales in 1911 was 28,162,936. That of the rural districts was 7,907,556.

Further details of the population are given below under the divisions of the United Kingdom to which they relate.

ESTIMATED POPULATION OF THE UNITED KINGDOM BY COUNTRIES AND SEXES

Year.	Males.	Female.	Total.
England and Wales.			
1911 . .	17,503,377	18,686,308	36,189,685
1912 . .	17,596,806	18,785,650	36,382,456
1913 . .	17,705,259	18,900,967	36,606,226
1914 . .	17,877,052	19,083,632	36,960,684
Scotland.			
1911 . .	2,304,100	2,447,032	4,751,132
1912 . .	2,299,224	2,441,853	4,741,077
1913 . .	2,292,946	2,435,186	4,728,132
1914 . .	2,302,177	2,444,990	4,747,167
Ireland.			
1911 . .	2,188,155	2,195,453	4,383,608
1912 . .	2,189,429	2,195,281	4,384,710
1913 . .	2,186,476	2,192,536	4,379,012
1914 . .	2,188,881	2,192,517	4,381,398
United Kingdom.			
1911 . .	21,995,632	23,328,793	45,324,425
1912 . .	22,085,459	23,422,784	45,508,243
1913 . .	22,184,681	25,528,689	45,713,370
1914 . .	22,368,110	23,721,139	46,089,249

ENGLAND AND WALES

(For the Isle of Man and Channel Islands see p. 463.)

The separate population figures for England and Wales as given in 1901 and in the Report of the Census for 1911 are:—

	Area in sq. m.	Population 1901.	Population 1911.
England .	50,939	30,811,420	34,045,290
Wales . .	7,376	1,716,423	2,025,202
	58,315	32,527,843	36,070,492

The enumeration of 1911 showed an increase of 3,547,426, or 10·9%, upon the number returned in 1901. This increase was numerically greater than in any previous decennium, but the progression per cent. was lower than in any previous decennium.

Date of Enumeration.	Population.	Increase per cent.	Population per sq. m.
1801 .	8,892,536	—	153
1811 .	10,164,256	14·0	175
1821 .	12,000,236	18·0	206
1831 .	13,896,797	15·8	239
1841 .	15,914,148	14·2	273
1851 .	17,927,609	12·6	308
1861 .	20,066,224	11·9	344
1871 .	22,712,266	13·2	390
1881 .	25,974,439	14·3	446
1891 .	29,002,525	11·6	498
1901 .	32,527,843	12·1	558
1911 .	36,070,492	10·9	618

The proportion of males and females in 1911 was 17,445,608 males to 18,624,884 females, showing an excess of 1,179,276 females, an excess which is partially attributable to the fact that men serving in the army, navy, and the merchant service abroad are excluded from the reckoning. In 1901 the excess was 1,070,617. The proportion of females steadily increased from 103·6% in 1821 to 106·8% in 1901, at which figure it remained in 1911. **The number of separate families in 1911** was 8,005,290, as compared with 7,036,868 in 1901.

Year.	Marriages.	Births.	Deaths.
1912 .	283,834	835,209	486,939
1913 .	286,583	881,890	504,975
1914 .	294,087	878,822	516,778

POPULATION BY COUNTIES (WITH ACREAGE)

English Counties

County (with County Town).	Area in Acres.	Population.	Lord Lieutenant.	Clerk of the Peace.
Bedford (Bedford)	302,942	194,588	S. H. Whitbread	Wm. W. Marks.
Berks (Reading)	456,491	195,811	J. H. Benyon	J. T. Morland.
Bucks (Aylesbury)	479,360	219,551	Marq. of Lincolnshire	W. Crouch.
Cambridge (Cambridge)	315,168	128,322	Charles R. W. Adeane	Ashley Tabrum.
Isle of Ely (March)	238,073	69,752		C. E. F. Copeman.
Cheshire (Chester)	644,172	676,275	Duke of Westminster	Reginald Potts.
Cornwall (Bodmin)	868,167	328,098	Earl of Mt. Edgcumbe	C. L. Cowlard.
Cumberland (Carlisle)	973,086	265,746	Lord Muncaster	C. Courtenay Hodgson.
Derby (Derby)	645,097	560,013	Duke of Devonshire	N. J. Hughes-Hallett.
Devon (Exeter)	1,662,672	457,331	Earl Fortescue	B. S. Miller.
Dorset (Dorchester)	625,612	223,266	E. of Shaftesbury, K.P.	E. A. Ffooks.
Durham (Durham)	637,672	929,214	Earl of Durham	Harold Jevons.

Drapery	204,126	93,171	110,955

POLICE OF ENGLAND AND WALES (COUNTIES AND BOROUGHS)

The established strength of county and borough police was for the year ended Sept. 29, 1915, 31,924, being 4,804 below its normal figure. This was exclusive of the Metropolitan and City of London Police (*qq.v.*). Of this number 18,831 were in the northern district (8,269 in counties and 10,562 in boroughs), and 13,093 in the southern district (7,726 in counties and 5,367 in boroughs). There were at the end of 1915 also some 120,000 special constables either actually serving or ready to be called. This does not include the Metropolitan Police District, where there were about 30,000 special constables serving.

MALE POPULATION OF ENGLAND AND WALES ACCORDING TO AGES

The male population of England and Wales at the last Census according to ages was:—

Ages last birthday.	April 2, 1911.	Ages last birthday.	April 2, 1911.
0	395,110	45 to 49	926,102
1	374,109	50 ,, 54	768,231
2	395,919	55 ,, 59	608,005

35 ,, 39	1,261,432		
40 ,, 44	1,075,076	Total	17,445,608

LOCAL ADMINISTRATIVE BODIES

The various local administrative bodies that now exist in England and Wales are as follows:—

County Councils for administrative counties,

Municipal Corporations for county boroughs and non-county boroughs,

Borough Councils for the Metropolitan Boroughs,

Urban District Councils for urban districts other than boroughs,

Rural District Councils for rural districts,

Parish Councils for parishes having a population of 300, or if with a less population by special grant from the County Council, and

Parish Meetings for every rural parish—that is, for every parish not comprised in an urban district or borough.

Besides these, there are the Boards of Guardians for Poor Law Unions.

The elections of all these bodies are now conducted by ballot and in similar manner to Parliamentary elections. Elections are held either triennially or annually (for a third of the body). Elections of Guardians, Urban and Rural District Councillors, and Parish Councillors, are regulated by special rules issued by the Local Government Board. **Parochial Electors,** *i.e.* persons on the parliamentary or local government register, are entitled to vote at these elections. The qualification for election as Guardian, District or Parish Councillor, consists in either being a Parochial Elector or having resided within the parish or district during the whole of the twelve months preceding the election. **Town Councillors** are elected by the burgesses, and the qualification for election consists in being a burgess and possessing or occupying property in the borough of a certain value. The qualification for a **County Councillor** is similar to that of a Town Councillor, but, in addition, peers owning property in the county, and persons registered as ownership voters for parliamentary elections, are qualified. By the **Qualification of Women (County and Borough Councils) Act, 1907**, women were for the first time rendered eligible for election as Town Councillors and County Councillors. Women are also eligible for election as members of Boards of Guardians, and of Parish and District Councils.

Other **Poor Law authorities,** who exercise power in relation to the relief of the poor, are (1) **The Metropolitan Asylums Board,** who are the managers of the Metropolitan Asylums District, constituted under the Metropolitan Poor Act ('67) for the reception and relief of fever and small-pox patients, imbeciles and certain classes of pauper children; (2) **The Managers of two Metropolitan Sick Asylum**

Districts, constituted under the same Act; and (3) **The Managers of School Districts** formed under the Poor Law Amendment Act ('44) for the maintenance of district schools, to which children are sent by certain boards of guardians instead of being maintained in the workhouses or in schools provided by the guardians.

RATING POWERS

The most generally levied rate is **the Poor Rate,** which is raised in every parish outside London by the Overseers of the Poor. County Councils, Boards of Guardians, Municipal Corporations as regards their expenditure under the Municipal Corporations Act, and as Local Education Authorities, Rural District Councils, Parish Councils and Parish Meetings raise their funds for their various purposes out of this rate, either indirectly or by precept addressed to the Overseers. Thus County Councils levy a county rate upon Boards of Guardians of the various Unions in the county. These Boards in their turn raise the money which they require for Poor Law purposes, and for the purpose of meeting the county-rate precepts, by issuing contribution orders on the Overseers for the sums to be raised by means of the **Poor Rate.**

Municipal Corporations, acting as sanitary authorities under the Public Health Act, and Urban District Councils levy a special rate called the **General District Rate,** and this is assessed at a lower rate upon land than that which is charged on buildings and other properties. Rural District Councils have power to raise moneys for expenses chargeable to any particular parish by requiring the Overseers to levy a special sanitary rate; and Parish Councils have power by means of precepts upon the Overseers to require special rates to be raised for lighting and for public libraries.

For the purpose of preparing the Poor Rate **a valuation list is made for each parish,** containing particulars as to the gross rental and rateable value of all properties in the parish liable to be rated. These valuation lists are the basis for practically all the local rates. In London the Borough Councils act as Overseers and raise one rate for all purposes, called the General Rate.

The total amount of loans outstanding against local authorities (not including the Metropolitan Water Board, the Mersey Docks and Harbour Board, and the Port of London Authority) in England and Wales on March 31, 1914, was £429,580,000, made up of £170,336,000 for purposes of electricity, gas, and water supply, tramways and light railways, and harbours, docks, piers, canals, and quays, and £259,244,000 for all other purposes.

The total amount received from Public Rates by local authorities in England and Wales during the year ended Lady Day, 1914, was £69,972,000, equivalent to 6*s.* 7½*d.* per pound of assessable value, and £1.17.11 per head of estimated population.

In addition to this amount received from public rates, £22,340,000 was received in the shape of **exchequer grants** (including local taxation duties), £28,776,000 from gas, water, and electric light supply undertakings and tramways and light railway undertakings, harbour, dock, pier, canal, and quay undertakings, and £14,309,000 from other sources, making a total of £137,030,000 exclusive of loans. **Trading undertakings** belonging to local authorities in some cases produced profits which were appropriated in aid of the rates, and in others showed deficiencies which were charged on the rates. In 1913-14 the total of the sums transferred in **aid of rates** from the accounts of trading undertakings was £1,633,000, and the totals of the sums **transferred from rates** to meet deficiencies in the accounts of such undertakings was £1,150,000. The principal items of **expenditure** defrayed, otherwise than out of loans, in 1913-14, by the principal classes of rate-spending local authorities was:—

	£	£
Education:		
Elementary	26,252,000	
Higher	5,306,000	
		31,558,000
Highways and bridges		17,857,000
Lunatics and lunatic asylums		4,140,000
Police and police stations		7,744,000
Relief of the poor (other than lunatics)		12,322,000
Sewage and sewage disposal: dust removal and house scavenging		8,257,000

LAND RATING

By the **Agricultural Rates Act, 1896,** occupiers of agricultural land in England and Wales were exempted from payment of one-half of the rates otherwise payable on land during the five years ending March 31, 1902. The period has been extended from time to time. In 1910 the Act was renewed for four years. The exemption does not apply in respect of rates to which land is already assessed at only one-half or less than one-half its rateable value, such as the General District Rate in urban districts and the Special Expenses Rate in rural districts; nor does it apply to rates levied in respect of works primarily for the benefit of the land, such as drainage, walls, and embankments; but it operates as regards all the other important rates, including the Poor Rate, County Rate, Borough Rate, etc. **Agricultural land** is "any land used as arable, meadow or pasture land only; cottage gardens exceeding a quarter of an acre, market gardens, nursery grounds, orchards, or allotments, but does not include land occupied together with a house, as a park, gardens other than as aforesaid, pleasure grounds, any land kept or preserved mainly or exclusively for purposes of sport or recreation, or land used as a racecourse." To meet the deficiency thus arising, and to prevent a greater burden being placed on occupiers of other property, **grants-in-aid** are made by the Local Government Board to "spending authorities" **out of the Local Taxation Accounts,** the Inland Revenue Commissioners paying the annual sum required into the Account out of the proceeds of Estate Duty on personal property. The "spending authorities" are the Councils of Counties, Boroughs, and Urban and Rural Districts, Boards of Guardians, and the Receiver of the Metropolitan Police District. The **total rateable value of agricultural land** in England and Wales in July 1896 was £24,565,058; at Lady-day 1914 it was £23,993,000. The assessable value for the purposes of the Agricultural Rates Act was £211,563,000 in 1914. The total amount of the **payments to the Local Taxation Account** of England and Wales in 1914-15 was £6,887,615, made up of £1,107,260 additional beer and spirit duties, £1,804,823 liquor and other licences, £2,394,139 in relief of rates generally, £180,669 in relief of rates on tithe rent charges, and £1,323,640 under Agricultural Rates Acts. (For **Exchequer Grants-in-Aid,** see p. 329.)

Local authorities are required to make annual returns of their receipts and expenditure to the Local Government Board, who in due course publish the information thus obtained in sum-

mary form. [Cd. 7753 of 1915, 3d.] County Councils, County Boroughs and Municipal Boroughs, Urban and Rural District Councils, Poor Law Guardians and Managers of Poor Law School and Sick Asylum Districts, and the Metropolitan Police are the principal local authorities. They number in all 2,540, and spend about 98% of the total amount of public rates raised, and also expend about 99% of the exchequer grants received.

VALUE OF PROPERTY

The **rateable value of property** in England and Wales has risen each year since 1874, when the total was £115,646,631
In 1884 it had risen to 145,527,944
In 1894 to 161,139,575
and in 1914 it was 223,559,000
including £2,065,000, the annual value of non-rateable government property in respect of which contributions in lieu of rates were paid.
